FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the Quarterly Period Ended June 30, 2010 Commission file number 1-5805

JPMORGAN CHASE & CO.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

13-2624428

(I.R.S. Employer
Identification No.)

270 Park Avenue, New York, New York

(Address of principal executive offices)

10017

(Zip Code)

Registrant's telephone number, including area code (212) 270-6000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

☒ Yes ☐ No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

☒ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒

Accelerated filer ☐

Non-accelerated filer ☐

Smaller reporting company ☐

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

☐ Yes ☒ No

Number of shares of common stock outstanding as of July 31, 2010: 3,965,167,399

Consumer net charge-off rate	4.49	5.56	4.60	4.79	4.69	5.03	4.15

- (a) Pre-provision profit is total net revenue less noninterest expense. The Firm believes that this financial measure is useful in assessing the ability of a lending institution to generate income in excess of its provision for credit losses.
- (b) On September 25, 2008, JPMorgan Chase acquired the banking operations of Washington Mutual Bank ("Washington Mutual"). The acquisition resulted in negative goodwill, and accordingly, the Firm recognized an extraordinary gain. A preliminary gain of \$1.9 billion was recognized at December 31, 2008. The final total extraordinary gain that resulted from the Washington Mutual transaction was \$2.0 billion.
- (c) The calculation of second-quarter 2009 earnings per share ("EPS") and net income applicable to common equity includes a one-time, noncash reduction of \$1.1 billion, or \$0.27 per share, resulting from repayment of U.S. Troubled Asset Relief Program ("TARP") preferred capital. Excluding this reduction, the adjusted ROE and ROTCE for the second quarter 2009 would have been 6% and 10%, respectively. The Firm views the adjusted ROE and ROTCE, both non-GAAP financial measures, as meaningful because they enable the comparability to prior periods. For further discussion, see "Explanation and Reconciliation of the Firm's use of Non-GAAP Financial measures" on pages 15-19 of this Form 10-Q and pages 50-52 of JPMorgan Chase's 2009 Annual Report.
- (d) On June 5, 2009, the Firm issued \$5.8 billion, or 163 million shares, of its common stock at \$35.25 per share.
- (e) Share prices shown for JPMorgan Chase's common stock are from the New York Stock Exchange. JPMorgan Chase's common stock is also listed and traded on the London Stock Exchange and the Tokyo Stock Exchange.
- (f) Effective January 1, 2010, the Firm adopted new guidance that amended the accounting for the transfer of financial assets and the consolidation of variable interest entities ("VIEs"). Upon adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, Firm-administered multi-seller conduits and certain other consumer loan securitization entities, primarily mortgage-related, adding \$87.7 billion and \$92.2 billion of assets and liabilities, respectively, and decreasing stockholders' equity and the Tier I capital ratio by \$4.5 billion and 34 basis points, respectively. The reduction to stockholders' equity was driven by the establishment of an allowance for loan losses of \$7.5 billion (pretax) primarily related to receivables held in credit card securitization trusts that were consolidated at the adoption date.
- (g) The Firm uses Tier 1 common capital ("Tier 1 common") along with the other capital measures to assess and monitor its capital position. The Tier 1 common capital ratio ("Tier 1 common ratio") is Tier 1 common divided by risk-weighted assets. For further discussion, see Regulatory capital on pages 82-84 of JPMorgan Chase's 2009 Annual Report.
- (h) Excludes the impact of home lending purchased credit-impaired loans for all periods. Also excludes, as of December 31, 2009, September 30, 2009, and June 30, 2009, the loans held by the Washington Mutual Master Trust ("WMMT"), which were consolidated onto the balance sheet at fair value during the second quarter of 2009; such loans have been fully repaid or charged off as of June 30, 2010. See Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This section of the Form 10-Q provides management's discussion and analysis ("MD&A") of the financial condition and results of operations of JPMorgan Chase. See the Glossary of terms on pages 181-184 for definitions of terms used throughout this Form 10-Q. The MD&A included in this Form 10-Q contains statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. Such statements are based on the current beliefs and expectations of JPMorgan Chase's management and are subject to significant risks and uncertainties. These risks and uncertainties could cause the Firm's actual results to differ materially from those set forth in such forward-looking statements. Certain of such risks and uncertainties are described herein (See Forward-looking Statements on pages 187-188 and Part II, Item 1A: Risk Factors on pages 196-197 of this Form 10-Q), and see Part I, Item 1A, Risk Factors on pages 4-10 of JPMorgan Chase's Annual Report on Form 10-K for the year ended December 31, 2009, filed with the U.S. Securities and Exchange Commission ("2009 Annual Report" or "2009 Form 10-K"), to which reference is hereby made.

INTRODUCTION

JPMorgan Chase & Co., a financial holding company incorporated under Delaware law in 1968, is a leading global financial services firm and one of the largest banking institutions in the United States of America ("U.S."), with \$2.0 trillion in assets, \$171.1 billion in stockholders' equity and operations in more than 60 countries as of June 30, 2010. The Firm is a leader in investment banking, financial services for consumers and businesses, financial transaction processing and asset management. Under the J.P. Morgan and Chase brands, the Firm serves millions of customers in the U.S. and many of the world's most prominent corporate, institutional and government clients.

JPMorgan Chase's principal bank subsidiaries are JPMorgan Chase Bank, National Association ("JPMorgan Chase Bank, N.A."), a national bank with branches in 23 states in the U.S.; and Chase Bank USA, National Association ("Chase Bank USA, N.A."), a national bank that is the Firm's credit card issuing bank. JPMorgan Chase's principal nonbank subsidiary is J.P. Morgan Securities Inc., the Firm's U.S. investment banking firm.

JPMorgan Chase's activities are organized, for management reporting purposes, into six business segments, as well as Corporate/Private Equity. The Firm's wholesale businesses comprise the Investment Bank, Commercial Banking, Treasury & Securities Services and Asset Management segments. The Firm's consumer businesses comprise the Retail Financial Services and Card Services segments. A description of the Firm's business segments, and the products and services they provide to their respective client bases, follows.

Investment Bank

J.P. Morgan is one of the world's leading investment banks, with deep client relationships and broad product capabilities. The clients of the Investment Bank ("IB") are corporations, financial institutions, governments and institutional investors. The Firm offers a full range of investment banking products and services in all major capital markets, including advising on corporate strategy and structure, capital-raising in equity and debt markets, sophisticated risk management, market-making in cash securities and derivative instruments, prime brokerage, and research.

Retail Financial Services

Retail Financial Services ("RFS") serves consumers and businesses through personal service at bank branches and through ATMs, online banking and telephone banking, as well as through auto dealerships and school financial-aid offices. Customers can use more than 5,100 bank branches (third-largest nationally) and 15,600 ATMs (second-largest nationally), as well as online and mobile banking around the clock. More than 26,900 branch salespeople assist customers with checking and savings accounts, mortgages, home equity and business loans, and investments across the 23-state footprint from New York and Florida to California. Consumers also can obtain loans through more than 15,900 auto dealerships and 1,800 schools and universities nationwide.

Card Services

Card Services (“CS”) is one of the nation’s largest credit card issuers, with nearly \$143 billion in loans and nearly 90 million open accounts. In the six months ended June 30, 2010, customers used Chase cards to meet nearly \$148 billion of their spending needs. Through its merchant acquiring business, Chase Paymentech Solutions, CS is a global leader in payment processing and merchant acquiring.

Commercial Banking

Commercial Banking (“CB”) delivers extensive industry knowledge, local expertise and dedicated service to more than 24,000 clients nationally, including corporations, municipalities, financial institutions and not-for-profit entities with annual revenue generally ranging from \$10 million to \$2 billion, and over 30,000 real estate investors/owners. CB partners with the Firm’s other businesses to provide comprehensive solutions, including lending, treasury services, investment banking and asset management to meet its clients’ domestic and international financial needs.

Treasury & Securities Services

Treasury & Securities Services (“TSS”) is a global leader in transaction, investment and information services. TSS is one of the world’s largest cash management providers and a leading global custodian. Treasury Services (“TS”) provides cash management, trade, wholesale card and liquidity products and services to small- and mid-sized companies, multinational corporations, financial institutions and government entities. TS partners with the CB, RFS and Asset Management businesses to serve clients firmwide. As a result, certain TS revenue is included in other segments’ results. Worldwide Securities Services holds, values, clears and services securities, cash and alternative investments for investors and broker-dealers, and manages depositary receipt programs globally.

Asset Management

Asset Management (“AM”), with assets under supervision of \$1.6 trillion, is a global leader in investment and wealth management. AM clients include institutions, retail investors and high-net-worth individuals in every major market throughout the world. AM offers global investment management in equities, fixed income, real estate, hedge funds, private equity and liquidity products, including money-market instruments and bank deposits. AM also provides trust and estate, banking and brokerage services to high-net-worth clients, and retirement services for corporations and individuals. The majority of AM’s client assets are in actively managed portfolios.

EXECUTIVE OVERVIEW

This executive overview of MD&A highlights selected information and may not contain all of the information that is important to readers of this Form 10-Q. For a complete description of events, trends and uncertainties, as well as the capital, liquidity, credit and market risks, and the critical accounting estimates, affecting the Firm and its various lines of business, this Form 10-Q should be read in its entirety.

The U.S. and global economic recovery proceeded in the second quarter of 2010, though the pace of growth slowed, particularly in the U.S. and Asia. Concerns about the outlook for fiscal policy in the developed economies, and the impact that might have on the global economic recovery, led to a decline in equity markets and a rally in the bond markets. However, conditions within the U.S. labor market continued to improve gradually and household spending increased, but at a slow pace. Business spending on equipment and technology rose significantly, supported by the strong financial condition of U.S. businesses; however, investment in nonresidential building projects remained weak. Furthermore, inflation continued to trend lower during the quarter and the Federal Reserve indicated that these economic conditions were likely to warrant an exceptionally low federal funds rate for an extended period.

In response to the recent financial crisis, the U.S. Congress and regulators, as well as legislative and regulatory bodies in other countries, continue to focus on the regulation of financial institutions. On July 21, 2010, the U.S. enacted the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), financial reform legislation that expands the range of financial companies and activities that are subject to federal oversight. This new law also provides more comprehensive regulation of the over-the-counter derivatives market; provides limitations on proprietary trading and the investment activities of banks; imposes limitations on debit card interchange transaction fees; and includes several other provisions that affect the Firm’s business activities. As discussed in the Business outlook section, the full impact of this legislation is unclear, and many challenges and uncertainties remain.

Financial performance of JPMorgan Chase

(a) The calculation of second quarter 2009 EPS includes a one-time, noncash reduction of \$1.1 billion, or \$0.27 per share (\$0.28 per share for the six months ended June 30, 2009), resulting from repayment of TARP preferred capital. For further discussion, see “Impact on diluted EPS of redemption of TARP preferred stock issued to the U.S. Treasury” on page 19 of this Form 10-Q.

(b) The calculation of second quarter 2009 net income applicable to common equity includes a one-time, noncash reduction of \$1.1 billion resulting from repayment of TARP preferred capital. Excluding this reduction, the adjusted ROE was 6% for the second quarter and first six months of 2009. For further discussion of adjusted ROE, see “Explanation and reconciliation of the Firm’s use of non-GAAP financial measures” on pages 15-19 of this Form 10-Q.

Business overview

JPMorgan Chase reported second-quarter 2010 net income of \$4.8 billion, or \$1.09 per share, compared with net income of \$2.7 billion, or \$0.28 per share, in the second quarter of 2009. Current-quarter EPS included a benefit from a \$1.5 billion, or \$0.36 per share, reduction of loan loss reserves, partially offset by a charge of \$550 million, or \$0.14 per share, for the United Kingdom (“U.K.”) Bank Payroll Tax. Prior-year EPS reflected a one-time, noncash reduction in net income applicable to common stockholders of \$1.1 billion, or \$0.27 per share, resulting from repayment of TARP preferred capital. ROE for the quarter was 12%, compared with 3% in the prior year.

The increase in earnings from the second quarter of 2009 was driven by a significantly lower provision for credit losses, partially offset by lower net revenue and higher noninterest expense. The decline in net revenue was driven by lower principal transactions revenue, reflecting lower trading results, and lower investment banking fees, partially offset by higher securities gains. The lower provision for credit losses reflected improvements in both the consumer and wholesale provisions. The consumer provision reflected a reduction in the allowance for credit losses as a result of improved delinquency trends and reduced net charge-offs. The wholesale provision was a benefit in the second

[Table of Contents](#)

quarter of 2010, compared with an expense in the second quarter of 2009. Noninterest expense in the second quarter of 2010 included the impact of the U.K. Bank Payroll Tax on certain compensation awarded from December 9, 2009, to April 5, 2010, to relevant banking employees, and included higher litigation expense. JPMorgan Chase maintained very high liquidity, with a deposit-to-loan ratio of 127%, and generated additional capital, ending the quarter with a strong Tier 1 common ratio of 9.6%.

Credit trends continued to improve during the second quarter; however, the levels of charge-offs and delinquencies in the consumer-lending businesses remained extremely high. The wholesale businesses experienced reduced credit costs, reflecting a reduction in the allowance for credit losses mainly due to net repayments, loan sales, refinements to credit loss estimates, and improvement in the credit quality of the commercial and industrial portfolio. Total firmwide credit reserves fell to \$36.7 billion, as loan balances remained flat and credit costs declined, resulting in a ratio of firmwide reserves to total loans (excluding purchased credit-impaired loans) of 5.3%.

Net income for the first six months of 2010 was \$8.1 billion, or \$1.83 per share, compared with \$4.9 billion, or \$0.68 per share, in the first half of 2009. The increase in earnings from the comparable 2009 six-month period was driven by a lower provision for credit losses and higher net revenue, partially offset by higher noninterest expense. The lower provision for credit losses and the higher noninterest expense reflected the same factors as those that drove the second quarter 2010 results. The higher net revenue reflected solid markets revenue in IB and elevated levels of securities gains from the investment portfolio in Corporate. Prior-year EPS reflected a one-time, noncash reduction in net income applicable to common stockholders of \$1.1 billion, or \$0.28 per share, resulting from repayment of TARP preferred capital.

JPMorgan Chase continued to support the economic recovery by assisting customers, providing sound lending and continuing its efforts to prevent foreclosure. The Firm loaned or raised capital for its clients of nearly \$700 billion during the first half of 2010, and its small-business originations were up 37%. The Firm has offered 880,000 mortgage modifications and has approved 245,000 since the beginning of 2009. Of these, nearly 193,000 have achieved permanent modification as of June 30, 2010.

The discussion that follows highlights the current-quarter performance of each business segment, compared with the prior-year quarter. Managed basis starts with the reported U.S. GAAP results and, for each line of business and the Firm as a whole, includes certain reclassifications to present total net revenue on a tax-equivalent basis. Effective January 1, 2010, the Firm adopted new accounting guidance that required it to consolidate its Firm-sponsored credit card securitization trusts; as a result, reported and managed basis relating to credit card securitizations are equivalent for periods beginning after January 1, 2010. Prior to the adoption of the new accounting guidance, in 2009 and all other prior periods, the U.S. GAAP results for CS and the Firm were also adjusted for certain reclassifications that assumed credit card loans that had been securitized and sold by CS remained on the Consolidated Balance Sheets. These adjustments had no impact on net income as reported by the Firm as a whole or by the lines of business. For more information about managed basis, as well as other non-GAAP financial measures used by management to evaluate the performance of each line of business, see pages 15-19 of this Form 10-Q.

Investment Bank net income decreased, reflecting lower net revenue and higher noninterest expense, predominantly offset by a benefit from the provision for credit losses. The decrease in net revenue was driven by a decline in Fixed Income Markets revenue, largely reflecting lower results in credit markets, rates and commodities. Investment banking fees also decreased, driven by lower levels of equity underwriting, debt underwriting and advisory fees. Partially offsetting the revenue decline was an increase in Equity Markets revenue, reflecting solid client revenue. The provision for credit losses was a benefit in the second quarter of 2010, compared with an expense in the second quarter of 2009, and reflected a reduction in the allowance for loan losses, largely related to net repayments and loan sales. Noninterest expense in the second quarter of 2010 included the impact of the U.K. Bank Payroll Tax.

Retail Financial Services net income increased significantly from the prior year driven by a lower provision for credit losses. Net revenue decreased, driven by lower loan and deposit balances and declining deposit-related fees. These decreases were predominantly offset by a shift to wider-spread deposit products, and growth in mortgage fees and related income, debit card income and auto operating lease income. The provision for credit losses decreased from the prior year and reflected improved delinquency trends and reduced net charge-offs. Noninterest expense increased from the prior year, driven by higher default-related expense and sales force increases, partially offset by a decrease in foreclosed asset expense.

Card Services reported net income compared with a net loss in the prior year, as a lower provision for credit losses was partially offset by lower net revenue. The decrease in net revenue was driven by a decline in net interest income, reflecting lower average loan balances, the impact of legislative changes and a decreased level of fees. These decreases

[Table of Contents](#)

were partially offset by lower revenue reversals associated with lower charge-offs and a prior-year write-down of securitization interests. The provision for credit losses decreased from the prior year, reflecting reduced net charge-offs and lower estimated losses, primarily related to improved delinquency trends and lower loan balances. Noninterest expense increased due to higher marketing expense.

Commercial Banking net income increased from the prior year, driven by a reduction in the provision for credit losses. Net revenue was relatively flat from the prior year, as growth in liability balances, wider loan spreads, gains on sales of loans and other real estate owned, and higher lending-related fees were predominantly offset by spread compression on liability products and lower loan balances. The provision for credit losses was a benefit in the second quarter of 2010 compared with an expense in the second quarter of 2009 and included a reduction to the allowance for credit losses, mainly due to refinements to credit loss estimates and improvement in the credit quality of the commercial and industrial portfolio. Noninterest expense was relatively flat compared with the prior year.

Treasury and Securities Services net income decreased from the prior year, driven by lower net revenue and higher noninterest expense. Worldwide Securities Services net revenue was relatively flat, as lower spreads in securities lending and the impact of lower volatility on foreign exchange were offset by higher market levels and net inflows of assets under custody. Similarly, TS net revenue was relatively flat, as lower deposit spreads were offset by higher trade loan and card product volumes. Noninterest expense for TSS increased, driven by higher performance-based compensation and continued investment in new product platforms, primarily related to international expansion.

Asset Management net income increased from the prior year, as higher net revenue and a lower provision for credit losses were partially offset by higher noninterest expense. Net revenue increased, due to the effects of higher market levels, net inflows to products with higher margins and higher performance fees; partially offset by lower quarterly valuations of seed capital investments and lower net interest income due to narrower deposit spreads, largely offset by higher deposit balances. The increase in noninterest expense was driven by higher headcount.

Corporate/Private Equity net income decreased from the prior year, driven by lower net revenue and higher noninterest expense. Although lower than in the prior year, net revenue included elevated levels of securities gains from the repositioning of the investment portfolio and elevated levels of net interest income from the size of the investment portfolio. Net revenue also included modest private equity gains. Noninterest expense rose, largely due to higher litigation expense.

Business outlook

The following forward-looking statements are based on the current beliefs and expectations of JPMorgan Chase's management and are subject to significant risks and uncertainties. These risks and uncertainties could cause the Firm's actual results to differ materially from those set forth in such forward-looking statements.

JPMorgan Chase's outlook for the third quarter of 2010 should be viewed against the backdrop of the global and U.S. economies, financial markets activity, the geopolitical environment, the competitive environment and client activity levels. Each of these linked factors will affect the performance of the Firm and its lines of business. Accordingly, the Firm continues to monitor closely U.S. and international economies and political environments.

As mentioned above, the Dodd-Frank Act was signed into law on July 21, 2010. There are a number of positive aspects of this new legislation, including systemic risk oversight and resolution authority. However, with hundreds of implementing rules to be written, there remain many challenges and uncertainties. The Firm continues to be committed to helping ensure that the reforms are implemented in a way that protects consumers and the competitiveness of the U.S. financial system, while ensuring the flow of safe and sound credit.

In addition to this legislation, any further legislation or regulations that are adopted in the U.S. or in other countries could limit or restrict the Firm's operations, impose additional costs on the Firm in order to comply with such new laws or regulations, or significantly and adversely affect the revenue of certain lines of business.

In the Retail Banking business within RFS, management expects continued strong revenue over the next several quarters, despite continued economic pressure on consumers and consumer spending levels. The Firm has already made changes consistent with and, in certain respects, beyond the requirements of the newly-enacted legislation in its policies relating to non-sufficient funds and overdraft fees. Management has refined its estimate of the cost of these changes to the business based on its most recent assessment of customer behavior and now estimates that Retail Banking net income may be reduced, on an annualized basis, by approximately \$700 million by the fourth quarter of 2010, an increase from management's prior estimate of approximately \$500 million. Results in the second quarter of 2010 reflect approximately 50% of the estimated quarterly impact of this reduction in net income.

In the Mortgage Banking & Other Consumer Lending business within RFS, management expects revenue to continue to be negatively affected by continued elevated levels of repurchases of mortgages previously sold to, for example, U.S. government-sponsored entities. In the Real Estate Portfolios business within RFS, management believes that, at the current rate

[Table of Contents](#)

of delinquencies and loss severity, quarterly net charge-offs could be approximately \$1.0 billion for the home equity portfolio, \$400 million for the prime mortgage portfolio and \$400 million for the subprime mortgage portfolio over the next several quarters. Given current origination and production levels, combined with management's current estimate of portfolio runoff levels, the residential real estate portfolio is expected to decline by approximately 10% to 15% annually for the foreseeable future. Based on management's preliminary estimate, the effect of such a reduction in the residential real estate portfolio is expected to reduce the portfolio's 2010 net interest income up to \$1.0 billion from the 2009 level, excluding any impact from further changes in the interest rate environment.

Also, in RFS, management expects noninterest expense to remain modestly above 2009 levels, reflecting investments in new branch builds and sales force hires, as well as continued elevated servicing-, default- and foreclosed asset-related costs.

In CS, management expects full-year average outstandings in 2010 to decline by approximately 15% from 2009 levels, possibly to approximately \$140 billion of average outstandings by the end of the fourth quarter of 2010, due to runoff of both the Washington Mutual portfolio and lower-yielding promotional balances. In addition, management estimates that CS net income may be reduced, on an annualized basis, by approximately \$750 million as a result of the impact of the Credit Card Act of 2009, including the recent regulatory guidance defining reasonable and proportional fees. Results in the second quarter of 2010 reflect approximately 25% of the estimated quarterly impact of this reduction in net income. The net charge-off rate for CS (excluding the Washington Mutual credit card portfolio) is anticipated to continue to improve if current delinquency trends continue and could be approximately 8.5% in the third quarter of 2010; however, results will depend on the economic environment and any resulting reserve actions.

While some normalization of the financial markets occurred during the second quarter of 2010 and consumer-lending net charge-offs and delinquencies have declined as noted above, the consumer credit portfolio remains under stress. Further declines in U.S. housing prices and increases in the unemployment rate remain possible; if this were to occur, it would adversely affect the Firm's results.

In IB, TSS and AM, revenue will be affected by market levels, volumes and volatility, which will influence client flows and assets under management, supervision and custody. In addition, IB and CB results will continue to be affected by the credit environment, which will influence levels of charge-offs, repayments and provision for credit losses.

In Private Equity (within the Corporate/Private Equity segment), earnings will likely continue to be volatile and be influenced by capital markets activity, market levels, the performance of the broader economy and investment-specific issues. Corporate's net interest income levels and securities gains will generally trend with the size and duration of the investment securities portfolio. Corporate net income (excluding Private Equity, merger-related items and any significant nonrecurring items) is anticipated to trend toward a level of approximately \$300 million per quarter.

The Firm's second-quarter results reflected lower net interest margin, compared with the prior quarter. Management expects modest continued downward pressure on net interest margin in the third quarter of 2010, primarily resulting from continued repositioning of the investment securities portfolio in Corporate, runoff of loans with higher contractual interest rates in the Real Estate Portfolios and CS businesses, and the impact of the Card Act legislation on CS.

Management and the Firm's Board of Directors continuously evaluate alternatives to deploy the Firm's strong capital base in ways that will enhance shareholder value. Such alternatives could include the repurchase of common stock, increasing the common stock dividend and pursuing alternative investment opportunities. The Firm resumed its repurchases of common stock beginning in the second quarter under its pre-existing Board authorization. The Firm's current share repurchase activity is intended to offset share count increases resulting from employee equity awards and is consistent with the Firm's goal of maintaining an appropriate share count. The aggregate amount and timing of future repurchases will depend, among other factors, on market conditions and management's judgment regarding economic conditions, the Firm's earnings outlook, the need to maintain adequate capital levels (in light of business needs and regulatory requirements) and alternative investment opportunities. With regard to any decision by the Firm's Board of Directors concerning any increase in the level of the common stock dividend, their determination will be subject to their judgment that the likelihood of another severe economic downturn has sufficiently diminished; that there is evidence of sustained underlying growth in employment for at least several months; that overall business performance and credit have stabilized or improved; and that such action is warranted, taking into consideration, among other factors, the Firm's earnings outlook, the need to maintain adequate capital levels (in light of business needs and regulatory requirements), alternative investment opportunities and appropriate dividend payout ratios. Ultimately, the Board would seek to return to the Firm's historical dividend ratio of approximately 30% to 40% of normalized earnings over time, though it would consider moving to that level in stages.

CONSOLIDATED RESULTS OF OPERATIONS

This section provides a comparative discussion of JPMorgan Chase's Consolidated Results of Operations on a reported basis. Factors that relate primarily to a single business segment are discussed in more detail within that business segment. For a discussion of the Critical Accounting Estimates Used by the Firm that affect the Consolidated Results of Operations, see pages 100-102 of this Form 10-Q and pages 127-131 of JPMorgan Chase's 2009 Annual Report.

Revenue

(in millions)	Three months ended June 30,			Six months ended June 30,		
	2010	2009	Change	2010	2009	Change
Investment banking fees	\$ 1,421	\$ 2,106	(33)%	\$ 2,882	\$ 3,492	(17)%
Principal transactions	2,090	3,097	(33)	6,638	5,098	30
Lending- and deposit-related fees	1,586	1,766	(10)	3,232	3,454	(6)
Asset management, administration and commissions	3,349	3,124	7	6,614	6,021	10
Securities gains	1,000	347	188	1,610	545	195
Mortgage fees and related income	888	784	13	1,546	2,385	(35)
Credit card income	1,495	1,719	(13)	2,856	3,556	(20)
Other income	585	10	NM	997	60	NM
Noninterest revenue	12,414	12,953	(4)	26,375	24,611	7
Net interest income	12,687	12,670	—	26,397	26,037	1
Total net revenue	\$25,101	\$25,623	(2)%	\$52,772	\$50,648	4%

Total net revenue for the second quarter of 2010 was \$25.1 billion, down by \$522 million, or 2%, from the second quarter of 2009. Total net revenue for the first six months of 2010 was \$52.8 billion, up by \$2.1 billion, or 4%, from the prior year. The decrease from the prior-year quarter was driven by lower principal transactions revenue, reflecting lower trading results, and lower investment banking fees, partially offset by higher securities gains and other income. The increase from the first six months of 2009 was driven by higher principal transactions revenue, reflecting higher trading revenue and private equity gains (compared with private equity losses in the prior year) in Corporate/Private Equity; the absence of mark-to-market losses on hedges of retained loans in IB; higher securities gains in Corporate; and higher other income. These increases were partially offset by lower mortgage fees and related income in RFS and lower investment banking fees.

Investment banking fees for the second quarter and first six months of 2010 decreased from the comparable periods of 2009, predominantly reflecting a decline from the record level of equity underwriting fees last year and lower advisory fees. Debt underwriting fees also contributed to the decline in the second quarter of 2010; however, for the first six months of 2010, debt underwriting fees increased compared with the prior year. Overall industry-wide volumes across bonds and equity were lower in the second quarter and first six months of 2010 compared with the respective periods in 2009. For additional information on investment banking fees, which are primarily recorded in IB, see IB segment results on pages 21-24 of this Form 10-Q.

Principal transactions revenue, which consists of revenue from the Firm's trading and private equity investing activities, decreased from the second quarter of 2009, reflecting lower results in Corporate and lower fixed income revenue in IB, largely reflecting weaker results in credit markets, rates and commodities. The decrease was offset partially by gains from the widening of the Firm's credit spreads on certain structured liabilities in the IB compared with losses in the prior year. Trading revenue increased for the first six months of 2010, primarily due to the absence of mark-to-market losses on hedges of retained loans in IB compared with the prior year. This increase was offset partially by lower fixed income revenue in IB, largely reflecting weaker results in rates, credit markets and commodities. Private equity gains in both the second quarter and first six months of 2010 improved from the losses incurred in the comparable 2009 periods. For additional information on principal transactions revenue, see IB and Corporate/Private Equity segment results on pages 21-24 and 51-53, respectively, and Note 3 on pages 110-124 of this Form 10-Q.

Lending- and deposit-related fees for the second quarter and first six months of 2010 decreased from the prior-year periods, reflecting declining deposit-related fees and lower deposit balances in RFS, offset partially by higher lending-related service fees in IB and CB. For additional information on lending- and deposit-related fees, which are mostly recorded in RFS, TSS and CB, see the RFS segment results on pages 25-35, the TSS segment results on pages 44-46 and the CB segment results on pages 41-43 of this Form 10-Q.

Asset management, administration and commissions revenue for the second quarter and first six months of 2010 rose from the comparable periods of 2009. The increase was driven by higher asset management fees in AM, which reflected the effect of higher market levels, higher placement fees, net inflows to products with higher margins, and higher performance fees. Also contributing to the increase was higher administration fees in TSS, resulting from the effect of

[Table of Contents](#)

higher market levels and net inflows of assets under custody. For additional information on these fees and commissions, see the segment discussions for AM on pages 47-51 and TSS on pages 44-46 of this Form 10-Q.

Securities gains increased from the second quarter and first six months of 2009, due to continued repositioning of the Corporate investment portfolio in connection with managing the Firm's structural interest rate risk. The second quarter of 2009 included a \$241 million gain on the sale of MasterCard shares. For additional information on securities gains, which are mostly recorded in the Firm's Corporate business, and Corporate's investment securities portfolio, see the Corporate/Private Equity segment discussion on pages 51-53 of this Form 10-Q.

Mortgage fees and related income increased from the second quarter of 2009, due to higher net mortgage servicing revenue, predominantly reflecting higher mortgage servicing rights ("MSR") risk management results. Partially offsetting this increase was lower production revenue, predominantly reflecting higher repurchase losses. Mortgage fees and related income decreased from the first six months of 2009 due to lower production revenue, reflecting higher repurchase losses and, to a lesser extent, lower net mortgage servicing revenue, as lower MSR risk management results were offset partially by higher operating revenue. For additional information on mortgage fees and related income, which is recorded primarily in RFS, see RFS's Mortgage Banking & Other Consumer Lending discussion on pages 29-32 of this Form 10-Q.

Credit card income decreased from the second quarter and first six months of 2009, due predominantly to the impact of the new consolidation guidance related to VIEs, effective January 1, 2010, that required the Firm to consolidate the assets and liabilities of its Firm-sponsored credit card securitization trusts. Adoption of the new guidance resulted in the elimination of all servicing fees received from Firm-sponsored credit card securitization trusts (offset by a respective increase in net interest income and the provision for loan losses, and elimination of securitization income/losses in other income). For a more detailed discussion of the impact of the adoption of the new consolidation guidance on the Consolidated Statements of Income, see Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-19 of this Form 10-Q. For additional information on credit card income, see the CS segment results on pages 36-40 of this Form 10-Q.

Other income increased in the second quarter and first six months of 2010 compared with the prior-year periods, due largely to the absence of the write-down of securitization interests in 2010, compared with losses of \$268 million and \$448 million during the second quarter and first half of 2009, respectively. Higher auto operating lease income in RFS also contributed to the increase in other income.

Net interest income for the second quarter of 2010 was relatively flat compared with the prior-year quarter, as the impact of the adoption of the new consolidation guidance related to VIEs (which increased net interest income by approximately \$1.4 billion) offset the decline in loan and deposit balances. The Firm's interest-earning assets for the second quarter of 2010 were \$1.7 trillion, and the net yield on those assets, on a fully taxable-equivalent ("FTE") basis, was 3.06%, a decrease of one basis point from 2009. Compared with the first quarter of 2010, the net yield on interest-earning assets declined by 26 basis points, driven by lower yields on loans, primarily in CS and RFS, lower credit card outstandings, and lower yields on securities resulting from investment portfolio repositioning. Net interest income for the first six months of 2010 increased slightly from the prior-year period, driven by the impact of the new consolidation guidance related to VIEs which increased net interest income by approximately \$3.2 billion, mainly as a result of the consolidation of Firm-sponsored credit card securitization trusts. Excluding the impact of the adoption of the new accounting guidance, net interest income decreased — driven by lower average loan balances, primarily in CS, RFS and IB — and lower yields on credit card receivables, reflecting the impact of legislative changes. The Firm's interest-earning assets for the first six months of 2010 were \$1.7 trillion, and the net yield on those assets, on a FTE basis, was 3.19%, an increase of one basis point from 2009. For a more detailed discussion of the impact of the adoption of the new consolidation guidance related to VIEs on the Consolidated Statements of Income, see Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-19 of this Form 10-Q.

Provision for credit losses (in millions)	Three months ended June 30,			Six months ended June 30,		
	2010	2009	Change	2010	2009	Change
Wholesale	\$ (572)	\$ 1,244	NM	\$ (808)	\$ 2,774	NM
Consumer	3,935	6,787	(42)%	11,181	13,853	(19)%
Total provision for credit losses	\$ 3,363	\$ 8,031	(58)%	\$10,373	\$16,627	(38)%

Table of Contents

The provision for credit losses decreased from the second quarter and first six months of 2009. The decrease in the wholesale provision in both 2010 periods reflected a reduction in the allowance for credit losses, mainly due to net repayments and loan sales in IB; and refinements to credit loss estimates and improvement in the credit quality of the commercial and industrial portfolio in CB. The decrease in the consumer provision for both 2010 periods reflected improved delinquency trends and reduced net charge-offs across most consumer portfolios; it included reductions in the allowance for loan losses in CS of \$1.5 billion and \$2.5 billion in the second quarter and first six months of 2010, respectively (compared with additions of \$250 million and \$1.4 billion in the comparable 2009 periods). The first six months of 2010 also included a \$1.2 billion addition to the allowance for loan losses in RFS, related to further estimated deterioration in the Washington Mutual prime and option adjustable-rate mortgage ("ARM") purchased credit-impaired portfolios. For a more detailed discussion of the loan portfolio and the allowance for credit losses, see the segment discussions for RFS on pages 25-35, CS on pages 36-40, IB on pages 21-24 and CB on pages 41-43, and the Allowance for Credit Losses section on pages 91-94 of this Form 10-Q.

Noninterest expense

The following table presents the components of noninterest expense.

(in millions)	Three months ended June 30,			Six months ended June 30,		
	2010	2009	Change	2010	2009	Change
Compensation expense ^(a)	\$ 7,616	\$ 6,917	10%	\$14,892	\$14,505	3%
Noncompensation expense:						
Occupancy	883	914	(3)	1,752	1,799	(3)
Technology, communications and equipment	1,165	1,156	1	2,302	2,302	—
Professional and outside services	1,685	1,518	11	3,260	3,033	7
Marketing	628	417	51	1,211	801	51
Other ^{(b)(c)(d)}	2,419	2,190	10	6,860	3,565	92
Amortization of intangibles	235	265	(11)	478	540	(11)
Total noncompensation expense	7,015	6,460	9	15,863	12,040	32
Merger costs	—	143	NM	—	348	NM
Total noninterest expense	\$14,631	\$13,520	8%	\$30,755	\$26,893	14%

(a) The second quarter and first six months of 2010 included a tax expense related to the U.K. Bank Payroll Tax on certain compensation awarded from December 9, 2009, to April 5, 2010, to relevant banking employees.

(b) Includes litigation expense of \$792 million and \$3.7 billion for the three and six months ended June 30, 2010, compared with \$14 million and a net benefit of \$256 million for the three and six months ended June 30, 2009, respectively.

(c) Includes foreclosed property expense of \$244 million and \$547 million for the three and six months ended June 30, 2010, respectively, compared with \$294 million and \$619 million for the three and six months ended June 30, 2009, respectively. For additional information regarding foreclosed property, see Note 13 on page 196 of JPMorgan Chase's 2009 Annual Report.

(d) The second quarter of 2009 included a \$675 million Federal Deposit Insurance Corporation ("FDIC") special assessment.

Total noninterest expense for the second quarter of 2010 was \$14.6 billion, up by \$1.1 billion, or 8%, from the second quarter of 2009. For the first six months of 2010, total noninterest expense was \$30.8 billion, up by \$3.9 billion, or 14%, from the comparable 2009 period. The increase for both periods was driven by higher noncompensation expense, predominantly due to significant additions to litigation reserves; and higher compensation expense, reflecting a payroll tax expense predominantly in IB, related to the U.K. Bank Payroll Tax on certain compensation awarded from December 9, 2009, to April 5, 2010, to relevant banking employees. These increases were partially offset by lower performance-based incentives, and by the absence of a \$675 million FDIC special assessment recognized in the second quarter of 2009.

Compensation expense in the second quarter and first six months of 2010 increased compared with the prior-year periods, due to the impact of the U.K. Bank Payroll Tax described above; ongoing investments in the businesses, including sales force increases in RFS; and higher performance-based compensation expense in several businesses. This was offset partially by lower performance-based compensation expense in IB.

Noncompensation expense increased for the second quarter and first six months of 2010 compared with the prior-year periods, due predominantly to significant additions to litigation reserves; higher marketing expense in CS; and higher brokerage, clearing and exchange transaction processing expense in IB. The increase for both periods was partially offset by the absence of a \$675 million FDIC special assessment recognized in the second quarter of 2009.

For a discussion of amortization of intangibles, refer to Note 16 on pages 166-167 of this Form 10-Q.

[Table of Contents](#)

There were no merger costs recorded in the second quarter or first six months of 2010. Merger costs of \$143 million and \$348 million were recorded in the second quarter and first six months of 2009, respectively. For additional information on merger costs, refer to Note 10 on page 139 of this Form 10-Q.

Income tax expense

(in millions, except rate)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Income before income tax expense	\$ 7,107	\$ 4,072	\$ 11,644	\$ 7,128
Income tax expense	2,312	1,351	3,523	2,266
Effective tax rate	32.5%	33.2%	30.3%	31.8%

The decrease in the effective tax rate for the second quarter and first six months of 2010 compared with the prior-year periods was primarily the result of lower state and local income taxes, as well as tax benefits recognized upon the resolution of tax audits in 2010. The decrease was partially offset by the impact of higher reported pretax income for 2010. For additional information on income taxes, see Critical Accounting Estimates Used by the Firm on pages 100-102 of this Form 10-Q.

EXPLANATION AND RECONCILIATION OF THE FIRM'S USE OF NON-GAAP FINANCIAL MEASURES

The Firm prepares its consolidated financial statements using accounting principles generally accepted in the U.S. ("U.S. GAAP"); these financial statements appear on pages 104-107 of this Form 10-Q. That presentation, which is referred to as "reported basis," provides the reader with an understanding of the Firm's results that can be tracked consistently from year to year and enables a comparison of the Firm's performance with other companies' U.S. GAAP financial statements.

In addition to analyzing the Firm's results on a reported basis, management reviews the Firm's results and the results of the lines of business on a "managed" basis, which is a non-GAAP financial measure. The Firm's definition of managed basis starts with the reported U.S. GAAP results and includes certain reclassifications to present total net revenue for the Firm (and each of the business segments) on a FTE basis. Accordingly, revenue from tax-exempt securities and investments that receive tax credits is presented in the managed results on a basis comparable to taxable securities and investments. This non-GAAP financial measure allows management to assess the comparability of revenue arising from both taxable and tax-exempt sources. The corresponding income tax impact related to these items is recorded within income tax expense. These adjustments have no impact on net income as reported by the Firm as a whole or by the lines of business.

Prior to January 1, 2010, the Firm's managed-basis presentation also included certain reclassification adjustments that assumed credit card loans securitized by CS remained on the balance sheet. Effective January 1, 2010, the Firm adopted new accounting guidance that required the Firm to consolidate its Firm-sponsored credit card securitizations trusts. The income, expense and credit costs associated with these securitization activities are now recorded in the 2010 Consolidated Statements of Income in the same classifications that were previously used to report such items on a managed basis. As a result of the consolidation of the credit card securitization trusts, reported and managed basis relating to credit card securitizations are equivalent for periods beginning after January 1, 2010. For additional information on the new accounting guidance, see Note 15 on pages 151-163 of this Form 10-Q.

The presentation in 2009 of CS results on a managed basis assumed that credit card loans that had been securitized and sold in accordance with U.S. GAAP remained on the Consolidated Balance Sheets, and that the earnings on the securitized loans were classified in the same manner as the earnings on retained loans recorded on the Consolidated Balance Sheets. JPMorgan Chase used the concept of managed basis to evaluate the credit performance and overall financial performance of the entire managed credit card portfolio. Operations were funded and decisions were made about allocating resources, such as employees and capital, based on managed financial information. In addition, the same underwriting standards and ongoing risk monitoring are used for both loans on the Consolidated Balance Sheets and securitized loans. Although securitizations result in the sale of credit card receivables to a trust, JPMorgan Chase retains the ongoing customer relationships, as the customers may continue to use their credit cards; accordingly, the customer's credit performance affects both the securitized loans and the loans retained on the Consolidated Balance Sheets. JPMorgan Chase believed that this managed-basis information was useful to investors, as it enabled them to understand both the credit risks associated with the loans reported on the Consolidated Balance Sheets and the Firm's retained interests in securitized loans. For a reconciliation of 2009 reported to managed basis results for CS, see CS segment results on pages 36-40 of this Form 10-Q. For information regarding the securitization process, and loans and residual interests sold and securitized, see Note 15 on pages 151-163 of this Form 10-Q.

Tangible common equity ("TCE") represents common stockholders' equity (i.e., total stockholders' equity less preferred stock) less identifiable intangible assets (other than MSRs) and goodwill, net of related deferred tax liabilities. ROTCE, a non-GAAP financial ratio, measures the Firm's earnings as a percentage of TCE and is, in management's view, a meaningful measure to assess the Firm's use of equity.

Management also uses certain non-GAAP financial measures at the business-segment level, because it believes these other non-GAAP financial measures provide information to investors about the underlying operational performance and trends of the particular business segment and, therefore, facilitate a comparison of the business segment with the performance of its competitors.

(a) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in non-taxable transactions, which are netted against goodwill and other intangibles when calculating TCE.

Impact on ROE of redemption of TARP preferred stock issued to the U.S. Treasury

The calculation of second quarter and year-to-date of 2009 net income applicable to common equity includes a one-time, noncash reduction of \$1.1 billion resulting from the repayment of TARP preferred capital. Excluding this reduction ROE would have been 6% for both the second quarter and year-to-date 2009 as disclosed in the table below. The Firm views the adjusted ROE, a non-GAAP financial measure, as meaningful because it increases the comparability to prior periods.

(in millions, except ratios)	Three months ended June 30, 2009		Six months ended June 30, 2009	
	As reported	Excluding the TARP redemption	As reported	Excluding the TARP redemption

Return on common equity	3%	6%	4%	6%

[Table of Contents](#)

Impact on diluted earnings per share of redemption of TARP preferred stock issued to the U.S. Treasury

Net income applicable to common equity for the second quarter and year-to-date 2009 includes a one-time, noncash reduction of approximately \$1.1 billion resulting from the repayment of TARP preferred capital. The following table presents the calculations of the effect on net income applicable to common stockholders for the second quarter and year-to-date 2009 and the \$0.27 and \$0.28 reduction, respectively, to diluted EPS which resulted from the repayment.

(in millions, except per share)	Three months ended June 30, 2009		Six months ended June 30, 2009	
	As reported	Effect of TARP redemption	As reported	Effect of TARP redemption
Diluted earnings per share				
Net income	\$ 2,721	\$ —	\$ 4,862	\$ —

Total weighted average diluted shares outstanding	3,824.1	3,824.1	3,791.4	3,791.4
Net income per share	\$ 0.28	\$ (0.27)	\$ 0.68	\$ (0.28)

Other financial measures

The Firm also discloses the allowance for loan losses to total retained loans, excluding home lending purchased credit-impaired loans and loans held by the WMMT. For a further discussion of this credit metric, see Allowance for Credit Losses on pages 91-94 of this Form 10-Q.

BUSINESS SEGMENT RESULTS

The Firm is managed on a line of business basis. The business segment financial results presented reflect the current organization of JPMorgan Chase. There are six major reportable business segments: the Investment Bank, Retail Financial Services, Card Services, Commercial Banking, Treasury & Securities Services and Asset Management, as well as a Corporate/Private Equity segment. The business segments are determined based on the products and services provided, or the type of customer served, and reflect the manner in which financial information is currently evaluated by management. Results of these lines of business are presented on a managed basis.

Description of business segment reporting methodology

Results of the business segments are intended to reflect each segment as if it were essentially a stand-alone business. The management reporting process that derives business segment results allocates income and expense using market-based methodologies. For a further discussion of those methodologies, see Business Segment Results — Description of business segment reporting methodology on pages 53-54 of JPMorgan Chase's 2009 Annual Report. The Firm continues to assess the assumptions, methodologies and reporting classifications used for segment reporting, and further refinements may be implemented in future periods.

Business segment capital allocation changes

Each business segment is allocated capital by taking into consideration stand-alone peer comparisons, economic risk measures and regulatory capital requirements. The amount of capital assigned to each business is referred to as equity. Effective January 1, 2010, the Firm enhanced its line of business equity framework to better align equity assigned to each line of business with the changes anticipated to occur in the business, and in the competitive and regulatory landscape. Equity was assigned to the lines of business based on the Tier 1 common standard, rather than the Tier 1 capital standard. For a further discussion of the changes, see Capital Management — Line-of-business equity on pages 63-64 of this Form 10-Q.

Segment Results — Managed Basis^(a)

The following table summarizes the business segment results for the periods indicated.

Three months ended June 30, (in millions, except ratios)	Total net revenue			Noninterest expense			Net income/(loss)			Return on equity

(a) Represents reported results on a tax-equivalent basis. The managed basis also assumes that credit card loans in Firm-sponsored credit card securitization trusts remained on the balance sheet for 2009. Firm-sponsored credit card securitizations were consolidated at their carrying values on January 1, 2010, under the new consolidation guidance related to VIEs.

(b) Corporate/Private Equity includes an adjustment to offset IB's inclusion of the credit reimbursement from TSS in total net revenue; TSS reports the reimbursement to IB as a separate line on its income statement (not part of total revenue).

INVESTMENT BANK

For a discussion of the business profile of IB, see pages 55-57 of JPMorgan Chase's 2009 Annual Report and Introduction on page 5 of this Form 10-Q.

- (a) TSS was charged a credit reimbursement related to certain exposures managed within IB credit portfolio on behalf of clients shared with TSS. IB recognizes this credit reimbursement in its credit portfolio business in all other income.
- (b) The decrease in net interest income in the second quarter was primarily due to lower loan balance, lower Prime Services spreads and spread tightening and increased liquidity in rates markets.
- (c) Total net revenue included tax-equivalent adjustments, predominantly due to income tax credits related to affordable housing and alternative energy investments, as well as tax-exempt income from municipal bond investments of \$401 million and \$334 million for the quarters ended June 30, 2010 and 2009, respectively, and \$804 million and \$699 million for year-to-date 2010 and 2009, respectively.
- (d) The compensation expense as a percentage of total net revenue ratio for the second quarter and year-to-date of 2010 excludes payroll tax expense related to the U.K. Bank Payroll Tax on certain compensation awarded from December 31, 2009, to April 5, 2010, to relevant banking employees, which is a non-GAAP financial measure. IB excludes this tax from the ratio because it enables comparability with prior periods. If this tax were included in the ratio for the second quarter and year-to-date of 2010, the ratio would have been 46% and 40%, respectively.

Quarterly results

Net income was \$1.4 billion, down 6% compared with the prior year. These results reflected lower revenue and higher noninterest expense, predominantly offset by a benefit from the provision for credit losses.

Net revenue was \$6.3 billion, compared with \$7.3 billion in the prior year. Investment banking fees decreased by 37% to \$1.4 billion, consisting of equity underwriting fees of \$354 million (down 68%), debt underwriting fees of \$696 million (down 6%) and advisory fees of \$355 million (down 10%). Fixed Income Markets revenue was \$3.6 billion, compared with \$4.9 billion in the prior year, largely reflecting lower results in credit markets, rates and commodities. These declines were offset partially by gains of \$397 million from the widening of the Firm's credit spreads on certain structured liabilities compared to losses of \$773 million in the prior year. Equity Markets revenue was \$1.0 billion, compared with \$708 million in the prior year, reflecting solid client revenue as well as gains of \$191 million from the widening of the Firm's credit spreads on certain structured liabilities compared with losses of \$326 million in the prior year. Credit Portfolio revenue was \$326 million, primarily reflecting net interest income and fees on retained loans.

The provision for credit losses was a benefit of \$325 million, compared with an expense of \$871 million in the prior year. The current-quarter provision reflected a reduction in the allowance for loan losses, largely related to net repayments and loan sales. The allowance for loan losses to end-of-period loans retained was 3.98%, compared with 7.91% in the prior year. The decline in the allowance ratio was due largely to the consolidation of asset-backed commercial paper conduits in accordance with new accounting guidance, effective January 1, 2010. Excluding these balances, the current-quarter allowance coverage ratio was 6.49%. Net charge-offs were \$28 million, compared with \$433 million in the prior year. Nonperforming loans were \$2.3 billion, down by \$1.3 billion from the prior year.

Noninterest expense was \$4.5 billion, compared with \$4.1 billion in the prior year. Current-quarter results included the impact of the U.K. Bank Payroll Tax.

ROE was 14% on \$40.0 billion of average allocated capital.

Year-to-date results

Net income was \$3.9 billion, up 25% compared with the prior year. These results reflect lower net revenue and higher noninterest expense, which was more than offset by a benefit from the provision for credit losses.

Net revenue was \$14.7 billion, compared with \$15.7 billion in prior year. Investment banking fees decreased 21% to \$2.9 billion, consisting of equity underwriting fees of \$767 million (down 46%), advisory fees of \$660 million (down 24%) and debt underwriting fees of \$1.4 billion (up 7%). Fixed Income Markets revenue was \$9.0 billion, compared with \$9.8 billion in the prior year. The decrease reflected lower results in rates, credit markets, and commodities. Equity Markets revenue of \$2.5 billion was flat compared with the prior year, reflecting solid client revenue. Credit Portfolio revenue was \$273 million, primarily reflecting net interest income and fees on retained loans.

The provision for credit losses was a benefit of \$787 million, compared with an expense of \$2.1 billion in the prior year. The current year provision reflected a reduction in the allowance for loan losses, largely related to net repayments and loan sales. Net charge-offs were \$725 million, compared with \$469 million in prior year.

Noninterest expense was \$9.4 billion, compared with \$8.8 billion in prior year, driven by increased litigation reserves, including those for mortgage-related matters, partially offset by lower performance-based compensation. Current year results also included the impact of the U.K. Bank Payroll Tax.

ROE was 19% on \$40.0 billion of average allocated capital.

- (a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon adoption of the new guidance, the Firm consolidated its Firm-administered multi-seller conduits. As a result, \$15.1 billion of related loans were recorded in loans on the Consolidated Balance Sheets.
- (b) Loans retained include credit portfolio loans, leveraged leases and other accrual loans, and exclude loans held-for-sale and loans accounted for at fair value.
- (c) Adjusted assets, a non-GAAP financial measure, equals total assets minus: (1) securities purchased under resale agreements and securities borrowed less securities sold, not yet purchased; (2) assets of consolidated VIEs; (3) cash and securities segregated and on deposit for regulatory and other purposes; (4) goodwill and intangibles; (5) securities received as collateral; and (6) investments purchased under the Asset-Backed Commercial Paper Money Market Mutual Fund Liquidity Facility ("AML Facility"). The amount of adjusted assets is presented to assist the reader.

Table of Contents

in comparing IB's asset and capital levels to other investment banks in the securities industry. Asset-to-equity leverage ratios are commonly used as one measure to assess a company's capital adequacy. IB believes an adjusted asset amount that excludes the assets discussed above, which were considered to have a low risk profile, provides a more meaningful measure of balance sheet leverage in the securities industry.

- (d) Allowance for loan losses of \$617 million and \$1.6 billion were held against these nonperforming loans at June 30, 2010 and 2009, respectively.
- (e) Loans held-for-sale and loans at fair value were excluded when calculating the allowance coverage ratio and net charge-off rate.
- (f) Average value-at-risk ("VaR") was less than the sum of the VaR of the components described above, which is due to portfolio diversification. The diversification effect reflects the fact that the risks were not perfectly correlated. The risk of a portfolio of positions is therefore usually less than the sum of the risks of the positions themselves. For a further discussion of VaR, see pages 95-97 of this Form 10-Q.
- (g) Trading VaR includes predominantly all trading activities in IB, as well as syndicated lending facilities that the Firm intends to distribute; however, particular risk parameters of certain products are not fully captured, for example, correlation risk. Trading VaR does not include the debit valuation adjustments ("DVA") taken on derivative and structured liabilities to reflect the credit quality of the Firm. See VaR discussion on pages 95-97 and the DVA Sensitivity table on page 97 of this Form 10-Q for further details. Trading VaR includes the estimated credit spread sensitivity of certain mortgage products.
- (h) Credit portfolio VaR includes the derivative credit valuation adjustments ("CVA"), hedges of the CVA and mark-to-market ("MTM") hedges of the retained loan portfolio, which were all reported in principal transactions revenue. This VaR does not include the retained loan portfolio.

According to Dealogic, for the first six months of 2010, the Firm was ranked #1 in Global Debt, Equity and Equity-Related; #1 in Global Equity and Equity-Related; #2 in Global Long-Term Debt; #1 in Global Syndicated Loans and #4 in Global Announced M&A based on volume.

According to Dealogic, the Firm was ranked #1 in Investment Banking fees generated for the first six months of 2010, based on revenue.

- (a) Source: Dealogic. Global Investment Banking fees reflects ranking of fees and market share. Remainder of rankings reflects transaction volume rank and market share.
- (b) Global IB fees exclude money market, short-term debt and shelf deals.
- (c) Long-term debt tables include investment-grade, high-yield, supranationals, sovereigns, agencies, covered bonds, asset-backed securities and mortgage-backed securities; and exclude money market, short-term debt, and U.S. municipal securities.
- (d) Equity and equity-related rankings include rights offerings and Chinese A-Shares.
- (e) Global announced M&A is based on transaction value at announcement; all other rankings are based on transaction proceeds, with full credit to each book manager/equal if joint. Because of joint assignments, market share of all participants will add up to more than 100%. M&A for year-to-date 2010 and full-year 2009 reflects the removal of any withdrawn transactions. U.S. announced M&A represents any U.S. involvement ranking.

RETAIL FINANCIAL SERVICES

Retail Financial Services (“RFS”) serves consumers and businesses through personal service at bank branches and through ATMs, online banking and telephone banking, as well as through auto dealerships and school financial-aid offices. Customers can use more than 5,100 bank branches (third-largest nationally) and 15,600 ATMs (second-largest nationally), as well as online and mobile banking around the clock. More than 26,900 branch salespeople assist customers with checking and savings accounts, mortgages, home equity and business loans, and investments across the 23-state footprint from New York and Florida to California. Consumers also can obtain loans through more than 15,900 auto dealerships and 1,800 schools and universities nationwide. Prior to January 1, 2010, RFS was reported as: Retail Banking and Consumer Lending. Commencing January 1, 2010, Consumer Lending for reporting purposes is presented as: (1) Mortgage Banking & Other Consumer Lending, and (2) Real Estate Portfolios. Mortgage Banking & Other Consumer Lending comprises mortgage production and servicing, auto finance, and student and other lending activities. Real Estate Portfolios comprises residential mortgages and home equity loans, including the purchased credit-impaired portfolio acquired in the Washington Mutual transaction. This change is intended solely to provide further clarity around the Real Estate Portfolios. Retail Banking, which includes branch banking and business banking activities, is not affected by these reporting revisions.

Return on common equity	15%	—%		7%	4%	
Overhead ratio	55	51		55	49	
Overhead ratio excluding core deposit intangibles ^(a)	54	50		54	48	

(a) RFS uses the overhead ratio (excluding the amortization of core deposit intangibles (“CDI”)), a non-GAAP financial measure, to evaluate the underlying expense trends of the business. Including CDI amortization expense in the overhead ratio calculation would result in a higher overhead ratio in the earlier years and a lower overhead ratio in later years. This method would therefore result in an improving overhead ratio over time, all things remaining equal. The non-GAAP ratio excludes Retail Banking’s CDI amortization expense related to prior business combination transactions of \$69 million and \$82 million for the quarters ended June 30, 2010 and 2009, respectively, and \$139 million and \$165 million for the six months ended June 30, 2010 and 2009, respectively.

Quarterly results

Net income was \$1.0 billion, compared with \$15 million in the prior year.

Net revenue was \$7.8 billion, a decrease of \$161 million, or 2%, compared with the prior year. Net interest income was \$4.8 billion, down by \$213 million, or 4%, reflecting the impact of lower loan and deposit balances, partially offset by a shift to wider-spread deposit products. Noninterest revenue was \$3.0 billion, relatively flat compared with the prior year, as increased mortgage fees and related income, debit card income and auto operating lease income were offset by declining deposit-related fees.

The provision for credit losses was \$1.7 billion, a decrease of \$2.1 billion from the prior year. Although losses for the mortgage and home equity portfolios continued to be extremely high, the current-quarter provision reflected improved delinquency trends and reduced net charge-offs as compared with the prior period. Additionally, the prior-year provision included an addition to the allowance for loan losses of \$1.2 billion. Home equity net charge-offs were \$796 million (3.32% net charge-off rate), compared with \$1.3 billion (4.61% net charge-off rate) in the prior year. Subprime mortgage net charge-offs were \$282 million (8.63% net charge-off rate), compared with \$410 million (11.50% net charge-off rate). Prime mortgage net charge-offs were \$264 million (1.79% net charge-off rate), compared with \$481 million (3.07% net charge-off rate). The allowance for loan losses to ending loans retained, excluding purchased credit-impaired loans, was 5.26%, compared with 4.41% in the prior year.

Noninterest expense was \$4.3 billion, an increase of \$202 million, or 5%, from the prior year.

Year-to-date results

Net income was \$911 million, compared with \$489 million in the prior year.

Net revenue was \$15.6 billion, a decrease of \$1.2 billion, or 7%, compared with the prior year. Net interest income was \$9.8 billion, down by \$427 million, or 4%, reflecting the impact of lower loan and deposit balances, partially offset by a shift to wider-spread deposit products. Noninterest revenue was \$5.7 billion, a decrease of \$793 million, or 12%, as a decline in mortgage fees and related income and deposit-related fees were partially offset by an increase in debit card income and auto operating lease income.

The provision for credit losses was \$5.4 billion, a decrease of \$2.3 billion from the prior year. Although losses for the mortgage and home equity portfolios continued to be extremely high, the provision reflected improved delinquency trends and reduced net charge-offs as compared with the prior period. Additionally, the current period included an addition to the allowance for loan losses of \$1.2 billion compared with an addition of \$2.9 billion in the prior year. Home equity net charge-offs were \$1.9 billion (3.96% net charge-off rate), compared with \$2.4 billion (4.27% net charge-off rate) in the prior year. Subprime mortgage net charge-offs were \$739 million (11.12% net charge-off rate), compared with \$774 million (10.69% net charge-off rate). Prime mortgage net charge-offs were \$723 million (2.45% net charge-off rate), compared with \$793 million (1.88% net charge-off rate).

Noninterest expense was \$8.5 billion, an increase of \$273 million, or 3%, from the prior year.

- (a) Loans at fair value consist of prime mortgages originated with the intent to sell that are accounted for at fair value and classified as trading assets on the Consolidated Balance Sheets. These loans totaled \$12.2 billion and \$11.3 billion at June 30, 2010 and 2009, respectively. Average balances of these loans totaled \$12.5 billion and \$16.2 billion for the quarters ended June 30, 2010 and 2009, respectively, and \$13.3 billion and \$14.9 billion for the six months ended June 30, 2010 and 2009, respectively.
- (b) Excludes purchased credit-impaired loans that were acquired as part of the Washington Mutual transaction. These loans are accounted for on a pool basis, and the pools are considered to be performing.
- (c) Certain of these loans are classified as trading assets on the Consolidated Balance Sheets.
- (d) At June 30, 2010 and 2009, nonperforming loans and assets exclude: (1) mortgage loans insured by U.S. government agencies of \$10.1 billion and \$4.2 billion, respectively, that are 90 days past due and accruing at the guaranteed reimbursement rate; (2) real estate owned insured by U.S. government agencies of \$1.4 billion and \$508 million, respectively; and (3) student loans that are 90 days past due and still accruing, which are insured by U.S. government agencies under the Federal Family Education Loan Program ("FFELP"), of \$447 million and \$473 million, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally.
- (e) Loans held-for-sale and loans accounted for at fair value were excluded when calculating the allowance coverage ratio and the net charge-off rate.
- (f) Excludes the impact of purchased credit-impaired loans that were acquired as part of the Washington Mutual transaction. These loans were accounted for at fair value on the acquisition date, which incorporated management's estimate, as of that date, of credit losses over the remaining life of the portfolio. An allowance for loan losses of \$2.8 billion was recorded for these loans at June 30, 2010, which has also been excluded from applicable ratios. No allowance for loan losses was recorded for these loans at June 30, 2009. To date, no charge-offs have been recorded for these loans.

RETAIL BANKING

Overhead ratio	60%	57%		60%	58%	
Overhead ratio excluding core deposit intangibles ^(a)	58	55		58	56	

(a) Retail Banking uses the overhead ratio (excluding the amortization of CDI), a non-GAAP financial measure, to evaluate the underlying expense trends of the business. Including CDI amortization expense in the overhead ratio calculation would result in a higher overhead ratio in the earlier years and a lower overhead ratio in later years. This method would therefore result in an improving overhead ratio over time, all things remaining equal. The non-GAAP ratio excludes Retail Banking's CDI amortization expense related to prior business combination transactions of \$69 million and \$82 million for the quarters ended June 30, 2010 and 2009, respectively, and \$139 million and \$165 million for the six months ended June 30, 2010 and 2009, respectively.

Quarterly results

Retail Banking reported net income of \$914 million, a decrease of \$56 million, or 6%, compared with the prior year.

Net revenue was \$4.4 billion, down 3% compared with the prior year. The decrease was driven by declining deposit-related fees and lower deposit balances, largely offset by a shift to wider-spread deposit products and higher debit card income.

The provision for credit losses was \$168 million, compared with \$361 million in the prior year. The prior-year provision reflected an increase in the Business Banking allowance for loan losses. Retail Banking net charge-offs were \$168 million (4.04% net charge-off rate), compared with \$211 million (4.70% net charge-off rate) in the prior year.

Noninterest expense was \$2.6 billion, up 3% compared with the prior year, resulting from sales force increases.

Year-to-date results

Retail Banking reported net income of \$1.8 billion, relatively flat compared with the prior year.

Net revenue was \$8.7 billion, relatively flat compared with the prior year, with declining deposit-related fees and lower deposit balances, offset by a shift to wider-spread deposit products and higher debit card income.

The provision for credit losses was \$359 million, compared with \$686 million in the prior year. The prior-year provision reflected an increase in the Business Banking allowance for loan losses. Retail Banking net charge-offs were \$359 million (4.31% net charge-off rate), compared with \$386 million (4.28% net charge-off rate) in the prior year.

Noninterest expense was \$5.2 billion, relatively flat compared with the prior year.

(a) Losses related to the repurchase of previously-sold loans are recorded as a reduction of production revenue. These losses totaled \$667 million and \$255 million for the quarters ended June 30, 2010 and 2009, respectively, and \$1.1 billion and \$475 million for the six months ended June 30, 2010 and 2009, respectively. The losses resulted in a negative impact on net income of \$388 million and \$157 million for the quarters ended June 30, 2010 and 2009, respectively, and \$640 million and \$292 million for the six months ended June 30, 2010 and 2009, respectively. For further discussion, see Repurchase liability on pages 58-60 and Note 22 on pages 170-174 of this Form 10-Q, and Note 31 on pages 230-234 of JPMorgan Chase's 2009 Annual Report.

Quarterly results

Mortgage Banking & Other Consumer Lending reported net income of \$364 million, an increase of \$129 million, or 55%, from the prior year. The increase was driven by higher noninterest revenue and a lower provision for credit losses, partially offset by higher noninterest expense.

Net revenue of \$2.0 billion was up by \$193 million, or 10%, from the prior year, and includes Mortgage Banking revenue of \$1.2 billion, up by \$62 million, and Other Consumer Lending revenue (comprised of Auto and Student Lending) of \$850 million, up by \$131 million predominantly as a result of higher auto loan and lease balances. Mortgage Banking revenue includes \$212 million of net interest income, \$886 million of mortgage fees and related income and \$100 million of other noninterest revenue. Included in mortgage fees and related income is \$9 million of production revenue, compared with \$284 million in the prior year, reflecting higher repurchase losses in the current year and the impact of write-downs on the mortgage warehouse in the prior year. Repurchase losses were \$667 million, compared with \$255 million in the prior year. Also included is net mortgage servicing revenue of \$877 million, up by \$354 million from the prior year, which is comprised of operating revenue and MSR risk management revenue. Operating revenue of \$566 million was up by \$124 million as the improvement in other changes in MSR asset fair value was partially offset by lower loan servicing revenue as a result of lower third-party loans serviced. MSR risk management results were \$311 million, compared with \$81 million in the prior year.

The provision for credit losses, predominantly related to the student and auto loan portfolios, was \$175 million, compared with \$366 million in the prior year. The prior-year provision reflected an increase in the allowance for loan losses for student and auto loans. Student loan and other net charge-offs were \$150 million (4.04% net charge-off rate), compared with \$101 million (2.79% net charge-off rate) in the prior year. Auto loan net charge-offs were \$58 million (0.49% net charge-off rate), compared with \$146 million (1.36% net charge-off rate) in the prior year.

Noninterest expense was \$1.2 billion, up by \$138 million, or 12%, from the prior year, driven by an increase in default-related expense.

Year-to-date results

Mortgage Banking & Other Consumer Lending reported net income of \$621 million, compared with \$965 million in the prior year. The decrease was driven by lower noninterest revenue and higher noninterest expense, partially offset by a lower provision for credit losses and higher net interest income.

Net revenue of \$4.0 billion was down by \$625 million, or 14%, from the prior year, and includes Mortgage Banking revenue of \$2.2 billion, down by \$955 million, and Other Consumer Lending revenue (comprised of Auto and Student Lending) of \$1.8 billion, up by \$330 million predominantly as a result of higher auto loan and lease balances. Mortgage Banking revenue includes \$428 million of net interest income, \$1.5 billion of mortgage fees and related income and \$191 million of other noninterest revenue. Included in mortgage fees and related income is \$10 million of production revenue, compared with \$765 million in the prior year, reflecting higher repurchase losses in the current year and the impact of write-downs on the mortgage warehouse in the prior year. Repurchase losses were \$1.1 billion, compared with \$475 million in the prior year. Also included is net mortgage servicing revenue of \$1.5 billion, down by \$144 million from the prior year, which is comprised of operating revenue and MSR risk management revenue. Operating revenue of \$1.1 billion was up \$477 million as the improvement in other changes in MSR asset fair value was partially offset by lower loan servicing revenue as a result of lower third-party loans serviced. MSR risk management results were \$463 million, compared with \$1.1 billion in the prior year.

The provision for credit losses, predominantly related to the student and auto loan portfolios, was \$392 million, compared with \$771 million in the prior year. The prior-year provision reflected an increase in the allowance for loan losses for student and auto loans. Student loan and other net charge-offs were \$214 million (2.80% net charge-off rate), compared with \$135 million (1.84% net charge-off rate) in the prior year. Auto loan net charge-offs were \$160 million (0.68% net charge-off rate), compared with \$320 million (1.51% net charge-off rate) in the prior year.

Noninterest expense was \$2.5 billion, up by \$247 million, or 11%, from the prior year, driven by an increase in default-related expense.

- (a) Predominantly represents prime loans repurchased from Government National Mortgage Association ("Ginnie Mae") pools, which are insured by U.S. government agencies. See further discussion of loans repurchased from Ginnie Mae pools in Repurchase liability on pages 58-60 of this Form 10-Q.
- (b) Total average loans owned includes loans held-for-sale of \$1.9 billion and \$2.8 billion for the quarters ended June 30, 2010 and 2009, respectively, and \$2.4 billion and \$2.9 billion for the six months ended June 30, 2010 and 2009, respectively. These amounts are excluded when calculating the net charge-off rate.
- (c) Excludes mortgage loans that are insured by U.S. government agencies of \$10.9 billion and \$5.1 billion at June 30, 2010 and 2009, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally.
- (d) Excludes loans that are 30 days past due and still accruing, which are insured by U.S. government agencies under the FFELP, of \$988 million and \$854 million at June 30, 2010 and 2009, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally.
- (e) At June 30, 2010 and 2009, nonperforming loans and assets exclude: (1) mortgage loans insured by U.S. government agencies of \$10.1 billion and \$4.2 billion, respectively, that are 90 days past due and accruing at the guaranteed reimbursement rate; (2) real estate owned insured by U.S. government agencies of \$1.4 billion and \$508 million, respectively; and (3) student loans that are 90 days past due and still accruing, which are insured by U.S. government agencies under the FFELP, of \$447 million and \$473 million, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally.
- (f) Includes rural housing loans sourced through brokers and correspondents, which are underwritten under U.S. Department of Agriculture guidelines. Prior period amounts have been revised to conform with the current period presentation.
- (g) Loans at fair value consist of prime mortgages originated with the intent to sell that are accounted for at fair value and classified as trading assets on the Consolidated Balance Sheets. Average balances of these loans totaled \$12.5 billion and \$16.2 billion for the quarters ended June 30, 2010 and 2009, respectively, and \$13.3 billion and \$14.9 billion for the six months ended June 30, 2010 and 2009, respectively.
- (h) Losses related to the repurchase of previously-sold loans are recorded as a reduction of production revenue. These losses totaled \$667 million and \$255 million for the quarters ended June 30, 2010 and 2009, respectively, and \$1.1 billion and \$475 million for the six months ended June 30, 2010 and 2009, respectively. For further discussion, see Repurchase liability on pages 58-60 and Note 22 on pages 170-174 of this Form 10-Q, and Note 31 on pages 230-234 of JPMorgan Chase's 2009 Annual Report.
- (i) Represents the ratio of MSR net carrying value (ending) to third-party mortgage loans serviced (ending) divided by the ratio of annualized loan servicing revenue to third-party mortgage loans serviced (average).

Net income/(loss)	\$ (236)	\$(1,190)	80	\$(1,522)	\$(2,309)	34
Overhead ratio	30%	26%		28%	26%	

Quarterly results

Real Estate Portfolios reported a net loss of \$236 million, compared with a net loss of \$1.2 billion in the prior year. The improvement was driven by a lower provision for credit losses, partially offset by lower net interest income.

Net revenue was \$1.4 billion, down by \$228 million, or 14%, from the prior year. The decrease was driven by a decline in net interest income as a result of lower loan balances, reflecting portfolio runoff.

The provision for credit losses was \$1.4 billion, compared with \$3.1 billion in the prior year. The current-quarter provision reflected improved delinquency trends and reduced net charge-offs, while the prior-year provision included an addition to the allowance for loan losses of \$930 million in the home equity and mortgage loan portfolios. (For further detail, see RFS discussion of the provision for credit losses.)

Noninterest expense was \$405 million, down by \$12 million, or 3%, from the prior year, reflecting a decrease in foreclosed asset expense.

Year-to-date results

Real Estate Portfolios reported a net loss of \$1.5 billion, compared with a net loss of \$2.3 billion in the prior year. The improvement was driven by a lower provision for credit losses, partially offset by lower net interest income.

Net revenue was \$2.9 billion, down by \$474 million, or 14%, from the prior year. The decrease was driven by a decline in net interest income as a result of lower loan balances, reflecting portfolio runoff.

The provision for credit losses was \$4.7 billion, compared with \$6.3 billion in the prior year. The provision reflected an addition to the allowance for loan losses for the purchased credit-impaired portfolio of \$1.2 billion as well as impacts of improved delinquency trends and reduced net charge-offs, while the prior-year provision included an addition to the allowance for loan losses of \$2.3 billion in the home equity and mortgage loan portfolios. (For further detail, see RFS discussion of the provision for credit losses.)

Noninterest expense was \$824 million, down by \$47 million, or 5%, from the prior year, reflecting a decrease in foreclosed asset expense.

(a) Purchased credit-impaired loans represent loans acquired in the Washington Mutual transaction for which a deterioration in credit quality occurred between the origination date and JPMorgan Chase's acquisition date. These loans were initially recorded at fair value and accrete interest income over the estimated lives of the loan as long as cash flows are reasonably estimable, even if the underlying loans are contractually past due.

Included within Real Estate Portfolios are purchased credit-impaired loans that the Firm acquired in the Washington Mutual transaction. For purchased credit-impaired loans, the excess of the undiscounted gross cash flows initially expected to be collected over the fair value of the loans at the acquisition date is accreted into interest income at a level rate of return over the expected life of the loans. This is commonly referred to as the "accretable yield." The estimate of gross cash flows expected to be collected is updated each reporting period based on updated assumptions. Probable decreases in expected loan principal cash flows require recognition of an allowance for loan losses; probable and significant increases in expected cash flows would first reverse any previously recorded allowance for loan losses with any remaining increases recognized over time through interest income.

[Table of Contents](#)

The net spread between the purchased credit-impaired loans and the related liabilities should be relatively constant over time, except for any basis risk or other residual interest rate risk that remains and changes in the accretable yield percentage (e.g., extended loan liquidation periods). As of June 30, 2010, the remaining weighted-average life of the purchased credit-impaired loan portfolio is expected to be 6.6 years. For further information, see Note 13, Purchased credit-impaired loans, on pages 149-150 of this Form 10-Q. The loan balances are expected to decline more rapidly in the earlier years as the most troubled loans are liquidated, and more slowly thereafter as the remaining troubled borrowers have limited refinancing opportunities. Similarly, default and servicing expense are expected to be higher in the earlier years and decline over time as liquidations slow down.

To date the impact of the purchased credit-impaired loans on Real Estate Portfolios net income has been modestly negative. This is due to the current net spread of the portfolio, the provision for loan losses recognized subsequent to its acquisition, and the higher level of default and servicing expense associated with the portfolio. Over time, the Firm expects that this portfolio will contribute positively to net income.

(a) Excludes the impact of purchased credit-impaired loans that were acquired as part of the Washington Mutual transaction. These loans were accounted for at fair value on the acquisition date, which incorporated management's estimate, as of that date, of credit losses over the remaining life of the portfolio. An allowance for loan losses of \$2.8 billion was recorded for these loans at June 30, 2010, which has also been excluded from the applicable ratios. No allowance for loan losses was recorded for these loans at June 30, 2009. To date, no charge-offs have been recorded for these loans.

(b) The delinquency rate for purchased credit-impaired loans was 27.91% and 23.37% at June 30, 2010 and 2009, respectively.

(c) Excludes purchased credit-impaired loans that were acquired as part of the Washington Mutual transaction. These loans are accounted for on a pool basis, and the pools are considered to be performing.

CARD SERVICES

For a discussion of the business profile of CS, see pages 64-66 of JPMorgan Chase's 2009 Annual Report and Introduction on page 6 of this Form 10-Q.

Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Prior to the adoption of the new guidance, JPMorgan Chase used the concept of "managed basis" to evaluate the credit performance of its credit card loans, both loans on the balance sheet and loans that had been securitized. Managed results excluded the impact of credit card securitizations on total net revenue, the provision for credit losses, net charge-offs and loan receivables. Securitization did not change reported net income; however, it did affect the classification of items on the Consolidated Statements of Income and Consolidated Balance Sheet. As a result of the consolidation of the securitization trusts, reported and managed basis are equivalent for periods beginning after January 1, 2010. For further information, see Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-19 of this Form 10-Q.

(a) Effective January 1, 2010, the Firm adopted new accounting guidance related to the transfer of financial assets and the consolidation of VIEs. For further details regarding the Firm's application and impact of the new guidance, see Note 15 on pages 151-163 of this Form 10-Q.

NA: Not applicable

Quarterly results

Net income was \$343 million, compared with a net loss of \$672 million in the prior year. The improved results were driven by a lower provision for credit losses, partially offset by lower net revenue.

End-of-period loans were \$143.0 billion, a decrease of \$28.5 billion, or 17%, from the prior year. Average loans were \$146.3 billion, a decrease of \$27.8 billion, or 16%, from the prior year. The declines in both end-of-period and average loans were due to the decline in lower yielding promotional balances and the Washington Mutual portfolio runoff.

Net revenue was \$4.2 billion, a decrease of \$651 million, or 13%, from the prior year. Net interest income was \$3.4 billion, down by \$955 million, or 22%. The decrease was driven by lower average loan balances, the impact of legislative changes and a decreased level of fees. These decreases were offset partially by lower revenue reversals associated with lower charge-offs. Noninterest revenue was \$861 million, an increase of \$304 million, or 55%. The prior year included a write-down of securitization interests.

[Table of Contents](#)

The provision for credit losses was \$2.2 billion, compared with \$4.6 billion in the prior year. The current-quarter provision included a reduction of \$1.5 billion to the allowance for loan losses, reflecting reduced net charge-offs and lower estimated losses primarily related to improved delinquency trends as well as lower loan balances. The prior-year provision included an addition of \$250 million to the allowance for loan losses. The net charge-off rate was 10.20%, up from 10.03% in the prior year. The 30-day delinquency rate was 4.96%, down from 5.86% in the prior year. Excluding the Washington Mutual portfolio, the net charge-off rate was 9.02%, up from 8.97% in the prior year; and the 30-day delinquency rate was 4.48%, down from 5.27% in the prior year.

Noninterest expense was \$1.4 billion, an increase of \$103 million, or 8%, due to higher marketing expense.

Year-to-date results

Net income was \$40 million, compared with a net loss of \$1.2 billion in the prior year. The improved results were driven by a lower provision for credit losses, partially offset by lower net revenue.

Average loans were \$151.0 billion, a decrease of \$27.7 billion, or 16%, from the prior year due to the decline in lower yielding promotional balances and the Washington Mutual portfolio runoff.

Net revenue was \$8.7 billion, a decrease of \$1.3 billion, or 13%, from the prior year. Net interest income was \$7.0 billion, down by \$1.7 billion, or 20%. The decrease was driven by lower average loan balances, a decreased level of fees, and the impact of legislative changes. Noninterest revenue was \$1.6 billion, an increase of \$415 million, or 34%, driven by a prior-year write-down of securitization interests.

The provision for credit losses was \$5.7 billion, compared with \$9.3 billion in the prior year. The current-year provision included a reduction of \$2.5 billion to the allowance for loan losses, reflecting lower estimated losses primarily related to improved delinquency trends as well as lower loan balances. The prior-year provision included an addition of \$1.4 billion to the allowance for loan losses. The net charge-off rate was 10.99%, up from 8.85% in the prior year. Excluding the Washington Mutual portfolio, the net charge-off rate was 9.80%, up from 7.90% in the prior year.

Noninterest expense was \$2.8 billion, an increase of \$159 million, or 6%, due to higher marketing expense.

Credit Card Legislation

In May 2009, the Credit Card Accountability, Responsibility and Disclosure Act of 2009 ("CARD Act") was enacted. Management estimates that the total annualized reduction in net income from the CARD Act, including recent regulatory guidance that defines reasonable and proportional fees, could be approximately \$750 million. Results in the second quarter of 2010 reflect approximately 25% of the estimated quarterly impact of this reduction in net income.

The most significant effects of the CARD Act include: (a) the inability to change the pricing of existing balances; (b) the allocation of customer payments above the minimum payment to the existing balance with the highest annual percentage rate ("APR"); (c) the requirement that customers opt-in in order to receive, for a fee, overlimit protection that permits an authorized transaction over their credit limit; and (d) the requirement that statements must be mailed or delivered not later than 21 days before the payment due date. In addition, certain rules were finalized in June, including those limiting the amount of penalty fees that can be assessed and those that would require CS to review customer accounts for potential interest rate reductions in certain circumstances.

As a result of the CARD Act, CS has implemented certain changes to its business practices to manage its inability to price loans to customers at rates that are commensurate with their risk over time. These changes include: (a) selectively increasing pricing; (b) reducing the volume and duration of low-rate promotional pricing offered to customers; and (c) reducing the amount of credit that is granted to certain new and existing customers.

(a) Revenue from investment banking products sold to CB clients and commercial card fee revenue is included in all other income.

(b) Total net revenue included tax-equivalent adjustments from income tax credits related to equity investments in designated community development entities that provide loans to qualified businesses in low-income communities as well as tax-exempt income from municipal bond activity of \$49 million and \$39 million for the quarters ended June 30, 2010 and 2009, respectively, and \$94 million and \$74 million for year-to-date 2010 and 2009, respectively.

(c) Represents the total revenue related to investment banking products sold to CB clients.

Quarterly results

Net income was \$693 million, an increase of \$325 million, or 88%, from the prior year. The increase was driven by a reduction in the provision for credit losses.

Net revenue was \$1.5 billion, relatively flat compared with the prior year. Net interest income was \$940 million, down by \$55 million, or 6%, driven by spread compression on liability products and lower loan balances, predominantly offset by growth in liability balances and wider loan spreads. Noninterest revenue was \$546 million, an increase of \$88 million, or 19%. The current quarter reflected gains on sales of loans and other real estate owned, and higher lending-related fees, while the prior year reflected markdowns on certain assets held at fair value.

Revenue from Middle Market Banking was \$767 million, a decrease of \$5 million, or 1%, from the prior year. Revenue from Commercial Term Lending was \$237 million, an increase of \$13 million, or 6%. Revenue from Mid-Corporate Banking was \$285 million, a decrease of \$20 million, or 7%. Revenue from Real Estate Banking was \$125 million, an increase of \$5 million, or 4%.

The provision for credit losses was a benefit of \$235 million, compared with an expense of \$312 million in the prior year. The current-quarter provision included a reduction of \$413 million to the allowance for credit losses, mainly due to refinements to credit loss estimates and improvement in the credit quality of the commercial and industrial portfolio. Net charge-offs were \$176 million (0.74% net charge-off rate), compared with \$181 million (0.67% net charge-off rate) in the prior year. Current-quarter net charge-offs were largely related to commercial real estate. The allowance for loan losses to end-of-period loans retained was 2.82%, down from 2.87% in the prior year.

Nonperforming loans were \$3.1 billion, up by \$1.0 billion from the prior year, reflecting increases in nonperforming commercial real estate loans.

Noninterest expense was \$542 million, an increase of \$7 million, relatively flat compared with the prior year.

Year-to-date results

Net income was \$1.1 billion, an increase of \$377 million, or 53%, from the prior year. The increase was driven by a reduction in the provision for credit losses.

Net revenue was \$2.9 billion, relatively flat compared with the prior year. Net interest income was \$1.9 billion down by \$119 million, or 6%, driven by spread compression on liability products and lower loan balances, but largely offset by growth in liability balances and wider loan spreads. Noninterest revenue was \$1.0 billion, an increase of \$166 million, or 19%, from the prior year. The current year reflected gains on sales of loans and other real estate owned, higher lending-related fees and higher investment banking fees, while the prior year reflected markdowns on certain assets held at fair value.

Revenue from Middle Market Banking was \$1.5 billion, relatively flat with the prior year. Revenue from Commercial Term Lending was \$466 million, an increase of \$14 million, or 3%. Mid-Corporate Banking revenue was \$548 million, flat compared with the prior year. Real Estate Banking revenue was \$225 million, a decrease of \$15 million, or 6%.

The provision for credit losses was a benefit of \$21 million, compared with an expense of \$605 million in the prior year. The reduction was mainly due to refinements to credit loss estimates and improvement in the credit quality of the commercial and industrial portfolio. Net charge-offs were \$405 million (0.85% net charge-off rate), compared with \$315 million (0.57% net charge-off rate) in the prior year.

Noninterest expense was \$1.1 billion, relatively flat with the prior year.

(a) IB credit portfolio group manages certain exposures on behalf of clients shared with TSS. TSS reimburses IB for a portion of the total cost of managing the credit portfolio. IB recognizes this credit reimbursement as a component of noninterest revenue.

(b) Loan balances include wholesale overdrafts, commercial card and trade finance loans.

(c) Liability balances include deposits, as well as deposits that are swept to on-balance sheet liabilities (e.g., commercial paper, federal funds purchased, time deposits and securities loaned or sold under repurchase agreements) as part of customer cash management programs.

Quarterly results

Net income was \$292 million, a decrease of \$87 million, or 23%, from the prior year. These results reflected lower net revenue and higher noninterest expense.

Net revenue was \$1.9 billion, a decrease of \$19 million, or 1%, from the prior year. Worldwide Securities Services net revenue was \$955 million, relatively flat compared with the prior year, as lower spreads in securities lending and the impact of lower volatility on foreign exchange were offset by higher market levels and net inflows of assets under custody. Similarly, TS net revenue was \$926 million, relatively flat as lower deposit spreads were offset by higher trade loan and card product volumes.

TSS generated firmwide net revenue of \$2.6 billion, including \$1.7 billion by TS; of that amount, \$926 million was recorded in TS, \$665 million in CB and \$62 million in other lines of business. The remaining \$955 million of firmwide net revenue was recorded in Worldwide Securities Services.

The provision for credit losses was a benefit of \$16 million, compared with a benefit of \$5 million in the prior year.

Noninterest expense was \$1.4 billion, up \$111 million, or 9% from the prior year. The increase was driven by higher performance-based compensation and continued investment in new product platforms, primarily related to international expansion.

Year-to-date results

Net income was \$571 million, a decrease of \$116 million, or 17%, from the prior year. These results reflected lower net revenue and higher noninterest expense.

Net revenue was \$3.6 billion, a decrease of \$84 million, or 2% from the prior year. Worldwide Securities Services net revenue of \$1.8 billion was relatively flat as lower spreads in securities lending, the impact of lower volatility on foreign exchange and lower balances on liability products, were offset by the effects of higher market levels and net inflows of assets under custody. TS net revenue was \$1.8 billion, a decrease of \$57 million, or 3%. The decrease primarily reflected lower deposit spreads, partially offset by higher trade loan and card product volumes.

TSS generated firmwide net revenue of \$5.1 billion, including \$3.2 billion by TS; of that amount, \$1.8 billion was recorded in TS, \$1.3 billion in CB and \$118 million in other lines of business. The remaining \$1.8 billion of net revenue was recorded in Worldwide Securities Services.

The provision for credit losses was a benefit of \$55 million compared with a benefit of \$11 million in the prior year.

Noninterest expense was \$2.7 billion, up \$117 million, or 4%. The increase was driven by higher performance-based compensation as well as continued investment in new product platforms, primarily related to international expansion.

- (a) TSS firmwide revenue includes foreign exchange (“FX”) revenue recorded in TSS and FX revenue associated with TSS customers who are FX customers of IB. However, some of the FX revenue associated with TSS customers who are FX customers of IB is not included in TS and TSS firmwide revenue. The total FX revenue generated was \$175 million and \$191 million for the three months ended June 30, 2010 and 2009, respectively, and \$312 million and \$345 million for the six months ended June 30, 2010 and 2009, respectively.
- (b) Firmwide liability balances include liability balances recorded in CB.
- (c) Overhead ratios have been calculated based on firmwide revenue and TSS and TS expense, respectively, including those allocated to certain other lines of business. FX revenue and expense recorded in IB for TSS-related FX activity are not included in this ratio.
- (d) International electronic funds transfer includes non-U.S. dollar Automated Clearing House (“ACH”) and clearing volume.
- (e) Wholesale cards issued and outstanding include U.S. domestic commercial, stored value, prepaid and government electronic benefit card products.

(a) JPMorgan Securities was formerly known as Bear Stearns Private Client Services prior to January 1, 2010.

Quarterly results

Net income was \$391 million, an increase of \$39 million, or 11%, from the prior year. These results reflected higher net revenue and a lower provision for credit losses, partially offset by higher noninterest expense.

Net revenue was \$2.1 billion, an increase of \$86 million, or 4%, from the prior year. Noninterest revenue was \$1.7 billion, up by \$131 million, or 8%, due to the effects of higher market levels, net inflows to products with higher margins and higher performance fees, partially offset by lower quarterly valuations of seed capital investments. Net interest income was \$369 million, down by \$45 million, or 11%, due to narrower deposit spreads, largely offset by higher deposit balances.

Revenue from the Private Bank was \$695 million, up 9% from the prior year. Revenue from Retail was \$482 million, up 17%. Revenue from Institutional was \$433 million, down 11%. Revenue from Private Wealth Management was \$348 million, up 4%. Revenue from JPMorgan Securities was \$110 million, flat compared with the prior year.

The provision for credit losses was \$5 million, compared with \$59 million in the prior year.

Noninterest expense was \$1.4 billion, an increase of \$51 million, or 4%, from the prior year, reflecting higher headcount.

Year-to-date results

Net income was \$783 million, an increase of \$207 million, or 36%, from the prior year, due to higher net revenue and a lower provision for credit losses, partially offset by higher noninterest expense.

Net revenue was \$4.2 billion, an increase of \$514 million, or 14%, from the prior year. Noninterest revenue was \$3.5 billion, an increase of \$605 million, or 21%, due to the effects of higher market levels, higher placement fees, net inflows to products with higher margins and higher performance fees. Net interest income was \$726 million, down by \$91 million, or 11%, from the prior year, due to narrower deposit spreads, partially offset by higher deposit balances.

Revenue from the Private Bank was \$1.4 billion, up 14% from the prior year. Revenue from Institutional was \$999 million, up 5%. Revenue from Retail was \$897 million, up 35%. Revenue from Private Wealth Management was \$691 million, up 7%. Revenue from JPMorgan Securities was \$219 million, up 7%.

The provision for credit losses was \$40 million, compared with \$92 million in the prior year.

Noninterest expense was \$2.8 billion, an increase of \$195 million, or 7%, from the prior year due to higher performance-based compensation and higher headcount.

Assets under supervision

Assets under supervision were \$1.6 trillion, an increase of \$97 billion, or 6%, from the prior year. Assets under management were \$1.2 trillion, a decrease of \$10 billion, or 1%, due to outflows in liquidity products, predominantly offset by inflows in fixed income and equity products and the effect of higher market levels. Custody, brokerage, administration and deposit balances were \$479 billion, up by \$107 billion, or 29%, due to custody and brokerage inflows and the effect of higher market levels.

(a) Total net revenue included tax-equivalent adjustments, predominantly due to tax-exempt income from municipal bond investments of \$57 million and \$44 million for the quarters ended June 30, 2010 and 2009, respectively, and \$105 million and \$70 million for the six months ended June 30, 2010 and 2009, respectively.

(b) The three and six months ended June 30, 2010, included litigation expense of \$694 million and \$3.0 billion, respectively. The second quarter of 2009 included a \$675 million FDIC special assessment.

(c) The income tax expense in the first quarter of 2010 includes tax benefits recognized upon the resolution of tax audits.

(d) The 2009 periods included merger costs and the extraordinary gain related to the Washington Mutual transaction, as well as items related to the Bear Stearns merger, including merger costs, asset management liquidation costs and Bear Stearns Private Client Services (which was renamed to JPMorgan Securities effective January 2010) broker retention expense.

[Table of Contents](#)

Quarterly results

Net income was \$653 million, compared with net income of \$808 million in the prior year.

Private Equity net income was \$11 million, compared with a net loss of \$27 million in the prior year. Net revenue was \$48 million, an increase of \$49 million, driven by higher private equity gains from more favorable market conditions and underlying performance on certain portfolio investments. Noninterest expense was \$32 million, a decrease of \$10 million.

Corporate net income was \$642 million, compared with \$835 million in the prior year. Net revenue was \$1.8 billion, a decrease of \$464 million, reflecting lower trading revenue primarily from the absence of spread tightening and increases in asset prices experienced in the second quarter of 2009; the decrease was offset partially by higher securities gains, from the repositioning of the investment portfolio. Noninterest expense was \$1.0 billion, up from \$822 million in the prior year, largely due to higher litigation expense.

Year-to-date results

Net income was \$881 million, compared with \$546 million in the prior year.

Private Equity net income was \$66 million, compared with a net loss of \$307 million in the prior year. Net revenue was \$163 million, an increase of \$613 million, driven by higher private equity gains from more favorable market conditions and underlying performance on certain portfolio investments. Noninterest expense was \$62 million, an increase of \$31 million.

Net income for Corporate was \$815 million compared with \$853 million. Net revenue was \$4.0 billion compared with \$2.4 billion reflecting elevated levels of securities gains from the investment portfolio. Noninterest expense was \$3.3 billion compared with \$744 million, reflecting an increase of litigation reserves. Prior year included a \$675 million FDIC special assessment.

Total private equity portfolio — Cost	\$ 9,723	\$ 8,781	11

(a) Unrealized gains/(losses) contain reversals of unrealized gains and losses that were recognized in prior periods and have now been realized.

(b) Included in principal transactions revenue in the Consolidated Statements of Income.

(c) For more information on the Firm's policies regarding the valuation of the private equity portfolio, see Note 3 on pages 110-124 of this Form 10-Q.

(d) Unfunded commitments to third-party private equity funds were \$1.2 billion and \$1.5 billion at June 30, 2010, and December 31, 2009, respectively.

The carrying value of the private equity portfolio at June 30, 2010, and December 31, 2009, was \$8.1 billion and \$7.3 billion, respectively. The increase in the portfolio during the first half of the year is primarily due to approximately \$1.0 billion in new and follow-on investments, partially offset by unrealized losses on markdowns. The portfolio represented 6.6% and 6.3% of the Firm's stockholders' equity less goodwill at June 30, 2010, and December 31, 2009, respectively.

Consolidated Balance Sheets overview

Total assets were \$2.0 trillion, down modestly from December 31, 2009. Total assets decreased, primarily as a result of repositioning the Firm's securities portfolio in response to changes in the interest rate environment, and reducing deposits with banks as market stress gradually eased since the end of 2009. The decrease was partially offset by an increase in loans, primarily due to the January 1, 2010, adoption of new consolidation guidance related to VIEs.

Total liabilities were \$1.8 trillion, down modestly. The decrease in liabilities was a result of customer deposits declining primarily due to lower short-term funding needs. Partially offsetting these liability decreases was an increase in beneficial interests issued by consolidated VIEs, which was also a result of the adoption of the new consolidation guidance related to VIEs.

Stockholders' equity was \$171.1 billion, an increase of \$5.8 billion, or 3%, from the prior year-end. Stockholders' equity increased driven predominantly by growth in net income and a net increase in accumulated other comprehensive income ("AOCI"); these were partially offset by the cumulative effect of a change in accounting principles as a result of the adoption of the new consolidation guidance related to VIEs.

The following is a discussion of the significant changes in the specific line captions of the Consolidated Balance Sheets from December 31, 2009. For a description of the specific line captions discussed below, see pages 76-78 of JPMorgan Chase's 2009 Annual Report.

Deposits with banks; federal funds sold and securities purchased under resale agreements; securities borrowed

Deposits with banks decreased, largely due to lower deposits with the Federal Reserve Bank and lower interbank lending, as market stress gradually eased since the end of 2009. Securities purchased under resale agreements increased, predominantly due to higher financing volume in IB, offset partially by a decline in Corporate due to a reduced level of funds to be invested on a short-term basis. For additional information on the Firm's Liquidity Risk Management, see pages 65-67 of this Form 10-Q.

Trading assets and liabilities – debt and equity instruments

Trading assets — debt and equity instruments decreased, primarily reflecting lower client flows as a result of unfavorable financial markets in the second quarter of 2010. Trading liabilities — debt and equity instruments increased, reflecting an increase in business activity in markets outside of the U.S. (mainly Asia Pacific) in the first quarter of 2010; this was partially offset by unfavorable financial markets in the second quarter of 2010. For additional information, refer to Note 3 on pages 110-124 of this Form 10-Q.

Trading assets and liabilities – derivative receivables and payables

Derivative receivables and payables were flat and reflected the effect of declining interest rates and increased levels of foreign exchange-rate volatility, offset by declining equity valuations and lower energy and base metal commodity prices. For additional information, refer to Derivative contracts on pages 75-77, and Note 3 and Note 5 on pages 110-124 and 128-136, respectively, of this Form 10-Q.

Securities

Securities decreased, largely due to repositioning of the Firm's securities portfolio in response to changes in the interest rate environment and to rebalance issuer exposures. The repositioning reduced U.S. government agency securities and increased non-U.S. mortgage-backed securities. The adoption of the new consolidation guidance related to VIEs, which resulted in the elimination of retained available-for-sale ("AFS") securities issued by Firm-sponsored credit card securitization trusts, also contributed to the decrease. For a more detailed discussion of the adoption of the new consolidation guidance, see Note 1 on pages 108-109 of this Form 10-Q. For additional information related to securities, refer to the Corporate/Private Equity segment on pages 51-53, and Note 3 and Note 11 on pages 110-124 and 139-144, respectively, of this Form 10-Q.

Loans and allowance for loan losses

Loans increased as a result of the new consolidation guidance related to VIEs that required the Firm to consolidate the assets and liabilities of its Firm-sponsored credit card securitization trusts, Firm-administered multi-seller conduits and certain other consumer securitization entities, primarily mortgage-related. Excluding the impact of the adoption of the new accounting guidance, loans decreased due to the Washington Mutual credit card portfolio runoff; the decline in lower-yielding promotional credit card balances; continued runoff of the residential real estate portfolios; net repayments and loan sales in IB; and net charge-offs. Client demand, in general, remains low.

[Table of Contents](#)

The allowance for loan losses increased, largely due to the impact of new consolidation guidance related to VIEs that required the Firm to consolidate the assets and liabilities of its Firm-sponsored credit card securitization trusts. Excluding the effect of the new consolidation guidance, the allowance decreased, as a result of reductions of \$2.0 billion and \$1.2 billion in the wholesale and consumer allowances, respectively. The wholesale allowance decreased, due primarily to net repayments, loan sales, refinements to credit loss estimates, and improvement in the credit quality of the commercial and industrial portfolio. The consumer allowance decreased, as a result of a \$2.5 billion reduction for CS, reflecting lower estimated losses, primarily related to improved delinquency trends, as well as lower levels of outstandings; these were partially offset by a \$1.2 billion increase in the first quarter in RFS related to further estimated deterioration in the Washington Mutual prime and option ARM purchased credit-impaired pools. For a more detailed discussion of the adoption of the new consolidated guidance, see Notes 1, 14 and 15 on pages 108-109, 150-151 and 151-163, respectively, of this Form 10-Q. For a more detailed discussion of the loan portfolio and the allowance for loan losses, refer to Credit Portfolio on pages 68-94 and Notes 3, 4, 13 and 14 on pages 110-124, 125-127, 145-150 and 150-151, respectively, of this Form 10-Q.

Accrued interest and accounts receivable

Accrued interest and accounts receivable decreased, due to the elimination of retained securitization interests upon the adoption of the new consolidation guidance that resulted in the consolidation of Firm-sponsored credit card securitization trusts. This decrease was offset partially by higher customer receivables in IB's Prime Services business due to increased client activity. For a more detailed discussion of the adoption of the new consolidated guidance, see Notes 1 and 15 on pages 108-109 and 151-163, respectively, of this Form 10-Q.

Mortgage servicing rights

MSRs decreased, primarily due to a significant decline in market interest rates during the first six months of 2010, as well as servicing portfolio runoff. The decrease was partially offset by an increase related to sales in RFS of originated loans for which servicing rights were retained. For additional information on MSRs, see Note 16 on pages 165-166 of this Form 10-Q.

Other intangible assets

Other intangible assets decreased, primarily as a result of amortization expense. For additional information on other intangible assets, see Note 16 on pages 164-167 of this Form 10-Q.

Deposits

Deposits decreased, reflecting a decline associated with wholesale funding activities due to the Firm's lower funding needs, and the continued normalization of TSS deposit levels from year-end inflows. These factors were offset partially by net inflows from existing customers and new business in AM, CB and RFS. For more information on deposits, refer to the RFS and AM segment discussions on pages 25-35 and 47-51, respectively; the Liquidity Risk Management discussion on pages 65-67; and Note 17 on page 167 of this Form 10-Q. For more information on wholesale liability balances, including deposits, refer to the CB and TSS segment discussions on pages 41-43 and 44-46, respectively, of this Form 10-Q.

Federal funds purchased and securities loaned or sold under repurchase agreements

Securities sold under repurchase agreements decreased, largely as a result of a decline in funding requirements associated with lower AFS securities in Corporate and reduced short-term funding requirements in IB. For additional information on the Firm's Liquidity Risk Management, see pages 65-67 of this Form 10-Q.

Commercial paper and other borrowed funds

Commercial paper and other borrowed funds, which includes advances from Federal Home Loan Banks ("FHLBs"), decreased due to lower funding requirements. For additional information on the Firm's Liquidity Risk Management and other borrowed funds, see pages 65-67, and Note 18 on page 167 of this Form 10-Q.

Beneficial interests issued by consolidated VIEs

Beneficial interests issued by consolidated VIEs increased, predominantly due to the adoption of the new consolidation guidance related to VIEs, offset modestly by maturities of \$13.2 billion related to Firm-sponsored credit card securitization trusts. For additional information on Firm-administered VIEs and loan securitization trusts, see Note 15 on pages 151-163 of this Form 10-Q.

Long-term debt

Long-term debt decreased, predominantly due to maturities and redemptions, partially offset by new issuances. For additional information on the Firm's long-term debt activities, see the Liquidity Risk Management discussion on pages 65-67 of this Form 10-Q.

Stockholders' equity

Total stockholders' equity increased, as a result of growth in net income for the first six months of 2010; a net increase in AOCI, due primarily to the narrowing of spreads on mortgage-backed securities and collateralized loan obligations, offset partially by declines in non-U.S. government debt securities and realization of gains due to portfolio repositioning; and net issuances under the Firm's employee stock-based compensation plans. The increase in stockholders' equity was partially offset by the impact of the adoption of the new consolidation guidance related to VIEs that resulted in a reduction of \$4.5 billion, driven by the establishment of an allowance for loan losses of \$7.5 billion (pretax) related to receivables held in credit card securitization trusts that were consolidated at the adoption date. Also partially offsetting the increase were the purchase of the remaining interest in a consolidated subsidiary from noncontrolling shareholders; the declaration of cash dividends on preferred and common stock; and stock repurchases. For a more detailed discussion of the adoption of new consolidated guidance, see Notes 1 and 15 on pages 108-109 and 151-163, respectively, of this Form 10-Q.

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL CASH OBLIGATIONS

JPMorgan Chase is involved with several types of off-balance sheet arrangements, including through special-purpose entities ("SPEs"), which are a type of VIE, and through lending-related financial instruments (e.g., commitments and guarantees). For further discussion of contractual cash obligations, see Off-Balance Sheet Arrangements and Contractual Cash Obligations on pages 78-81 of JPMorgan Chase's 2009 Annual Report.

Special-purpose entities

SPEs are the most common type of VIE, used in securitization transactions in order to isolate certain assets and distribute the cash flows from those assets to investors. As a result of new accounting guidance, certain VIEs were consolidated on to the Firm's Consolidated Balance Sheets effective January 1, 2010. Nevertheless, SPEs continue to be an important part of the financial markets, including the mortgage- and asset-backed securities and commercial paper markets, as they provide market liquidity by facilitating investors' access to specific portfolios of assets and risks. The Firm holds capital, as deemed appropriate, against all SPE-related transactions and related exposures, such as derivative transactions and lending-related commitments and guarantees. For further information on the Firm's involvement with SPEs, see Note 1 on pages 108-109 and Note 15 on pages 151-163 of this Form 10-Q; and Note 1 on pages 142-143, Note 15 on pages 198-205 and Note 16 on pages 206-214 of JPMorgan Chase's 2009 Annual Report.

The Firm has no commitments to issue its own stock to support any SPE transaction, and its policies require that transactions with SPEs be conducted at arm's length and reflect market pricing. Consistent with this policy, no JPMorgan Chase employee is permitted to invest in SPEs with which the Firm is involved where such investment would violate the Firm's Code of Conduct. These rules prohibit employees from self-dealing and acting on behalf of the Firm in transactions with which they or their family have any significant financial interest.

Implications of a credit rating downgrade to JPMorgan Chase Bank, N.A.

For certain liquidity commitments to SPEs, the Firm could be required to provide funding if the short-term credit rating of JPMorgan Chase Bank, N.A. were downgraded below specific levels, primarily "P-1," "A-1" and "F1" for Moody's, Standard & Poor's and Fitch, respectively. The aggregate amount of these liquidity commitments, to both consolidated and nonconsolidated SPEs, were \$36.1 billion and \$34.2 billion at June 30, 2010, and December 31, 2009, respectively. Alternatively, if JPMorgan Chase Bank, N.A. were downgraded, the Firm could be replaced by another liquidity provider in lieu of providing funding under the liquidity commitment or, in certain circumstances, the Firm could facilitate the sale or refinancing of the assets in the SPE in order to provide liquidity.

Special-purpose entities revenue

The following table summarizes certain revenue information related to consolidated and nonconsolidated VIEs with which the Firm has significant involvement. The revenue reported in the table below primarily represents contractual servicing and credit fee income (i.e., income from acting as administrator, structurer or liquidity provider). It does not include MTM gains and losses from changes in the fair value of trading positions (such as derivative transactions) entered into with VIEs. Those gains and losses are recorded in principal transactions revenue.

Revenue from VIEs and Securitization Entities (in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Multi-seller conduits	\$ 60	\$ 136	\$ 127	\$ 256
Investor intermediation	12	8	25	14
Other securitization entities(a)	544	617	1,088	1,254
Total	\$ 616	\$ 761	\$ 1,240	\$ 1,524

(a) Excludes servicing revenue from loans sold to and securitized by third parties.

Loan modifications

The Firm modifies loans that it services, including loans that were sold to off-balance sheet SPEs, pursuant to the U.S. Treasury's Making Home Affordable ("MHA") programs and the Firm's other loss-mitigation programs. For both the Firm's on-balance sheet loans and loans serviced for others, approximately 121,000 and 281,000 mortgage modifications had been offered to borrowers during the three and six months ended June 30, 2010, respectively; and more than 59,000 and 123,000 permanent mortgage modifications were approved during the three and six months ended June 30, 2010, respectively. See Consumer Credit Portfolio on pages 79-91 of this Form 10-Q for more details on these loan modifications.

Off-balance sheet lending-related financial instruments, guarantees and other commitments

JPMorgan Chase uses lending-related financial instruments (e.g., commitments and guarantees) to meet the financing needs of its customers. The contractual amount of these financial instruments represents the maximum possible credit risk should the counterparty draw upon the commitment or the Firm be required to fulfill its obligation under the guarantee, and the counterparty subsequently fail to perform according to the terms of the contract. These commitments and guarantees often expire without being drawn, and even higher proportions expire without a default. As a result, the total contractual amount of these instruments is not, in the Firm's view, representative of its actual future credit exposure or funding requirements. For further discussion of lending-related commitments and guarantees and the Firm's accounting for them, see Lending-related commitments on page 77 and Note 22 on pages 170-174 of this Form 10-Q; and Lending-related commitments on page 105 and Note 31 on pages 230-234 of JPMorgan Chase's 2009 Annual Report.

The following table presents, as of June 30, 2010, the amounts by contractual maturity of off-balance sheet lending-related financial instruments, guarantees and other commitments. The amounts in the table for credit card and home equity lending-related commitments represent the total available credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit for these products would be utilized at the same time. The Firm can reduce or cancel these lines of credit by providing the borrower prior notice or, in some cases, without notice as permitted by law. The table excludes certain commitments and guarantees that do not have a contractual maturity date (e.g., loan sale and securitization-related indemnifications). For further discussion, see discussion of repurchase liability below and Note 22 on pages 170-174 of this Form 10-Q, and Note 31 on pages 230-234 of JPMorgan Chase's 2009 Annual Report.

Off—balance sheet lending-related financial instruments, guarantees and other commitments

By remaining maturity (in millions)	June 30, 2010				Dec. 31, 2009

Equity investment commitments(g)	1,231	15	30	931	2,207	2,374
Building purchase commitment(h)	670	—	—	—	670	670

(a) At June 30, 2010, and December 31, 2009, represents the contractual amount net of risk participations totaling \$609 million and \$643 million, respectively, for other unfunded commitments to extend credit; \$23.4 billion and \$24.6 billion, respectively, for standby letters of credit and other financial guarantees; and \$828 million and \$690 million, respectively, for other letters of credit. In regulatory filings with the Federal Reserve these commitments are shown gross of risk participations.

(b) Upon the adoption of the new consolidation guidance related to VIEs, \$24.2 billion of lending-related commitments between the Firm and Firm-administered multi-seller conduits were eliminated upon consolidation. The decrease in lending-related commitments was partially offset by the addition of \$6.5 billion of unfunded commitments directly between the multi-seller conduits and clients; these unfunded commitments of the consolidated conduits are now included as off-balance sheet lending-related commitments of the Firm.

(c) At June 30, 2010, and December 31, 2009, includes unissued standby letters of credit commitments of \$39.4 billion and \$38.4 billion, respectively.

(d) At June 30, 2010, and December 31, 2009, JPMorgan Chase held collateral relating to \$34.7 billion and \$31.5 billion, respectively, of standby letters of credit; and \$2.7 billion and \$1.3 billion, respectively, of other letters of credit.

(e) At June 30, 2010, and December 31, 2009, collateral held by the Firm in support of securities lending indemnification agreements totaled \$164.5 billion and \$173.2 billion, respectively. Securities lending collateral comprises primarily cash and securities issued by governments that are members of the Organisation for Economic Co-operation and Development (“OECD”) and U.S. government agencies.

(f) Represents notional amounts of derivatives qualifying as guarantees.

(g) At June 30, 2010, and December 31, 2009, includes unfunded commitments to third-party private equity funds of \$1.2 billion and \$1.5 billion, respectively. Also includes unfunded commitments for other equity investments of \$981 million and \$897 million, respectively. These commitments include \$1.2 billion and \$1.5 billion, respectively, related to investments that are generally fair valued at net asset value as discussed in Note 3 on pages 110-124 of this Form 10-Q.

(h) For further information refer to Building purchase commitment in Note 22 on page 174 of this Form 10-Q.

Repurchase liability

The Firm conducts a significant portion of its loan sale and securitization activities with Fannie Mae and Freddie Mac (the “GSEs”). In connection with these and other securitization transactions, the Firm makes certain representations and warranties that the loans sold meet certain requirements (e.g., type of collateral, underwriting standards, validity of borrower representations in connection with the loan, primary mortgage insurance is in force for any mortgage loan with a loan-to-value ratio (“LTV”) greater than 80%, use of the GSEs’ standard legal documentation). The Firm may be required to repurchase the loans and/or indemnify the GSEs or other purchasers against losses due to material breaches of these representations and warranties. For additional information about the Firm’s loan sale and securitization-related indemnifications, including a description of how the Firm estimates its repurchase liability, see Note 22 on pages 170—174 of this Form 10-Q, and Note 31 on pages 230—234 of JPMorgan Chase’s 2009 Annual Report.

The repurchase liability recorded by the Firm is estimated based on several factors, including the level of current and estimated probable future repurchase demands made by purchasers, the ability of the Firm to cure the defects identified

in the repurchase demands (considering the types of those defects), and the severity of loss upon repurchase or foreclosure.

The Firm estimates probable future repurchase demands in part by considering the time period over which the GSEs or other purchasers typically demand repurchase. Although the GSEs or other purchasers may demand repurchase at any time, the majority of repurchase demands have historically related to loans that became delinquent in the first 24 to 36 months following origination of the mortgage loan. Currently, repurchase demands predominantly relate to the 2006 to 2008 vintages. During the second quarter of 2010, the Firm experienced a slight increase in repurchase demands across most vintages, including its older vintages. The Firm has considered this development in estimating its repurchase liability. To date, demands against the 2009 vintage have not been significant. The Firm attributes the comparatively favorable performance of the 2009 vintage to the tightened underwriting and loan qualification standards that were implemented in 2007 and 2008.

The primary reasons for repurchase demands relate to documents missing from the mortgage file. Other factors that give rise to repurchase demands include alleged misrepresentations relating to: (i) credit quality and/or undisclosed debt of the borrower; (ii) income level and/or employment status of the borrower; and (iii) appraised value of collateral. Ineligibility of the borrower for the particular product and mortgage insurance rescissions are other reasons for repurchase demands. While the Firm has demonstrated an ability to more frequently cure certain defects (for example, missing documents) than others, the Firm has not observed a direct relationship between the type of defect that causes the breach of representations and warranties and the severity of the realized loss.

Beginning in 2009, the mortgage insurers have more frequently rescinded mortgage insurance coverage. Accordingly, rescission of mortgage insurance has become a more significant cause of repurchase demands from the GSEs. While the Firm actively reviews all rescission notices from mortgage insurers and appeals them when appropriate, there can be no assurance regarding the success of the Firm's appeals. The Firm had unresolved mortgage insurance rescission notices on loans with an unpaid principal balance of \$1.7 billion and \$1.5 billion at June 30, 2010, and December 31, 2009, respectively.

As soon as practicable after receiving a repurchase demand from one of the GSEs (whether due to mortgage insurance rescission or alleged breach of another representation and warranty), the Firm evaluates the request and takes appropriate actions based on the nature of the repurchase demand. Loan-level negotiations with the GSEs are typical and the Firm seeks to provide a final response to a repurchase demand within three to four months of the date of receipt. The unpaid principal balance of loans subject to unresolved repurchase demands received from the GSEs was \$1.4 billion and \$1.3 billion at June 30, 2010, and December 31, 2009, respectively. Because the GSEs may make repurchase demands based on mortgage insurance rescission notices that remain unresolved, certain loans are the subject of both unresolved mortgage insurance rescission notices and unresolved repurchase demands. This overlapping population included approximately \$220 million and \$175 million of unpaid principal balances at June 30, 2010, and December 31, 2009, respectively.

The estimated loss resulting from the unresolved mortgage insurance rescission notices and repurchase demands from GSEs, after consideration of the Firm's ability to cure the identified defects, is considered in the Firm's recorded repurchase liability. In addition the Firm's recorded repurchase liability considers projected future demands that have not been presented. However, the repurchase liability recorded by the Firm incorporates a number of estimates requiring management judgment, such as the amount of probable future demands from purchasers (which is in part dependent on the amount of rescissions by mortgage insurers), the ability of the Firm to cure identified defects, the severity of loss upon repurchase or foreclosure and recoveries from third parties. Estimating the repurchase liability is further complicated by limited and rapidly changing historical data and uncertainty surrounding numerous external factors, including: (i) economic factors (e.g., further declines in home prices and changes in borrower behavior may lead to increases in the number of defaults, the severity of losses, or both), and (ii) the level of future demands, which is dependent, in part, on actions taken by third parties, such as the GSEs and mortgage insurers. While the Firm uses the best information available to it in estimating its repurchase liability, the estimation process is inherently uncertain and requires the application of judgment. An assumed simultaneous 10% adverse change in the assumptions noted above would increase the repurchase liability as of June 30, 2010, by approximately \$1.2 billion. This estimate is based upon a hypothetical scenario and is intended to provide an indication of the impact on the estimated repurchase liability of significant and simultaneous adverse changes in the key underlying assumptions. Actual changes in these assumptions may not occur at the same time or to the same degree, or improvement in one factor may offset deterioration in another.

[Table of Contents](#)

The following table summarizes the change in the repurchase liability for each of the periods presented.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Repurchase liability at beginning of period	\$ 1,982	\$ 662	\$ 1,705	\$ 1,093
Realized losses ^(a)	(317)	(173)	(563)	(887) ^(b)
Provision for repurchase losses	667	267	1,190	550
Repurchase liability at end of period	\$ 2,332	\$ 756	\$ 2,332	\$ 756

(a) Includes principal losses and accrued interest on repurchased loans, “make-whole” settlements, settlements with claimants, and certain related expenses.

(b) Primarily related to the Firm’s settlement of claims for certain loans originated and sold by Washington Mutual. The unpaid principal balance of loans related to this settlement is not included in the first table below, which summarizes the unpaid principal balance of repurchased loans.

The Firm also sells loans in securitization transactions with Ginnie Mae; these loans are typically insured by the Federal Housing Administration (“FHA”), Rural Housing Administration (“RHA”) and/or guaranteed by the U.S. Department of Veterans Affairs (“VA”). The Firm, in its role as servicer, may elect to repurchase delinquent loans securitized by Ginnie Mae in accordance with guidelines prescribed by Ginnie Mae, FHA, RHA and VA. Substantially all amounts due under the terms of these loans continue to be insured and the reimbursement of insured amounts is proceeding normally. Accordingly, the Firm has not recorded any repurchase liability related to these loans.

The following table summarizes the total unpaid principal balance of repurchases for the periods indicated.

(in millions) ^(a)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Ginnie Mae ^(b)	\$ 3,230	\$ 55	\$ 5,240	\$ 2,114
GSEs and other ^(c)	515	350	837	498
Total	\$ 3,745	\$ 405	\$ 6,077	\$ 2,612

(a) Excludes mortgage insurers. While the rescission of mortgage insurance may result in a breach of representations and warranties, which may trigger a repurchase demand, the mortgage insurers themselves do not present repurchase demands to the Firm.

(b) In substantially all cases, these repurchases represent the Firm’s voluntary repurchase of certain delinquent loans from loan pools or packages as permitted by Ginnie Mae guidelines (i.e., they do not result from repurchase demands due to breaches of representations and warranties). In certain cases, the Firm repurchases these delinquent loans as it continues to service them and/or manage the foreclosure process in accordance with applicable requirements of Ginnie Mae, the FHA, RHA and/or the VA.

(c) Predominantly all of the repurchases related to GSEs.

In lieu of repurchasing loans, the Firm may reimburse the purchaser for a realized loss on a liquidated property. The Firm has recognized these “make-whole” settlements for the periods indicated.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
GSEs and other ^(a)	\$ 150	\$ 69	\$ 255	\$ 125

(a) Predominantly all of the settlements related to GSEs.

Nonperforming loans held-for-investment included \$293 million and \$218 million at June 30, 2010, and December 31, 2009, respectively, of loans repurchased due to breaches of representations and warranties.

CAPITAL MANAGEMENT

The following discussion of JPMorgan Chase’s capital management highlights developments since December 31, 2009, and should be read in conjunction with Capital Management on pages 82-85 of JPMorgan Chase’s 2009 Annual Report.

The Firm’s capital management objectives are to hold capital sufficient to:

- Cover all material risks underlying the Firm’s business activities;
- Maintain “well-capitalized” status under regulatory requirements;
- Achieve debt rating targets;
- Remain flexible to take advantage of future opportunities; and
- Build and invest in businesses, even in a highly stressed environment.

Regulatory capital

The Federal Reserve establishes capital requirements, including well-capitalized standards for the consolidated financial holding company. The Office of the Comptroller of the Currency (“OCC”) establishes similar capital requirements and standards for the Firm’s national banks, including JPMorgan Chase Bank, N.A. and Chase Bank USA, N.A. As of June 30, 2010, and December 31, 2009, JPMorgan Chase and all of its banking subsidiaries were well-capitalized and met all capital requirements to which each was subject.

Table of Contents

The following table presents the risk-based capital ratios for JPMorgan Chase and its significant banking subsidiaries at June 30, 2010, and December 31, 2009.

	JPMorgan Chase & Co. ^(e)		JPMorgan Chase Bank, N.A. ^(e)		Chase Bank USA, N.A. ^(e)		Well-capitalized ratios ^(g)	Minimum capital ratios ^(g)
(in millions, except ratios)	June 30, 2010	Dec. 31, 2009	June 30, 2010	Dec. 31, 2009	June 30, 2010	Dec. 31, 2009		
Regulatory capital								
Tier 1 ^(a)	\$ 137,077	\$ 132,971	\$ 97,549	\$ 96,372	\$ 11,584	\$ 15,534		
Total	178,293	177,073	135,654	136,646	15,418	19,198		
Tier 1 common ^(b)	108,175	105,284	96,795	95,353	11,584	15,534		
Assets								
Risk-weighted ^(c)	1,131,030 ^(f)	1,198,006	928,740	1,011,995	125,282	114,693		
Adjusted average ^(d)	1,983,839 ^(f)	1,933,767	1,600,868	1,609,081	130,911	74,087		
Capital ratios								
Tier 1 capital ^(a)	12.1% ^(f)	11.1%	10.5%	9.5%	9.2%	13.5%	6.0%	4.0%
Total capital	15.8	14.8	14.6	13.5	12.3	16.7	10.0	8.0
Tier 1 leverage	6.9	6.9	6.1	6.0	8.8	21.0	5.0 ^(h)	3.0 ⁽ⁱ⁾
Tier 1 common ^(b)	9.6	8.8	10.4	9.4	9.2	13.5	NA	NA

- (a) At June 30, 2010, for JPMorgan Chase and JPMorgan Chase Bank, N.A., trust preferred capital debt securities were \$20.7 billion and \$600 million, respectively. If these securities were excluded from the calculation at June 30, 2010, Tier 1 capital would be \$116.4 billion and \$96.9 billion, respectively, and the Tier 1 capital ratio would be 10.3% and 10.4%, respectively. At June 30, 2010, Chase Bank USA, N.A. had no trust preferred capital debt securities.
- (b) Tier 1 common ratio is Tier 1 common divided by risk-weighted assets. Tier 1 common is defined as Tier 1 capital less elements of capital not in the form of common equity — such as perpetual preferred stock, noncontrolling interests in subsidiaries and trust preferred capital debt securities. Tier 1 common, a non-GAAP financial measure, is used by banking regulators, investors and analysts to assess and compare the quality and composition of the Firm's capital with the capital of other financial services companies. The Firm uses Tier 1 common along with the other capital measures to assess and monitor its capital position.
- (c) Includes off-balance sheet risk-weighted assets at June 30, 2010, of \$269.4 billion, \$261.2 billion and \$32 million, respectively, for JPMorgan Chase, JPMorgan Chase Bank, N.A. and Chase Bank USA, N.A., and at December 31, 2009, of \$367.4 billion, \$312.3 billion and \$49.9 billion, respectively. Risk-weighted assets are calculated in accordance with U.S. federal regulatory capital standards.
- (d) Adjusted average assets, for purposes of calculating the leverage ratio, include total average assets adjusted for unrealized gains/(losses) on securities, less deductions for disallowed goodwill and other intangible assets, investments in certain subsidiaries, and the total adjusted carrying value of nonfinancial equity investments that are subject to deductions from Tier 1 capital.
- (e) Asset and capital amounts for JPMorgan Chase's banking subsidiaries reflect intercompany transactions; whereas the respective amounts for JPMorgan Chase reflect the elimination of intercompany transactions.
- (f) Effective January 1, 2010, the Firm adopted new guidance that amended the accounting for the consolidation of VIEs, which resulted in a decrease in the Tier 1 capital ratio of 34 basis points. See Note 15 on pages 151-163 of this Form 10-Q for further information.
- (g) As defined by the regulations issued by the Federal Reserve, OCC and FDIC.
- (h) Represents requirements for banking subsidiaries pursuant to regulations issued under the FDIC Improvement Act. There is no Tier 1 leverage component in the definition of a well-capitalized bank holding company.
- (i) The minimum Tier 1 leverage ratio for bank holding companies and banks is 3% or 4%, depending on factors specified in regulations issued by the Federal Reserve and OCC.

Note: Rating agencies allow measures of capital to be adjusted upward for deferred tax liabilities, which have resulted from both nontaxable business combinations and from tax-deductible goodwill. The Firm had deferred tax liabilities resulting from nontaxable business combinations of \$730 million and \$812 million at June 30, 2010, and December 31, 2009, respectively. Additionally, the Firm had deferred tax liabilities resulting from tax-deductible goodwill of \$1.9 billion and \$1.7 billion at June 30, 2010, and December 31, 2009, respectively.

[Table of Contents](#)

A reconciliation of the Firm's Total stockholders' equity to Tier 1 common, Tier 1 capital and Total qualifying capital is presented in the table below:

Risk-based capital components and assets (in millions)	June 30, 2010	December 31, 2009
Tier 1 capital		
Tier 1 common:		
Total stockholders' equity	\$ 171,120	\$ 165,365
Less: Preferred stock	8,152	8,152
Common stockholders' equity	162,968	157,213
Effect of certain items in accumulated other comprehensive income/(loss) excluded from Tier 1 common equity	(2,444)	75
Less: Goodwill ^(a)	46,466	46,630
Fair value DVA on derivative and structured note liabilities related to the Firm's credit quality	1,558	912
Investments in certain subsidiaries and other	1,050	802
Other intangible assets	3,275	3,660
Tier 1 common	108,175	105,284
Preferred stock	8,152	8,152
Qualifying hybrid securities and noncontrolling interests ^(b)	20,750	19,535
Total Tier 1 capital	137,077	132,971
Tier 2 capital		
Long-term debt and other instruments qualifying as Tier 2	26,984	28,977
Qualifying allowance for credit losses	14,474	15,296
Adjustment for investments in certain subsidiaries and other	(242)	(171)
Total Tier 2 capital	41,216	44,102
Total qualifying capital	\$ 178,293	\$ 177,073
Risk-weighted assets	\$1,131,030	\$ 1,198,006
Total adjusted average assets	\$1,983,839	\$ 1,933,767

(a) Goodwill is net of any associated deferred tax liabilities.

(b) Primarily includes trust preferred capital debt securities of certain business trusts.

The Firm's Tier 1 common was \$108.2 billion at June 30, 2010, compared with \$105.3 billion at December 31, 2009, an increase of \$2.9 billion. The increase was predominantly due to net income (adjusted for DVA) of \$7.5 billion and net issuances of common stock under the Firm's employee stock-based compensation plans of \$1.7 billion. The increase was partially offset by the \$4.4 billion cumulative effect adjustment to retained earnings that resulted from the Firm's adoption of new consolidation guidance related to VIEs; a \$1.3 billion reduction in common stockholders' equity related to the purchase of the remaining interest in a consolidated subsidiary from noncontrolling shareholders; dividends on preferred and common stock outstanding; and repurchases of common stock. The Firm's Tier 1 capital was \$137.1 billion at June 30, 2010, compared with \$133.0 billion at December 31, 2009, an increase of \$4.1 billion. The increase in Tier 1 capital reflected the increase in Tier 1 common, and an issuance of trust preferred capital debt securities. Additional information regarding the Firm's capital ratios and the federal regulatory capital standards to which it is subject is presented in Note 29 on pages 228-229 of JPMorgan Chase's 2009 Annual Report.

Basel II and Basel III

The minimum risk-based capital requirements adopted by the U.S. federal banking agencies follow the Capital Accord of the Basel Committee on Banking Supervision. In 2004, the Basel Committee published a revision to the Accord ("Basel II"). The goal of the new Basel II Framework is to provide more risk-sensitive regulatory capital calculations and promote enhanced risk management practices among large, internationally active banking organizations. U.S. banking regulators published a final Basel II rule in December 2007, which will require JPMorgan Chase to implement Basel II at the holding company level, as well as at certain of its key U.S. bank subsidiaries.

Prior to full implementation of the new Basel II Framework, JPMorgan Chase will be required to complete a qualification period of four consecutive quarters during which it will need to demonstrate that it meets the requirements of the new rule to the satisfaction of its primary U.S. banking regulators. The U.S. implementation timetable consists of the qualification period, starting no later than April 1, 2010, followed by a minimum transition period of three years. During the transition period, Basel II risk-based capital requirements cannot fall below certain floors based on current ("Basel I") regulations. JPMorgan Chase is currently in the qualification period and expects to be in compliance with all relevant Basel II rules within the established timelines. In addition, the Firm has adopted, and will continue to adopt, based on various established timelines, Basel II rules in certain non-U.S. jurisdictions, as required.

In addition to the Basel II Framework, the Basel Committee is developing further proposed revisions to the Capital Accord (Basel III). In July 2010, the committee revised a broad range of potential changes, including narrowing the

[Table of Contents](#)

definition of capital, increasing capital requirements for specific exposures, introducing short-term liquidity coverage and term funding standards, and establishing an international leverage ratio. If these revisions were adopted as currently proposed, the Firm estimates that they would, taken together with the changes already approved by the Basel Committee for calculating capital on trading assets and securitizations, result in a reduction in the Firm's Tier 1 common ratio ranging from approximately 100 to 200 basis points. This estimate of the potential reduction in the Tier 1 common ratio reflects the Firm's current understanding of the proposed revisions and their application to its businesses as currently conducted; accordingly, this estimate will evolve over time as the Firm's businesses change and the requirements are finalized. In addition, if these revisions were adopted as currently proposed, the Firm believes it would need to modify the current liquidity profile of its assets and liabilities to become more liquid in response to the proposed short-term liquidity coverage and term funding standards. The Firm will continue to monitor the ongoing rule-making process to assess both the timing and the impact of Basel III on its businesses and financial condition.

Broker-dealer regulatory capital

JPMorgan Chase's principal U.S. broker-dealer subsidiaries are J.P. Morgan Securities Inc. ("JPMorgan Securities") and J.P. Morgan Clearing Corp. J.P. Morgan Clearing Corp. is a subsidiary of JPMorgan Securities and provides clearing and settlement services. JPMorgan Securities and J.P. Morgan Clearing Corp. are each subject to Rule 15c3-1 under the Securities Exchange Act of 1934 (the "Net Capital Rule"). JPMorgan Securities and J.P. Morgan Clearing Corp. are also registered as futures commission merchants and subject to Rule 1.17 under the Commodity Futures Trading Commission ("CFTC").

JPMorgan Securities and J.P. Morgan Clearing Corp. have elected to compute their minimum net capital requirements in accordance with the "Alternative Net Capital Requirements" of the Net Capital Rule. At June 30, 2010, JPMorgan Securities' net capital, as defined by the Net Capital Rule, was \$7.5 billion, exceeding the minimum requirement by \$7.0 billion. J.P. Morgan Clearing Corp's net capital was \$5.5 billion, exceeding the minimum requirement by \$3.9 billion.

In addition to its net capital requirements, JPMorgan Securities is required to hold tentative net capital in excess of \$1.0 billion and is also required to notify the Securities and Exchange Commission ("SEC") in the event that tentative net capital is less than \$5.0 billion, in accordance with the market and credit risk standards of Appendix E of the Net Capital Rule. As of June 30, 2010, JPMorgan Securities had tentative net capital in excess of the minimum and notification requirements.

Economic risk capital

JPMorgan Chase assesses its capital adequacy relative to the risks underlying its business activities, using internal risk-assessment methodologies. The Firm measures economic capital based primarily on four risk factors: credit, market, operational and private equity risk.

Economic risk capital (in billions)	Quarterly Averages		
	2Q10	4Q09	2Q09
Credit risk	\$ 48.1	\$ 48.5	\$ 51.9
Market risk	15.6	15.8	15.7
Operational risk	7.5	7.9	8.4
Private equity risk	6.0	4.9	4.5
Economic risk capital	77.2	77.1	80.5
Goodwill	48.3	48.3	48.3
Other ^(a)	33.6	31.1	12.1
Total common stockholders' equity	\$159.1	\$156.5	\$140.9

(a) Reflects additional capital required, in the Firm's view, to meet its regulatory and debt rating objectives.

Line-of-business equity

Equity for a line of business represents the amount the Firm believes the business would require if it were operating independently, incorporating sufficient capital to address economic risk measures, regulatory capital requirements and capital levels for similarly rated peers. Capital is also allocated to each line of business for, among other things, goodwill and other intangibles associated with acquisitions effected by the line of business. ROE is measured and internal targets for expected returns are established as a key measure of a business segment's performance.

[Table of Contents](#)

Effective January 1, 2010, the Firm enhanced its line of business equity framework to better align equity assigned to each line of business with the changes anticipated to occur in the line of business and to reflect the competitive and regulatory landscape. The lines of business are now capitalized based on the Tier 1 common standard, rather than the Tier 1 capital standard.

Line-of-business equity (in billions)	June 30, 2010	December 31, 2009
Investment Bank	\$ 40.0	\$ 33.0
Retail Financial Services	28.0	25.0
Card Services	15.0	15.0
Commercial Banking	8.0	8.0
Treasury & Securities Services	6.5	5.0
Asset Management	6.5	7.0
Corporate/Private Equity	59.0	64.2
Total common stockholders' equity	\$ 163.0	\$ 157.2

Line-of-business equity (in billions)	Quarterly Averages		
	2Q10	4Q09	2Q09
Investment Bank	\$ 40.0	\$ 33.0	\$ 33.0

Corporate/Private Equity	55.1	63.5	47.9
Total common stockholders' equity	\$159.1	\$156.5	\$140.9

Capital actions

Stock repurchases

Under the stock repurchase program authorized by the Firm's Board of Directors, the Firm is authorized to repurchase up to \$10.0 billion of the Firm's common stock plus 88 million warrants issued in 2008 as part of the U.S. Treasury's Capital Purchase Program. During the second quarter of 2010, the Firm resumed common stock repurchases, repurchasing a total of 3 million shares for \$135 million at an average price of \$38.73 per share. The Firm's current share repurchase activity is intended to offset share count increases resulting from employee equity awards and is consistent with the Firm's goal of maintaining an appropriate share count. The Firm did not repurchase any of the warrants. As of June 30, 2010, \$6.1 billion of authorized repurchase capacity remained with respect to the common stock, and all of the authorized repurchase capacity remained with respect to the warrants. For a further discussion of the Firm's stock repurchase program, see Stock repurchases on page 85 of JPMorgan Chase 2009 Annual Report.

The Firm has determined that it may, from time to time, enter into written trading plans under Rule 10b5-1 of the Securities Exchange Act of 1934 to facilitate the repurchase of common stock and warrants in accordance with the repurchase program. A Rule 10b5-1 repurchase plan allows the Firm to repurchase its equity during periods when it would not otherwise be repurchasing common stock — for example, during internal trading “black-out periods.” All purchases under a Rule 10b5-1 plan must be made according to a predefined plan established when the Firm is not aware of material nonpublic information. For additional information regarding repurchases of the Firm's equity securities, see Part II, Item 2, Unregistered Sales of Equity Securities and Use of Proceeds, on pages 197-198 of this Form 10-Q.

RISK MANAGEMENT

Risk is an inherent part of JPMorgan Chase's business activities. The Firm's risk management framework and governance structure are intended to provide comprehensive controls and ongoing management of the major risks inherent in its business activities. In addition, this framework recognizes the diversity among the Firm's core businesses, which helps reduce the impact of volatility in any particular area on the Firm's operating results as a whole. There are eight major types of risk identified in the business activities of the Firm: liquidity, credit, market, interest rate, operational, legal and reputation, fiduciary, and private equity risk.

For further discussion of these risks, see Risk Management on pages 86-126 of JPMorgan Chase's 2009 Annual Report and the information below.

LIQUIDITY RISK MANAGEMENT

The following discussion of JPMorgan Chase's liquidity risk management framework highlights developments since December 31, 2009, and should be read in conjunction with pages 88-92 of JPMorgan Chase's 2009 Annual Report.

The ability to maintain surplus levels of liquidity through economic cycles is crucial to financial services companies, particularly during periods of adverse conditions. The Firm's funding strategy is intended to ensure liquidity and diversity of funding sources to meet actual and contingent liabilities through both normal and stress periods.

JPMorgan Chase's primary sources of liquidity include a diversified \$887.8 billion deposit base and access to the equity capital markets and long-term unsecured and secured funding sources, including asset securitizations and borrowings from FHLBs. Additionally, JPMorgan Chase maintains large pools of highly-liquid unencumbered assets. The Firm actively monitors its available capacity in the wholesale funding markets across various geographic regions and in various currencies. The Firm's ability to generate funding from a broad range of sources in a variety of geographic locations is intended to enhance financial flexibility and limit funding concentration risk.

Management considers the Firm's liquidity position to be strong, based on its liquidity metrics as of June 30, 2010, and believes that the Firm's unsecured and secured funding capacity is sufficient to meet its on- and off-balance sheet obligations at that date.

Liquidity monitoring

The Firm centralizes the management of global funding and liquidity risk within Corporate Treasury to maximize liquidity access, minimize funding costs and enhance global identification and coordination of liquidity risk. The Firm utilizes a variety of metrics to monitor and manage liquidity. One set of analyses used by the Firm relates to the timing of liquidity sources versus liquidity uses (e.g., funding gap analysis and parent holding company funding, which is discussed below). The second set of analyses focuses on ratios of funding and liquid collateral (e.g., measurements of the Firm's reliance on short-term unsecured funding as a percentage of total liabilities, as well as analyses of the relationship of short-term unsecured funding to highly-liquid assets, the deposit-to-loan ratio and other balance sheet measures). The Firm conducts a variety of stress tests intended to ensure that ample liquidity is available through stressed as well as normal market conditions.

Parent holding company

In addition to monitoring liquidity on a firm-wide basis, the Firm also monitors liquidity for the parent holding company. This monitoring takes into consideration regulatory restrictions that limit the extent to which bank subsidiaries may extend credit to the parent holding company and other nonbank subsidiaries. Excess cash generated by parent holding company issuance activity is placed with both bank and nonbank subsidiaries in the form of deposits and advances. As discussed below, the Firm's liquidity management is also intended to ensure that those subsidiaries have the ability to generate replacement funding in the event the parent holding company requires repayment.

The Firm closely monitors the ability of the parent holding company to meet all of its obligations with liquid sources of cash or cash equivalents for an extended period of time without access to the unsecured funding markets. The Firm targets pre-funding of parent holding company obligations for at least 12 months; however, due to conservative liquidity management actions taken by the Firm in the current environment, the current pre-funding of such obligations is significantly greater than target.

Liquidity reserves

In addition to the parent holding company, the Firm maintains a significant amount of liquidity, primarily at its bank subsidiaries, but also at its nonbank subsidiaries. Liquidity reserves at bank subsidiaries include cash on deposit with central banks as well as high-quality unencumbered securities which can be quickly converted to cash through repurchase agreements or sales. Liquidity reserves fluctuate over time, reflecting market conditions and balance sheet composition. The Firm expects its current liquidity reserves to decrease over time as the economic environment stabilizes and loan demand increases. Although the Firm does not consider it to be a primary means of contingent funding, the Firm also maintains access to secured funding capacity through overnight borrowings from the Federal Reserve and various central banks collateralized by pledging certain loan and securities portfolios.

Sources of funds

A key strength of the Firm is its diversified deposit franchise through the RFS, CB, TSS and AM lines of business, which provides a stable source of funding and decreases reliance on the wholesale markets. As of June 30, 2010, total deposits for the Firm were \$887.8 billion, compared with \$938.4 billion at December 31, 2009. A significant portion of the Firm's deposits are retail deposits (41% and 38% at June 30, 2010, and December 31, 2009, respectively), which are considered particularly stable as they are less sensitive to interest rate changes or market volatility. A significant portion of the Firm's wholesale deposits are also considered to be stable sources of funding due to the nature of the relationships from which they are generated, particularly customers' operating service relationships with the Firm. As of June 30, 2010, the Firm's deposit-to-loan ratio was 127%, compared with 148% at December 31, 2009. The decline in the Firm's deposit-to-loan ratio was partly due to an increase in loans resulting from the January 1, 2010, implementation of new consolidation accounting guidance related to VIEs. For further discussions of deposit and liability balance trends, see the discussion of the results for the Firm's business segments and the Balance Sheet Analysis on pages 21-51 and 53-56, respectively, of this Form 10-Q. For a more detailed discussion of the adoption of the new consolidation guidance, see Note 1 on pages 108-109 of this Form 10-Q.

The Firm's reliance on short-term unsecured funding sources such as commercial paper, federal funds and Eurodollars purchased, certificates of deposit, time deposits, and bank notes is limited. Total commercial paper liabilities for the Firm were \$41.1 billion as of June 30, 2010, compared with \$41.8 billion as of December 31, 2009. However, of those totals, \$30.9 billion and \$28.7 billion as of June 30, 2010 and December 31, 2009, respectively, originated from deposits that customers chose to sweep into commercial paper liabilities as a cash management product offered by the Firm. Therefore, commercial paper liabilities sourced from wholesale funding markets were \$10.2 billion as of June 30, 2010, compared with \$13.1 billion as of December 31, 2009.

Issuance

During the three months ended June 30, 2010, the Firm issued \$7.1 billion of long-term debt, including \$1.3 billion of senior notes issued in the U.S. market, \$1.5 billion of trust preferred capital debt securities, and \$4.3 billion of IB structured notes. During the six months ended June 30, 2010, the Firm issued \$18.0 billion of long-term debt, including \$6.9 billion of senior notes issued in the U.S. market, \$904 million of senior notes issued in non-U.S. markets, \$1.5 billion of trust preferred capital debt securities, and \$8.7 billion of IB structured notes. In addition, in July 2010, the Firm issued \$2.9 billion of senior notes in the U.S. market. During the three and six months ended June 30, 2010, \$16.2 billion and \$30.3 billion of long-term debt matured or were redeemed, including \$5.4 billion and \$12.8 billion of IB structured notes. The maturities or redemptions in the first six months of 2010 were partially offset by the issuances during the period.

Replacement capital covenants

In connection with the issuance of certain of its trust preferred capital debt securities and its noncumulative perpetual preferred stock, the Firm has entered into Replacement Capital Covenants ("RCCs"). These RCCs grant certain rights to the holders of "covered debt," as defined in the RCCs, that prohibit the repayment, redemption or purchase of such trust preferred capital debt securities and noncumulative perpetual preferred stock except, with limited exceptions, to the extent that JPMorgan Chase has received, in each such case, specified amounts of proceeds from the sale of certain qualifying securities. Currently, the Firm's covered debt is its 5.875% Junior Subordinated Deferrable Interest Debentures, Series O, due in 2035. For more information regarding these covenants, reference is made to the respective RCCs (including any supplements thereto) entered into by the Firm in relation to such trust preferred capital debt securities and noncumulative perpetual preferred stock, which are available in filings made by the Firm with the SEC.

Cash flows

Cash and due from banks was \$32.8 billion and \$25.1 billion at June 30, 2010 and 2009, respectively; these balances increased by \$6.6 billion from December 31, 2009, and decreased by \$1.8 billion from December 31, 2008. The following discussion highlights the major activities and transactions that affected JPMorgan Chase's cash flows during the first six months of 2010 and 2009.

Cash flows from operating activities

JPMorgan Chase's operating assets and liabilities support the Firm's capital markets and lending activities, including the origination or purchase of loans initially designated as held-for-sale. Operating assets and liabilities can vary significantly in the normal course of business due to the amount and timing of cash flows, which are affected by client-driven activities, market conditions and trading strategies. Management believes cash flows from operations, available cash balances and the Firm's ability to generate cash through short- and long-term borrowings are sufficient to fund the Firm's operating liquidity needs.

[Table of Contents](#)

For the six months ended June 30, 2010, net cash provided by operating activities was \$47.6 billion, primarily driven by an increase in trading liabilities, reflecting an increase in business activity in markets outside of the U.S., mainly Asia Pacific, in the first quarter of 2010, partially offset by a decrease in trading assets driven by lower client flows as a result of unfavorable financial markets in the second quarter of 2010. Also, net cash generated from operating activities was higher than net income, largely as a result of adjustments for non-cash items such as the provision for credit losses, stock-based compensation, and depreciation and amortization. Proceeds from sales and paydowns of loans originated or purchased with an initial intent to sell were higher than cash used to acquire such loans.

For the six months ended June 30, 2009, net cash provided by operating activities was \$103.3 billion, largely due to a net decline in trading activity reflecting the effect of the challenging capital markets environment. In addition, net cash generated from operating activities was higher than net income; this was also partially the result of 2009's non-cash adjustments which are the same non-cash items as those mentioned above for 2010. Proceeds from sales, securitizations and paydowns of loans originated or purchased with an initial intent to sell were higher than cash used to acquire such loans, but the cash flows from these loan activities remained at a reduced level as a result of the continued volatility and stress in the markets.

Cash flows from investing activities

The Firm's investing activities predominantly include originating loans to be held for investment, the AFS securities portfolio and other short-term interest-earning assets. For the six months ended June 30, 2010, net cash of \$73.7 billion was provided by investing activities. This resulted from a decrease in deposits with banks largely due to a decline in deposits placed with the Federal Reserve Bank and lower interbank lending as market stress has gradually eased since the end of 2009; a net decrease in the loan portfolio, driven by a decline in credit card loans due to the runoff of the Washington Mutual portfolio and decrease in lower-yielding promotional loans, continued runoff of the residential real estate portfolios, repayments and loan sales in IB; continued low client demand; and proceeds from sales and maturities of AFS securities used in the Firm's interest rate risk management activities being higher than cash used to acquire such securities.

For the six months ended June 30, 2009, net cash of \$36.3 billion was provided by investing activities. This was primarily due to a decrease in deposits with banks, as interbank lending and deposits with the Federal Reserve Bank declined relative to the elevated level at the end of 2008; a net decrease in the loan portfolio, reflecting declines across all businesses, including lower customer demand in the wholesale businesses, the seasonal decline in credit card receivables, credit card securitization activities, and paydowns; and a decrease in securities purchased under resale agreements, reflecting a lower volume of excess cash available for short-term investments. Largely offsetting these cash proceeds were net purchases of AFS securities to manage the Firm's exposure to a declining interest rate environment.

Cash flows from financing activities

The Firm's financing activities primarily reflect cash flows related to raising customer deposits, and issuing long-term debt (including trust preferred capital debt securities) as well as preferred and common stock. In the first six months of 2010 net cash used in financing activities was \$114.2 billion. This resulted from a decline in deposits associated with wholesale funding activities reflecting the Firm's lower funding needs; a decline in TSS deposits reflecting the normalization of deposit levels, offset partially by net inflows from existing customers and new business in AM, CB and RFS; net repayment of long-term debt and trust preferred capital debt securities as new issuances were more than offset by repayments; payments of cash dividends; and repurchases of common stock. Additionally, cash was used as a result of a decline in securities loaned or sold under repurchase agreements largely due to reduced funding requirements associated with lower AFS securities in Corporate and reduced short-term funding requirements in IB; a decline in beneficial interests issued by consolidated VIEs due to maturities related to Firm-sponsored credit card securitization trusts; and a decline in other borrowed funds due to maturities of advances from FHLBs.

In the first six months of 2009, net cash used in financing activities was \$141.2 billion; this reflected a decline in wholesale deposits in TSS, compared with the elevated level during the latter part of 2008 due to heightened volatility and credit concerns in the markets at that time; a decline in other borrowings due to the absence of borrowings from the Federal Reserve under the Term Auction Facility program and net repayments of advances from FHLBs; the June 17, 2009, repayment in full of the \$25.0 billion principal amount of Series K preferred stock; and the payment of cash dividends. Cash proceeds resulted from an increase in securities loaned or sold under repurchase agreements, partly attributable to favorable pricing and to financing the Firm's increased AFS securities portfolio; the issuance of \$5.8 billion of common stock; and a slight net increase in long-term debt, as issuances of FDIC-guaranteed debt as well as non-FDIC guaranteed debt in both the European and U.S. markets were offset by redemptions. There were no open-market stock repurchases during the first half of 2009.

Credit ratings

The cost and availability of financing are influenced by credit ratings. Reductions in credit ratings could have an adverse effect on the Firm's access to liquidity sources, increase the cost of funds, trigger additional collateral or funding requirements, and decrease the number of investors and counterparties willing to lend to the Firm. Additionally, the Firm's funding requirements for VIEs and other third-party commitments may be adversely affected by a decline in credit ratings. For additional information on the impact of a credit-rating downgrade on the funding requirements for VIEs, and on derivatives and collateral agreements, see Special-purpose entities on pages 56-57, Ratings profile of derivative receivables marked to market ("MTM") on page 76, and Note 5 on pages 128-136 of this Form 10-Q.

Critical factors in maintaining high credit ratings include a stable and diverse earnings stream, strong capital ratios, strong credit quality and risk management controls, diverse funding sources, and disciplined liquidity monitoring procedures.

Ratings from Moody's, S&P and Fitch on JPMorgan Chase and its principal bank subsidiaries remained unchanged at June 30, 2010, from December 31, 2009. At June 30, 2010, Moody's and S&P's outlook remained negative, while Fitch's outlook remained stable.

Several rating agencies have recently announced that they will be evaluating the effects of the financial regulatory reform legislation in order to determine the extent, if any, to which financial institutions, including the Firm, may be negatively impacted. There is no assurance the Firm's credit ratings will not be downgraded in the future as a result of any such reviews.

CREDIT PORTFOLIO

The following table presents JPMorgan Chase's credit portfolio as of June 30, 2010, and December 31, 2009. Total managed credit exposure of \$1.7 trillion at June 30, 2010, decreased by \$59.1 billion from December 31, 2009, reflecting decreases of \$55.3 billion in the consumer portfolio and \$3.8 billion in the wholesale portfolio. During the first six months of 2010, lending-related commitments decreased by \$46.6 billion, managed loans decreased by \$18.6 billion and receivables from customers increased by \$7.2 billion. The decrease in lending-related commitments was partially related to the January 1, 2010, adoption of the new consolidation guidance related to VIEs, which resulted in the elimination of \$24.2 billion of wholesale lending-related commitments between the Firm and its administrated multi-seller conduits upon consolidation. This decrease in lending-related commitments was partially offset by the addition of \$6.5 billion of unfunded commitments between the consolidated multi-seller conduits and their clients. The decrease in managed loans was primarily related to lower customer demand, net repayments, and loan sales, partially offset by the adoption of the new consolidation guidance related to VIEs.

While overall portfolio exposure declined, the Firm provided and raised nearly \$700 billion in new and renewed credit and capital for consumers, corporations, small businesses, municipalities and not-for-profit organizations during the first half of the year.

[Table of Contents](#)

In the table below, reported loans include loans retained; loans held-for-sale (which are carried at the lower of cost or fair value, with changes in value recorded in noninterest revenue); and loans accounted for at fair value. Loans retained are presented net of unearned income, unamortized discounts and premiums, and net deferred loan costs. Nonperforming assets include nonaccrual loans and assets acquired in satisfaction of debt (primarily real estate owned). Nonaccrual loans are those for which the accrual of interest has been suspended in accordance with the Firm's accounting policies. For additional information on these loans, including the Firm's accounting policies, see Note 13 on pages 145-150 of this Form 10-Q, and Note 13 on pages 192-196 of JPMorgan Chase's 2009 Annual Report.

- (a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, its Firm-administered multi-seller conduits and certain other consumer loan securitization entities, primarily mortgage-related. As a result, related assets are now primarily recorded in loans or other assets on the Consolidated Balance Sheet. As a result of the consolidation of the credit card securitization trusts, reported and managed basis are equivalent for periods beginning after January 1, 2010. For further discussion, see Note 15 on pages 151-163 of this Form 10-Q.
- (b) Loans securitized are defined as loans that were sold to nonconsolidated securitization trusts and were not included in reported loans. For further discussion of credit card securitizations, see Note 15 on pages 151-163 of this Form 10-Q.
- (c) Represents margin loans to prime and retail brokerage customers, which are included in accrued interest and accounts receivable on the Consolidated Balance Sheets.
- (d) Represents the net notional amount of protection purchased and sold of single-name and portfolio credit derivatives used to manage both performing and non-performing credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. For additional information, see Credit derivatives on pages 76-77 and Note 5 on pages 128-136 of this Form 10-Q.
- (e) At June 30, 2010, and December 31, 2009, nonperforming loans and assets exclude: (1) mortgage loans insured by U.S. government agencies of \$10.1 billion and \$9.0 billion, respectively, that are 90 days past due and accruing at the guaranteed reimbursement rate; (2) real estate owned insured by U.S. government agencies of \$1.4 billion and \$579 million, respectively; and (3) student loans that are 90 days past due and still accruing, which are insured by U.S. government agencies under the FFELP, of \$447 million and \$542 million, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance issued by the Federal Financial Institutions Examination Council ("FFIEC"), credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specified event (e.g., bankruptcy of the borrower), whichever is earlier.
- (f) Excludes consumer purchased credit-impaired loans that were acquired as part of the Washington Mutual transaction, which are accounted for on a pool basis. Since each pool is accounted for as a single asset with a single composite interest rate and an aggregate

Table of Contents

expectation of cash flows, the past due status of the pools, or that of individual loans within the pools, is not meaningful. Because the Firm is recognizing interest income on each pool of loans, they are all considered to be performing.

- (g) For the quarters ended June 30, 2010 and 2009, net charge-off ratios were calculated using: (1) average retained loans of \$699.2 billion and \$685.4 billion, respectively; (2) average securitized loans of zero and \$84.4 billion, respectively; and (3) average managed loans of \$699.2 billion and \$769.8 billion, respectively. For the year-to-date periods ended June 30, 2010 and 2009, net charge-off ratios were calculated using: (1) average retained loans of \$708.8 billion and \$697.9 billion; (2) average securitized loans of zero and \$85.0 billion; and (3) average managed loans of \$708.8 billion and \$783.0 billion.
- (h) For the quarters ended June 30, 2010 and 2009, firmwide net charge-off ratios were calculated including average purchased credit-impaired loans of \$78.1 billion and \$86.7 billion. For the year-to-date periods ended June 30, 2010, and 2009, net charge-off ratios were calculated using average purchased credit-impaired loans of \$79.2 billion and \$87.5 billion, respectively. For the quarters ended June 30, 2010 and 2009, excluding the impact of purchased credit-impaired loans, the total Firm's managed net charge-off rate would have been 3.69% and 4.51% respectively.

WHOLESALE CREDIT PORTFOLIO

As of June 30, 2010, wholesale exposure (IB, CB, TSS and AM) decreased by \$3.8 billion from December 31, 2009. The overall decrease was primarily driven by a decrease of \$22.6 billion in lending-related commitments, partially offset by an increase of \$12.7 billion in loans. The decrease in lending-related commitments and the increase in loans were primarily related to the January 1, 2010, adoption of the new consolidation guidance related to VIEs which resulted in the elimination of \$24.2 billion of lending-related commitments between the Firm and its administrated multi-seller conduits upon consolidation. This decrease in lending-related commitments was partially offset by the addition of \$6.5 billion of unfunded commitments between the consolidated multi-seller conduits and their clients. Assets of the consolidated conduits included \$15.1 billion of wholesale loans at January 1, 2010. Excluding the effect of the new consolidation guidance, lending-related commitments and loans would have decreased by \$4.9 billion and \$2.4 billion, respectively, mainly due to net repayments and sales. Partly offsetting these decreases was an increase of \$7.2 billion in receivables from customers due to increased client activity in prime services.

(a) Represents margin loans to prime and retail brokerage customers, which are included in accrued interest and accounts receivable on the Consolidated Balance Sheets.

(b) Represents the net notional amount of protection purchased and sold of single-name and portfolio credit derivatives used to manage both performing and nonperforming credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. For additional information, see Credit derivatives on pages 76-77 and Note 5 on pages 128-136 of this Form 10-Q.

(c) Excludes assets acquired in loan satisfactions. For additional information, see the wholesale nonperforming assets by business segment table on page 73 of this Form 10-Q.

[Table of Contents](#)

The following table summarizes the maturity and ratings profiles of the wholesale portfolio as of June 30, 2010, and December 31, 2009. The ratings scale is based on the Firm's internal risk ratings, which generally correspond to ratings as defined by S&P and Moody's.

Wholesale credit exposure — maturity and ratings profile

At June 30, 2010 (in billions, except ratios)	Maturity profile(c)				Ratings profile			
	Due in 1 year or less	Due after 1 year through 5 years	Due after 5 years	Total	Investment- grade ("IG")	Noninvestment- grade	Total	Total % of IG

Total exposure							\$ 650	
Net credit derivative hedges notional ^(b)	49%	42%	9%	100%	\$ (48)	\$ —	\$ (48)	100%

(a) Loans held-for-sale and loans at fair value relate primarily to syndicated loans and loans transferred from the retained portfolio.

(b) Represents the net notional amounts of protection purchased and sold of single-name and portfolio credit derivatives used to manage the credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP.

(c) The maturity profile of loans and lending-related commitments is based on the remaining contractual maturity. The maturity profile of derivative receivables is based on the maturity profile of average exposure. For further discussion of average exposure, see Derivative receivables marked to market on pages 102-103 of JPMorgan Chase's 2009 Annual Report.

[Table of Contents](#)
Wholesale credit exposure — selected industry concentrations

The Firm focuses on the management and diversification of its industry concentrations, with particular attention paid to industries with actual or potential credit concerns.

Exposures deemed criticized generally represent a ratings profile similar to a rating of “CCC+”/“Caa1” and lower, as defined by S&P and Moody’s, respectively. The total criticized component of the portfolio, excluding loans held-for-sale and loans at fair value, decreased to \$26.5 billion at June 30, 2010, from \$33.2 billion at year-end 2009. The decrease was primarily related to net repayments and loan sales.

(a) The Firm held allowance for loan losses of \$1.3 billion and \$2.0 billion related to nonperforming retained loans resulting in allowance coverage ratios of 25% and 31%, at June 30, 2010, and December 31, 2009, respectively. Wholesale nonperforming loans represent 2.61% and 3.38% of total wholesale loans at June 30, 2010, and December 31, 2009, respectively.

(b) Nonperforming derivatives represent less than 1.0% of the total derivative receivables net of cash collateral at both June 30, 2010, and December 31, 2009.

[Table of Contents](#)

In the normal course of business, the Firm provides loans to a variety of customers, from large corporate and institutional clients to high-net-worth individuals.

Retained wholesale loans were \$213.0 billion at June 30, 2010, compared with \$200.1 billion at December 31, 2009. The \$12.9 billion increase was primarily related to the January 1, 2010, adoption of new consolidation guidance related to VIEs. Upon adoption of the new guidance, \$15.1 billion of wholesale loans associated with Firm-administered multi-seller conduits were added to the Consolidated Balance Sheets. Excluding the effect of the adoption of the new consolidation guidance, loans decreased by \$2.2 billion. Loans held-for-sale and loans at fair value relate primarily to syndicated loans and loans transferred from the retained portfolio. Held-for-sale loans and loans carried at fair value were in aggregate \$3.8 billion and \$4.1 billion at June 30, 2010, and December 31, 2009, respectively.

The Firm actively manages wholesale credit exposure through sales of loans and lending-related commitments. During the first six months of 2010 the Firm sold \$4.6 billion of loans and commitments, recognizing gains of \$31 million. In the first six months of 2009, the Firm sold \$879 million of loans and commitments, recognizing net losses of \$23 million. These results include gains or losses on sales of nonperforming loans, if any, as discussed on pages 74-75 of this Form 10-Q. These activities are not related to the Firm's securitization activities. For further discussion of securitization activity, see Liquidity Risk Management and Note 15 on pages 65-67 and 151-163 respectively, of this Form 10-Q.

Nonperforming wholesale loans were \$5.7 billion at June 30, 2010, a decrease of \$1.2 billion from December 31, 2009, reflecting primarily net repayments and loan sales.

The following table presents the geographic distribution of wholesale loans and nonperforming loans as of June 30, 2010, and December 31, 2009. The geographic distribution of the wholesale portfolio is determined based predominantly on the domicile of the borrower.

Loans and nonperforming loans, U.S. and Non-U.S.

Wholesale (in millions)	June 30, 2010		December 31, 2009	
	Loans	Nonperforming loans	Loans	Nonperforming loans
U.S.	\$155,737	\$ 4,699	\$149,085	\$ 5,844
Non-U.S.	61,089	961	55,090	1,060
Ending balance	\$216,826	\$ 5,660	\$204,175	\$ 6,904

The following table presents the change in the nonperforming loan portfolio during the six months ended June 30, 2010 and 2009.

Nonperforming loan activity

	2010	2009
Beginning balance	\$ 6,904	\$ 2,382
Additions	4,150	6,063
Reductions:		
Paydowns and other	2,857	1,510
Gross charge-offs	1,162	903
Returned to performing	113	70
Sales	1,262	—
Total reductions	5,394	2,483
Net additions (reductions)	(1,244)	3,580
Ending balance	\$ 5,660	\$ 5,962

[Table of Contents](#)

The following table presents net charge-offs, which are defined as gross charge-offs less recoveries, for the three and six months ended June 30, 2010 and 2009. A nonaccrual loan is charged off to the allowance for loan losses when it is highly certain that a loss has been realized; this determination considers many factors, including the prioritization of the Firm's claim in bankruptcy, expectations of the workout/restructuring of the loan, and valuation of the borrower's equity. The amounts in the table below do not include gains from sales of nonperforming loans.

Net charge-offs

Wholesale (in millions, except ratios)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Loans — reported				
Average loans retained	\$ 209,016	\$ 229,105	\$210,300	\$233,871
Net charge-offs	231	679	1,190	870
Average annual net charge-off rate	0.44%	1.19%	1.14%	0.75%

Derivatives

Derivative contracts

In the normal course of business, the Firm uses derivative instruments to meet the needs of customers; to generate revenue through trading activities; to manage exposure to fluctuations in interest rates, currencies and other markets; and to manage the Firm's credit exposure. For further discussion of these contracts, see Notes 5 and 22 on pages 128-136 and 170-174 of this Form 10-Q and Notes 5 and 32 on pages 167-175 and 224-235 of JPMorgan Chase's 2009 Annual Report.

The following table summarizes the net derivative receivables MTM for the periods presented.

Derivative receivables marked to market (in millions)	Derivative receivables MTM	
	June 30, 2010	December 31, 2009
Interest rate(a)	\$ 42,268	\$ 33,733
Credit derivatives(a)	8,346	11,859
Foreign exchange	19,586	21,984
Equity	5,523	6,635
Commodity	4,492	5,999
Total, net of cash collateral	80,215	80,210
Liquid securities collateral held against derivative receivables	(19,276)	(15,519)
Total, net of all collateral	\$ 60,939	\$ 64,691

(a) In the first quarter of 2010, cash collateral netting reporting was enhanced. Prior periods have been revised to conform to the current presentation. The effect resulted in an increase to interest rate derivative receivables, and a corresponding decrease to credit derivative receivables, of \$7.0 billion as of December 31, 2009.

The amounts of derivative receivables reported on the Consolidated Balance Sheets were \$80.2 billion at both June 30, 2010, and December 31, 2009. These are the amounts of the MTM or fair value of the derivative contracts after giving effect to legally enforceable master netting agreements, cash collateral held by the Firm and CVA. These amounts reported on the Consolidated Balance Sheets represent the cost to the Firm to replace the contracts at current market rates should the counterparty default. Derivative receivables were flat and reflected the offsetting effect of declining interest rates and increased levels of foreign exchange-rate volatility, with declining equity valuations and lower energy and base metal commodity prices. However, in management's view, the appropriate measure of current credit risk should also reflect additional liquid securities held as collateral by the Firm of \$19.3 billion and \$15.5 billion at June 30, 2010, and December 31, 2009, respectively, resulting in total exposure, net of all collateral, of \$60.9 billion and \$64.7 billion, respectively.

The Firm also holds additional collateral delivered by clients at the initiation of transactions, as well as collateral related to contracts that have a non-daily call frequency and collateral that the Firm has agreed to return but has not yet settled as of the reporting date. Though this collateral does not reduce the balances noted in the table above, it is available as security against potential exposure that could arise should the MTM of the client's derivative transactions move in the Firm's favor. As of June 30, 2010, and December 31, 2009, the Firm held \$16.1 billion and \$16.9 billion, respectively, of this additional collateral. The derivative receivables MTM, net of all collateral, also does not include other credit enhancements in the form of letters of credit. The following table summarizes the ratings profile of the Firm's derivative receivables MTM, net of all collateral, for the dates indicated.

Ratings profile of derivative receivables MTM

Rating equivalent (in millions, except ratios)	June 30, 2010		December 31, 2009	
	Exposure net of all collateral	% of exposure net of all collateral	Exposure net of all collateral	% of exposure net of all collateral
AAA/Aaa to AA-/Aa3	\$ 25,328	42%	\$ 25,530	40%
A+/A1 to A-/A3	12,876	21	12,432	19
BBB+/Baa1 to BBB-/Baa3	7,179	12	9,343	14
BB+/Ba1 to B-/B3	12,757	21	14,571	23
CCC+/Caa1 and below	2,799	4	2,815	4
Total	\$ 60,939	100%	\$ 64,691	100%

The Firm actively pursues the use of collateral agreements to mitigate counterparty credit risk in derivatives. The percentage of the Firm's derivatives transactions subject to collateral agreements — excluding foreign exchange spot trades, which are not typically covered by collateral agreements due to their short maturity — was 97% as of June 30, 2010, up from 89% at December 31, 2009. The Firm posted \$70.7 billion and \$56.7 billion of collateral at June 30, 2010, and December 31, 2009, respectively.

Certain derivative and collateral agreements include provisions that require the counterparty and/or the Firm, upon specified downgrades in the respective credit ratings of their legal entities, to post collateral for the benefit of the other party. At June 30, 2010, the impact of a single-notch and six-notch ratings downgrade to JPMorgan Chase & Co., and its subsidiaries, primarily JPMorgan Chase Bank, N.A., would have required \$1.5 billion and \$5.0 billion, respectively, of additional collateral to be posted by the Firm. Certain derivative contracts also provide for termination of the contract, generally upon a downgrade to a specified rating of either the Firm or the counterparty, at the then-existing fair value of the derivative contracts.

Credit derivatives

For a more detailed discussion of credit derivatives, including types of derivatives, see Note 5, Credit derivatives, on pages 135-136 of this Form 10-Q, and Credit derivatives on pages 103-104 and Note 5, Credit derivatives, on pages 173-175 of JPMorgan Chase's 2009 Annual Report. The following table presents the Firm's notional amounts of credit derivatives protection purchased and sold as of June 30, 2010, and December 31, 2009.

Credit derivative positions

(in billions)	Notional amount				Total
	Dealer/client		Credit portfolio		
	Protection purchased ^(a)	Protection sold	Protection purchased ^{(a)/(b)}	Protection sold	
June 30, 2010	\$ 2,666	\$ 2,654	\$ 32	\$ —	\$5,352
December 31, 2009	2,997	2,947	49	1	5,994

(a) Included \$2.6 trillion and \$3.0 trillion at June 30, 2010, and December 31, 2009, respectively, of notional exposure where the Firm had protection sold with identical underlying reference instruments.

(b) Included \$8.5 billion and \$19.7 billion at June 30, 2010, and December 31, 2009, respectively, that represented the notional amount for structured portfolio protection; the Firm retains the first risk of loss on this portfolio.

Dealer/client

For a further discussion of the dealer/client business related to credit protection, see Dealer/client business on page 104 of JPMorgan Chase's 2009 Annual Report. At June 30, 2010, the total notional amount of protection purchased and sold in the dealer/client business decreased by \$624 billion from year-end 2009, primarily as a result of continuing industry efforts to reduce offsetting trade activity.

Credit portfolio activities

Use of single-name and portfolio credit derivatives (in millions)	Notional amount of protection purchased and sold	
	June 30, 2010	December 31, 2009
Credit derivatives used to manage:		
Loans and lending-related commitments	\$ 17,271	\$ 36,873
Derivative receivables	15,165	11,958
Total protection purchased ^(a)	32,436	48,831
Total protection sold	426	455
Credit derivatives hedges notional	\$ 32,010	\$ 48,376

(a) Included \$8.5 billion and \$19.7 billion at June 30, 2010, and December 31, 2009, respectively, that represented the notional amount for structured portfolio protection; the Firm retains the first risk of loss on this portfolio.

[Table of Contents](#)

The credit derivatives used by JPMorgan Chase for credit portfolio management activities do not qualify for hedge accounting under U.S. GAAP; these derivatives are reported at fair value, with gains and losses recognized in principal transactions revenue. In contrast, the loans and lending-related commitments being risk-managed are accounted for on an accrual basis. This asymmetry in accounting treatment, between loans and lending-related commitments and the credit derivatives used in credit portfolio management activities, causes earnings volatility that is not representative, in the Firm's view, of the true changes in value of the Firm's overall credit exposure. The MTM value related to the Firm's credit derivatives used for managing credit exposure, as well as the MTM value related to the CVA (which reflects the credit quality of derivatives counterparty exposure), are included in the gains and losses realized on credit derivatives disclosed in the table below. These results can vary from period to period due to market conditions that affect specific positions in the portfolio. For a discussion of CVA related to derivative contracts, see Derivative receivables MTM on pages 102-103 of JPMorgan Chase's 2009 Annual Report.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Hedges of lending-related commitments ^(a)	\$ 60	\$ (1,512)	\$ (60)	\$ (2,064)
CVA and hedges of CVA ^(a)	(289)	1,196	(290)	1,319
Net gains/(losses)	\$ (229)	\$ (316)	\$ (350)	\$ (745)

^(a) These hedges do not qualify for hedge accounting under U.S. GAAP.

Lending-related commitments

JPMorgan Chase uses lending-related financial instruments, such as commitments and guarantees, to meet the financing needs of its customers. The contractual amount of these financial instruments represents the maximum possible credit risk should the counterparties draw down on these commitments or the Firm fulfills its obligation under these guarantees, and the counterparties subsequently fail to perform according to the terms of these contracts.

Wholesale lending-related commitments were \$324.6 billion at June 30, 2010, compared with \$347.2 billion at December 31, 2009. The decrease reflected the January 1, 2010, adoption of new consolidation guidance related to VIEs. Upon adoption of the new consolidation guidance, \$24.2 billion of lending-related commitments between the Firm and its administered multi-seller conduits were eliminated in consolidation. This decrease in lending-related commitments was partially offset by the addition of \$6.5 billion of unfunded commitments between the consolidated multi-seller conduits and their clients.

In the Firm's view, the total contractual amount of these wholesale lending-related commitments is not representative of the Firm's actual credit risk exposure or funding requirements. In determining the amount of credit risk exposure the Firm has to wholesale lending-related commitments, which is used as the basis for allocating credit risk capital to these commitments, the Firm has established a "loan-equivalent" amount for each commitment; this amount represents the portion of the unused commitment or other contingent exposure that is expected, based on average portfolio historical experience, to become drawn upon in an event of a default by an obligor. The loan-equivalent amounts of the Firm's lending-related commitments were \$166.7 billion and \$179.8 billion as of June 30, 2010, and December 31, 2009, respectively.

Country Exposure

The Firm's wholesale portfolio includes country risk exposures to both developed and emerging markets. The Firm seeks to diversify its country exposures, including its credit-related lending, trading and investment activities, whether cross-border or locally funded.

Country exposure under the Firm's internal risk management approach is reported based on the country where the assets of the obligor, counterparty or guarantor are located. Exposure amounts, including resale agreements, are adjusted for collateral and for credit enhancements (e.g., guarantees and letters of credit) provided by third parties; outstandings supported by a guarantor located outside the country or backed by collateral held outside the country are assigned to the country of the enhancement provider. In addition, the effect of credit derivative hedges and other short credit or equity trading positions are reflected. Total exposure measures include activity with both government and private-sector entities in a country.

The Firm also reports country exposure for regulatory purposes following FFIEC guidelines, which are different from the Firm's internal risk management approach for measuring country exposure. For additional information on the FFIEC exposures, see Cross-border outstandings on page 264 of JPMorgan Chase's 2009 Annual Report.

Table of Contents

In recent months, several European countries, including Greece, Portugal, Spain, Italy and Ireland, have been subject to credit deterioration due to weaknesses in their economic and fiscal situations. The Firm is closely monitoring its exposures to these five countries. Aggregate net exposures to these five countries as measured under the Firm's internal approach was less than \$20.0 billion at June 30, 2010; no individual country represented a majority of the net exposure and sovereign exposure represented less than half the aggregate net exposure. The Firm currently believes its exposure to these five countries is modest relative to the Firm's overall risk exposures and is manageable given the size and types of exposures to each of the countries and the diversification of the aggregate exposure. The Firm continues to conduct business and support client activity in these countries and, therefore, the Firm's aggregate net exposures may vary over time.

As part of its ongoing country risk management process, the Firm monitors exposure to emerging market countries, and utilizes country stress tests to measure and manage the risk of extreme loss associated with a sovereign crisis. There is no common definition of emerging markets, but the Firm generally includes in its definition those countries whose sovereign debt ratings are equivalent to "A+" or lower. The table below presents the Firm's exposure to its top ten emerging markets countries based on its internal measurement approach. The selection of countries is based solely on the Firm's largest total exposures by country and does not represent its view of any actual or potentially adverse credit conditions.

Top 10 emerging markets country exposure

At June 30, 2010 (in billions)	Cross-border			Total	Local ^(d)	Total exposure

- (a) Lending includes loans and accrued interest receivable, interest-bearing deposits with banks, acceptances, other monetary assets, issued letters of credit net of participations, and undrawn commitments to extend credit.
- (b) Trading includes: (1) issuer exposure on cross-border debt and equity instruments, held both in trading and investment accounts and adjusted for the impact of issuer hedges, including credit derivatives; and (2) counterparty exposure on derivative and foreign exchange contracts, as well as security financing trades (resale agreements and securities borrowed).
- (c) Other represents mainly local exposure funded cross-border, including capital investments in local entities.
- (d) Local exposure is defined as exposure to a country denominated in local currency and booked locally. Any exposure not meeting these criteria is defined as cross-border exposure.

CONSUMER CREDIT PORTFOLIO

JPMorgan Chase's consumer portfolio consists primarily of residential mortgages, home equity loans, credit cards, auto loans, student loans and business banking loans. Included within the portfolio are home equity loans and lines of credit secured by junior liens, and mortgage loans with interest-only payment options to predominantly prime borrowers, as well as certain payment-option loans acquired from Washington Mutual that may result in negative amortization. The Firm's primary focus is on serving the prime consumer credit market. The Firm has never originated option ARMs.

A substantial portion of the consumer loans acquired in the Washington Mutual transaction were identified as credit-impaired based on an analysis of high-risk characteristics, including product type, LTV ratios, FICO scores and delinquency status. These purchased credit-impaired loans are accounted for on a pool basis, and the pools are considered to be performing. At the time of the acquisition, these loans were recorded at fair value, including an estimate of losses that were expected to be incurred over the estimated remaining lives of the loan pools. Therefore, no allowance for loan losses was recorded for these loans as of the transaction date. As part of its ongoing assessment of these loans, management evaluates whether higher expected future credit losses for certain pools of the purchased credit-impaired portfolio would result in a decrease in expected future principal cash flows for these pools. No allowance was added in the second quarter of 2010. The total allowance for loan losses on the purchased credit-impaired portfolio added since the beginning of the third quarter of 2009 is \$2.8 billion.

The credit performance of the consumer portfolio across the entire product spectrum appears to have stabilized but remains under stress, as high unemployment and weak overall economic conditions continue to put pressure on the number of loans charged off, and weak housing prices continue to negatively affect the severity of loss recognized on real estate loans that default. Delinquencies and nonperforming loans remain elevated, but the delinquency trend is showing continued stability or improvement, with improvement continuing in early-stage delinquencies (30-89 days delinquent) across most products. Late-stage real estate delinquencies (150+ days delinquent) remain elevated. The elevated level of these credit quality metrics is due, in part, to loss-mitigation activities currently being undertaken and elongated foreclosure processing timelines. Losses related to these loans continued to be recognized in accordance with the Firm's standard charge-off practices, but some delinquent loans that would have otherwise been foreclosed upon remain in the mortgage and home equity loan portfolios.

Since mid-2007, the Firm has taken actions to reduce risk exposure to consumer loans by tightening both underwriting and loan qualification standards, as well as eliminating certain products and channels for residential real estate lending. The tightening of underwriting criteria for auto loans has resulted in the reduction of both extended-term and high LTV financing. In addition, new originations of private student loans are limited to school-certified loans, the majority of which include a qualified co-borrower.

As a further action to reduce risk associated with lending-related commitments, the Firm has reduced or canceled certain lines of credit as permitted by law. For example, the Firm may reduce or close home equity lines of credit when there are significant decreases in the value of the underlying property or when there has been a demonstrable decline in the creditworthiness of the borrower. Also, the Firm typically closes credit card lines when the borrower is 60 days or more past due. Finally, certain inactive credit card lines have been closed, and a number of active credit card lines have been reduced for risk management purposes.

The following tables present managed consumer credit-related information (including RFS, CS and residential real estate loans reported in the Corporate/Private Equity segment) for the dates indicated. For further information about the Firm's nonaccrual and charge-off accounting policies, see Note 13 on pages 145-150 of this Form 10-Q.

(a) Represents loans where JPMorgan Chase holds the first security interest on the property.

(b) Represents loans where JPMorgan Chase holds a security interest that is subordinate in rank to other liens.

(c) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts and certain other consumer loan securitization entities, primarily mortgage-related. As a result, related receivables are now recorded as loans on the Consolidated Balance Sheet. As a result of the consolidation of the securitization trusts, reported and managed basis are equivalent for periods beginning after January 1, 2010. For further discussion, see Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-19 of this Form 10-Q.

(d) Excluded operating lease-related assets of \$3.4 billion and \$2.9 billion at June 30, 2010, and December 31, 2009, respectively.

(e) Includes \$1.0 billion of loans at December 31, 2009, held by the WMMT, which were consolidated onto the Firm's Consolidated Balance Sheets at fair value during the second quarter of 2009. Such loans had been fully repaid or charged off as of June 30, 2010. See Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report.

(f) Includes billed finance charges and fees net of an allowance for uncollectible amounts.

(g) Loans securitized are defined as loans that were sold to nonconsolidated securitization trusts and were not included in reported loans. For a further discussion of credit card securitizations, see CS on pages 36-40 of this Form 10-Q.

(h) The credit card and home equity lending-related commitments represent the total available lines of credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit would be used at the same time. For credit card commitments and home equity commitments (if certain conditions are met), the Firm can reduce or cancel these lines of credit by providing the borrower prior notice or, in some cases, without notice as permitted by law.

(i) Charge-offs are not recorded on purchased credit-impaired loans until actual losses exceed estimated losses that were recorded as purchase accounting adjustments at the time of acquisition. To date, no charge-offs have been recorded for these loans.

(j) At June 30, 2010, and December 31, 2009, nonperforming loans exclude: (1) mortgage loans insured by U.S. government agencies of \$10.1 billion and \$9.0 billion, respectively, that are 90 days past due and accruing at the guaranteed reimbursement rate; and (2) student loans that are 90 days past due and still accruing, which are insured by U.S. government agencies under the FFELP, of \$447 million and \$542 million, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance. Under guidance issued by the FFIEC, credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specified event (e.g., bankruptcy of the borrower), whichever is earlier.

(k) Excludes purchased credit-impaired loans that were acquired as part of the Washington Mutual transaction, which are accounted for on a pool basis. Since each pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows, the past due status of the pools, or that of individual loans within the pools, is not meaningful. Because the Firm is recognizing interest income on each pool of loans, they are all considered to be performing.

(l) Average consumer loans held-for-sale and loans at fair value were \$1.9 billion and \$2.8 billion for the quarters ended June 30, 2010 and 2009, respectively, and \$2.4 billion and \$2.9 billion for year-to-date 2010 and 2009, respectively. These amounts were excluded when calculating the net charge-off rates.

[Table of Contents](#)

The following table presents consumer nonperforming assets by business segment as of June 30, 2010, and December 31, 2009.

Consumer nonperforming assets

(in millions)	June 30, 2010				December 31, 2009			
	Nonperforming loans	Assets acquired in loan satisfactions		Nonperforming assets	Nonperforming loans	Assets acquired in loan satisfactions		Nonperforming assets

- (a) At June 30, 2010, and December 31, 2009, nonperforming loans and assets excluded: (1) mortgage loans insured by U.S. government agencies of \$10.1 billion and \$9.0 billion, respectively, that are 90 days past due and accruing at the guaranteed reimbursement rate; (2) real estate owned insured by U.S. government agencies of \$1.4 billion and \$579 million, respectively; and (3) student loans that are 90 days past due and still accruing, which are insured by U.S. government agencies under the FFELP, of \$447 million and \$542 million, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance. Under guidance issued by the FFIEC, credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specified event (e.g., bankruptcy of the borrower), whichever is earlier.
- (b) Excludes purchased credit-impaired loans that were acquired as part of the Washington Mutual transaction, which are accounted for on a pool basis. Since each pool is accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows, the past-due status of the pools, or that of individual loans within the pools, is not meaningful. Because the Firm is recognizing interest income on each pool of loans, they are all considered to be performing.

Effective January 1, 2010, the Firm adopted new guidance that amended the accounting for consolidation of VIEs. Upon adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts and certain other consumer loan securitization entities. The following table summarizes the impact on consumer loans at adoption.

Reported loans

(in millions)	January 1, 2010
Prime mortgage	\$ 1,477
Subprime mortgage	1,758
Option ARMs	381
Auto loans	218
Student loans	1,008
Credit card(a)	84,663
Total increase in consumer loans	\$ 89,505

- (a) Represents the impact of adoption of the new consolidation standard related to VIEs on reported loans for Firm-sponsored credit card securitization trusts. As a result of the consolidation of the securitization trusts, reported and managed basis are equivalent for periods beginning after January 1, 2010. For further discussion, see Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-19 of this Form 10-Q.

Portfolio analysis

The following discussion relates to the specific loan and lending-related categories within the consumer portfolio. Purchased credit-impaired loans are excluded from individual loan product discussions and are addressed separately below.

Home equity: Home equity loans at June 30, 2010, were \$94.8 billion, compared with \$101.4 billion at December 31, 2009. The decrease primarily reflected loan paydowns and charge-offs. Both senior lien and junior lien nonperforming loans decreased from year-end as a result of continuing improvement in early-stage delinquencies. Junior lien net charge-offs have declined from the prior year, but remain extremely high. Delinquencies continued to show improvement, albeit at a slower pace than the prior quarter, but remain elevated. In addition to delinquent accounts, the Firm monitors current junior lien loans where the borrower has a first mortgage loan which is either delinquent or has been modified. The portfolio contained an estimated \$4.0 billion of such junior lien loans which are considered to be at higher risk for delinquency and this risk has been considered in establishing the allowance for loan losses at June 30, 2010.

Mortgage: Mortgage loans at June 30, 2010, which include prime mortgages, subprime mortgages, option ARMs acquired in the Washington Mutual transaction and mortgage loans held-for-sale, were \$87.9 billion, compared with \$88.3 billion at December 31, 2009. The decrease is due to portfolio runoff, partially offset by the addition of loans to the balance sheet as a result of the adoption of the new consolidation guidance related to VIEs. Net charge-offs have decreased from the prior year; however, losses continue to remain elevated.

[Table of Contents](#)

Prime mortgages were \$66.7 billion, compared with \$67.3 billion at December 31, 2009. The decrease was due to paydowns and charge-offs on delinquent loans, partially offset by the addition of loans as a result of the adoption of the new consolidation guidance related to VIEs. Delinquencies continued to show improvement; however, nonperforming assets remain elevated as a result of ongoing trial modification activity and foreclosure processing delays.

Subprime mortgages were \$12.6 billion, relatively flat compared with December 31, 2009, due to the addition of loans as a result of the adoption of the new consolidation guidance related to VIEs, offset by paydowns and charge-offs on delinquent loans. Both early-stage and late-stage delinquencies are showing improvement but remain elevated.

Option ARMs were \$8.6 billion, relatively flat compared with December 31, 2009, due to the addition of loans as a result of the adoption of the new consolidation guidance related to VIEs, offset by paydowns in the portfolio. The option ARM portfolio represents less than 5% of the non-purchased credit-impaired residential real estate loans and is primarily comprised of loans with low LTV ratios and high borrower FICOs. Accordingly, the Firm currently expects substantially lower losses on this portfolio when compared with the purchased credit-impaired option ARM portfolio. As of June 30, 2010, approximately 62% of option ARM borrowers elected to make an interest-only or minimum payment. The cumulative amount of unpaid interest added to the unpaid principal balance due to negative amortization of option ARMs was \$68 million and \$78 million at June 30, 2010, and December 31, 2009, respectively. Assuming current market interest rates, the Firm would expect the following balance of current loans to experience a payment recast: \$721 million in 2010, \$375 million in 2011 and \$611 million in 2012. New originations of option ARMs were discontinued by Washington Mutual prior to the date of JPMorgan Chase's acquisition of the banking operations of Washington Mutual.

Auto loans: As of June 30, 2010, auto loans were \$47.5 billion, compared with \$46.0 billion at December 31, 2009. Delinquent loans were lower than in the prior year, while provision expense decreased due to favorable loss severities as a result of higher used-car prices nationwide. The auto loan portfolio reflects a high concentration of prime quality credits.

Credit card: Credit card receivables (which include receivables in its Firm-sponsored credit card securitization trust that were not reported on the Consolidated Balance Sheets prior to January 1, 2010) were \$143.0 billion at June 30, 2010, a decrease of \$20.4 billion from year-end 2009, due to the decline in lower-yielding promotional balances and the Washington Mutual portfolio runoff.

The 30-day delinquency rate decreased to 4.96% at June 30, 2010, from 6.28% at December 31, 2009, while the net charge-off rate increased to 10.20% for the second quarter of 2010, from 10.03% for the second quarter of 2009. Charge-offs were negatively affected by the current weak economic environment, especially in metropolitan statistical areas ("MSAs") experiencing the greatest housing price depreciation and highest unemployment, and by the credit performance of loans acquired in the Washington Mutual transaction. The delinquency trend is showing improvement, especially within early stage delinquencies. Provision expense reflected a \$1.5 billion decrease in the allowance for loan losses in the second quarter of 2010, reflecting lower estimated losses, primarily related to the improvement in the delinquent loan trend and lower levels of outstandings. The credit card portfolio continues to reflect a well-seasoned, largely rewards-based portfolio that has good U.S. geographic diversification.

Credit card receivables, excluding the Washington Mutual portfolio, were \$127.4 billion at June 30, 2010, compared with \$143.8 billion at December 31, 2009. The 30-day delinquency rate was 4.48% at June 30, 2010, down from 5.52% at December 31, 2009; the net charge-off rate, excluding the Washington Mutual portfolio, increased to 9.02% for the second quarter of 2010 from 8.97% in the second quarter of 2009. Excluding the impact of the payment holiday program offered in the second quarter of 2009, the net charge-off rate is down from the prior two quarters.

Credit card receivables in the Washington Mutual portfolio were \$15.6 billion at June 30, 2010, compared with \$19.7 billion at December 31, 2009. The Washington Mutual portfolio's 30-day delinquency rate was 8.86% at June 30, 2010, compared with 12.72% at December 31, 2009; the latter excludes the impact at December 31, 2009, of the consolidation of the WMMT in the second quarter of 2009 as a result of certain actions taken at that time. The net charge-off rate in the second quarter of 2010 was 19.53%, compared with 19.17% in the second quarter of 2009, excluding the impact of the purchase accounting adjustments related to the consolidation of the WMMT in the second quarter of 2009.

All other: All other loans primarily include business banking loans (which are highly collateralized loans, often with personal loan guarantees), student loans, and other secured and unsecured consumer loans. As of June 30, 2010, other loans, including loans held-for-sale, were \$32.6 billion, compared with \$33.6 billion at December 31, 2009.

Purchased credit-impaired: Purchased credit-impaired loans were \$76.9 billion at June 30, 2010, compared with \$81.2 billion at December 31, 2009. This portfolio represents loans acquired in the Washington Mutual transaction that were recorded at fair value at the time of acquisition. The fair value of these loans included an estimate of credit losses expected to be realized over the remaining lives of the loans, and therefore no allowance for loan losses was recorded for these loans as of the acquisition date.

The Firm regularly updates the amount of expected loan principal and interest cash flows to be collected for these loans. Probable decreases in expected loan principal cash flows trigger the recognition of impairment through the provision for loan losses. Probable and significant increases in expected loan principal cash flows would first trigger the reversal of any allowance for loan losses. Any remaining increase in the expected principal cash flows would be recognized prospectively in interest income over the remaining lives of the underlying loans.

During the second quarter of 2010, the Firm did not recognize any impairment as a result of updating its assessment of expected cash flows for these purchased credit-impaired pools. As a result of impairment recognized in prior periods, the Firm maintains an allowance for loan losses for the prime mortgage and option ARM purchased credit-impaired pools of \$1.8 billion and \$1.0 billion, respectively, at June 30, 2010. The credit performance of the other pools has generally been consistent with the estimate of losses at the acquisition date. Accordingly, no impairment for these other pools has been recognized.

Concentrations of credit risk — consumer loans other than purchased credit-impaired loans

Following is tabular information and, where appropriate, supplemental discussions about certain concentrations of credit risk for the Firm's consumer loans, other than purchased credit-impaired loans, including:

- Geographic distribution of loans, including certain residential real estate loans with high LTV ratios; and
- Loans that are 30+ days past due.

[Table of Contents](#)

The following tables present the geographic distribution of managed consumer credit outstandings by product as of June 30, 2010, and December 31, 2009, excluding purchased credit-impaired loans.

Consumer loans by geographic region

June 30, 2010 (in billions)	Home equity- senior lien	Home equity- junior lien	Prime mortgage	Subprime mortgage	Option ARMs	Total home loan portfolio	Auto	Card- reported	All other loans	Total consumer loans- reported	Card loans- securitized ^(b)	Total consumer loans- managed

(a) Includes prime mortgage loans repurchased from Ginnie Mae pools, which are insured by U.S. government agencies, of \$12.0 billion and \$10.4 billion at June 30, 2010, and December 31, 2009, respectively. Prior period amounts have been revised to conform to the current period presentation. See further discussion of loans repurchased from Ginnie Mae pools in Repurchase liability on pages 58-60 of this Form 10-Q.

(b) Loans securitized are defined as loans that were sold to nonconsolidated securitization trusts and were not included in reported loans at December 31, 2009. For further discussion of credit card securitizations, see Note 15 on pages 151-163 of this Form 10-Q.

[Table of Contents](#)

The following table presents the geographic distribution of certain residential real estate loans with current estimated LTV ratios in excess of 100% as of June 30, 2010, and December 31, 2009, excluding purchased credit-impaired loans acquired in the Washington Mutual transaction. The estimated collateral values used to calculate the current estimated LTV ratios in the following table were derived from a nationally recognized home price index measured at the MSA level. Because home price indices can have wide variability, and such derived real estate values do not represent actual appraised loan-level collateral values, the resulting ratios are necessarily imprecise and should therefore be viewed as estimates.

Geographic distribution of residential real estate loans with current estimated LTVs > 100% (a)

June 30, 2010 (in billions, except ratios)	Home equity- junior lien ^(c)	Prime mortgage ^(d)	Subprime mortgage	Total	% of total loans ^(e)

All other	6.6	1.7	1.2	9.5	15
Total LTV > 100%	\$ 19.9	\$ 10.4	\$ 3.5	\$ 33.8	25%
As a percentage of total loans	29%	19%	28%	25%	
Total portfolio average LTV at origination	73	70	78		
Total portfolio average current estimated LTV ^(b)	90	81	90		

December 31, 2009 (in billions, except ratios)	Home equity- junior lien ^(c)	Prime mortgage ^(d)	Subprime mortgage	Total	% of total loans ^(e)
California	\$ 6.7	\$ 5.7	\$ 1.0	\$ 13.4	36%
New York	1.7	0.3	0.2	2.2	10
Arizona	2.4	0.7	0.2	3.3	63
Florida	2.5	2.5	1.2	6.2	57
Michigan	1.3	0.4	0.2	1.9	61
All other	6.9	1.6	1.3	9.8	15
Total LTV > 100%	\$ 21.5	\$ 11.2	\$ 4.1	\$ 36.8	26%
As a percentage of total loans	29%	20%	33%	26%	
Total portfolio average LTV at origination	74	71	79		
Total portfolio average current estimated LTV ^(b)	90	81	95		

- (a) Home equity — junior lien, prime mortgage and subprime mortgage loans with current estimated LTVs greater than 80% up to and including 100% were \$16.7 billion, \$13.4 billion and \$3.3 billion, respectively, at June 30, 2010, and \$17.9 billion, \$15.0 billion and \$3.7 billion, respectively, at December 31, 2009.
- (b) The average current estimated LTV ratio reflects the outstanding balance at the balance sheet date, divided by the estimated current property value. Current property values are estimated based on home valuation models utilizing nationally recognized home price index valuation estimates.
- (c) Represents combined LTV, which considers all available lien positions related to the property. All other products are presented without consideration of subordinate liens on the property. Prior period amounts have been revised to conform to the current period presentation.
- (d) Excludes mortgage loans insured by the U.S. government agencies of \$6.8 billion and \$5.0 billion at June 30, 2010, and December 31, 2009, respectively. Prior period amounts have been revised to conform to the current period presentation.
- (e) Represents total loans of the product types noted in this table by geographic location, excluding mortgage loans insured by U.S. government agencies.

The consumer credit portfolio is geographically diverse. The greatest concentration of loans is in California. Excluding mortgage loans insured by U.S. government agencies, California represents 17% of total managed consumer loans and 25% of total residential real estate loans at both June 30, 2010, and December 31, 2009. Of the total managed consumer loan portfolio, excluding mortgage loans insured by U.S. government agencies, \$162.4 billion, or 41%, is concentrated in California, New York, Arizona, Florida and Michigan at June 30, 2010, compared with \$174.5 billion, or 41%, at December 31, 2009.

Declining home prices have had a significant impact on the collateral value underlying the Firm's residential real estate loan portfolio. In general, the delinquency rate for loans with high LTV ratios is greater than the delinquency rate for loans in which the borrower has equity in the collateral. While a large portion of the loans with estimated LTV ratios greater than 100% continue to pay and are current, the continued willingness and ability of these borrowers to pay remains uncertain. Nonperforming loans in the residential real estate portfolio totaled \$9.4 billion at June 30, 2010, of which 76% were greater than 150 days past due; this compared with total residential real estate nonperforming loans of \$9.6 billion at December 31, 2009, of which 64% were greater than 150 days past due. In the aggregate, the unpaid principal balance of these loans has been charged down by approximately 32% and 36% to estimated collateral value at June 30, 2010, and December 31, 2009, respectively.

Consumer 30+ day delinquency information

(in millions, except ratios)	30+ day delinquent loans		30+ day delinquency rate	
	June 30, 2010	December 31, 2009	June 30, 2010	December 31, 2009
Consumer loans — excluding purchased credit-impaired loans^(a)				
Home equity — senior lien	\$ 725	\$ 833	2.80%	3.04%
Home equity — junior lien	1,746	2,515	2.53	3.40
Prime mortgage	5,221 ^(d)	5,532 ^(d)	7.84 ^(f)	8.21 ^(f)
Subprime mortgage	3,349	4,232	26.59	33.79
Option ARMs	550	438	6.40	5.13
Auto loans	446	750	0.94	1.63
Credit card — reported ^(b)	7,087	6,093	4.96	7.73
All other loans	1,324 ^(e)	1,306 ^(e)	4.06	3.91
Total consumer loans — excluding purchased credit-impaired loans — reported	\$ 20,448	\$ 21,699	5.04%	6.23%
Credit card — securitized ^{(b)(c)}	NA	4,174	NA	4.93
Total consumer loans — excluding purchased credit-impaired loans — managed^(b)	\$ 20,448	\$ 25,873	5.04%	5.98%
Memo: Credit card — managed^(b)	\$ 7,087	\$ 10,267	4.96%	6.28%

- (a) The delinquency rate for purchased credit-impaired loans, which is based on the unpaid principal balance, was 27.91% and 27.79% at June 30, 2010, and December 31, 2009, respectively.
- (b) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts and certain other consumer loan securitization entities, primarily mortgage-related. As a result, related assets are now recorded as loans on the Consolidated Balance Sheet. As a result of the consolidation of the credit card securitization trusts, reported and managed basis are equivalent for periods beginning after January 1, 2010. For further discussion, see Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-19 of this Form 10-Q.
- (c) Loans securitized are defined as loans that were sold to nonconsolidated securitization trusts and were not included in reported loans at December 31, 2009. For a further discussion of credit card securitizations, see CS on pages 36-40 of this Form 10-Q.
- (d) Excludes 30+ day delinquent mortgage loans that are insured by U.S. government agencies of \$10.9 billion and \$9.7 billion at June 30, 2010, and December 31, 2009, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally.
- (e) Excludes 30+ day delinquent loans that are 30 days or more past due and still accruing, which are insured by U.S. government agencies under the FFELP, of \$988 million and \$942 million at June 30, 2010, and December 31, 2009, respectively. These amounts are excluded as reimbursement of insured amounts is proceeding normally.
- (f) The denominator for the calculation of the 30+ day delinquency rate includes: (1) residential real estate loans reported in the Corporate/Private Equity segment; and (2) mortgage loans insured by U.S. government agencies. The 30+ day delinquency rate excluding these loan balances was 11.24% at both June 30, 2010, and December 31, 2009.

Consumer 30+ day delinquencies have decreased to 5.04% of the consumer loan portfolio at June 30, 2010, compared with 5.98% at December 31, 2009, driven predominantly by a \$3.2 billion decrease in CS delinquencies as well as a \$2.0 billion decrease in residential real estate delinquencies. While early stage delinquencies (30-89 days delinquent) in the residential real estate portfolios have shown improvement since December 31, 2009, late stage delinquencies (150+ days delinquent) remain elevated, due in part to loss mitigation activities and elongated foreclosure processing timelines. Losses related to the residential real estate portfolio continue to be recognized in accordance with the Firm's normal charge-off practices; as such, these loans are reflected at their estimated collateral value.

Concentrations of credit risk — purchased credit-impaired loans

The following table presents the current estimated LTV ratio, as well as the ratio of the carrying value of the underlying loans to the current estimated collateral value, for purchased credit-impaired loans. Because such loans were initially measured at fair value, the ratio of the carrying value to the current estimated collateral value will be lower than the current estimated LTV ratio, which is based on the unpaid principal balance. The estimated collateral values used to calculate these ratios were derived from a nationally recognized home price index measured at the MSA level. Because home price indices can have wide variability, and such derived real estate values do not represent actual appraised loan-level collateral values, the resulting ratios are necessarily imprecise and should therefore be viewed as estimates.

LTV ratios and ratios of carrying values to current estimated collateral values — purchased credit-impaired

June 30, 2010 (in billions, except ratios)	Unpaid principal balance ^(a)	Current estimated LTV ratio ^(b)	Carrying value ^(d)	Ratio of carrying value to current estimated collateral value
Option ARMs	\$ 34.6	112%	\$ 27.3	85% ^(e)
Home equity	30.4	114 ^(c)	25.5	96
Prime mortgage	20.4	105	18.5	86 ^(e)
Subprime mortgage	8.5	109	5.6	73

December 31, 2009 (in billions, except ratios)	Unpaid principal balance ^(a)	Current estimated LTV ratio ^(b)	Carrying value ^(d)	Ratio of carrying value to current estimated collateral value
Option ARMs	\$ 37.4	113%	\$ 29.0	86% ^(e)
Home equity	32.9	115 ^(c)	26.5	93
Prime mortgage	22.0	106	19.7	90 ^(e)
Subprime mortgage	9.0	110	6.0	73

(a) Represents the contractual amount of principal owed at June 30, 2010, and December 31, 2009.

(b) Represents the aggregate unpaid principal balance of loans divided by the estimated current property value. Current property values are estimated based on home valuation models utilizing nationally recognized home price index valuation estimates.

(c) Represents current estimated combined LTV, which considers all available lien positions related to the property. All other products are presented without consideration of subordinate liens on the property. Prior period amounts have been revised to conform to the current period presentation.

(d) Carrying values include the effect of fair value adjustments that were applied to the consumer purchased credit-impaired portfolio at the date of acquisition.

(e) As of June 30, 2010, and December 31, 2009, the ratios of the carrying value to current estimated collateral value are net of the allowance for loan losses of \$1.8 billion and \$1.1 billion for the prime mortgage pool, respectively, and \$1.0 billion and \$491 million for the option ARM pool, respectively.

Purchased credit-impaired loans in the states of California and Florida represented 54% and 11%, respectively, of total purchased credit-impaired loans at both June 30, 2010, and December 31, 2009. The current estimated LTV ratios were 117% and 133% for California and Florida loans, respectively, at June 30, 2010, compared with 118% and 136%, respectively, at December 31, 2009. Loan concentrations in California and Florida, as well as the continued pressure on housing prices in those states, have contributed negatively to both the current estimated LTV ratio and the ratio of carrying value to current collateral value for loans in the purchased credit-impaired portfolio. While the carrying value of the purchased credit-impaired loans is below the current estimated collateral value of the loans, the ultimate performance of this portfolio is highly dependent on the borrowers' behavior and ongoing ability and willingness to continue to make payments on homes with negative equity as well as the cost of alternative housing.

Option ARM and prime purchased credit-impaired pools: Approximately 56% of option ARM borrowers elected to make an interest-only or minimum payment at June 30, 2010. The cumulative amount of unpaid interest added to the unpaid principal balance of option ARMs was \$1.6 billion and \$1.9 billion at June 30, 2010, and December 31, 2009, respectively. Assuming current market interest rates, the Firm would expect the following balance of current option ARM loans to experience a payment recast: \$2.1 billion in 2010, \$3.4 billion in 2011 and \$4.6 billion in 2012.

The option ARM and prime purchased credit-impaired pools continue to show some signs of stabilization and are performing within management's revised expectations. Accordingly, no impairment was recognized for the purchased credit-impaired prime mortgage or option ARM pools during the second quarter of 2010. Previously, management concluded as part of the Firm's regular assessment of these pools that it was probable that higher expected principal credit losses for the prime mortgage and option ARM purchased credit-impaired pools would result in a decrease in expected cash flows. As a result, an allowance for loan losses for impairment of the prime mortgage and option ARM pools has been recognized. As of June 30, 2010, the total allowance for loan losses for the prime mortgage and option ARM purchased credit-impaired pools was \$1.8 billion and \$1.0 billion, respectively.

Other purchased credit-impaired pools: The credit performance of the home equity and subprime purchased credit-impaired pools has generally been consistent with the estimate of losses at the acquisition date. Accordingly, no impairment for these pools has been recognized.

Table of Contents

The following table provides a summary of lifetime principal loss estimates included in both the nonaccretable difference and the allowance for loan losses. Principal charge-offs will not be recorded on these portfolios until the nonaccretable difference has been fully depleted.

(in millions)	Lifetime loss estimates ^(a)		LTD liquidation losses ^{(b)(c)}	
	June 30, 2010	December 31, 2009	June 30, 2010	December 31, 2009
Option ARMs	\$ 11,350	\$ 10,650	\$ 2,680	\$ 1,744
Home equity	13,138	13,138	7,701	6,060
Prime mortgage	5,020	4,240	1,158	794
Subprime mortgage	3,842	3,842	1,048	796
Total	\$ 33,350	\$ 31,870	\$ 12,587	\$ 9,394

- (a) Includes the original nonaccretable difference established in purchase accounting of \$30.5 billion for principal losses only. The remaining nonaccretable difference for principal losses only is \$17.9 billion and \$21.1 billion at June 30, 2010, and December 31, 2009, respectively. All increases in principal losses subsequent to the purchase date are reflected in the allowance for loan losses.
- (b) Realization of loss upon loan resolution.
- (c) If charge-offs were reported comparable to the non-purchased credit-impaired portfolio, life-to-date ("LTD") principal charge-offs would have been \$20.8 billion and \$16.7 billion at June 30, 2010, and December 31, 2009, respectively.

Loan modification activities

For additional information about consumer loan modification activities, including consumer loan modifications accounted for as troubled debt restructurings, see Note 13 on pages 145-150 of this Form 10-Q, and Note 13 on pages 192-196 of JPMorgan Chase's 2009 Annual Report.

Residential real estate loans: For both the Firm's on-balance sheet loans and loans serviced for others, more than 880,000 mortgage modifications have been offered to borrowers and nearly 245,000 have been approved since the beginning of 2009. Of these, approximately 193,000 have achieved permanent modification as of June 30, 2010.

The Firm is participating in the U.S. Treasury's MHA programs while continuing to expand its other loss-mitigation efforts for financially distressed borrowers who do not qualify for the U.S. Treasury's programs. The MHA programs include the Home Affordable Modification Program ("HAMP") and the Second Lien Modification Program ("2MP"); these programs mandate standard modification terms across the industry and provide incentives to borrowers, servicers and investors who participate. All of the Firm's loan-modification activities are intended to minimize economic loss to the Firm, while providing the borrower with an alternative to foreclosure and an affordable loan payment.

In July 2009, following the introduction of MHA, the Firm began to offer modifications under standard programs; prior to that time, residential real estate loan modifications were evaluated and offered on a case-by-case basis rather than being based on a standardized framework comparable to HAMP. The Firm completed its first permanent modifications under HAMP in September 2009. HAMP, as well as the Firm's other loss-mitigation programs, generally provide various concessions to financially troubled borrowers, including, but not limited to, term or payment extensions, interest rate reductions, and deferral of principal payments that would have otherwise been required under the terms of the original agreement. In certain limited circumstances, loan modifications include principal forgiveness, which has been minimal to-date.

In addition, JPMorgan Chase announced in March 2010 that it would be joining 2MP, with implementation occurring in phases beginning in May 2010. Under 2MP, homeowners will be offered a way to modify their second mortgages to make them more affordable when their first mortgage has been modified under HAMP. For amortizing second lien loans modified under 2MP, the interest rate will be reduced to 1%; the interest rate on interest-only second lien loans will be reduced to 2%. After five years, the interest rate on these modified second lien loans will reset to the then-current interest rate on the HAMP-modified first-lien.

When the Firm modifies home equity lines of credit in troubled debt restructurings, future lending commitments related to the modified loans are canceled as part of the terms of the modification. Except for home equity loans modified under 2MP where the borrower is current, borrowers must make at least three payments under the revised contractual terms during a trial modification and be successfully re-underwritten with income verification before a mortgage or home equity loan can be permanently modified.

For the 21,700 on-balance sheet loans modified under HAMP and the Firm's other loss-mitigation programs since July 1, 2009, 68% of permanent loan modifications have included interest rate reductions, 51% have included term or payment extensions and 14% have included principal deferment. The sum of the percentages of the types of loan modifications exceeds 100% because, in some cases, the modification of an individual loan includes more than one type of concession.

[Table of Contents](#)

The ultimate success of these modification programs and their impact on reducing credit losses remains uncertain given the short period of time since modification. The primary indicator used by management to monitor the success of these programs is the rate at which the modified loans redefault. Modification redefault rates are affected by a number of factors, including the type of loan modified, the borrower's overall ability and willingness to repay the modified loan, the LTV ratio of the property and other macroeconomic factors. Modifications of serviced mortgage loans completed after July 1, 2009, whether under HAMP or under the Firm's other modification programs, differ from modifications completed under prior programs in that they are fully underwritten after a successful trial payment period of at least 3 months. More than 85% of the modifications completed since July 1, 2009 were completed in 2010 with 41% completed as recently as the second quarter. Performance metrics to date show redefault rates of 20-30%. While these rates compare favorably to equivalent metrics for modifications completed under prior programs, ultimate redefault rates will remain uncertain until modified loans have seasoned.

The following table presents information as of June 30, 2010, and December 31, 2009, relating to restructured on-balance sheet residential real estate loans for which concessions have been granted to borrowers experiencing financial difficulty. Modifications of purchased credit-impaired loans continue to be accounted for and reported as purchased credit-impaired loans, and the impact of the modification is incorporated into the Firm's quarterly assessment of whether a probable and/or significant change in estimated future cash flows has occurred. Modifications of loans other than purchased credit-impaired loans are generally accounted for and reported as troubled debt restructurings.

Restructured residential real estate loans

(in millions)	June 30, 2010		December 31, 2009	
	On-balance sheet loans	Nonperforming on-balance sheet loans ^(d)	On-balance sheet loans	Nonperforming on-balance sheet loans ^(d)
Restructured residential real estate loans — excluding purchased credit-impaired loans^{(a)(b)}				
Home equity — senior lien	\$ 220	\$ 46	\$ 168	\$ 30
Home equity — junior lien	253	34	222	43
Prime mortgage	1,421	567	634	243
Subprime mortgage	2,575	986	1,998	598
Option ARMs	65	19	8	6
Total restructured residential real estate loans — excluding purchased credit-impaired loans	\$ 4,534	\$ 1,652	\$ 3,030	\$ 920
Restructured purchased credit-impaired loans^(c)				
Home equity	\$ 436	NA	\$ 453	NA
Prime mortgage	2,276	NA	1,526	NA
Subprime mortgage	2,934	NA	1,954	NA
Option ARMs	4,839	NA	2,972	NA
Total restructured purchased credit-impaired loans	\$ 10,485	NA	\$ 6,905	NA

(a) Amounts represent the carrying value of restructured residential real estate loans.

(b) Excludes \$1.7 billion and \$296 million of loans at June 30, 2010, and December 31, 2009, respectively, that were repurchased from Ginnie Mae pools and modified subsequent to repurchase. When such loans reperform subsequent to modification they are generally sold back into Ginnie Mae loan pools. Modified loans that do not reperform will become subject to foreclosure.

(c) Amounts represent the unpaid principal balance of restructured purchased credit-impaired loans.

(d) Nonperforming loans modified in a troubled debt restructuring may be returned to accrual status when repayment is reasonably assured and the borrower has made a minimum of six payments under the new terms.

Excluding purchased credit-impaired loans, 21% of restructured residential real estate loans are greater than 30 days delinquent, which is within the Firm's expectations.

Credit card loans: JPMorgan Chase has also modified the terms of credit card loan agreements with borrowers who have experienced financial difficulty. Such modifications typically include reducing the interest rate on the card and, in most cases, involve placing the customer on a fixed payment plan not exceeding 60 months; in substantially all cases, the Firm cancels the customer's available line of credit on the credit card. If the cardholder does not comply with the modified payment terms, the credit card loan agreement generally reverts back to its original payment and interest rate terms, resulting in the loan being excluded from modified loans. Assuming that those borrowers do not begin to perform in accordance with those original payment terms, the loans continue to age and become subject to the Firm's standard charge-off policies. Substantially all modifications of credit card loans performed under the Firm's existing modification programs are considered to be troubled debt restructurings. At June 30, 2010, and December 31, 2009, the Firm had \$9.3 billion and \$5.1 billion, respectively, of on-balance sheet credit card loans outstanding for borrowers enrolled in a credit card modification program. The increase in modified credit card loans outstanding from December 31, 2009, to June 30, 2010, is primarily attributable to previously-modified loans held in Firm-sponsored credit card securitization trusts being consolidated as a result of adopting the new consolidation guidance. Consistent with the Firm's policy, all credit card

loans typically remain on accrual status. Based on the Firm's historical experience, the Firm expects that a significant portion of the borrowers will not ultimately comply with the modified payment terms.

Real estate owned ("REO")

As part of the residential real estate foreclosure process, loans are written down to the fair value of the underlying real estate asset, less costs to sell, at acquisition. Typically, any further gains or losses on REO assets are recorded as part of other income. In those instances where the Firm gains ownership and possession of individual properties at the completion of the foreclosure process, these REO assets are managed for prompt sale and disposition at the best possible economic value. Operating expense, such as real estate taxes and maintenance, are charged to other expense. REO assets were up slightly compared with December 31, 2009. It is anticipated that REO assets will increase over the next several quarters, as loans moving through the foreclosure process are expected to increase.

Portfolio transfers

The Firm regularly evaluates market conditions and overall economic returns and makes an initial determination as to whether new originations will be held-for-investment or sold within the foreseeable future. The Firm also periodically evaluates the expected economic returns of previously originated loans under prevailing market conditions to determine whether their designation as held-for-sale or held-for-investment continues to be appropriate. When the Firm determines that a change in this designation is appropriate, the loans are transferred to the appropriate classification. Since the second half of 2007, all new prime mortgage originations that cannot be sold to U.S. government agencies and U.S. government-sponsored enterprises have been designated as held-for-investment. Prime mortgage loans originated with the intent to sell are accounted for at fair value and classified as trading assets on the Consolidated Balance Sheets.

ALLOWANCE FOR CREDIT LOSSES

JPMorgan Chase's allowance for loan losses covers the wholesale (risk-rated) and consumer (primarily scored) loan portfolios and represents management's estimate of probable credit losses inherent in the Firm's loan portfolio. Management also computes an allowance for wholesale lending-related commitments using a methodology similar to that used for the wholesale loans.

Determining the appropriateness of the allowance is complex and requires judgment about the effect of matters that are inherently uncertain. Assumptions about unemployment rates, housing prices and overall economic conditions could have a significant impact on the Firm's assessment of loan quality. Subsequent evaluations of the loan portfolio, in light of then-prevailing factors, may result in significant changes in the allowances for loan losses and lending-related commitments in future periods. At least quarterly, the allowance for credit losses is reviewed by the Chief Risk Officer, the Chief Financial Officer and the Controller of the Firm, and discussed with the Risk Policy and Audit Committees of the Board of Directors of the Firm. As of June 30, 2010, JPMorgan Chase deemed the allowance for credit losses to be appropriate (i.e., sufficient to absorb losses inherent in the portfolio, including those not yet identifiable).

For a further discussion of the allowance for credit losses, see Critical Accounting Estimates Used by the Firm on page 100 and Note 14 on pages 150-151 of this Form 10-Q, and Allowance for Credit Losses on page 115, Critical Accounting Estimates Used by the Firm on pages 127-131, and Note 14 on pages 196-198 of JPMorgan Chase's 2009 Annual Report.

The allowance for credit losses was \$36.7 billion at June 30, 2010, an increase of \$4.2 billion from \$32.5 billion at year-end 2009. The increase was primarily due to the Firm's adoption of new consolidation guidance related to VIEs. As a result of the consolidation of certain securitization entities, the Firm established an allowance for loan losses of \$7.5 billion at January 1, 2010, primarily related to the receivables that had been held in such securitization trusts.

The consumer allowance for loan losses increased predominately due to the aforementioned impact of new consolidation guidance. Excluding the effect of this adoption, the consumer allowance decreased by \$1.2 billion from December 31, 2009. The decrease reflects a \$2.5 billion reduction in the allowance in CS, reflecting lower estimated losses primarily related to improved delinquency trends as well as lower levels of outstandings. This decrease was partly offset by a \$1.2 billion allowance increase in RFS during the first quarter, related to further estimated deterioration in the Washington Mutual prime and option ARM purchased credit-impaired pools. While RFS delinquencies and credit losses improved as compared to the prior quarter, they remain at elevated levels and a growing series of environmental, regulatory, and legislative challenges continue to present significant risk to credit performance, primarily in the Home Lending portfolio. After consideration of these factors, the RFS allowance for loan losses was essentially flat to the prior quarter.

The wholesale allowance for loan losses was down by \$2.0 billion from December 31, 2009. The decrease was primarily due to net repayments, loan sales, refinements to credit loss estimates, and improvement in the credit quality of the commercial and industrial portfolio.

[Table of Contents](#)

The allowance for lending-related commitments for both wholesale and consumer, which is reported in other liabilities, was \$912 million and \$939 million at June 30, 2010, and December 31, 2009. The decrease primarily reflects lower wholesale commitment levels.

The credit ratios in the table below are based on retained loan balances, which exclude loans held-for-sale and loans accounted for at fair value. As of June 30, 2010 and 2009, wholesale retained loans were \$213.0 billion and \$224.1 billion, respectively; and consumer retained loans were \$482.2 billion and \$447.0 billion, respectively. For the six months ended June 30, 2010 and 2009, average wholesale retained loans were \$210.3 billion and \$233.9 billion, respectively; and average consumer retained loans were \$498.5 billion and \$464.1 billion, respectively. Excluding held-for-sale loans, loans carried at fair value, and purchased credit-impaired consumer loans, the allowance for loan losses represented 5.34% of loans at June 30, 2010, compared with 5.01% at June 30, 2009.

(a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, its Firm-administered multi-seller conduits and certain other consumer loan securitization entities, primarily mortgage-related. As a result \$7.4 billion, \$14 million and \$127 million of allowance for loan losses were recorded on-balance sheet associated with the Firm-sponsored credit card securitization trusts, Firm-administered multi-seller conduits, and

Table of Contents

certain other consumer loan securitization entities, primarily mortgage-related, respectively. For further discussion, see Note 15 on pages 151-153 of this Form 10-Q.

- (b) Other predominantly includes a reclassification in 2009 related to the issuance and retention of securities from the Chase Issuance Trust.
- (c) Relates to risk-rated loans that have been placed on nonaccrual status and loans that have been modified in a troubled debt restructuring.
- (d) The asset-specific consumer allowance for loan losses includes troubled debt restructuring reserves of \$946 million and \$603 million at June 30, 2010 and 2009, respectively. Prior-period amounts have been reclassified from formula-based to conform with the current period presentation.
- (e) Includes all of the Firm's allowance for loan losses on credit card loans, including those for which the Firm has modified the terms of the loans for borrowers experiencing financial difficulty.
- (f) The Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance issued by the FFIEC, credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specified event (e.g., bankruptcy of the borrower), whichever is earlier. The allowance for loan losses on credit card loans was \$14.5 billion and \$8.8 billion as of June 30, 2010 and 2009, respectively.
- (g) Charge-offs are not recorded on purchased credit-impaired loans until actual losses exceed estimated losses recorded as purchase accounting adjustments at the time of acquisition. To date, no charge-offs have been recorded for any of these loans.
- (h) Excludes the impact of home lending purchased credit-impaired loans acquired as part of the Washington Mutual transaction. The allowance for loan losses on home lending purchased credit-impaired loans was \$2.8 billion and zero as of June 30, 2010 and 2009, respectively.

For more information on home lending purchased credit-impaired loans, see pages 87-89 and Note 13 on pages 149-150 of this Form 10-Q and pages 116-117 of JPMorgan Chase's 2009 Annual Report.

The calculation of the allowance for loan losses to total retained loans, excluding home lending purchased credit-impaired loans and loans held by the WMMT, is presented below.

June 30, (in millions, except ratios)	2010	2009
Allowance for loan losses	\$ 35,836	\$ 29,072
Less: Allowance for purchased credit-impaired loans	2,811	—
Adjusted allowance for loan losses	\$ 33,025	\$ 29,072
Total loans retained	\$695,210	\$ 671,116
Less: Firmwide purchased credit-impaired loans	76,995	90,628
Adjusted loans	\$618,215	\$ 580,488
Allowance for loan losses to ending loans, excluding purchased credit-impaired loans and loans held by the Washington Mutual Master Trust	5.34%	5.01%

The following table presents the allowance for credit losses by business segment at June 30, 2010, and December 31, 2009.

(in millions)	Allowance for credit losses					
	June 30, 2010			December 31, 2009		
	Loan losses	Lending-related commitments	Total	Loan losses	Lending-related commitments	Total
Investment Bank ^(a)	\$ 2,149	\$ 564	\$ 2,713	\$ 3,756	\$ 485	\$ 4,241

- (a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, its Firm-administered multi-seller conduits and certain other consumer loan securitization entities, primarily mortgage-related. As a result, related receivables are now recorded in loans on the Consolidated Balance Sheet. As a result, \$7.4 billion, \$14 million and \$127 million of allowance for loan losses were recorded on-balance sheet associated with the Firm-sponsored credit card securitization trusts, Firm-administered multi-seller conduits, and certain other consumer loan securitization entities, primarily mortgage-related, respectively. For further discussion, see Note 15 on pages 151-163 of this Form 10-Q.

Provision for credit losses

The provision for credit losses was \$3.4 billion for the three months ended June 30, 2010, down by \$6.3 billion or 65% from the prior-year provision. The total consumer provision for credit losses was \$3.9 billion, compared with \$8.5 billion in the prior year, reflecting a reduction in the allowance for credit losses as a result of improved delinquency trends and reduced net charge-offs across most consumer portfolios. The wholesale provision for credit losses was a benefit of \$572 million, compared with an expense of \$1.2 billion, reflecting a reduction in the allowance for credit losses due to net repayments, loan sales, refinements to credit loss estimates, and improvement in the credit quality of the commercial and industrial portfolio.

(a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, its Firm-administered multi-seller conduits and certain other consumer loan securitization entities, primarily mortgage-related. As a result of the consolidation of the credit card securitization trusts, reported and managed basis are comparable for periods beginning after January 1, 2010. For further discussion, see Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 15-19 of this Form 10-Q.

(b) Loans securitized are defined as loans that were sold to unconsolidated securitization trusts and were not included in reported loans. For further discussion of credit card securitizations, see Note 15 on pages 151-163 of this Form 10-Q.

MARKET RISK MANAGEMENT

For discussion of the Firm's market risk management organization, major market risk drivers and classification of risks, see pages 118-124 of JPMorgan Chase's 2009 Annual Report.

Value-at-risk ("VaR")

JPMorgan Chase's primary statistical risk measure, VaR, estimates the potential loss from adverse market moves in a normal market environment and provides a consistent cross-business measure of risk profiles and levels of diversification. VaR is used for comparing risks across businesses, for monitoring limits and as an input to economic-capital calculations. Each business day, as part of its risk management activities, the Firm undertakes a comprehensive VaR calculation that includes the majority of its market risks. These VaR results are reported to senior management.

To calculate VaR, the Firm uses historical simulation, based on a one-day time horizon and an expected tail-loss methodology, which measures risk across instruments and portfolios in a consistent and comparable way. The simulation is based on data for the previous 12 months. This approach assumes that historical changes in market values are representative of future changes; this assumption may not always be accurate, particularly when there is volatility in the market environment. For certain products, such as syndicated lending facilities and some mortgage-related securities for which price-based time series are not readily available, market-based data are used in conjunction with sensitivity factors to estimate the risk. It is likely that using an actual price-based time series for these products, if available, would affect the VaR results presented. In addition, certain risk parameters, such as correlation risk among certain instruments, are not fully captured in VaR.

The following section describes JPMorgan Chase's VaR measure using a 95% confidence level.

95% Confidence Level VaR

Total IB trading VaR by risk type, credit portfolio VaR and other VaR

Total IB and other VaR	\$ 93	\$ 66	\$ 133	\$ 214	\$ 172	\$ 263	\$ 114	\$ 182	\$ 95	\$ 250

- (a) Average VaR and period-end VaR were less than the sum of the VaR of the components described above, which is due to portfolio diversification. The diversification effect reflects the fact that the risks were not perfectly correlated. The risk of a portfolio of positions is therefore usually less than the sum of the risks of the positions themselves.
- (b) Designated as not meaningful ("NM"), because the minimum and maximum may occur on different days for different risk components, and hence it is not meaningful to compute a portfolio-diversification effect.

VaR Measurement

The Firm's IB trading and other VaR measure above includes substantially all trading activities in IB, as well as syndicated lending facilities that the Firm intends to distribute. Credit portfolio VaR includes VaR on derivative CVA, hedges of the CVA and MTM hedges of the retained loan portfolio, which are all reported in principal transactions revenue. Credit portfolio VaR does not include the retained loan portfolio, which is not MTM. In addition, IB and other VaR measure include certain positions used as part of the Firm's risk management function within the CIO and in the Mortgage Banking businesses. The CIO VaR includes positions, primarily in debt securities and credit products, used to manage the Firm's risk concentrations, including interest rate and credit risks arising from the Firm's ongoing business activities. The Mortgage Banking VaR includes the Firm's mortgage pipeline and warehouse loans, MSRs and all related hedges.

The VaR measure excludes the DVA taken on certain structured liabilities and derivatives to reflect the credit quality of the Firm. It also excludes certain activities such as Private Equity and principal investing (e.g., mezzanine financing, tax-oriented investments, etc.), as well as structural interest rate risk-management positions, capital management positions, and longer-term investments managed by the CIO. These longer-term positions are managed through the Firm's earnings-at-risk and other cash flow-monitoring processes rather than by using a VaR measure. Principal investing activities and Private Equity positions are managed using stress and scenario analysis.

2010 and 2009 second-quarter and year-to-date VaR results

As presented in the table on the previous page, total average IB and other VaR for the second quarter and first half of 2010 was \$93 million and \$95 million, respectively, compared with \$214 million in the second quarter and \$250 million in the first half of 2009. The decrease in average VaR for the second quarter and first half of 2010 was driven by a decline in the impact of the market volatility experienced in early 2009, as well as a reduction in exposures primarily in IB. Average total IB trading and credit portfolio VaR for the second quarter of 2010 was \$90 million, compared with \$178 million for the same prior year period. The decrease in IB trading VaR for the second quarter and first half of 2010 was driven by a decline in the impact of market volatility, as well as a reduction in exposures, primarily in the fixed income and equities risk components. CIO VaR averaged \$72 million for the second quarter of 2010, compared with \$111 million for the same prior year period. Mortgage Banking VaR averaged \$24 million for the current quarter, compared with \$43 million for the same prior year period. Decreases for the second quarter and first half of 2010 were again driven by the decline in market volatility.

Average IB and other VaR diversification benefit was 46% of the sum for the second quarter of 2010, compared with 29% of the sum for the second quarter of 2009. The Firm experienced a gain in diversification benefit as the market crisis receded, markets started to recover and positions changed such that correlations decreased. In general, over the course of the year, VaR exposures can vary significantly as positions change, market volatility fluctuates and diversification benefits change.

VaR back-testing

To evaluate the soundness of its VaR model the Firm conducts daily back-testing of VaR against the Firm's market risk-related revenue, which is defined as: the change in value of principal transactions revenue for IB and CIO; trading-related net interest income for IB, CIO and Mortgage Banking; IB brokerage commissions, underwriting fees or other revenue; revenue from syndicated lending facilities that the Firm intends to distribute; and mortgage fees and related income for the Firm's mortgage pipeline and warehouse loans, MSRs, and all related hedges. The daily firmwide market risk-related revenue excludes gains and losses from DVA and from longer-term corporate investments and Private Equity losses.

The following histogram illustrates the daily market risk-related gains and losses for IB, CIO and Mortgage Banking positions for the first six months of 2010. The chart shows that the Firm posted market risk-related gains on 121 out of 129 days in this period, with 10 days exceeding \$200 million. The inset graph looks at those days on which the Firm experienced losses and depicts the amount by which the 95% confidence level VaR exceeded the actual loss on each of those days. Losses were sustained on eight days during the six months ended June 30, 2010, none of which exceeded the VaR measure.

The following table provides information about the gross sensitivity of DVA to a one-basis-point increase in JPMorgan Chase’s credit spreads. This sensitivity represents the impact from a one-basis-point parallel shift in JPMorgan Chase’s entire credit curve. As credit curves do not typically move in a parallel fashion, the sensitivity multiplied by the change in spreads at a single maturity point may not be representative of the actual revenue recognized.

Debit valuation adjustment sensitivity

(in millions)		Change in revenue based upon a 1-basis-point increase in JPMorgan Chase credit spread
June 30, 2010		\$33
December 31, 2009		39

Economic value stress testing

While VaR reflects the risk of loss due to adverse changes in normal markets, stress testing captures the Firm's exposure to unlikely but plausible events in abnormal markets. The Firm conducts economic-value stress tests using multiple scenarios that assume credit spreads widen significantly, equity prices decline and significant changes in interest rates across the major currencies. Other scenarios focus on the risks predominant in individual business segments and include scenarios that focus on the potential for adverse movements in complex portfolios. Scenarios were updated more frequently in 2009 and, in some cases, redefined to reflect the significant market volatility which began in late 2008. Along with VaR, stress testing is important in measuring and controlling risk. Stress testing enhances the understanding of the Firm's risk profile and loss potential, and stress losses are monitored against limits. Stress testing is also utilized in one-off approvals and cross-business risk measurement, as well as an input to economic capital allocation. Stress-test results, trends and explanations based on current market risk positions are reported to the Firm's senior management and to the lines of business to help them better measure and manage risks and to understand event risk-sensitive positions.

Earnings-at-risk stress testing

The VaR and stress-test measures described above illustrate the total economic sensitivity of the Firm's Consolidated Balance Sheets to changes in market variables. The effect of interest-rate exposure on net income for the Firm's core nontrading business activities is also important. For further discussion on the effect of interest rate exposure, see page 123 of JPMorgan Chase's 2009 Annual Report.

The Firm conducts simulations of changes in net interest income from its nontrading activities under a variety of interest rate scenarios. Earnings-at-risk tests measure the potential change in the Firm's net interest income, and the corresponding impact to the Firm's pretax earnings, over the following 12 months. These tests highlight exposures to various rate-sensitive factors, such as the rates themselves (e.g., the prime lending rate), pricing strategies on deposits, optionality and changes in product mix. The tests include forecasted balance sheet changes, such as asset sales and securitizations, as well as prepayment and reinvestment behavior.

Immediate changes in interest rates present a limited view of risk, and so a number of alternative scenarios are also reviewed. These scenarios include the implied forward curve, nonparallel rate shifts and severe interest rate shocks on selected key rates. These scenarios are intended to provide a comprehensive view of JPMorgan Chase's earnings at risk over a wide range of outcomes. JPMorgan Chase's 12-month pretax earnings sensitivity profiles as of June 30, 2010, and December 31, 2009, were as follows.

(in millions)	Immediate change in rates			
	+200bp	+100bp	-100bp	-200bp
June 30, 2010	\$1,276	\$ 947	NM(a)	NM(a)
December 31, 2009	(1,594)	(554)	NM(a)	NM(a)

(a) Downward 100- and 200-basis-point parallel shocks result in a Fed Funds target rate of zero and negative three- and six-month treasury rates. The earnings-at-risk results of such a low-probability scenario are not meaningful.

The change in earnings at risk from December 31, 2009, resulted from investment portfolio repositioning, assumed higher levels of deposit balances and reduced levels of fixed-rate loans. The Firm's risk to rising rates was largely the result of widening deposit margins, which are currently compressed due to very low short-term interest rates.

Additionally, under another interest rate scenario used by the Firm, involving a steeper yield curve, with long-term rates rising by 100 basis points and short-term rates staying at current levels, would result in a 12-month pretax earnings benefit of \$605 million. The increase in earnings under this scenario would be due to reinvestment of maturing assets at the higher long-term rates, with funding costs remaining unchanged.

PRIVATE EQUITY RISK MANAGEMENT

For a discussion of Private Equity Risk Management, see page 124 of JPMorgan Chase's 2009 Annual Report. At June 30, 2010, and December 31, 2009, the carrying value of the Private Equity portfolio was \$8.1 billion and \$7.3 billion, respectively, of which \$873 million and \$762 million, respectively, represented securities with publicly available market quotations.

OPERATIONAL RISK MANAGEMENT

For a discussion of JPMorgan Chase's Operational Risk Management, see page 125 of JPMorgan Chase's 2009 Annual Report.

REPUTATION AND FIDUCIARY RISK MANAGEMENT

For a discussion of the Firm's Reputation and Fiduciary Risk Management, see page 126 of JPMorgan Chase's 2009 Annual Report.

SUPERVISION AND REGULATION

The following discussion should be read in conjunction with the Supervision and Regulation section on pages 1-4 of JPMorgan Chase's 2009 Form 10-K. On July 21, 2010, President Obama signed into law the Dodd-Frank Act which will make significant structural reforms to the financial services industry. For additional information regarding the Dodd-Frank Act, please see Part II Other Information, Item 1A Risk Factors on pages 196-197 of this Form 10-Q.

Dividends

At June 30, 2010, JPMorgan Chase's bank subsidiaries could pay, in the aggregate, \$6.8 billion in dividends to their respective bank holding companies without the prior approval of their relevant banking regulators.

CRITICAL ACCOUNTING ESTIMATES USED BY THE FIRM

JPMorgan Chase's accounting policies and use of estimates are integral to understanding its reported results. The Firm's most complex accounting estimates require management's judgment to ascertain the value of assets and liabilities. The Firm has established detailed policies and control procedures intended to ensure that valuation methods, including any judgments made as part of such methods, are well-controlled, independently reviewed and applied consistently from period to period. In addition, the policies and procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. The Firm believes its estimates for determining the value of its assets and liabilities are appropriate. The following is a brief description of the Firm's critical accounting estimates involving significant valuation judgments.

Allowance for credit losses

JPMorgan Chase's allowance for credit losses covers the retained wholesale and consumer loan portfolios, as well as the Firm's portfolio of lending-related commitments. The allowance for loan losses is intended to adjust the value of the Firm's loan assets to reflect probable credit losses as of the balance sheet date. For a further discussion of the methodologies used in establishing the Firm's allowance for credit losses, see Note 14 on pages 196-198 of JPMorgan Chase's 2009 Annual Report. The methodology for calculating the allowance for loan losses and the allowance for lending-related commitments involves significant judgment. For a further description of these judgments, see Allowance for Credit Losses on pages 127-128 of JPMorgan Chase's 2009 Annual Report; for amounts recorded as of June 30, 2010 and 2009, see Allowance for Credit Losses on pages 91-94 and Note 14 on pages 150-151 of this Form 10-Q.

As noted on page 127 of JPMorgan Chase's 2009 Annual Report, many factors can affect estimates of loss, including volatility of loss given default, probability of default and rating migrations. The Firm uses a risk-rating system to determine the credit quality of its wholesale loans. The Firm's wholesale allowance is sensitive to the risk rating assigned to a loan. As of June 30, 2010, assuming a one-notch downgrade in the Firm's internal risk ratings for its entire wholesale portfolio, the allowance for loan losses for the wholesale portfolio would increase by approximately \$1.2 billion. This sensitivity analysis is hypothetical and intended to provide an indication of the impact of risk ratings on the estimate of the allowance for loan losses for wholesale loans. In the Firm's view, the likelihood of a one-notch downgrade for all wholesale loans within a short timeframe is remote, and it is not intended to imply management's expectation of future deterioration in risk ratings. Given the process the Firm follows in determining the risk ratings of its loans, management believes the risk ratings currently assigned to wholesale loans are appropriate.

The allowance for credit losses for the consumer portfolio is sensitive to changes in the economic environment, delinquency status, FICO scores, the realizable value of collateral, borrower behavior and other risk factors. The credit performance of the consumer portfolio across the entire consumer credit product spectrum appears to have stabilized but remains under stress, as high unemployment and weak overall economic conditions continue to result in a high level of delinquencies, while continued weak housing prices continue to result in elevated loss severities. Significant judgment is required to estimate the ultimate duration and severity of the current economic downturn, as well as its impact on housing prices and the labor market. While the allowance for credit losses is highly sensitive to both home prices and unemployment rates, in the current market it is difficult to estimate how potential changes in one or both of these factors might impact the allowance for credit losses. For example, while both factors are important determinants of overall allowance levels, changes in one factor or the other may not occur at the same rate, or improvement in one factor may offset deterioration in the other. In addition, changes in these factors would not necessarily be consistent across geographies or product types. Finally, it is difficult to predict the extent to which changes in both or either of these factors would ultimately impact the frequency or severity of losses, and overall loss rates are a function of both the frequency and severity of individual loan losses.

Fair value of financial instruments, MSRs and commodities inventory

JPMorgan Chase carries a portion of its assets and liabilities at fair value. The majority of such assets and liabilities are measured at fair value on a recurring basis. Certain assets and liabilities are measured at fair value on a nonrecurring basis, including loans accounted for at the lower of cost or fair value that are only subject to fair value adjustments under certain circumstances.

Table of Contents

Assets measured at fair value

The following table includes the Firm's assets measured at fair value and the portion of such assets that are classified within level 3 of the valuation hierarchy.

(in billions)	June 30, 2010		December 31, 2009	
	Total at fair value	Level 3 total	Total at fair value	Level 3 total
Trading debt and equity instruments ^(a)	\$ 317.3	\$ 35.2	\$ 330.9	\$ 35.2
Derivative receivables — gross	1,810.3	45.8	1,565.5	46.7
Netting adjustment	(1,730.1)	—	(1,485.3)	—
Derivative receivables — net	80.2	45.8 ^(d)	80.2	46.7 ^(d)
AFS securities	312.0	12.7	360.4	13.2
Loans	2.4	1.1	1.4	1.0
MSRs	11.9	11.9	15.5	15.5
Private equity investments	8.1	7.2	7.3	6.6
Other ^(b)	44.9	4.3	44.4	9.5
Total assets measured at fair value on a recurring basis	776.8	118.2	840.1	127.7
Total assets measured at fair value on a nonrecurring basis ^(c)	6.6	1.7	8.2	2.7
Total assets measured at fair value	\$ 783.4	\$ 119.9^(e)	\$ 848.3	\$ 130.4^(e)
Total Firm assets	\$ 2,014.0		\$ 2,032.0	
Level 3 assets as a percentage of total Firm assets		6%		6%
Level 3 assets as a percentage of total Firm assets at fair value		15		15

(a) Includes physical commodities generally carried at the lower of cost or fair value.

(b) Includes certain securities purchased under resale agreements, securities borrowed, assets within accrued interest and other investments.

(c) Predominantly includes delinquent mortgage and home equity loans, where impairment is based on the fair value of the underlying collateral, and on leveraged lending loans carried on the Consolidated Balance Sheets at the lower of cost or fair value.

(d) Derivative receivable and derivative payable balances, and the related cash collateral received and paid, are presented net on the Consolidated Balance Sheets where there is a legally enforceable master netting agreement in place with counterparties. For purposes of the table above, the Firm does not reduce derivative receivable and derivative payable balances for netting adjustments, either within or across the levels of the fair value hierarchy, as such an adjustment is not relevant to a presentation that is based on the transparency of inputs to the valuation of an asset or liability. Therefore, the derivative balances reported in the fair value hierarchy levels are gross of any counterparty netting adjustments. However, if the Firm were to net such balances within level 3, the reduction in the level 3 derivative receivable and payable balances would be \$19.0 billion and \$16.0 billion at June 30, 2010, and December 31, 2009, respectively, exclusive of the netting benefit associated with cash collateral, which would further reduce the level 3 balances.

(e) Included in the table above at June 30, 2010, and December 31, 2009, are \$77.5 billion and \$80.0 billion, respectively, of level 3 assets, consisting of recurring and nonrecurring assets carried by IB.

Valuation

For instruments classified within level 3 of the hierarchy, judgments used to estimate fair value may be significant. In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate model to use. Second, due to the lack of observability of significant inputs, management must assess all relevant empirical data in deriving valuation inputs — including, but not limited to, yield curves, interest rates, volatilities, equity or debt prices, foreign exchange rates and credit curves. In addition to market information, models also incorporate transaction details, such as maturity. Finally, management judgment must be applied to assess the appropriate level of valuation adjustments to reflect counterparty credit quality, the Firm's creditworthiness, constraints on liquidity and unobservable parameters, where relevant. The judgments made are typically affected by the type of product and its specific contractual terms, as well as the level of liquidity for the product or within the market as a whole. For further discussion of changes in level 3 assets, see Note 3 on pages 110-124 of this Form 10-Q.

Imprecision in estimating unobservable market inputs can affect the amount of revenue or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date. For a detailed discussion of the determination of fair value for individual financial instruments, see Note 3 on pages 148-152 of JPMorgan Chase's 2009 Annual Report. In addition, for a further discussion of the significant judgments and estimates involved in the determination of the Firm's mortgage-related exposures, see "Mortgage-related exposures carried at fair value" in Note 3 on pages 161-162 of JPMorgan Chase's 2009 Annual Report.

Purchased credit-impaired loans

In connection with the Washington Mutual transaction, JPMorgan Chase acquired certain loans with evidence of deterioration of credit quality since origination and for which it was probable, at acquisition, that the Firm would be unable to collect all contractually required payments receivable. These purchased credit-impaired loans are accounted for

[Table of Contents](#)

on a pool basis, and the pools are considered to be performing. At the time of the acquisition, these loans were recorded at fair value, including an estimate of losses that were expected to be incurred over the estimated remaining lives of the loan pools. Many of the assumptions and estimates underlying the estimation of the initial fair value and the ongoing updates to management's expectation of future cash flows are both significant and subjective, particularly considering the current economic environment. The level of future home price declines, the duration and severity of the current economic downturn, the impact of various government programs and actions, uncertainties about borrower behavior, and the lack of market liquidity and transparency are factors that have influenced, and may continue to affect, these assumptions and estimates.

In accounting for these loans on an ongoing basis, probable decreases in expected loan principal cash flows trigger the recognition of impairment, while probable and significant increases in expected principal cash flows would first trigger the reversal of any previously recorded allowance for loan losses; any remaining increases would be recognized prospectively as yield adjustments. The impact of (i) prepayments, (ii) changes in variable interest rates and (iii) any other changes in the timing of expected cash flows would be recognized prospectively as yield adjustments. The process to determine which changes in cash flows trigger the recognition of impairment, and which changes in cash flows should be recognized as yield adjustments, requires the application of judgment. As of June 30, 2010, a 1% decrease in expected future principal cash payments for the entire portfolio of purchased credit-impaired loans would result in the recognition of an allowance for loan losses for these loans of approximately \$730 million. For additional information on purchased credit-impaired loans, including the significant assumptions, estimates and judgment involved, see Purchased credit-impaired loans on pages 129—130 of JPMorgan Chase's 2009 Annual Report and Note 13 on pages 149-150 of this Form 10-Q.

Goodwill impairment

Management applies significant judgment when testing goodwill for impairment. For a description of the significant valuation judgments associated with goodwill impairment, see Goodwill impairment on page 130 of JPMorgan Chase's 2009 Annual Report.

During the six months ended June 30, 2010, the Firm updated the discounted cash flow valuations of certain consumer lending businesses in RFS and CS, which continue to have elevated risk for goodwill impairment due to their exposure to U.S. consumer credit risk and the effects of regulatory and legislative changes. The assumptions used in the valuation of these businesses include a) estimates of future cash flows for the business (which are dependent on portfolio outstanding balances, net interest margin, operating expenses, credit losses and the amount of capital necessary given the risk of business activities and to meet regulatory capital requirements), and b) the cost of equity used to discount those cash flows to a present value. Each of these factors require significant judgment and the assumptions used are based on management's best and most current projections, including the anticipated effects of regulatory and legislative changes, derived from the Firm's business forecasting process reviewed with senior management. These projections are consistent with the short-term estimates addressed in the Business Outlook on pages 9-10 of this Form 10-Q, and in the longer term, incorporate a set of macroeconomic assumptions (for example, allowing for relatively high but gradually declining unemployment rates for the next few years) and the Firm's best estimates of long-term growth of its businesses. Where possible, the Firm uses third-party and peer data to benchmark its assumptions and estimates.

In addition, for its other businesses, the Firm reviewed current conditions (including the estimated effects of regulatory and legislative changes) and prior projections of business performance. Based upon the updated valuations for its consumer lending businesses and reviews of its other businesses, the Firm concluded that goodwill allocated to all of its reporting units was not impaired at June 30 and March 31, 2010. However, the fair value of the credit card lending business within CS and a consumer lending business within RFS exceeded their carrying values by narrow margins at June 30 and March 31, 2010 ranging from 3-15%. Deterioration in economic market conditions, increased estimates of the effects of recent regulatory or legislative changes, or additional regulatory or legislative changes may result in declines in projected business performance beyond management's expectations. For example, in CS, such declines could result from deterioration in economic conditions such as increased unemployment claims or bankruptcy filings that result in increased credit losses, changes in customer behavior that cause decreased account activity or receivable balances, or unanticipated effects of regulatory or legislative changes. In RFS, such declines could result from deterioration in economic conditions that result in increased credit losses, including decreases in home prices beyond management expectations.

Such declines in business performance, or increases in the estimated cost of equity, could cause the estimated fair values of the Firm's reporting units or their associated goodwill to decline, which may result in a material impairment charge to earnings in a future period related to some portion of the associated goodwill.

For additional information on goodwill, see Note 16 on pages 164-167 of this Form 10-Q.

Income taxes

For a description of the significant assumptions, judgments and interpretations associated with the accounting for income taxes, see Income taxes on page 131 of JPMorgan Chase's 2009 Annual Report.

ACCOUNTING AND REPORTING DEVELOPMENTS

Accounting for transfers of financial assets and consolidation of variable interest entities

Effective January 1, 2010, the Firm implemented new accounting guidance that amends the accounting for the transfers of financial assets and the consolidation of VIEs. Upon adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, Firm-administered multi-seller conduits and certain mortgage and other consumer loan securitization entities. The Financial Accounting Standards Board ("FASB") deferred the requirements of the new consolidation guidance for VIEs for certain investment funds, including mutual funds, private equity funds and hedge funds, until the FASB and the International Accounting Standards Board ("IASB") complete a joint consolidation project that would provide consistent accounting guidance for these funds. For additional information about the impact of the adoption of the new consolidation guidance on January 1, 2010, see Note 15 on pages 151-163 of this Form 10-Q.

Fair value measurements and disclosures

In January 2010, the FASB issued guidance that requires new disclosures, and clarifies existing disclosure requirements, about fair value measurements. The clarifications and the requirement to separately disclose transfers of instruments between level 1 and level 2 of the fair value hierarchy are effective for interim reporting periods beginning after December 15, 2009; the Firm adopted this guidance in the first quarter of 2010. For additional information about the impact of the adoption of the new fair value measurements guidance, see Note 3 on pages 110-124 of this Form 10-Q. In addition, a new requirement to provide purchases, sales, issuances and settlements in the level 3 rollforward on a gross basis is effective for fiscal years beginning after December 15, 2010. Early adoption of the guidance is permitted.

Subsequent events

In May 2009, the FASB issued guidance that established general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or are available to be issued. The guidance was effective for interim or annual financial periods ending after June 15, 2009. In February 2010, the FASB amended the guidance by eliminating the requirement for SEC filers to disclose the date through which it evaluated subsequent events. The Firm adopted the amended guidance in the first quarter of 2010. The application of the guidance had no effect on the Firm's Consolidated Balance Sheets or results of operations.

Accounting for certain embedded credit derivatives

In March 2010, the FASB issued guidance clarifying the circumstances in which a credit derivative embedded in a beneficial interest in securitized financial assets is required to be separately accounted for as a derivative instrument. The guidance is effective for the first fiscal quarter beginning after June 15, 2010, with early adoption permitted. Upon adoption, the new guidance permits the election of the fair value option for any beneficial interest in securitized financial assets. Adoption of the new guidance will not have a material impact on the Firm's Consolidated Balance Sheets or results of operations.

Accounting for modifications of purchased credit-impaired loans that are part of a pool

In April 2010, the FASB issued guidance that amends the accounting for modifications of purchased credit-impaired loans accounted for within a pool. The guidance clarifies that modified purchased credit-impaired loans should not be removed from a pool even if the modification would otherwise be considered a troubled debt restructuring. Additionally, the guidance clarifies that the impact of modifications should be included in evaluating whether a pool of loans is impaired. The guidance is effective for modifications of purchased credit-impaired loans occurring in interim and annual reporting periods ending on or after July 15, 2010, and is to be applied prospectively. Early adoption is permitted. The guidance is consistent with the Firm's current accounting practice and, therefore, will have no impact on the Firm's Consolidated Balance Sheets or results of operations.

Disclosures about the credit quality of financing receivables and the allowance for credit losses

In July 2010, the FASB issued guidance that will require enhanced disclosures surrounding the credit characteristics of the Firm's loan portfolio. Under the new guidance, the Firm will be required to disclose its accounting policies, the methods it uses to determine the components of the allowance for credit losses, and qualitative and quantitative information about the credit risk inherent in the loan portfolio, including additional information on certain types of loan modifications. For the Firm, the new disclosures are effective for the 2010 Annual Report. The new disclosures on the rollforward of the allowance for credit losses and the new disclosures about troubled-debt modifications are effective for the first quarter 2011 Form 10-Q. The adoption of this guidance will only affect JPMorgan Chase's disclosures of financing receivables and not its Consolidated Balance Sheets or results of operations.

Retained earnings	65,465	62,481
Accumulated other comprehensive income/(loss)	2,404	(91)
Shares held in RSU Trust, at cost (1,527,326 and 1,526,944 shares at June 30, 2010, and December 31, 2009, respectively)	(68)	(68)
Treasury stock, at cost (129,122,833 and 162,974,783 shares at June 30, 2010, and December 31, 2009, respectively)	(5,683)	(7,196)
Total stockholders' equity	171,120	165,365
Total liabilities and stockholders' equity	\$ 2,014,019	\$ 2,031,989

(a) The following table presents information on assets and liabilities related to VIEs that are consolidated by the Firm at June 30, 2010, and December 31, 2009. The difference between total VIE assets and liabilities represents the Firm's interests in those entities, which were eliminated in consolidation.

Assets		
Trading assets	\$ 7,525	\$ 6,347
Loans	111,965	13,004
All other assets	4,869	5,043
Total assets	\$124,359	\$ 24,394
Liabilities		
Beneficial interests issued by consolidated variable interest entities	\$ 88,148	\$ 15,225
All other liabilities	2,524	2,197
Total liabilities	\$ 90,672	\$ 17,422

The assets of the consolidated VIEs are used to settle the liabilities of those entities. At June 30, 2010, the Firm provided limited program-wide credit enhancement of \$2.0 billion related to its Firm-administered multi-seller conduits. For further discussion, see Note 15 on pages 151-162 of this Form 10-Q.

Note: Effective January 1, 2010, the Firm adopted new guidance that amended the accounting for the transfer of financial assets and the consolidation of VIEs. Upon adoption of the new guidance, the Firm consolidated noncash assets and liabilities of \$87.7 billion and \$92.2 billion, respectively.

The Notes to Consolidated Financial Statements (unaudited) are an integral part of these statements.

See Glossary of Terms on pages 181-184 of this Form 10-Q for definitions of terms used throughout the Notes to Consolidated Financial Statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

NOTE 1 — BASIS OF PRESENTATION

JPMorgan Chase & Co. (“JPMorgan Chase” or the “Firm”), a financial holding company incorporated under Delaware law in 1968, is a leading global financial services firm and one of the largest banking institutions in the United States of America (“U.S.”), with operations worldwide. The Firm is a leader in investment banking, financial services for consumers and businesses, financial transaction processing and asset management. For a discussion of the Firm’s business segment information, see Note 23 on pages 174-178 of this Form 10-Q.

The accounting and financial reporting policies of JPMorgan Chase and its subsidiaries conform to accounting principles generally accepted in the United States of America (“U.S. GAAP”). Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by bank regulatory authorities. The unaudited consolidated financial statements prepared in conformity with U.S. GAAP require management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expense, and the disclosures of contingent assets and liabilities. Actual results could be different from these estimates. In the opinion of management, all normal recurring adjustments have been included for a fair statement of this interim financial information. These unaudited consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes thereto included in JPMorgan Chase’s Annual Report on Form 10-K for the year ended December 31, 2009, as filed with the U.S. Securities and Exchange Commission (the “2009 Annual Report”).

Certain amounts in prior periods have been reclassified to conform to the current presentation.

Consolidation

The Consolidated Financial Statements include the accounts of JPMorgan Chase and other entities in which the Firm has a controlling financial interest. All material intercompany balances and transactions have been eliminated. The Firm determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity (“VIE”).

Voting Interest Entities

Voting interest entities are entities that have sufficient equity and provide the equity investors voting rights that enable them to make significant decisions relating to the entity’s operations. For these types of entities, the Firm’s determination of whether it has a controlling interest is primarily based on the amount of voting equity interests held. Entities in which the Firm has a controlling financial interest, through ownership of the majority of the entities’ voting equity interests, or through other contractual rights that give the Firm control, are consolidated by the Firm.

Investments in companies that are considered to be voting interest entities in which the Firm has significant influence over operating and financing decisions (but does not own a majority of the voting equity interests) are accounted for (i) in accordance with the equity method of accounting (which requires the Firm to recognize its proportionate share of the entity’s net earnings), or (ii) at fair value if the fair value option was elected at the inception of the Firm’s investment. These investments are generally included in other assets, with income or loss included in other income.

Firm-sponsored asset management funds are generally structured as limited partnerships or limited liability companies and are typically considered voting interest entities. For the significant majority of these entities, for which the Firm is the general partner or managing member of the limited partnership or limited liability company (“LLC”), the non-affiliated partners or members have the substantive ability to remove the Firm as the general partner or managing member without cause (i.e., kick-out rights), based on a simple unaffiliated majority vote, or the non-affiliated partners or members have substantive participating rights. Accordingly, the Firm does not consolidate these funds. In limited cases where the non-affiliated partners or members do not have substantive kick-out or participating rights, the Firm consolidates the underlying funds.

Private equity investments, which are recorded in other assets on the Consolidated Balance Sheets, include investments in buyouts, growth equity and venture opportunities. These investments are accounted for under investment company guidelines and accordingly, irrespective of the percentage of equity ownership interests held, are carried on the Consolidated Balance Sheets at fair value.

[Table of Contents](#)

Variable Interest Entities

VIEs are entities that, by design, either (1) lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) have equity investors that do not have the ability to make significant decisions relating to the entity's operations through voting rights, or do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity.

The most common type of VIE is a special purpose entity ("SPE"). SPEs are commonly used in securitization transactions in order to isolate certain assets and distribute the cash flows from those assets to investors. SPEs are an important part of the financial markets, including the mortgage- and asset-backed securities and commercial paper markets, as they provide market liquidity by facilitating investors' access to specific portfolios of assets and risks. SPEs may be organized as trusts, partnerships or corporations and are typically established for a single, discrete purpose. SPEs are not typically operating entities and usually have a limited life and no employees. The basic SPE structure involves a company selling assets to the SPE; the SPE funds the purchase of those assets by issuing securities to investors. The legal documents that govern the transaction specify how the cash earned on the assets must be allocated to the SPE's investors and other parties that have rights to those cash flows. SPEs are generally structured to insulate investors from claims on the SPE's assets by creditors of other entities, including the creditors of the seller of the assets.

On January 1, 2010, the Firm implemented new consolidation accounting guidance related to VIEs. The new guidance eliminates the concept of qualified special purpose entities ("QSPEs") that were previously exempt from consolidation, and introduces a new framework for determining the primary beneficiary of a VIE. The primary beneficiary of a VIE is required to consolidate the assets and liabilities of the VIE. Under the new guidance, the primary beneficiary is the party that has both (1) the power to direct the activities of an entity that most significantly impact the VIE's economic performance; and (2) through its interests in the VIE, the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE.

To assess whether the Firm has the power to direct the activities of a VIE that most significantly impact the VIE's economic performance, the Firm considers all facts and circumstances, including its role in establishing the VIE and its ongoing rights and responsibilities. This assessment includes, first, identifying the activities that most significantly impact the VIE's economic performance; and second, identifying which party, if any, has power over those activities. In general, the parties that make the most significant decisions affecting the VIE (such as asset managers, collateral managers, servicers, or owners of call options or liquidation rights over the VIE's assets) or have the right to unilaterally remove those decision-makers are deemed to have the power to direct the activities of a VIE.

To assess whether the Firm has the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE, the Firm considers all of its economic interests, including debt and equity investments, servicing fees, and derivative or other arrangements deemed to be variable interests in the VIE. This assessment requires that the Firm apply judgment in determining whether these interests, in the aggregate, are considered potentially significant to the VIE. Factors considered in assessing significance include: the design of the VIE, including its capitalization structure; subordination of interests; payment priority; relative share of interests held across various classes within the VIE's capital structure; and the reasons why the interests are held by the Firm.

The Firm performs on-going reassessments of: 1) whether any entities previously evaluated under the majority voting-interest framework have become VIEs, based on certain events, and therefore subject to the VIE consolidation framework; and 2) whether changes in the facts and circumstances regarding the Firm's involvement with a VIE cause the Firm's consolidation conclusion regarding the VIE to change.

For further details regarding the Firm's application of the new accounting guidance effective January 1, 2010, see Note 15 on pages 151-163 of this Form 10-Q. For a description of the accounting guidance applied to periods ending prior to January 1, 2010, see Note 1 on page 142 of JPMorgan Chase's 2009 Annual Report.

In February 2010, the Financial Accounting Standards Board ("FASB") issued an amendment which defers the requirements of the new consolidation accounting guidance for certain investment funds, including mutual funds, private equity funds and hedge funds. For funds to which the amendment applies, the consolidation guidance will be deferred until the completion of the FASB and International Accounting Standards Board ("IASB") joint consolidation project. For the funds to which the amendment applies, the Firm continues to apply other existing authoritative guidance to determine whether such funds should be consolidated.

Assets held for clients in an agency or fiduciary capacity by the Firm are not assets of JPMorgan Chase and are not included in the Consolidated Balance Sheets.

NOTE 2 — BUSINESS CHANGES AND DEVELOPMENTS

Purchase of remaining interest in J.P. Morgan Cazenove

On January 4, 2010, JPMorgan Chase purchased the remaining interest in J.P. Morgan Cazenove, an investment banking business partnership formed in 2005 which resulted in an adjustment to the Firm's capital surplus of approximately \$1.3 billion.

Subsequent events

RBS Semptra transaction

On July 1, 2010, JPMorgan Chase completed the acquisition of RBS Semptra Commodities' global oil, global metals and European power and gas businesses for approximately \$1.6 billion. This acquisition almost doubled the number of clients the Firm's commodities business can serve and will enable the Firm to offer them more products in more regions of the world.

Redemption of Series E, F and G cumulative preferred stock

On July 16, 2010, JPMorgan Chase announced that it will redeem at stated redemption value on August 20, 2010, all outstanding shares of its 6.15% Cumulative Preferred Stock, Series E, 5.72% Cumulative Preferred Stock, Series F and 5.49% Cumulative Preferred Stock, Series G. For a further discussion of preferred stock, see Note 23 on pages 222-223 of JPMorgan Chase's 2009 Annual Report.

NOTE 3 — FAIR VALUE MEASUREMENT

For a further discussion of the Firm's valuation methodologies for assets, liabilities and lending-related commitments measured at fair value and the fair value hierarchy, see Note 3 on pages 148-165 of JPMorgan Chase's 2009 Annual Report.

During the first six months of 2010, no changes were made to the Firm's valuation models that had, or are expected to have, a material impact on the Firm's Consolidated Balance Sheets or results of operations.

[Table of Contents](#)

The following table presents the assets and liabilities measured at fair value as of June 30, 2010, and December 31, 2009, by major product category and by the fair value hierarchy.

- (a) Includes total U.S. government-sponsored enterprise obligations of \$144.3 billion and \$195.8 billion at June 30, 2010, and December 31, 2009, respectively, which were predominantly mortgage-related.
- (b) For further discussion of residential and commercial mortgage-backed securities ("MBS"), see the "Mortgage-related exposures carried at fair value" section of Note 3 on pages 161-162 of JPMorgan Chase's 2009 Annual Report.
- (c) Included within trading loans at June 30, 2010, and December 31, 2009, respectively, are \$20.1 billion and \$20.7 billion of residential first-lien mortgages and \$3.8 billion and \$2.7 billion of commercial first-lien mortgages. Residential mortgage loans include conforming mortgage loans originated with the intent to sell to U.S. government agencies of \$10.6 billion and \$11.1 billion, respectively, and reverse mortgages of \$3.9 billion and \$4.5 billion, respectively. For further discussion of residential and commercial loans carried at fair value or the lower of cost or fair value, see the "Mortgage-related exposures carried at fair value" section of Note 3 on pages 161-162 of JPMorgan Chase's 2009 Annual Report.
- (d) Physical commodities inventories are generally accounted for at the lower of cost or fair value.
- (e) Balances reflect the reduction of securities owned (long positions) by the amount of securities sold but not yet purchased (short positions) when the long and short positions have identical Committee on Uniform Security Identification Procedures ("CUSIPs").
- (f) The level 3 amounts for derivative receivables and derivative payables related to credit primarily include structured credit derivative instruments. For further information on the classification of instruments within the valuation hierarchy, see Note 3 on pages 148-152 of JPMorgan Chase's 2009 Annual Report.
- (g) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral received and paid when a legally enforceable master netting agreement exists. For purposes of the tables above, the Firm does not reduce derivative receivables and derivative payables balances for this netting adjustment, either within or across the levels of the fair value hierarchy, as such netting is not relevant to a presentation based on the transparency of inputs to the valuation of an asset or liability. Therefore, the balances reported in the fair value hierarchy table are gross of any counterparty netting adjustments. However, if the Firm were to net such balances within level 3, the reduction in the level 3 derivative receivable and payable balances would be \$19.0 billion and \$16.0 billion at June 30, 2010, and December 31, 2009, respectively, exclusive of the netting benefit associated with cash collateral which would further reduce the level 3 balances.
- (h) Private equity instruments represent investments within the Corporate/Private Equity line of business. The cost basis of the private equity investment portfolio totaled \$9.7 billion and \$8.8 billion at June 30, 2010, and December 31, 2009, respectively.
- (i) At June 30, 2010, and December 31, 2009, balances included investments valued at net asset value of \$13.2 billion and \$16.8 billion, respectively, of which \$7.0 billion and \$9.0 billion, respectively, were classified in level 1, \$2.1 billion and \$3.2 billion, respectively, in level 2 and \$4.1 billion and \$4.6 billion in level 3.
- (j) In the three and six months ended June 30, 2010, the transfers between levels 1, 2 and 3 were not significant.
- (k) Includes assets within accrued interest receivable and other assets at December 31, 2009.

Changes in level 3 recurring fair value measurements

The following tables include a rollforward of the balance sheet amounts (including changes in fair value) for financial instruments classified by the Firm within level 3 of the fair value hierarchy for the three and six months ended June 30, 2010 and 2009. When a determination is made to classify a financial instrument within level 3, the determination is based on the significance of the unobservable parameters to the overall fair value measurement. However, level 3 financial instruments typically include, in addition to the unobservable or level 3 components, observable components (that is, components that are actively quoted and can be validated to external sources); accordingly, the gains and losses in the table below include changes in fair value due in part to observable factors that are part of the valuation methodology. Also, the Firm risk-manages the observable components of level 3 financial instruments using securities and derivative positions that are classified within level 1 or 2 of the fair value hierarchy; as these level 1 and level 2 risk management instruments are not included below, the gains or losses in the following tables do not reflect the effect of the Firm's risk management activities related to such level 3 instruments.

- (a) For further discussion of residential and commercial MBS, see the “Mortgage-related exposures carried at fair value” section of Note 3 on pages 161-162 of JPMorgan Chase’s 2009 Annual Report.
- (b) Predominantly reported in principal transactions revenue, except for changes in fair value for Retail Financial Services (“RFS”) mortgage loans originated with the intent to sell, which are reported in mortgage fees and related income.
- (c) Realized gains and losses on available-for-sale (“AFS”) securities, as well as other-than-temporary impairment (“OTTI”) losses that are recorded in earnings, are reported in securities gains. Unrealized gains and losses are reported in other comprehensive income.
- (d) Changes in fair value for RFS mortgage servicing rights are reported in mortgage fees and related income.
- (e) Predominantly reported in other income.
- (f) All transfers into and/or out of level 3 are assumed to occur at the beginning of the reporting period.

Table of Contents

- (g) Level 3 liabilities as a percentage of total Firm liabilities accounted for at fair value (including liabilities measured at fair value on a nonrecurring basis) were 27% and 29% at June 30, 2010, and December 31, 2009, respectively.
- (h) Includes assets within accrued interest receivable and other assets at June 30, 2009.

Assets and liabilities measured at fair value on a nonrecurring basis

Certain assets, liabilities and unfunded lending-related commitments are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances (for example, when there is evidence of impairment). The following tables present the assets and liabilities carried on the Consolidated Balance Sheets by caption and level within the valuation hierarchy as of June 30, 2010, and December 31, 2009, for which a nonrecurring change in fair value has been recorded during the reporting period.

June 30, 2010 (in millions)	Fair value hierarchy			Total fair value
	Level 1(d)	Level 2(d)	Level 3(d)	
Loans retained(a)	\$ —	\$ 4,207	\$ 946	\$ 5,153
Loans held-for-sale(b)	—	607	437	1,044

Accounts payable and other liabilities(c)	\$ —	\$ 87	\$ 39	\$ 126
Total liabilities at fair value on a nonrecurring basis	\$ —	\$ 87	\$ 39	\$ 126

- (a) Reflects mortgage, home equity and other loans where the carrying value is based on the fair value of the underlying collateral.
- (b) Predominantly includes leveraged lending loans carried on the Consolidated Balance Sheets at the lower of cost or fair value.
- (c) Represents, at June 30, 2010, and December 31, 2009, fair value adjustments associated with \$501 million and \$648 million, respectively, of unfunded held-for-sale lending-related commitments within the leveraged lending portfolio.
- (d) In the three and six months ended June 30, 2010, the transfers between levels 1, 2 and 3 were not significant.

The method used to estimate the fair value of impaired collateral-dependent loans, and other loans where the carrying value is based on the fair value of the underlying collateral (e.g., residential mortgage loans charged off in accordance with regulatory guidance), depends on the type of collateral (e.g., securities, real estate, and nonfinancial assets). Fair value of the collateral is estimated based on quoted market prices, broker quotes or independent appraisals, or by using a DCF model. For further information, see Note 14 on pages 150-151 of this Form 10-Q.

Nonrecurring fair value changes

The following table presents the total change in value of assets and liabilities for which a fair value adjustment has been included in the Consolidated Statements of Income for the three and six months ended June 30, 2010 and 2009, related to financial instruments held at those dates.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Loans retained	\$ (978)	\$ (1,008)	\$ (2,052)	\$ (1,622)
Loans held-for-sale	(3)	(339)	65	(705)
Total loans	(981)	(1,347)	(1,987)	(2,327)
Other assets	11	(154)	29	(250)
Accounts payable and other liabilities	—	16	5	47
Total nonrecurring fair value gains/(losses)	\$ (970)	\$ (1,485)	\$ (1,953)	\$ (2,530)

Level 3 analysis

Level 3 assets at June 30, 2010, principally include derivative receivables, mortgage servicing rights (“MSRs”), trading loans, and collateralized loan obligations (“CLOs”) held within the available-for-sale securities portfolio. For further discussion of JPMorgan Chase’s valuation methodologies for assets and liabilities measured at fair value, see Note 3 on pages 148-165 of JPMorgan Chase’s 2009 Annual Report.

- Derivative receivables included \$45.8 billion of interest rate, credit, foreign exchange, equity and commodity contracts classified within level 3 at June 30, 2010. Included within this balance were \$21.3 billion of structured credit derivatives with corporate debt underlying. In assessing the Firm’s risk exposure to structured credit derivatives, the Firm believes consideration should also be given to derivative liabilities with similar, and therefore, offsetting risk profiles. At June 30, 2010, there were \$12.1 billion of level 3 derivative liabilities with risk characteristics similar to those of the derivative receivable assets that were classified in level 3. Both derivative receivables and payables are modeled and valued the same way with the same parameters and inputs. In addition, the counterparty credit risk and market risk exposure of all level 3 derivatives is partially hedged with instruments, for which the inputs are largely observable, that are largely liquid, and that are classified within level 2 of the valuation hierarchy.
- Mortgage servicing rights represent the fair value of future cash flows for performing specified mortgage servicing activities for others (predominantly with respect to residential mortgage loans). For a further description of the MSR asset, interest rate risk management and the valuation methodology used for MSRs, including valuation assumptions and sensitivities, see Note 16 on pages 164-167 of this Form 10-Q and Note 17 on pages 214-217 of JPMorgan Chase’s 2009 Annual Report.
- CLOs of \$12.0 billion are securities backed by corporate loans, and they are held in the Firm’s AFS securities portfolio. For these securities, external pricing information is not available. They are therefore valued using market-standard models to model the specific collateral composition and cash flow structure of each deal; key inputs to the model are market spread data for each credit rating, collateral type and other relevant contractual features. Substantially all of these securities are rated “AAA,” “AA” and “A” and have an average credit enhancement of 29%. Credit enhancement in CLOs is primarily in the form of overcollateralization, which is the excess of the par amount of collateral over the par amount of the securities. For further discussion, see Note 11 on pages 139-144 of this Form 10-Q.
- Trading loans principally include \$6.5 billion of commercial mortgage loans and nonagency residential mortgage whole loans held in the Investment Bank (“IB”) for which there is limited price transparency; and \$3.9 billion of reverse mortgages for which the principal risk sensitivities are mortality risk and home prices. The fair value of the commercial and residential mortgage loans is estimated by projecting expected cash flows, considering relevant borrower-specific and market factors, and discounting those cash flows at a rate reflecting current market liquidity. Loans are partially hedged by level 2 instruments, including credit default swaps and interest rate derivatives, which are observable and liquid.

Consolidated Balance Sheets changes

Level 3 assets (including assets measured at fair value on a nonrecurring basis) were 6% of total Firm assets at June 30, 2010. The following describes significant changes to level 3 assets during the quarter.

For the three months ended June 30, 2010

Level 3 assets were \$119.9 billion at June 30, 2010, reflecting a decrease of \$2.0 billion from the first quarter. The decrease is mainly due to:

- \$3.7 billion decrease in MSRs. For a further discussion of the change, refer to Note 16 on pages 164-167 of this Form 10-Q.
- \$887 million decrease in trading loans driven by loans securitizations and loan sales; and
- \$2.0 billion increase in derivative receivables, predominantly due to widening of credit spreads.

For the six months ended June 30, 2010

Level 3 assets decreased by \$10.5 billion in the first six months of 2010, due to the following:

- \$3.7 billion decrease in MSRs. For a further discussion of the change, refer to Note 16 on pages 164-167 of this Form 10-Q.
- A net decrease of \$3.5 billion due to the adoption of new consolidation guidance related to VIEs. As a result of the adoption of the new guidance, there was a decrease of \$5.0 billion in accrued interest and accounts receivable related to retained securitization interests in Firm-sponsored credit card securitization trusts that were eliminated upon consolidation, partially offset by an increase of \$1.5 billion in trading debt and equity instruments; and
- \$917 million decrease in derivative receivables due to changes in credit spreads.

[Table of Contents](#)

Gains and Losses

Included in the tables for the three months ended June 30, 2010

- \$1.9 billion of net gains on derivatives, primarily related to the widening of credit spreads
- \$632 million in gains related to long-term structured note liabilities, primarily due to volatility in the equity markets
- \$3.6 billion of losses on MSRs

Included in the tables for the three months ended June 30, 2009

- \$3.8 billion in gains on MSRs
- \$1.1 billion in gains on trading-debt and equity instruments, primarily from certain asset-backed securities
- \$5.7 billion of net losses on derivatives primarily related to changes in credit spreads
- \$883 million of losses related to long-term structured note liabilities, primarily due to volatility in the equity markets

Included in the tables for the six months ended June 30, 2010

- \$3.7 billion of losses on MSRs
- \$1.2 billion of gains in net derivatives receivables
- \$1.0 billion of gains related to long-term structured note liabilities primarily due to volatility in the equity markets

Included in the tables for the six months ended June 30, 2009

- \$5.1 billion of gains on MSRs
- \$4.9 billion of net losses on derivatives, primarily related to changes in credit spreads and changes in interest rates
- \$2.5 billion of losses on trading debt and equity instruments, primarily related to residential and commercial loans and mortgage-backed securities and principally driven by mark-downs and sales; these losses were partially offset by \$669 million in gains on certain asset-backed securities
- \$850 million of losses on leveraged loans, which are primarily classified as held-for-sale and measured at the lower of cost or fair value and therefore included in nonrecurring fair value assets

Credit adjustments

When determining the fair value of an instrument, it may be necessary to record a valuation adjustment to arrive at an exit price under U.S. GAAP. Valuation adjustments include, but are not limited to, amounts to reflect counterparty credit quality and the Firm's own creditworthiness. The market's view of the Firm's credit quality is reflected in credit spreads observed in the credit default swap market. For a detailed discussion of the valuation adjustments the Firm considers, see Note 3 on pages 148-165 of JPMorgan Chase's 2009 Annual Report.

The following table provides the credit adjustments, excluding the effect of any hedging activity, reflected within the Consolidated Balance Sheets as of the dates indicated.

(in millions)	June 30, 2010	December 31, 2009
Derivative receivables balance	\$ 80,215	\$ 80,210
Derivatives CVA ^(a)	(4,611)	(3,697)
Derivative payables balance	60,137	60,125
Derivatives DVA	(1,132)	(841) ^(d)
Structured notes balance ^{(b)(c)}	54,221	59,064
Structured notes DVA	(1,381)	(685) ^(d)

(a) Derivatives credit valuation adjustments ("CVA"), gross of hedges, includes results managed by credit portfolio and other lines of business within IB.

(b) Structured notes are recorded within long-term debt, other borrowed funds or deposits on the Consolidated Balance Sheets, based on the tenor and legal form of the note.

(c) Structured notes are measured at fair value based on the Firm's election under the fair value option. For further information on these elections, see Note 4 on pages 125-127 of this Form 10-Q.

(d) The prior period has been revised.

[Table of Contents](#)

The following table provides the impact of credit adjustments on earnings in the respective periods, excluding the effect of any hedging activity.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Credit adjustments:				
Derivative CVA <i>(a)</i>	\$ (1,070)	\$ 3,522	\$ (914)	\$ 4,399
Derivative DVA	397	(793)	291	(379)
Structured note DVA <i>(b)</i>	588	(1,099)	696	(461)

(a) Derivatives CVA, gross of hedges, includes results managed by credit portfolio and other lines of business within IB.

(b) Structured notes are measured at fair value based on the Firm's election under the fair value option. For further information on these elections, see Note 4 on pages 125-127 of this Form 10-Q.

Additional disclosures about the fair value of financial instruments (including financial instruments not carried at fair value)

U.S. GAAP requires disclosure of the estimated fair value of certain financial instruments, and the methods and significant assumptions used to estimate their fair value. Financial instruments within the scope of these disclosure requirements are included in the following table. Additionally, certain financial instruments and all nonfinancial instruments are excluded from the scope. Accordingly, the fair value disclosures provided in the following table include only a partial estimate of the fair value of JPMorgan Chase. For example, the Firm has developed long-term relationships with its customers through its deposit base and credit card accounts, commonly referred to as core deposit intangibles and credit card relationships. In the opinion of management, these items, in the aggregate, add significant value to JPMorgan Chase, but their fair value is not disclosed in this Note.

Financial instruments for which carrying value approximates fair value

Certain financial instruments that are not carried at fair value on the Consolidated Balance Sheets are carried at amounts that approximate fair value, due to their short-term nature and generally negligible credit risk. These instruments include cash and due from banks; deposits with banks, federal funds sold; securities purchased under resale agreements and securities borrowed with short-dated maturities; short-term receivables and accrued interest receivable; commercial paper; federal funds purchased; securities loaned and sold under repurchase agreements with short-dated maturities; other borrowed funds (excluding advances from Federal Home Loan Banks ("FHLBs")); accounts payable; and accrued liabilities. In addition, U.S. GAAP requires that the fair value for deposit liabilities with no stated maturity (i.e., demand, savings and certain money market deposits) be equal to their carrying value; recognition of the inherent funding value of these instruments is not permitted.

[Table of Contents](#)

The following table presents the carrying value and estimated fair value of financial assets and liabilities.

(in billions)	June 30, 2010			December 31, 2009		
	Carrying value	Estimated fair value	Appreciation/ (depreciation)	Carrying value	Estimated fair value	Appreciation/ (depreciation)
Financial assets						
Assets for which fair value approximates carrying value	\$ 72.2	\$ 72.2	\$ —	\$ 89.4	\$ 89.4	\$ —
Accrued interest and accounts receivable (included zero and \$5.0 at fair value at June 30, 2010, and December 31, 2009, respectively)	61.3	61.3	—	67.4	67.4	—
Federal funds sold and securities purchased under resale agreements (included \$22.8 and \$20.5 at fair value at June 30, 2010, and December 31, 2009, respectively)	199.0	199.0	—	195.4	195.4	—
Securities borrowed (included \$11.9 and \$7.0 at fair value at June 30, 2010, and December 31, 2009, respectively)	122.3	122.3	—	119.6	119.6	—
Trading assets	397.5	397.5	—	411.1	411.1	—
Securities (included \$312.0 and \$360.4 at fair value at June 30, 2010, and December 31, 2009, respectively)	312.0	312.0	—	360.4	360.4	—
Loans (included \$2.4 and \$1.4 at fair value at June 30, 2010, and December 31, 2009, respectively)(a)	663.6	663.3	(0.3)	601.9	598.3	(3.6)
Mortgage servicing rights at fair value	11.9	11.9	—	15.5	15.5	—
Other (included \$18.4 and \$19.2 at fair value at June 30, 2010, and December 31, 2009, respectively)	70.7	70.6	(0.1)	73.4	73.2	(0.2)
Total financial assets	\$ 1,910.5	\$ 1,910.1	\$ (0.4)	\$ 1,934.1	\$ 1,930.3	\$ (3.8)
Financial liabilities						
Deposits (included \$4.9 and \$4.5 at fair value at June 30, 2010, and December 31, 2009, respectively)	\$ 887.8	\$ 888.9	\$ (1.1)	\$ 938.4	\$ 939.5	\$ (1.1)
Federal funds purchased and securities loaned or sold under repurchase agreements (included \$6.0 and \$3.4 at fair value at June 30, 2010, and December 31, 2009, respectively)	237.5	237.5	—	261.4	261.4	—
Commercial paper	41.1	41.1	—	41.8	41.8	—
Other borrowed funds (included \$7.4 and \$5.6 at fair value at June 30, 2010, and December 31, 2009, respectively)	44.4	44.4	—	55.7	55.9	(0.2)
Trading liabilities	134.9	134.9	—	125.1	125.1	—
Accounts payable and other liabilities (included \$0.5 and \$0.4 at fair value at June 30, 2010, and December 31, 2009, respectively)	131.6	131.6	—	136.8	136.8	—
Beneficial interests issued by consolidated VIEs (included \$2.1 and \$1.4 at fair value at June 30, 2010, and December 31, 2009, respectively)	88.1	88.7	(0.6)	15.2	15.2	—
Long-term debt and junior subordinated deferrable interest debentures (included \$41.9 and \$49.0 at fair value at June 30, 2010, and December 31, 2009, respectively)	248.6	247.8	0.8	266.3	268.4	(2.1)
Total financial liabilities	\$ 1,814.0	\$ 1,814.9	\$ (0.9)	\$ 1,840.7	\$ 1,844.1	\$ (3.4)
Net (depreciation)/appreciation			\$ (1.3)			\$ (7.2)

- (a) Fair value is typically estimated using a discounted cash flow model that incorporates the characteristics of the underlying loans (including principal, customer rate and contractual fees) and key inputs including expected lifetime credit losses, interest rates, prepayment rates and primary origination or secondary market spreads. For a further discussion of the Firm's methodologies for estimating the fair value of loans and lending-related commitments see Note 3 on pages 148-152 of JPMorgan Chase's 2009 Annual Report.

Table of Contents

The majority of the Firm's unfunded lending-related commitments are not carried at fair value on a recurring basis on the Consolidated Balance Sheets, nor are they actively traded. The carrying value and estimated fair value of the Firm's wholesale lending-related commitments were as follows for the periods indicated.

(in billions)	June 30, 2010		December 31, 2009	
	Carrying value ^(a)	Estimated fair value	Carrying value ^(a)	Estimated fair value
Wholesale lending-related commitments	\$ 0.9	\$ 1.9	\$ 0.9	\$ 1.3

(a) Represents the allowance for wholesale unfunded lending-related commitments. Excludes the current carrying values of the guarantee liability and the offsetting asset, each recognized at fair value at the inception of guarantees.

The Firm does not estimate the fair value of consumer lending-related commitments. In many cases, the Firm can reduce or cancel these commitments by providing the borrower prior notice or, in some cases, without notice as permitted by law. For a further discussion of the valuation of lending-related commitments, see Note 3 on pages 149-150 of JPMorgan Chase's 2009 Annual Report.

Trading assets and liabilities – average balances

Average trading assets and liabilities were as follows for the periods indicated.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Trading assets — debt and equity instruments ^(a)	\$ 340,612	\$ 308,951	\$ 336,212	\$ 311,883
Trading assets — derivative receivables	79,409	114,096	79,048	128,092
Trading liabilities — debt and equity instruments ^{(a)(b)}	77,492	54,587	74,205	54,726
Trading liabilities — derivative payables	62,547	78,155	60,809	86,503

(a) Balances reflect the reduction of securities owned (long positions) by the amount of securities sold, but not yet purchased (short positions) when the long and short positions have identical CUSIPs.

(b) Primarily represent securities sold, not yet purchased.

NOTE 4 — FAIR VALUE OPTION

For a discussion of the primary financial instruments for which fair value elections have been made, including the determination of instrument-specific credit risk for these items and the basis for those elections, see Note 4 on pages 165-167 of JPMorgan Chase's 2009 Annual Report.

2010 Elections

In connection with the adoption of the new consolidation guidance related to VIEs, effective January 1, 2010, the fair value option was elected for long-term beneficial interests related to securitization trusts within IB that were consolidated where the underlying assets are carried at fair value.

Changes in fair value under the fair value option election

The following table presents the changes in fair value included in the Consolidated Statements of Income for the three and six months ended June 30, 2010 and 2009, for items for which the fair value election was made. The profit and loss information presented below only includes the financial instruments that were elected to be measured at fair value; related risk management instruments, which are required to be measured at fair value, are not included in the table.

(in millions)	Three months ended June 30,					
	2010			2009		
	Principal transactions	Other income	Total changes in fair value recorded	Principal transactions	Other income	Total changes in fair value recorded
Federal funds sold and securities purchased under resale agreements	\$ 261	\$ —	\$ 261	\$ (269)	\$ —	\$ (269)
Securities borrowed	27	—	27	(12)	—	(12)
Trading assets:						
Debt and equity instruments, excluding loans	40	(12)(c)	28	244	22(c)	266
Loans reported as trading assets:

Other borrowed funds(a)	838	—	838	(180)	—	(180)
Trading liabilities	—	—	—	(13)	—	(13)
Beneficial interests issued by consolidated VIEs	(14)	—	(14)	(139)	—	(139)
Other liabilities	(19)	14(d)	(5)	5	—	5
Long-term debt:						
Changes in instrument-specific credit risk(a)	534	—	534	(1,038)	—	(1,038)
Other changes in fair value(b)	1,332	—	1,332	(2,978)	—	(2,978)

	Six months ended June 30,					
	2010			2009		
(in millions)	Principal transactions	Other income	Total changes in fair value recorded	Principal transactions	Other income	Total changes in fair value recorded
Federal funds sold and securities purchased under resale agreements	\$ 280	\$ —	\$ 280	\$ (495)	\$ —	\$ (495)
Securities borrowed	39	—	39	(19)	—	(19)
Trading assets:						
Debt and equity instruments, excluding loans	196	(11)(c)	185	304	19(c)	323
Loans reported as trading assets:						
Changes in instrument-specific credit risk	798	22(c)	820	(472)	(165)(c)	(637)
Other changes in fair value	(683)	1,972(c)	1,289	712	1,432(c)	2,144
Loans:						
Changes in instrument-specific credit risk	79	—	79	(329)	—	(329)
Other changes in fair value	(71)	—	(71)	(126)	—	(126)
Other assets	—	(102)(d)	(102)	—	(588)(d)	(588)
Deposits(a)	(292)	—	(292)	(186)	—	(186)
Federal funds purchased and securities loaned or sold under repurchase agreements	(65)	—	(65)	94	—	94
Other borrowed funds(a)	912	—	912	(146)	—	(146)
Trading liabilities	(3)	—	(3)	(15)	—	(15)
Beneficial interests issued by consolidated VIEs	32	—	32	(124)	—	(124)
Other liabilities	4	14(d)	18	4	—	4
Long-term debt:						
Changes in instrument-specific credit risk(a)	585	—	585	(394)	—	(394)
Other changes in fair value(b)	1,558	—	1,558	(1,771)	—	(1,771)

- (a) Total changes in instrument-specific credit risk related to structured notes were \$588 million and \$(1.1) billion for the three months ended June 30, 2010 and 2009, respectively, and \$696 million and \$(461) million for the six months ended June 30, 2010 and 2009, respectively. Those totals include adjustments for structured notes classified within deposits and other borrowed funds, as well as long-term debt.
- (b) Structured notes are debt instruments with embedded derivatives that are tailored to meet a client's need for derivative risk in funded form. The embedded derivative is the primary driver of risk. Although the risk associated with the structured notes is actively managed, the gains reported in this table do not include the income statement impact of such risk management instruments.
- (c) Reported in mortgage fees and related income.
- (d) Reported in other income.

Difference between aggregate fair value and aggregate remaining contractual principal balance outstanding

The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of June 30, 2010, and December 31, 2009, for loans, long-term debt and long-term beneficial interests for which the fair value option has been elected.

(in millions)	June 30, 2010			December 31, 2009		
	Contractual principal outstanding	Fair value	Fair value over/(under) contractual principal outstanding	Contractual principal outstanding	Fair value	Fair value over/(under) contractual principal outstanding
Loans						
Performing loans 90 days or more past due						
Loans reported as trading assets	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —
Loans	—	—	—	—	—	—
Nonaccrual loans						
Loans reported as trading assets	6,240	1,834	(4,406)	7,264	2,207	(5,057)
Loans	954	94	(860)	1,126	151	(975)
Subtotal	7,194	1,928	(5,266)	8,390	2,358	(6,032)
All other performing loans						
Loans reported as trading assets	35,806	29,822	(5,984)	35,095	29,341	(5,754)
Loans	3,160	2,045	(1,115)	2,147	1,000	(1,147)
Total loans	\$46,160	\$33,795	\$ (12,365)	\$45,632	\$ 32,699	\$ (12,933)
Long-term debt						
Principal—protected debt	\$21,862 ^(b)	\$22,152	\$ 290	\$26,765 ^(b)	\$ 26,378	\$ (387)
Nonprincipal—protected debt ^(a)	NA	19,776	NA	NA	22,594	NA
Total long-term debt	NA	\$41,928	NA	NA	\$ 48,972	NA
Long-term beneficial interests						
Principal—protected debt	\$ 60	\$ 60	\$ —	\$ 90	\$ 90	\$ —
Nonprincipal—protected debt ^(a)	NA	1,997	NA	NA	1,320	NA
Total long-term beneficial interests	NA	\$ 2,057	NA	NA	\$ 1,410	NA

(a) Remaining contractual principal is not applicable to nonprincipal-protected notes. Unlike principal-protected notes, for which the Firm is obligated to return a stated amount of principal at the maturity of the note, nonprincipal-protected notes do not obligate the Firm to return a stated amount of principal at maturity, but to return an amount based on the performance of an underlying variable or derivative feature embedded in the note.

(b) Where the Firm issues principal-protected zero-coupon or discount notes, the balance reflected as the remaining contractual principal is the final principal payment at maturity.

NOTE 5 — DERIVATIVE INSTRUMENTS

For a further discussion of the Firm's use and accounting policies regarding derivative instruments, see Note 5 on pages 167—175 of JPMorgan Chase's 2009 Annual Report.

Notional amount of derivative contracts

The following table summarizes the notional amount of derivative contracts outstanding as of June 30, 2010, and December 31, 2009.

(in billions)	Notional amounts ^(b)	
	June 30, 2010	December 31, 2009
Interest rate contracts		
Swaps	\$ 43,448	\$ 47,663
Futures and forwards	9,484	6,986
Written options	4,143	4,553
Purchased options	4,013	4,584
Total interest rate contracts	61,088	63,786
Credit derivatives^(a)	5,352	5,994
Foreign exchange contracts		
Cross-currency swaps	2,251	2,217
Spot, futures and forwards	4,166	3,578
Written options	742	685
Purchased options	730	699
Total foreign exchange contracts	7,889	7,179
Equity contracts		
Swaps	97	81
Futures and forwards	41	45
Written options	575	502
Purchased options	495	449
Total equity contracts	1,208	1,077
Commodity contracts		
Swaps	206	178
Spot, futures and forwards	156	113
Written options	221	201
Purchased options	216	205
Total commodity contracts	799	697
Total derivative notional amounts	\$ 76,336	\$ 78,733

(a) Primarily consists of credit default swaps. For more information on volumes and types of credit derivative contracts, see the Credit derivatives discussion on pages 135—136 of this Note.

(b) Represents the sum of gross long and gross short third-party notional derivative contracts.

While the notional amounts disclosed above give an indication of the volume of the Firm's derivative activity, the notional amounts significantly exceed, in the Firm's view, the possible losses that could arise from such transactions. For most derivative transactions, the notional amount is not exchanged; it is used simply as a reference to calculate payments.

Impact of derivatives on the Consolidated Balance Sheets

The following tables summarize information on derivative fair values that are reflected on the Firm's Consolidated Balance Sheets as of June 30, 2010, and December 31, 2009, by accounting designation (e.g., whether the derivatives were designated as hedges or not) and contract type.

Free-standing derivatives (a)

June 30, 2010 (in millions)	Derivative receivables			Derivative payables		
	Not designated as hedges	Designated as hedges	Total derivative receivables	Not designated as hedges	Designated as hedges	Total derivative payables
Trading assets and liabilities						
Interest rate	\$ 1,395,286	\$ 7,192	\$ 1,402,478	\$1,359,547	\$ 711	\$ 1,360,258
Credit	155,341	—	155,341	148,950	—	148,950
Foreign exchange(b)	159,181	2,436	161,617	171,274	623	171,897
Equity	58,098	—	58,098	55,379	—	55,379
Commodity	32,277	484	32,761	32,472	187(d)	32,659
Gross fair value of trading assets and liabilities	\$ 1,800,183	\$ 10,112	\$ 1,810,295	\$1,767,622	\$ 1,521	\$ 1,769,143
Netting adjustment(c)			(1,730,080)			(1,709,006)
Carrying value of derivative trading assets and trading liabilities on the Consolidated Balance Sheets			\$ 80,215			\$ 60,137

December 31, 2009 (in millions)	Derivative receivables			Derivative payables		
	Not designated as hedges	Designated as hedges	Total derivative receivables	Not designated as hedges	Designated as hedges	Total derivative payables
Trading assets and liabilities						
Interest rate	\$ 1,148,901	\$ 6,568	\$ 1,155,469	\$1,121,978	\$ 427	\$ 1,122,405
Credit	170,864	—	170,864	164,790	—	164,790
Foreign exchange(b)	141,790	2,497	144,287	137,865	353	138,218
Equity	57,871	—	57,871	58,494	—	58,494
Commodity	36,988	39	37,027	35,082	194(d)	35,276
Gross fair value of trading assets and liabilities	\$ 1,556,414	\$ 9,104	\$ 1,565,518	\$1,518,209	\$ 974	\$ 1,519,183
Netting adjustment(c)			(1,485,308)			(1,459,058)
Carrying value of derivative trading assets and trading liabilities on the Consolidated Balance Sheets			\$ 80,210			\$ 60,125

(a) Excludes structured notes for which the fair value option has been elected. See Note 4 on pages 125—127 of this Form 10-Q and Note 4 on pages 165—167 of JPMorgan Chase's 2009 Annual Report for further information.

(b) Excludes \$36 million of foreign currency-denominated debt designated as a net investment hedge at June 30, 2010. The Firm did not use foreign currency-denominated debt as a hedging instrument in 2009, and therefore there was no impact as of December 31, 2009.

(c) U.S. GAAP permits the netting of derivative receivables and payables, and the related cash collateral received and paid when a legally enforceable master netting agreement exists between the Firm and a derivative counterparty.

(d) Excludes \$1.3 billion related to separated commodity derivatives used as fair value hedging instruments that are recorded in the line item of the host contract (other borrowed funds) for both June 30, 2010, and December 31, 2009.

Derivative receivables and payables mark-to-market

The following table summarizes the fair values of derivative receivables and payables, including those designated as hedges by contract type after netting adjustments as of June 30, 2010, and December 31, 2009.

(in millions)	Trading assets-Derivative receivables		Trading liabilities-Derivative payables	
	June 30, 2010	December 31, 2009	June 30, 2010	December 31, 2009
Contract type:				
Interest rate(a)	\$ 42,268	\$ 33,733	\$ 20,041	\$ 19,688
Credit(a)	8,346	11,859	4,320	6,036
Foreign exchange	19,586	21,984	24,192	19,818
Equity	5,523	6,635	8,532	11,554
Commodity	4,492	5,999	3,052	3,029
Total	\$ 80,215	\$ 80,210	\$ 60,137	\$ 60,125

(a) In the first quarter of 2010, cash collateral netting reporting was enhanced. Prior periods have been revised to conform to the current presentation. The revision resulted in an increase to interest rate derivative receivables and a corresponding decrease to credit derivative receivables of \$7.0 billion, and an increase to interest rate derivative payables and a corresponding decrease to credit derivative payables of \$4.5 billion as of December 31, 2009.

[Table of Contents](#)
Impact of derivatives and hedged items on the income statement and on other comprehensive income

The following tables summarize the total pretax impact of JPMorgan Chase's derivative-related activities on the Firm's Consolidated Statements of Income and Other Comprehensive Income for the three and six months ended June 30, 2010 and 2009, respectively, by accounting designation.

Consolidated Statements of Income

Three months ended June 30, (in millions)	Derivative-related gains/(losses)					Total

2009	NA	168	(27)	NA	NA	141

(a) Includes the hedge accounting impact of the hedged item for fair value hedges and includes cash instruments within trading activities.

(b) Includes \$2 million and \$43 million of foreign currency transaction gain related to foreign currency-denominated debt designated as a net investment hedge for the three and six months ended June 30, 2010. The Firm did not use foreign currency-denominated debt as a hedging instrument in 2009 and therefore there was no impact for the three and six months ended June 30, 2009.

Table of Contents

The tables that follow reflect more detailed information regarding the derivative-related income statement impact by accounting designation for the three and six months ended June 30, 2010 and 2009, respectively.

Fair value hedge gains and losses

The following tables present derivative instruments, by contract type, used in fair value hedge accounting relationships, as well as pretax gains/(losses) recorded on such derivatives and the related hedged items for the three and six months ended June 30, 2010 and 2009, respectively. The Firm includes gains/(losses) on the hedging derivative and the related hedged item in the same line item in the Consolidated Statements of Income.

Three months ended June 30, 2010 (in millions)	Gains/(losses) recorded in income			Income statement impact due to:

Total	\$ (5,412)	\$ 5,882	\$ 470	\$ (484)	\$ 954

- (a) Primarily consists of hedges of the benchmark (e.g., London Interbank Offered Rate ("LIBOR")) interest rate risk of fixed-rate long-term debt and AFS securities. Gains and losses were recorded in net interest income.
- (b) Primarily consists of hedges of the foreign currency risk of long-term debt and AFS securities for changes in spot foreign currency rates. Gains and losses related to the derivatives and the hedged items, due to changes in spot foreign currency rates, were recorded in principal transactions revenue.
- (c) Consists of overall fair value hedges of physical gold and base metal inventory. Gains and losses were recorded in principal transactions revenue.
- (d) Total income statement impact for fair value hedges consists of hedge ineffectiveness and any components excluded from the assessment of hedge effectiveness.
- (e) Hedge ineffectiveness is the amount by which the gain or loss on the designated derivative instrument does not exactly offset the gain or loss on the hedged item attributable to the hedged risk.
- (f) Certain components of hedging derivatives are permitted to be excluded from the assessment of hedge effectiveness, such as forward points on a futures or forwards contract. Amounts related to excluded components are recorded in current-period income.

[Table of Contents](#)

Cash flow hedge gains and losses

The following tables present derivative instruments, by contract type, used in cash flow hedge accounting relationships, and the pretax gains/(losses) recorded on such derivatives, for the three and six months ended June 30, 2010 and 2009, respectively. The Firm includes the gain/(loss) on the hedging derivative in the same line item as the offsetting change in cash flows on the hedged item in the Consolidated Statements of Income.

Three months ended June 30, 2010 (in millions)	Gains/(losses) recorded in income and other comprehensive income/(loss)				
	Derivatives — effective portion reclassified from AOCI to income	Hedge ineffectiveness recorded directly in income/(d)	Total income statement impact	Derivatives — effective portion recorded in OCI	Total change in OCI for period

Total	\$ 7	\$ 8	\$ 15	\$ 284	\$ 277

Six months ended June 30, 2009 (in millions)	Gains/(losses) recorded in income and other comprehensive income/(loss)				
	Derivatives — effective portion reclassified from AOCI to income	Hedge ineffectiveness recorded directly in income/(d)	Total income statement impact	Derivatives — effective portion recorded in OCI	Total change in OCI for period
Contract type					
Interest rate(a)	\$ (69)(c)	\$ 2	\$ (67)	\$ (299)	\$ (230)
Foreign exchange(b)	209	—	209	607	398
Total	\$ 140	\$ 2	\$ 142	\$ 308	\$ 168

(a) Primarily consists of benchmark interest rate hedges of LIBOR-indexed floating-rate assets and floating-rate liabilities. Gains and losses were recorded in net interest income.

(b) Primarily consists of hedges of the foreign currency risk of non—U.S. dollar—denominated revenue and expense. The income statement classification of gains and losses follows the hedged item — primarily net interest income, compensation expense and other expense.

(c) In the second quarter of 2010, the Firm reclassified a \$25 million loss from accumulated other comprehensive income (“AOCI”) to earnings because the Firm determined that it is probable that forecasted interest payment cash flows related to certain wholesale deposits will not occur. The Firm did not experience forecasted transactions that failed to occur during the three and six months ended June 2009, respectively.

(d) Hedge ineffectiveness is the amount by which the cumulative gain or loss on the designated derivative instrument exceeds the present value of the cumulative expected change in cash flows on the hedged item attributable to the hedged risk.

Over the next 12 months, the Firm expects that \$296 million (after-tax) of net losses recorded in AOCI at June 30, 2010, related to cash flow hedges will be recognized in income. The maximum length of time over which forecasted transactions are hedged is 10 years, and such transactions primarily relate to core lending and borrowing activities.

Table of Contents

Net investment hedge gains and losses

The following tables present hedging instruments, by contract type, that were used in net investment hedge accounting relationships, and the pretax gains/(losses) recorded on such instruments for the three and six months ended June 30, 2010 and 2009, respectively.

Three months ended June 30, (in millions)	Gains/(losses) recorded in income and other comprehensive income/(loss)			
	2010		2009	
	Excluded components recorded directly in income ^(a)	Effective portion recorded in OCI	Excluded components recorded directly in income ^(a)	Effective portion recorded in OCI
Contract type				
Foreign exchange derivatives	\$ (32)	\$ 429	\$ (21)	\$ (208)
Foreign currency denominated debt	—	2	NA	NA
Total	\$ (32)	\$ 431	\$ (21)	\$ (208)

Six months ended June 30, (in millions)	Gains/(losses) recorded in income and other comprehensive income/(loss)			
	2010		2009	
	Excluded components recorded directly in income ^(a)	Effective portion recorded in OCI	Excluded components recorded directly in income ^(a)	Effective portion recorded in OCI
Contract type				
Foreign exchange derivatives	\$ (73)	\$ 714	\$ (30)	\$ (27)
Foreign currency denominated debt	—	43	NA	NA
Total	\$ (73)	\$ 757	\$ (30)	\$ (27)

(a) Certain components of derivatives used as hedging instruments are permitted to be excluded from the assessment of hedge effectiveness, such as forward points on a futures or forwards contract. Amounts related to excluded components are recorded in current-period income. There was no ineffectiveness for net investment hedge accounting relationships during the three and six months ended June 30, 2010 and 2009.

Risk management derivatives gains and losses (not designated as hedging instruments)

The following table presents nontrading derivatives, by contract type, that were not designated in hedge relationships, and the pretax gains/(losses) recorded on such derivatives for the three and six months ended June 30, 2010 and 2009, respectively. These derivatives are risk management instruments used to mitigate or transform the risk of market exposures arising from banking activities other than trading activities, which are discussed separately below.

(in millions)	Derivatives gains/(losses) recorded in income			
	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Contract type				
Interest rate ^(a)	\$ 3,672	\$ (3,047)	\$ 3,812	\$ (3,200)
Credit ^(b)	60	(1,512)	(59)	(2,028)
Foreign exchange ^(c)	(20)	(82)	(41)	(151)
Equity	—	—	—	—
Commodity ^(b)	—	17	(23)	(10)
Total	\$ 3,712	\$ (4,624)	\$ 3,689	\$ (5,389)

(a) Gains and losses were recorded in principal transactions revenue, mortgage fees and related income, and net interest income.

(b) Gains and losses were recorded in principal transactions revenue.

(c) Gains and losses were recorded in principal transactions revenue and net interest income.

[Table of Contents](#)

Trading derivative gains and losses

The following table presents trading derivatives gains and losses, by contract type, that are recorded in principal transactions revenue in the Consolidated Statements of Income for the three and six months ended June 30, 2010 and 2009, respectively. The Firm has elected to present derivative gains and losses related to its trading activities together with the cash instruments with which they are risk managed.

(in millions)	Gains/(losses) recorded in principal transactions revenue			
	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Type of instrument				
Interest rate	\$ (37)	\$ 1,373	\$ 70	\$ 3,758
Credit	1,287	2,332	3,412	1,683
Foreign exchange	(3,035)	2,052	(4,279)	3,126
Equity	85	(62)	907	798
Commodity	33	359	446	760
Total	\$ (1,667)	\$ 6,054	\$ 556	\$ 10,125

Credit risk, liquidity risk and credit-related contingent features

Derivative payables expose the Firm to liquidity risk, as the derivative contracts typically require the Firm to post cash or securities collateral with counterparties as the mark-to-market ("MTM") moves in the counterparties' favor, or upon specified downgrades in the Firm's or its subsidiaries' respective credit ratings. At June 30, 2010, the impact of a single-notch and six-notch ratings downgrade to JPMorgan Chase & Co. and its subsidiaries, primarily JPMorgan Chase Bank, National Association ("JPMorgan Chase Bank, N.A.") would have required \$1.5 billion and \$5.0 billion, respectively, of additional collateral to be posted by the Firm. Certain derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Firm or the counterparty, at the fair value of the derivative contracts. At June 30, 2010, the impact of single-notch and six-notch ratings downgrades to JPMorgan Chase & Co. and its subsidiaries, primarily JPMorgan Chase Bank, N.A., related to contracts with termination triggers would have required the Firm to settle trades with a fair value of \$349 million and \$6.3 billion, respectively. The aggregate fair value of net derivative payables that contain contingent collateral or termination features triggered upon a downgrade was \$37.0 billion at June 30, 2010, for which the Firm has posted collateral of \$30.2 billion in the normal course of business.

The following tables show the current credit risk of derivative receivables after netting adjustments and collateral received, and the current liquidity risk of derivative payables after netting adjustments and collateral posted, as of June 30, 2010, and December 31, 2009, respectively.

June 30, 2010 (in millions)	Derivative receivables	Derivative payables
Gross derivative fair value	\$ 1,810,295	\$ 1,769,143
Netting adjustment — offsetting receivables/payables	(1,660,105)	(1,660,105)
Netting adjustment — cash collateral received/paid	(69,975)	(48,901)
Carrying value on Consolidated Balance Sheets	\$ 80,215	\$ 60,137

December 31, 2009 (in millions)	Derivative receivables	Derivative payables
Gross derivative fair value	\$ 1,565,518	\$ 1,519,183
Netting adjustment — offsetting receivables/payables	(1,419,840)	(1,419,840)
Netting adjustment — cash collateral received/paid	(65,468)	(39,218)
Carrying value on Consolidated Balance Sheets	\$ 80,210	\$ 60,125

In addition to the collateral amounts reflected in the tables above, at June 30, 2010, and December 31, 2009, the Firm had received liquid securities collateral in the amount of \$19.3 billion and \$15.5 billion, respectively, and posted \$12.0 billion and \$11.7 billion, respectively. The Firm also receives and delivers collateral at the initiation of derivative transactions, which is available as security against potential exposure that could arise should the fair value of the transactions move in the Firm's or client's favor, respectively. Furthermore, the Firm and its counterparties hold collateral related to contracts that have a non-daily call frequency for collateral to be posted, and collateral that the Firm or a counterparty has agreed to return but has not yet settled as of the reporting date. At June 30, 2010, and December 31, 2009, the Firm had received \$16.1 billion and \$16.9 billion, respectively, and delivered \$9.7 billion and \$5.8 billion, respectively, of such additional collateral. These amounts were not netted against the derivative receivables and payables in the tables above, because, at an individual counterparty level, the collateral exceeded the fair value exposure at both June 30, 2010, and December 31, 2009.

Credit derivatives

For a more detailed discussion of credit derivatives, including a description of the different types used by the Firm, see Note 5 on pages 167—175, of JPMorgan Chase's 2009 Annual Report.

The following tables present a summary of the notional amounts of credit derivatives and credit-related notes the Firm sold and purchased as of June 30, 2010, and December 31, 2009. Upon a credit event, the Firm as a seller of protection would typically pay out only a percentage of the full notional amount of net protection sold, as the amount actually required to be paid on the contracts takes into account the recovery value of the reference obligation at the time of settlement. The Firm manages the credit risk on contracts to sell protection by purchasing protection with identical or similar underlying reference entities. As such, other purchased protection referenced in the following tables include credit derivatives bought on related, but not identical, reference positions; these include indices, portfolio coverage and other reference points. The Firm does not use notional amounts as the primary measure of risk management for credit derivatives, because the notional amount does not take into account the probability of the occurrence of a credit event, the recovery value of the reference obligation, or related cash instruments and economic hedges.

Total credit derivatives and credit-related notes

June 30, 2010 (in millions)	Maximum payout/Notional amount			
	Protection sold	Protection purchased with identical underlyings ^(b)	Net protection (sold)/purchased ^(c)	Other protection purchased ^(d)
Credit derivatives				
Credit default swaps	\$ (2,620,672)	\$ 2,601,815	\$ (18,857)	\$ 28,970
Other credit derivatives ^(a)	(34,066)	33,303	(763)	33,607
Total credit derivatives	(2,654,738)	2,635,118	(19,620)	62,577
Credit-related notes	(2,426)	—	(2,426)	2,388
Total	\$ (2,657,164)	\$ 2,635,118	\$ (22,046)	\$ 64,965

December 31, 2009 (in millions)	Maximum payout/Notional amount			
	Protection sold	Protection purchased with identical underlyings ^(b)	Net protection (sold)/purchased ^(c)	Other protection purchased ^(d)
Credit derivatives				
Credit default swaps	\$ (2,937,442)	\$ 2,978,044	\$ 40,602	\$ 28,064
Other credit derivatives ^(a)	(10,575)	9,290	(1,285)	30,473
Total credit derivatives	(2,948,017)	2,987,334	39,317	58,537
Credit-related notes	(4,031)	—	(4,031)	1,728
Total	\$ (2,952,048)	\$ 2,987,334	\$ 35,286	\$ 60,265

(a) Primarily consists of total return swaps and credit default swap options.

(b) Represents the total notional amount of protection purchased where the underlying reference instrument is identical to the reference instrument on protection sold; the notional amount of protection purchased for each individual identical underlying reference instrument may be greater or lower than the notional amount of protection sold.

(c) Does not take into account the fair value of the reference obligation at the time of settlement, which would generally reduce the amount the seller of protection pays to the buyer of protection in determining settlement value.

(d) Represents single-name and index credit default swap protection the Firm purchased.

The following tables summarize the notional and fair value amounts of credit derivatives and credit-related notes as of June 30, 2010, and December 31, 2009, where JPMorgan Chase is the seller of protection. The maturity profile is based on the remaining contractual maturity of the credit derivative contracts. The ratings profile is based on the rating of the reference entity on which the credit derivative contract is based. The ratings and maturity profile of protection purchased are comparable to the profile reflected below.

Protection sold — credit derivatives and credit-related notes ratings^(a)/maturity profile

June 30, 2010 (in millions)	<1 year	1 - 5 years	>5 years	Total notional amount	Fair value ^(b)

(a) The ratings scale is based on the Firm's internal ratings, which generally correspond to ratings as defined by S&P and Moody's.

(b) Amounts are shown on a gross basis, before the benefit of legally enforceable master netting agreements and cash collateral held by the Firm.

NOTE 6 — OTHER NONINTEREST REVENUE

For a discussion of the components of and accounting policies for the Firm's other noninterest revenue, see Note 6 on pages 175—176 of JPMorgan Chase's 2009 Annual Report.

The following table presents the components of investment banking fees.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Underwriting:				
Equity	\$ 354	\$ 949	\$ 767	\$ 1,257
Debt	711	766	1,462	1,369
Total underwriting	1,065	1,715	2,229	2,626
Advisory ^(a)	356	391	653	866
Total investment banking fees	\$ 1,421	\$ 2,106	\$ 2,882	\$ 3,492

(a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the guidance, the Firm consolidated its Firm-administered multi-seller conduits. The consolidation of the conduits did not significantly change the Firm's net income as a whole; however, it did affect the classification of items on the Firm's Consolidated Statements of Income. As a result, certain advisory fees were eliminated, which were offset by an increase in lending- and deposit-related fees.

The following table presents principal transactions revenue.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009

Interest expense^(a)				
Interest-bearing deposits	883	1,165	1,727	2,851
Short-term and other liabilities ^(d)	583	876	1,284	1,967
Long-term debt	1,260	1,781	2,520	3,525
Beneficial interests issued by consolidated VIEs	306	57	636	95
Total interest expense^(c)	3,032	3,879	6,167	8,438
Net interest income	12,687	12,670	26,397	26,037
Provision for credit losses	3,363	8,031	10,373	16,627
Net interest income after provision for credit losses	\$ 9,324	\$ 4,639	\$ 16,024	\$ 9,410

(a) Interest income and expense include the current-period interest accruals for financial instruments measured at fair value, except for financial instruments containing embedded derivatives that would be separately accounted for in accordance with U.S. GAAP absent the fair value option election; for those instruments, all changes in fair value, including any interest elements, are reported in principal transactions revenue.

(b) Predominantly margin loans.

(c) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon the adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, its Firm-administered multi-seller conduits and certain other consumer loan securitization entities, primarily mortgage-related. The consolidation of these VIEs did not significantly change the Firm's total net income. However, it did affect the classification of items on the Firm's Consolidated Statements of Income; as a result of the adoption of the new guidance, certain noninterest revenue was eliminated, offset by the recognition of interest income, interest expense, and provision for credit losses.

(d) Includes brokerage customer payables.

NOTE 8 — PENSION AND OTHER POSTRETIREMENT EMPLOYEE BENEFIT PLANS

For a discussion of JPMorgan Chase's pension and other postretirement employee benefit ("OPEB") plans, see Note 8 on pages 176—183 of JPMorgan Chase's 2009 Annual Report.

The following table presents the components of net periodic benefit cost reported in the Consolidated Statements of Income for the Firm's U.S. and non-U.S. defined benefit pension and OPEB plans.

Three months ended June 30, (in millions)	Defined benefit pension plans				OPEB plans	
	U.S.		Non-U.S.		2010	2009
	2010	2009	2010	2009		
Components of net periodic benefit cost						
Benefits earned during the period	\$ 58	\$ 80	\$ 6	\$ 7	\$ 1	\$ 1
Interest cost on benefit obligations	117	128	77	30	13	13
Expected return on plan assets	(185)	(146)	(75)	(28)	(24)	(24)
Amortization:						
Net loss	56	77	13	11	—	—
Prior service cost (credit)	(11)	1	—	—	(4)	(3)
Net periodic defined benefit cost for material plans	35	140	21	20	(14)	(13)
Net periodic defined benefit cost for individually immaterial plans	3	4	1	4	NA	NA
Total net periodic defined benefit cost for all plans	38	144	22	24	(14)	(13)
Total cost for defined contribution plans	84	76	67	63	NA	NA
Total pension and OPEB cost included in compensation expense	\$ 122	\$ 220	\$ 89	\$ 87	\$(14)	\$(13)

Six months ended June 30, (in millions)	Defined benefit pension plans				OPEB plans	
	U.S.		Non-U.S.		2010	2009
	2010	2009	2010	2009		
Components of net periodic benefit cost						
Benefits earned during the period	\$ 116	\$ 157	\$ 13	\$ 14	\$ 1	\$ 2
Interest cost on benefit obligations	234	256	63	56	28	31
Expected return on plan assets	(371)	(292)	(62)	(52)	(48)	(48)
Amortization:						
Net loss	112	153	27	21	—	—
Prior service cost (credit)	(22)	2	—	—	(7)	(7)
Net periodic defined benefit cost for material plans	69	276	41	39	(26)	(22)
Net periodic defined benefit cost for individually immaterial plans	7	7	5	8	NA	NA
Total net periodic defined benefit cost for all plans	76	283	46	47	(26)	(22)
Total cost for defined contribution plans	147	154	132	122	NA	NA
Total pension and OPEB cost included in compensation expense	\$ 223	\$ 437	\$178	\$169	\$(26)	\$(22)

The fair value of plan assets for the U.S. defined benefit pension and OPEB plans and for the material non-U.S. defined benefit pension plans were \$11.0 billion and \$2.3 billion, respectively, as of June 30, 2010, and \$11.5 billion and \$2.4 billion, respectively, as of December 31, 2009. See Note 20 on pages 168—169 of this Form 10-Q for further information on unrecognized amounts (i.e., net loss and prior service costs/(credit)) reflected in AOCI for the six months ended June 30, 2010 and 2009.

The amount, if any, of 2010 potential contributions for the U.S. qualified defined benefit pension plans is not reasonably estimable at this time. The 2010 potential contributions for the Firm's U.S. non-qualified defined benefit pension plans are estimated to be \$42 million and for the non-U.S. defined benefit pension and OPEB plans are estimated to be \$171 million and \$2 million, respectively.

NOTE 9 — EMPLOYEE STOCK-BASED INCENTIVES

For a discussion of the accounting policies and other information relating to employee stock-based incentives, see Note 9 on pages 184—186 of JPMorgan Chase's 2009 Annual Report.

The Firm recognized noncash compensation expense related to its various employee stock-based incentive plans of \$832 million and \$884 million for the three months ended June 30, 2010 and 2009, respectively, and \$1.8 billion and \$1.7 billion for the six months ended June 30, 2010 and 2009, respectively, in its Consolidated Statements of Income. For the three months ended June 30, 2010 and 2009, these amounts included expense of \$645 million and \$692 million, respectively, related to the cost of prior grants of restricted stock units ("RSUs") and stock appreciation rights ("SARs") that are amortized over their applicable vesting periods, and expense of \$187 million and \$192 million, respectively, related to the accrual of estimated costs of RSUs and SARs to be granted in future periods to full-career eligible employees. For the six months ended June 30, 2010, and 2009, these amounts included expense of \$1.4 billion and \$1.4 billion, respectively, related to the cost of prior grants of RSUs and SARs that are amortized over their applicable vesting periods, and expense of \$440 million and \$332 million, respectively, related to the accrual of estimated costs of RSUs and SARs to be granted in future periods to full-career eligible employees.

In the first quarter of 2010, the Firm granted 71 million RSUs, with a weighted average grant date fair value of \$43.12 per RSU, in connection with its annual incentive grant.

NOTE 10 — NONINTEREST EXPENSE

The following table presents the components of noninterest expense.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Compensation expense ^(a)	\$ 7,616	\$ 6,917	\$ 14,892	\$ 14,505
Noncompensation expense:				
Occupancy expense	883	914	1,752	1,799
Technology, communications and equipment expense	1,165	1,156	2,302	2,302
Professional and outside services	1,685	1,518	3,260	3,033
Marketing	628	417	1,211	801
Other expense ^{(b)(c)(d)}	2,419	2,190	6,860	3,565
Amortization of intangibles	235	265	478	540
Total noncompensation expense	7,015	6,460	15,863	12,040
Merger costs	—	143 ^(e)	—	348 ^(e)
Total noninterest expense	\$ 14,631	\$ 13,520	\$ 30,755	\$ 26,893

- (a) The second quarter and year-to-date of 2010 include a payroll tax expense related to the United Kingdom (“U.K.”) Bank Payroll Tax on certain compensation awarded from December 9, 2009, to April 5, 2010, to relevant banking employees.
- (b) Includes litigation expense of \$792 million and \$3.7 billion for the three and six months ended June 30, 2010, compared with \$14 million and a net benefit of \$256 million for the three and six months ended June 30, 2009, respectively.
- (c) Includes foreclosed property expense of \$244 million and \$547 million for the three and six months ended June 30, 2010, respectively, compared with \$294 million and \$619 million for the three and six months ended June 30, 2009, respectively. For additional information regarding foreclosed property, see Note 13 on page 196 of JPMorgan Chase’s 2009 Annual Report.
- (d) The second quarter of 2009 includes a \$675 million Federal Deposit Insurance Corporation (“FDIC”) special assessment.
- (e) Includes \$61 million and \$203 million for compensation expense, \$15 million and \$20 million for occupancy expense and \$67 million and \$125 million for technology and communications and other expense for the three and six months ended June 30, 2009, respectively. With the exception of occupancy- and technology-related write-offs, all of the costs required the expenditure of cash.

NOTE 11 — SECURITIES

Securities are classified as AFS, held-to-maturity (“HTM”) or trading. For additional information regarding AFS and HTM securities, see Note 11 on pages 187—191 of JPMorgan Chase’s 2009 Annual Report. Trading securities are discussed in Note 3 on pages 110—124 of this Form 10-Q.

Securities gains and losses

The following table presents realized gains and losses and credit losses that were recognized in income from AFS securities.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Realized gains	\$ 1,130	\$ 743	\$ 1,882	\$ 1,153
Realized losses	(130)	(210)	(172)	(417)

Other-than-temporary impairment (“OTTI”)

The following table presents credit losses that are included in the securities gains and losses table above.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Debt securities the Firm does not intend to sell that have credit losses				
Total losses (a)	—	\$ (880)	\$ (94)	\$ (880)
Losses recorded in/(reclassified from) other comprehensive income	—	696	(6)	696
Credit losses recognized in income on debt securities the Firm does not intend to sell (b)	—	(184)	(100)	(184)
Credit losses recognized in income on debt securities the Firm intends to sell	—	(2)(c)	—	(7)(c)
Total credit losses recognized in income	—	\$ (186)	\$ (100)	\$ (191)

- (a) For initial OTTI, represents the excess of the amortized cost over the fair value of AFS debt securities. For subsequent impairments of the same security, represents additional declines in fair value subsequent to previously recorded OTTI, if applicable.
- (b) Represents the credit loss component of certain prime mortgage-backed securities and obligations of U.S. states and municipalities that the Firm does not intend to sell. Subsequent credit losses may be recorded on securities without a corresponding further decline in fair value if there has been a decline in expected cash flows.
- (c) Includes OTTI losses recognized in income on certain subprime mortgage-backed securities. These securities were sold during the third quarter of 2009.

Changes in the credit loss component of credit-impaired debt securities

The following table presents a rollforward for the three and six months ended June 30, 2010 and 2009, of the credit loss component of OTTI losses that have been recognized in income, related to debt securities that the Firm does not intend to sell.

Impact of new consolidation guidance related to VIEs	—	—	(15)	—
Balance, end of period	\$ 640	\$ 184	\$ 640	\$ 184

Unrealized losses have generally decreased since December 31, 2009, due primarily to market spread improvement and increased liquidity, driving asset prices higher. Unrealized losses on certain securities have increased, including on corporate debt securities which included government-guaranteed positions that experienced credit spread widening. As of June 30, 2010, the Firm does not intend to sell the securities with a loss position in AOCI, and it is not likely that the Firm will be required to sell these securities before recovery of their amortized cost basis. Except for the securities reported in the table above for which credit losses have been recognized in income, the Firm believes that the securities with an unrealized loss in AOCI are not other-than-temporarily impaired as of June 30, 2010.

Following is a description of the Firm’s main security investments with the most significant unrealized losses as of June 30, 2010, and the key assumptions used in its estimate of the present value of the cash flows most likely to be collected from these investments.

Mortgage-backed securities — Prime and Alt-A nonagency

As of June 30, 2010, gross unrealized losses related to prime and Alt-A residential mortgage-backed securities issued by private issuers were \$420 million, all of which related to securities that have been in an unrealized loss position for 12 months or more. Overall losses have decreased since December 31, 2009, due to increased market stabilization, resulting from increased demand for higher-yielding asset classes and U.S. government programs. Approximately one-fifth of these positions (by amortized cost) are currently rated “AAA.” The remaining four-fifths have experienced downgrades since purchase, and approximately half of the downgraded positions are currently rated below investment-grade. Despite significant downgrades experienced in the portfolio, most of these are senior positions and possess adequate credit enhancement to absorb future expected losses. In analyzing prime and Alt-A residential mortgage-backed securities for potential credit losses, the Firm utilizes a methodology that focuses on loan-level detail to estimate future cash flows, which are then applied to the various tranches of issued securities based on their respective contractual provisions of the securitization trust. The loan-level analysis considers prepayment, home price, default rate and loss severity assumptions. Given this level of granularity, the underlying assumptions vary significantly taking into consideration such factors as the financial condition of the borrower, loan-to-value (“LTV”) ratio, loan type and geographical location of the underlying property. The weighted average underlying default rate on the positions was 23% and the related weighted average loss severity was 50%. Based on this analysis, the Firm has not recognized any additional OTTI losses in earnings during the second quarter of 2010; however, an OTTI loss of \$6 million was

recognized in the first quarter of 2010 related to securities that experienced increased delinquency rates associated with specific collateral types and origination dates. The unrealized loss of \$420 million is considered temporary, based on management's assessment that the credit enhancement levels for those securities remain sufficient to support the Firm's investment.

Asset-backed securities — Collateralized loan obligations

As of June 30, 2010, gross unrealized losses related to CLOs were \$262 million, all of which related to securities that were in an unrealized loss position for 12 months or more. Overall losses have decreased since December 31, 2009, mainly as a result of lower default forecasts and spread tightening across various asset classes. Substantially all of these securities are rated "AAA," "AA" and "A" and have an average credit enhancement of 29%. Credit enhancement in CLOs is primarily in the form of overcollateralization, which is the excess of the par amount of collateral over the par amount of securities. The key assumptions considered in analyzing potential credit losses were underlying loan and debt security defaults and loss severity. Based on current default trends, the Firm assumed collateral default rates of 5% for the second quarter 2010 and thereafter. Further, loss severities were assumed to be 50% for loans and 80% for debt securities. Losses on collateral were estimated to occur approximately 24 months after default.

Contractual maturities and yields

The following table presents the amortized cost and estimated fair value at June 30, 2010, of JPMorgan Chase's AFS and HTM securities by contractual maturity.

	June 30, 2010

(a) U.S. government agencies and U.S. government-sponsored enterprises were the only issuers whose securities exceeded 10% of JPMorgan Chase's total stockholders' equity at June 30, 2010.

(b) Average yield was based on amortized cost balances at the end of the period and did not give effect to changes in fair value reflected in accumulated other comprehensive income/(loss). Yields are derived by dividing interest/dividend income (including the effect of related derivatives on AFS securities and the amortization of premiums and accretion of discounts) by total amortized cost. Taxable-equivalent yields are used where applicable.

(c) Includes securities with no stated maturity. Substantially all of the Firm's residential mortgage-backed securities and collateralized mortgage obligations are due in 10 years or more, based on contractual maturity. The estimated duration, which reflects anticipated future prepayments based on a consensus of dealers in the market, is approximately four years for agency residential mortgage-backed securities, three years for agency residential collateralized mortgage obligations and five years for nonagency residential collateralized mortgage obligations.

NOTE 12 — SECURITIES FINANCING ACTIVITIES

For a discussion of accounting policies relating to securities financing activities, see Note 12 on page 192 of JPMorgan Chase's 2009 Annual Report. For further information regarding securities borrowed and securities lending agreements for which the fair value option has been elected, see Note 4 on pages 125-127 of this Form 10-Q.

The following table details the Firm's repurchase agreements, resale agreements, securities borrowed transactions and securities loaned transactions, all of which are accounted for as collateralized financings during the periods presented.

(in millions)	June 30, 2010	December 31, 2009
Securities purchased under resale agreements ^(a)	\$ 198,825	\$ 195,328
Securities borrowed ^(b)	122,289	119,630
Securities sold under repurchase agreements ^(c)	\$ 222,018	\$ 245,692
Securities loaned	10,505	7,835

(a) Includes resale agreements of \$22.8 billion and \$20.5 billion accounted for at fair value at June 30, 2010, and December 31, 2009, respectively.

(b) Includes securities borrowed of \$11.9 billion and \$7.0 billion accounted for at fair value at June 30, 2010, and December 31, 2009, respectively.

(c) Includes repurchase agreements of \$6.0 billion and \$3.4 billion accounted for at fair value at June 30, 2010, and December 31, 2009, respectively.

The amounts reported in the table above have been reduced by \$135.2 billion and \$121.2 billion at June 30, 2010, and December 31, 2009, respectively, as a result of the agreements having met the specified conditions for net presentation under applicable accounting guidance.

JPMorgan Chase pledges certain financial instruments it owns to collateralize repurchase agreements and other securities financings. Pledged securities that can be sold or repurchased by the secured party are identified as financial instruments owned (pledged to various parties) on the Consolidated Balance Sheets.

At June 30, 2010, the Firm received securities as collateral that could be repledged, delivered or otherwise used with a fair value of approximately \$623.3 billion. This collateral was generally obtained under resale agreements, securities borrowing agreements and customer margin loans. Of these securities, approximately \$439.0 billion were repledged, delivered or otherwise used, generally as collateral under repurchase agreements, securities lending agreements or to cover short sales.

NOTE 13 — LOANS

The accounting for a loan may differ based on whether it is originated or purchased and whether the loan is used in an investing or trading strategy. The measurement framework for loans in the Consolidated Financial Statements is one of the following:

- At the principal amount outstanding, net of the allowance for loan losses, unearned income, unamortized discounts and premiums, and any net deferred loan fees or costs, for loans held-for-investment (other than purchased credit-impaired loans);
- At the lower of cost or fair value, with valuation changes recorded in noninterest revenue, for loans that are classified as held-for-sale;
- At fair value, with changes in fair value recorded in noninterest revenue, for loans classified as trading assets or risk managed on a fair value basis; or
- Purchased credit-impaired loans held-for-investment are initially measured at fair value, which includes estimated future credit losses. Accordingly, an allowance for loan losses related to these loans is not recorded at the acquisition date.

For a detailed discussion of the accounting policies relating to loans, see Note 13 on pages 192-196 of JPMorgan Chase's 2009 Annual Report. See Note 4 on pages 125-127 of this Form 10-Q for further information on the Firm's elections of fair value accounting under the fair value option. See Note 3 on pages 110-124 of this Form 10-Q for further information on loans carried at fair value and classified as trading assets.

[Table of Contents](#)

The composition of the Firm's aggregate loan portfolio at each of the dates indicated was as follows.

(in millions)	June 30, 2010	December 31, 2009
U.S. wholesale loans:		
Commercial and industrial	\$ 47,431	\$ 49,103

Loans held-for-sale ^(j)	434	2,142
Total consumer loans — excluding purchased credit-impaired loans	405,756	348,038
Consumer loans — purchased credit-impaired loans	76,901	81,245
Total consumer loans	482,657	429,283
Total loans ^{(a)(k)}	\$ 699,483	\$ 633,458

- (a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon adoption of the new guidance, the Firm consolidated \$84.7 billion of loans associated with Firm-sponsored credit card securitization trusts; \$15.1 billion of wholesale loans; and \$4.8 billion of loans associated with certain other consumer securitization entities, primarily mortgage-related. For further information, see Note 15 on pages 151-163 of this Form 10-Q.
- (b) Includes IB, Commercial Banking ("CB"), Treasury & Securities Services ("TSS"), Asset Management ("AM") and Corporate/Private Equity.
- (c) Represents credit extended for real estate-related purposes to borrowers who are primarily in the real estate development or investment businesses, and for which the repayment is predominantly from the sale, lease, management, operations or refinancing of the property.
- (d) Includes loans for commercial and industrial, real estate, financial institutions and other of \$1.7 billion, \$206 million, \$1.3 billion and \$661 million, respectively, at June 30, 2010, and \$3.1 billion, \$44 million, \$278 million and \$715 million, respectively, at December 31, 2009.
- (e) Includes RFS, Card Services ("CS") and the Corporate/Private Equity segment.
- (f) Represents loans where JPMorgan Chase holds the first security interest placed upon the property.
- (g) Represents loans where JPMorgan Chase holds a security interest that is subordinate in rank to other liens.
- (h) Includes billed finance charges and fees net of an allowance for uncollectible amounts.
- (i) Includes \$1.0 billion of loans at December 31, 2009 held by the Washington Mutual Master Trust, which were consolidated onto the Firm's balance sheet at fair value during the second quarter of 2009. Such loans had been fully repaid or charged off as of June 30, 2010. See Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report.
- (j) Includes loans for prime mortgages and other (largely student loans) of \$185 million and \$249 million, respectively, at June 30, 2010, and \$450 million and \$1.7 billion, respectively, at December 31, 2009.
- (k) Loans (other than purchased credit-impaired loans and those for which the fair value option has been elected) are presented net of unearned income, unamortized discounts and premiums, and net deferred loan costs of \$1.7 billion and \$1.4 billion at June 30, 2010, and December 31, 2009, respectively.

[Table of Contents](#)

The following table reflects information about the Firm's loan sales.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Net gains/(losses) on sales of loans (including lower of cost or fair value adjustments)(a)	\$ 149	\$ 306	\$ 258	\$ 13

(a) Excludes sales related to loans accounted for at fair value.

Impaired loans

For further discussion of impaired loans, including the nature of such loans and the related accounting policies, and certain troubled debt restructurings, see Note 13 on pages 192-196 of JPMorgan Chase's 2009 Annual Report.

The tables below set forth information about the Firm's impaired loans, excluding both purchased credit-impaired loans and modified credit card loans, which are discussed separately below.

(in millions)	June 30, 2010	December 31, 2009
Impaired loans with an allowance:		
Wholesale	\$ 4,318	\$ 6,216
Consumer(a)	4,880	3,840
Total impaired loans with an allowance	9,198	10,056
Impaired loans without an allowance:(b)		
Wholesale	1,343	760
Consumer(a)	748	138
Total impaired loans without an allowance	2,091	898
Total impaired loans	\$ 11,289	\$ 10,954
Allowance for impaired loans:		
Wholesale	\$ 1,324	\$ 2,046
Consumer	1,161	996
Total allowance for impaired loans(c)	\$ 2,485	\$ 3,042

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Average balance of impaired loans:				
Wholesale	\$ 4,801	\$ 4,375	\$ 5,244	\$ 3,639
Consumer	5,406	3,479	4,998	3,042
Total impaired loans	\$ 10,207	\$ 7,854	\$ 10,242	\$ 6,681
Interest income recognized on impaired loans:				
Wholesale	\$ 3	\$ —	\$ 6	\$ —
Consumer	37	37	88	67
Total interest income recognized on impaired loans during the period	\$ 40	\$ 37	\$ 94	\$ 67

- (a) Consumer impaired loans without an allowance includes loans considered to be collateral-dependent based on regulatory guidance, which are charged off to the fair value of the underlying collateral. These loans are considered collateral-dependent because they involve modifications where a significant portion of principal is deferred or an interest-only period is provided. Prior period amounts have been reclassified from impaired loans with an allowance.
- (b) When the discounted cash flows, collateral value or market price equals or exceeds the recorded investment in the loan, then the loan does not require an allowance.
- (c) The allowance for impaired loans is included in JPMorgan Chase's asset-specific allowance for loan losses.

Loan modifications

Certain loan modifications are made in conjunction with the Firm's loss mitigation activities. Through the modification, JPMorgan Chase grants one or more concessions to a borrower who is experiencing financial difficulty in order to minimize the Firm's economic loss, avoid foreclosure or repossession of the collateral and to ultimately maximize payments received by the Firm from the borrower. The concessions granted vary by program and by borrower-specific characteristics, and may include interest rate reductions, payment deferrals, or the acceptance of equity or other assets in lieu of payments. In certain limited circumstances, loan modifications include principal forgiveness, which has been minimal to-date. All such modifications are accounted for and reported as troubled debt restructurings.

A loan that has been modified in a troubled debt restructuring is generally considered to be impaired until its maturity, regardless of whether the borrower performs under the modified terms. In certain limited cases, the concession granted relates solely to principal adjustments or other noninterest-rate concessions, and the effective interest rate applicable to the modified loan is at or above the current market rate at that time. In such circumstances, the loan is disclosed as impaired and as a troubled debt restructuring only during the year of the modification; in subsequent years, the loan is

[Table of Contents](#)

not disclosed as impaired or as a troubled debt restructuring if repayment of the restructured loan on its modified terms is reasonably assured.

It is the Firm's general policy to place loans, other than credit card loans, on nonperforming status when the loan is modified in a troubled debt restructuring. In most cases, residential real estate and commercial loans modified in a troubled debt restructuring were considered nonperforming prior to their modification. These loans may be returned to performing status (resuming the accrual of interest) if the criteria set forth in the Firm's accounting policy are met. These criteria generally include (a) performance under the modified terms for a minimum of six months and/or six payments, and (b) an expectation that repayment of the modified loan is reasonably assured based on, for example, the borrower's debt capacity and level of future earnings, collateral values, LTV ratios, and other current market considerations. The Firm's policy exempts credit card loans, including modified credit card loans, from being placed on nonperforming status as permitted by regulatory guidance. However, the Firm has separately established an allowance for the portion of earned interest and fees on such modified credit card loans that it estimates to be uncollectible.

The allowance for loan losses for loans modified in troubled debt restructurings is determined based on the same methodology used to estimate the Firm's asset-specific allowance component for as long as the loan continues to be reported as an impaired loan, regardless of whether the loan has returned to performing status. For further discussion of the methodology used to estimate the Firm's asset-specific allowance, see Note 14 on pages 196-198 of JPMorgan Chase's 2009 Annual Report.

Wholesale

As of June 30, 2010, and December 31, 2009, wholesale loans modified in troubled debt restructurings were \$1.1 billion for both periods. These modifications generally provided interest rate concessions to the borrower or deferral of principal repayments. Of these loans, \$524 million and \$491 million were classified as nonperforming at June 30, 2010, and December 31, 2009, respectively.

Consumer

For detailed discussions on the U.S. Treasury Making Home Affordable ("MHA") programs and the Firm's other loss-mitigation programs, see Note 13, Impaired loans, on pages 194-195 of JPMorgan Chase's 2009 Annual Report. Substantially all of the modifications made under these programs are accounted for and reported as troubled debt restructurings.

Consumer loans, other than credit card loans and certain home loans repurchased from the Government National Mortgage Association ("Ginnie Mae"), with balances of approximately \$4.9 billion and \$3.1 billion have been permanently modified and accounted for as troubled debt restructurings as of June 30, 2010, and December 31, 2009, respectively. Of these loans, \$1.9 billion and \$966 million were classified as nonperforming at June 30, 2010, and December 31, 2009, respectively.

At June 30, 2010, and December 31, 2009, \$1.7 billion and \$296 million, respectively, of loans modified subsequent to repurchase from Ginnie Mae were excluded from loans accounted for as troubled debt restructurings. When such loans perform subsequent to modification they are generally sold back into Ginnie Mae loan pools. Modified loans that do not re-perform become subject to foreclosure. Substantially all amounts due under the terms of these loans continue to be insured and, where applicable, reimbursement of insured amounts is proceeding normally.

Credit Card

For a detailed discussion of the modification of the terms of credit card loan agreements, see Note 13 on pages 192-196 of JPMorgan Chase's 2009 Annual Report. Substantially all modifications of credit card loans performed under the Firm's existing modification programs are considered to be troubled debt restructurings. At June 30, 2010, and December 31, 2009, the Firm had \$9.3 billion and \$5.1 billion, respectively, of on-balance sheet credit card loans outstanding for borrowers who are experiencing financial difficulty and who were then enrolled in a credit card modification program. The increase in modified credit card loans outstanding from December 31, 2009 to June 30, 2010, is primarily attributable to previously-modified loans held in Firm-sponsored credit card securitization trusts being consolidated as a result of adopting the new consolidation guidance related to VIEs. These modified loan amounts exclude loans to borrowers who have not complied with the modified payment terms, thereby causing the loan agreement to revert back to its original payment terms. Assuming that those borrowers do not begin to perform in accordance with the original payment terms, those loans will continue to age and will ultimately be charged-off in accordance with the Firm's accounting policies.

Consistent with the Firm's policy, all credit card loans typically remain on accrual status.

[Table of Contents](#)

The consumer formula-based allowance for loan losses includes \$3.6 billion and \$2.2 billion at June 30, 2010, and December 31, 2009, specifically attributable to credit card loans in loan modification programs. This component of the allowance for loan losses has been determined based on the present value of cash flows expected to be received over the estimated lives of the underlying loans.

Purchased credit-impaired loans

In connection with the Washington Mutual transaction, JPMorgan Chase acquired certain loans that it deemed to be credit-impaired. For a detailed discussion of purchased credit-impaired loans, including the related accounting policies, see Note 13 on pages 192-196 of JPMorgan Chase's 2009 Annual Report.

The table below sets forth the accretable yield activity for purchased credit-impaired consumer loans for the three and six months ended June 30, 2010 and 2009.

Accretable yield activity (in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Beginning balance	\$ 20,571	\$ 29,114	\$ 25,544	\$ 32,619
Accretion into interest income	(787)	(1,106)	(1,673)	(2,365)
Changes in interest rates on variable-rate loans	(333)	(1,045)	(727)	(3,291)
Other changes in expected cash flows ^(a)	170	—	(3,523)	—
Ending balance	\$ 19,621	\$ 26,963	\$ 19,621	\$ 26,963
Accretable yield percentage	4.20%	5.13%	4.39%	5.46%

(a) Other changes in expected cash flows may vary from period to period as the Firm continues to refine its cash flow model and periodically updates model assumptions. For the six months ended June 30, 2010, other changes in expected cash flows are principally driven by changes in prepayment assumptions, as well as reclassifications to the nonaccretable difference. Such changes are expected to have an insignificant impact on the accretable yield percentage.

The factors that most significantly affect estimates of gross cash flows expected to be collected, and accordingly the accretable yield balance, include: (i) changes in the benchmark interest rate indices upon which customer rates are based for products such as option ARM and home equity loans; and (ii) changes in prepayment assumptions.

To date, the decrease in the accretable yield percentage has been primarily related to a decrease in interest rates on variable rate loans and, to a lesser extent, extended loan liquidation periods. Certain events, such as extended loan liquidation periods, affect the timing of expected cash flows but not the amount of cash expected to be received (i.e., the accretable yield balance). Extended loan liquidation periods reduce the accretable yield percentage because the same accretable yield balance is recognized against a higher than expected loan balance over a longer than expected period of time.

The purchased credit-impaired portfolio primarily impacts the Firm's results of operations through: (i) contribution to net interest margin; and (ii) expense related to defaults and servicing resulting from the liquidation of the loans; and (iii) any provision for loan losses. The purchased credit-impaired loans acquired in the Washington Mutual transaction were funded based on the interest rate characteristics of the loans. For example, variable-rate loans were funded with variable-rate liabilities and fixed-rate loans were funded with fixed-rate liabilities with a similar maturity profile. As a result, the net spread between the purchased credit-impaired loans and the related liabilities should be relatively constant over time, except for any basis risk or other residual interest rate risk that remains and changes in the accretable yield percentage (e.g., from extended loan liquidation periods). The net spread will be earned on a declining loan balance over the estimated remaining weighted-average life of the portfolio, which is 6.6 years as of June 30, 2010.

While the Firm has modified certain purchased credit-impaired loans, such modifications have not yet seasoned and the ongoing performance of these loans is difficult to predict. Accordingly, the Firm has not yet incorporated the potential positive cash flow effects of these modifications into its expected cash flow estimates. The Firm will continue to monitor the success of the modifications and its ability to reliably estimate any related cash flow benefits. If the modifications ultimately result in a probable and significant increase in expected cash flows, the Firm will first consider the reversal of any previously recorded allowance for loan losses. Any remaining increase will be recognized prospectively as interest income (through an increase in accretable yield).

Table of Contents

As of June 30, 2010, and December 31, 2009, an allowance for loan losses of \$2.8 billion and \$1.6 billion, respectively, was recorded for the prime mortgage and option adjustable-rate mortgage ("ARM") pools. The net aggregate carrying amount of the pools that have an allowance for loan losses was \$43.0 billion and \$47.2 billion, respectively, at June 30, 2010, and December 31, 2009. This allowance for loan losses is reported as a reduction of the carrying amount of the loans in the table below.

The table below provides additional information about these purchased credit-impaired consumer loans.

(in millions)	June 30, 2010	December 31, 2009
Outstanding balance(a)	\$ 96,079	\$ 103,369
Carrying amount	74,090	79,664

(a) Represents the sum of contractual principal, interest and fees earned at the reporting date.

NOTE 14 — ALLOWANCE FOR CREDIT LOSSES

For further discussion of the allowance for credit losses and the related accounting policies, see Note 14 on pages 196-198 of JPMorgan Chase's 2009 Annual Report.

The table below summarizes the changes in the allowance for loan losses.

(in millions)	Six months ended June 30,	
	2010	2009
Allowance for loan losses at January 1	\$ 31,602	\$ 23,164
Cumulative effect of change in accounting principles(a)	7,494	—
Gross charge-offs(a)	14,652	10,937
Gross (recoveries)(a)	(1,028)	(522)
Net charge-offs(a)	13,624	10,415
Provision for loan losses(a)	10,371	16,540
Other(b)	(7)	(217)
Allowance for loan losses at June 30	\$ 35,836	\$ 29,072
Components:		
Asset-specific(c)(d)	\$ 2,485	\$ 2,909
Formula-based(a)(e)	30,540	26,163
Purchased credit-impaired	2,811	—
Total allowance for loan losses	\$ 35,836	\$ 29,072

- (a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon adoption of the new guidance, the Firm consolidated its Firm-sponsored credit card securitization trusts, its Firm-administered multi-seller conduits and certain other consumer loan securitization entities, primarily mortgage-related. As a result, \$7.4 billion, \$14 million and \$127 million of allowance for loan losses were recorded on-balance sheet associated with the Firm-sponsored credit card securitization trusts, Firm-administered multi-seller conduits, and certain other consumer loan securitization entities, primarily mortgage-related, respectively. For further discussion, see Note 15 on pages 151-163 of this Form 10-Q.
- (b) The 2009 amount predominantly represents a reclassification related to the issuance and retention of securities from the Chase Issuance Trust. See Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report.
- (c) Relates to risk-rated loans that have been placed on nonaccrual status and loans that have been modified in a troubled debt restructuring.
- (d) The asset-specific consumer allowance for loan losses includes troubled debt restructurings reserves of \$946 million and \$603 million at June 30, 2010 and 2009, respectively. Prior period amounts have been reclassified from formula-based to conform with the current period presentation.
- (e) Includes all of the Firm's allowance for loan losses on credit card loans, including those for which the Firm has modified the terms of the loans for borrowers who are experiencing financial difficulty.

The table below summarizes the changes in the allowance for lending-related commitments.

(in millions)	Six months ended June 30,	
	2010	2009
Allowance for lending-related commitments at January 1	\$ 939	\$ 659
Cumulative effect of change in accounting principles(a)	(18)	—
Provision for lending-related commitments(a)	2	87
Other	(11)	—
Allowance for lending-related commitments at June 30	\$ 912	\$ 746
Components:		
Asset-specific	\$ 248	\$ 111
Formula-based	664	635
Total allowance for lending-related commitments	\$ 912	\$ 746

- (a) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Upon adoption of the new guidance, the Firm consolidated its Firm-administered multi-seller conduits. As a result, related assets are now primarily recorded in loans and other assets on the Consolidated Balance Sheets.

[Table of Contents](#)

Charge-offs for Collateral-dependent loans

Included in gross charge-offs in the table above are \$405 million and \$140 million of charge-offs related to impaired collateral-dependent loans for the six months ended June 30, 2010 and 2009, respectively. The remaining balance of impaired collateral-dependent loans, measured at fair value of collateral less costs to sell, was \$2.5 billion and \$2.3 billion as of June 30, 2010 and 2009, respectively.

A loan is collateral-dependent when repayment of the loan is expected to be provided solely by the underlying collateral, rather than by cash flows from the borrower's operations, income or other resources. A collateral-dependent loan is deemed to be impaired when the borrower is unable to repay the loan and the collateral is insufficient to cover principal and interest. Certain impaired collateral-dependent loans (including those to wholesale customers and those modified in troubled debt restructurings) are charged-off to the fair value of the collateral less costs to sell.

The determination of the fair value of the collateral depends on the type of collateral (e.g., securities, real estate, and nonfinancial assets). In cases where the collateral is in the form of liquid securities, the fair value is based on quoted market prices or broker quotes. For illiquid securities or other financial assets, the fair value of the collateral is estimated using a discounted cash flow model.

For residential real estate loans, collateral value is determined using both internal and external valuation sources. Broker opinions of fair value are used to estimate the fair value of the collateral for all properties being evaluated for charge-off. These estimated fair values are reviewed and compared with prior valuations for reasonableness in light of current, geography-specific economic conditions and adjusted, as appropriate, for estimated selling costs. When foreclosure is determined to be probable, a third-party appraisal is obtained as soon as practicable.

For commercial real-estate loans, the collateral value is generally based on appraisals from internal and external valuation services. Appraisals are typically obtained and updated every six to twelve months. The Firm also considers both borrower- and market-specific factors, which may result in obtaining appraisal updates or broker price opinions at more frequent intervals.

See Note 3 on page 119 of this Form 10-Q for further information on the fair value hierarchy for impaired collateral-dependent loans.

NOTE 15 — VARIABLE INTEREST ENTITIES

For a further description of JPMorgan Chase's accounting policies regarding consolidation of VIEs, see Note 1 on pages 108-109 of this Form 10-Q. For a more detailed discussion of the Firm's principal involvement with VIEs, see Note 16 on page 206 of JPMorgan Chase's 2009 Annual Report.

The following summarizes the most significant type of Firm-sponsored VIEs by business segment.

Line of Business	Transaction Type	Activity	Form 10-Q page reference
Card Services	Credit card securitization trusts	Securitization of both originated and purchased credit card receivables	152-153
RFS	Mortgage and other securitization trusts	Securitization of originated and purchased residential mortgages, automobile and student loans	153-155
IB	Mortgage and other securitization trusts	Securitization of both originated and purchased residential and commercial mortgages, automobile and student loans	154-155
	Multi-seller conduits	Assist clients in accessing the financial markets in a cost-efficient manner and structures	156
	Investor intermediation activities:	transactions to meet investor needs	
	• Municipal bond vehicles		156-157
	• Credit-linked note vehicles		157
	• Asset swap vehicles		158

The Firm also invests in and provides financing and other services to VIEs sponsored by third parties, as described on page 158 of this Note.

New Consolidation Accounting Guidance for VIEs

On January 1, 2010, the Firm implemented new consolidation accounting guidance related to VIEs. The following table summarizes the incremental impact at adoption.

(in millions)	GAAP assets	GAAP liabilities	Stockholders' equity	Tier 1 capital
As of December 31, 2009	\$2,031,989	\$ 1,866,624	\$ 165,365	11.10%
Impact of new accounting guidance for consolidation of VIEs				
Credit card ^(a)	60,901	65,353	(4,452)	(0.30)%
Multi-seller conduits ^(b)	17,724	17,744	(20)	—
Mortgage & other ^{(c)(d)}	9,059	9,107	(48)	(0.04)%
Total impact of new guidance	87,684	92,204	(4,520)	(0.34)% ^(e)
Beginning balance- January 1, 2010	\$2,119,673	\$ 1,958,828	\$ 160,845	10.76%

- (a) The assets and liabilities of the Firm-sponsored credit card securitization trusts that were consolidated were initially measured at their carrying values, primarily amortized cost, as this method is consistent with the approach that CS utilizes to manage its other assets. These assets are primarily recorded in loans on the Firm's Consolidated Balance Sheet. In addition, CS established an allowance for loan losses of \$7.4 billion (pretax), which was reported as a transition adjustment in stockholders' equity. The impact to stockholders' equity also includes a decrease to AOCI of \$116 million, as a result of the reversal of the fair value adjustments taken on retained AFS securities that were eliminated in consolidation.
- (b) The assets and liabilities of the Firm-administered multi-seller conduits that were consolidated were initially measured at their carrying values, primarily amortized cost, as this method is consistent with the business's intent to hold the assets for the longer-term. The assets are primarily recorded in loans and in other assets on the Firm's Consolidated Balance Sheets.
- (c) RFS consolidated certain mortgage and other consumer securitizations, which resulted in a net increase in both assets and liabilities of \$4.7 billion (\$3.5 billion related to residential mortgage securitizations and \$1.2 billion related to other consumer securitizations). These assets were initially measured at their unpaid principal balance and primarily recorded in loans on the Firm's Consolidated Balance Sheets. This method was elected as a practical expedient.
- (d) IB consolidated certain mortgage and other consumer securitizations, which resulted in a net increase in both assets and liabilities of \$4.3 billion (\$3.7 billion related to residential mortgage securitizations and \$0.6 billion related to other consumer securitizations). These assets were initially measured at their fair value, as this method is consistent with the approach that IB utilizes to manage similar assets. These assets were primarily recorded in trading assets on the Firm's Consolidated Balance Sheets.
- (e) The U.S. GAAP consolidation of these VIEs did not have a significant impact on risk-weighted assets on the adoption date; this was due to the consolidation, for regulatory capital purposes, of the Chase Issuance Trust (the Firm's primary credit card securitization trust) in the second quarter of 2009, which added approximately \$40 billion of risk-weighted assets for regulatory capital purposes. For further discussion of the Firm's actions taken in the second quarter of 2009, see Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report. In addition, the U.S. GAAP consolidation of these VIEs did not have a significant regulatory impact because the banking regulatory agencies issued regulatory capital rules relating to the adoption of the new consolidation guidance related to VIEs that permitted an optional two-quarter implementation delay for certain VIEs, which permits the deferral of the effect of this accounting guidance on risk-weighted assets and risk-based capital requirements. The Firm elected this regulatory implementation delay, as permitted under these new regulatory capital rules, for its Firm-administered multi-seller conduits and certain mortgage-related and other securitization entities. Once the deferral period is over, the Firm expects the impact of this new consolidation guidance to be negligible on risk-weighted assets and risk-based capital ratios.

Firm-sponsored variable interest entities

Credit card securitizations

Effective January 1, 2010, the Firm was deemed to be the primary beneficiary of the Firm-sponsored credit card securitization trusts and consolidated the assets and liabilities of these trusts, including its primary card securitization trust, Chase Issuance Trust. The primary beneficiary determination was based on the Firm's ability to direct the activities of these VIEs through its servicing responsibilities and duties, including making decisions as to the receivables that get transferred into those trusts as well as any related modifications and workouts. Additionally, the nature and extent of the Firm's other involvement with the trusts including the retention of an undivided seller's interest in the receivables, retaining certain securities issued by the trust and the maintenance of escrow accounts, obligates the Firm to absorb losses and gives the Firm the right to receive certain benefits from these VIEs that could potentially be significant. For a more detailed description of JPMorgan Chase's principal involvement with credit card securitizations, as well as the accounting treatment applicable under prior accounting rules, see Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report.

Upon consolidation at January 1, 2010, the Firm recorded a net increase in GAAP assets of \$60.9 billion on the Consolidated Balance Sheet, which comprised: \$84.7 billion of loans; \$7.4 billion of allowance for loan losses; \$4.4 billion of other assets, partially offset by \$20.8 billion of previously recognized assets, consisting primarily of retained AFS securities that were eliminated upon consolidation. In addition, the Firm recognized \$65.4 billion of liabilities representing the trusts' beneficial interests issued to third parties.

[Table of Contents](#)

The following table summarizes the assets and liabilities of the Firm-sponsored credit card securitization trusts at June 30, 2010.

(in billions)	Loans	Other assets	Total assets held by Firm-sponsored credit card securitization trusts	Beneficial interests issued to third parties
June 30, 2010	\$82.1	\$ 1.3	\$ 83.4	\$ 56.0

The underlying securitized credit card receivables and other assets are available only for payment of the beneficial interests issued by the securitization trusts; they are not available to pay the Firm's other obligations or the claims of the Firm's other creditors.

The agreements with the credit card securitization trusts require the Firm to maintain a minimum undivided interest in the credit card trusts (which generally ranges from 4% to 12%). These undivided interests represent the Firm's undivided interests in the receivables transferred to the credit card trusts that have not been securitized. As of June 30, 2010, the Firm held undivided interests in Firm-sponsored credit card securitization trusts of \$13.2 billion. The Firm maintained an average undivided interest in principal receivables owned by those trusts of approximately 14% and 17% for the three and six months ended June 30, 2010. The Firm also retained \$1.6 billion of senior securities and \$9.2 billion of subordinated securities in certain of its credit card securitization trusts as of June 30, 2010. As of January 1, 2010, the Firm's undivided interests in the credit card trusts and securities retained were eliminated in consolidation. The credit card receivables of the trusts underlying the Firm's undivided interests and securities retained are classified within loans.

Firm-sponsored mortgage and other securitization trusts

Effective January 1, 2010, the Firm was deemed to be the primary beneficiary of certain mortgage securitization trusts and the Firm-sponsored automobile and student loan trusts because the Firm has the power to direct the activities of these VIEs through its servicing responsibilities and duties, including making decisions related to loan modifications and workouts. Additionally, the nature and extent of the Firm's continuing economic involvement with the trusts obligates the Firm to absorb losses and gives the Firm the right to receive benefits from the VIEs which could potentially be significant. For a more detailed description of JPMorgan Chase's principal involvement with mortgage and other securitization trusts, as well as the accounting treatment applicable under prior accounting rules, see Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report.

The following table presents the total unpaid principal amount of assets held in JPMorgan Chase-sponsored securitization entities at June 30, 2010, and December 31, 2009, including those that are consolidated by the Firm and those that are not consolidated by the Firm but for which the Firm has continuing involvement. Continuing involvement includes servicing the loans; holding senior interests or subordinated interests; recourse or guarantee arrangements; and derivative transactions. In certain instances, the Firm's only continuing involvement is servicing the loans. In the table below, the amount of beneficial interests held by JPMorgan Chase will not equal the assets held in nonconsolidated VIEs, because the beneficial interests held by third parties are reflected at their current outstanding par amounts, and a portion of the Firm's retained interests (trading assets and AFS securities) are reflected at their fair values. See Securitization activity on pages 160-161 of this Note for further information regarding the Firm's cash flows with and interests retained in nonconsolidated VIEs.

- (a) Excludes loan sales to government sponsored entities (“GSEs”). See Securitization activity on pages 160-161 of this Note for information on the Firm’s loan sales to GSEs.
- (b) Includes Alt-A loans.
- (c) Consists of securities backed by commercial loans (predominantly real estate) and non-mortgage-related consumer receivables purchased from third parties. The Firm generally does not retain a residual interest in its sponsored commercial mortgage securitization transactions. Includes co-sponsored commercial securitizations and, therefore, includes non-JPMorgan Chase-originated commercial mortgage loans.
- (d) Excludes retained servicing (for a discussion of MSRs, see Note 16 on pages 164-167 of this Form 10-Q) and securities retained from loan sales to Ginnie Mae, Fannie Mae and Freddie Mac.
- (e) Excludes senior and subordinated securities of \$208 million and \$51 million, respectively, at June 30, 2010, and \$729 million and \$146 million, respectively, at December 31, 2009, which the Firm purchased in connection with IB’s secondary market-making activities.
- (f) Includes investments acquired in the secondary market that are predominantly for held-for-investment purposes, of \$182 million and \$139 million as of June 30, 2010, and December 31, 2009, respectively. This is comprised of \$122 million and \$91 million of AFS securities, related to commercial and other; and \$60 million and \$48 million of investments classified as trading assets-debt and equity instruments, including \$59 million and \$47 million of residential mortgages, and \$1 million and \$1 million of commercial and other, all respectively, at June 30, 2010, and December 31, 2009.
- (g) Excludes interest rate and foreign exchange derivatives primarily used to manage the interest rate and foreign exchange risks of the securitization entities. See Note 5 on pages 128-136 of this Form 10-Q for further information on derivatives.
- (h) Includes interests held in re-securitization transactions.

Residential mortgage

The Firm securitizes residential mortgage loans originated by RFS, as well as residential mortgage loans that may be purchased by either RFS or IB. RFS generally retains servicing for all its originated and purchased residential mortgage loans. Additionally, RFS may retain servicing for certain mortgage loans purchased by IB. As servicer, the Firm receives servicing fees based on the securitized loan balance plus ancillary fees.

For Firm-sponsored securitizations serviced by RFS, the Firm is deemed to have the power to direct the significant activities of the VIE, as it is the servicer of the loans and is responsible for decisions related to loan modifications and workouts. For the loans serviced by unrelated third parties, the Firm is not the primary beneficiary, as the power to direct the significant activities resides with the third-party servicer. In a limited number of securitizations, RFS, in addition to

having servicing rights, may retain an interest in the VIE that could potentially be significant to the VIE. In these instances, the Firm is deemed to be the primary beneficiary. As of June 30, 2010, due to RFS's servicing arrangements and retained interests, the Firm consolidated approximately \$3.3 billion of assets and \$3.4 billion of liabilities of Firm-sponsored residential mortgage securitization trusts. As of December 31, 2009, RFS did not consolidate any VIEs in accordance with the accounting treatment under prior accounting rules. Additionally, RFS held retained interests of approximately \$245 million and \$537 million as of June 30, 2010, and December 31, 2009, respectively, in nonconsolidated securitization entities. See pages 161-163 of this Note for further information on retained interests held in nonconsolidated VIEs; these retained interests are classified as trading assets or AFS securities.

IB may engage in underwriting and trading activities of the securities issued by Firm-sponsored securitization trusts. As a result, IB at times retains senior and/or subordinated interests (including residual interests) in residential mortgage securitizations upon securitization, and/or reacquires positions in the secondary market in the normal course of business. In certain instances as a result of the size of the positions retained or reacquired by IB, when considered together with the servicing arrangements entered into by RFS, the Firm is deemed to be the primary beneficiary of certain trusts. As of June 30, 2010, the Firm consolidated approximately \$1.2 billion of VIE assets and \$684 million of liabilities due to IB's involvement with such trusts. These entities were not consolidated at December 31, 2009, in accordance with the accounting treatment under prior accounting rules. Additionally, IB held approximately \$488 million, and \$699 million of senior and subordinated interests as of June 30, 2010, and December 31, 2009, respectively, in nonconsolidated securitization entities. This includes approximately \$1 million and \$2 million of residual interests as of June 30, 2010, and December 31, 2009, respectively. See pages 161-163 of this Note for further information on interests held in nonconsolidated securitizations. These retained interests are accounted for at fair value and classified as trading assets.

The Firm's mortgage loan sales are primarily nonrecourse, thereby effectively transferring the risk of future credit losses to the purchaser of the mortgage-backed securities issued by the trust. However, for a limited number of loan sales, the Firm is obligated to share a portion of the credit risk associated with the sold loans with the purchaser. See Note 22 on pages 170-174 of this Form 10-Q for additional information on loans sold with recourse, as well as information on indemnifications for breaches of representations and warranties. See page 161 of this Note for further information on loans sold to the GSEs.

Commercial mortgages and other consumer securitizations

IB securitizes commercial mortgage loans that it originates. Additionally, IB may also engage in underwriting and trading of securities issued by the securitization trusts. IB may retain unsold senior and/or subordinated interests in commercial mortgage securitizations at the time of securitization but generally does not service commercial loan securitizations. For loans serviced by unrelated third parties, the Firm generally does not have the power to direct the significant activities of the VIE and, therefore, does not consolidate the VIEs. As of June 30, 2010, the Firm consolidated approximately \$637 million of commercial mortgage securitization trusts due to the Firm holding certain subordinated interests that give the Firm the power to direct the activities of these entities. These entities were not consolidated at December 31, 2009, in accordance with the accounting treatment under prior accounting rules. At June 30, 2010, and December 31, 2009, the Firm held \$1.8 billion and \$1.6 billion, respectively, of retained interests in nonconsolidated commercial mortgage securitizations. This includes approximately \$9 million and \$22 million of residual interests as of June 30, 2010, and December 31, 2009, respectively.

The Firm also securitizes automobile and student loans originated by RFS, and consumer loans (including automobile and student loans) purchased by IB. The Firm retains servicing responsibilities for all originated and certain purchased student and automobile loans. It also holds a retained interest in these securitizations. As such, the Firm is the primary beneficiary of and consolidates these VIEs as of June 30, 2010. As of June 30, 2010, the Firm consolidated \$4.8 billion of assets and \$3.5 billion of liabilities of automobile and student loan securitizations. As of December 31, 2009, the Firm held \$9 million and \$49 million of retained interests in nonconsolidated securitized automobile and student loan securitizations, respectively. These entities were not consolidated at December 31, 2009, in accordance with the accounting treatment under prior accounting rules. In addition, at December 31, 2009, the Firm consolidated \$3.8 billion of other student loans.

Re-securitizations

The Firm also engages in certain re-securitization transactions in which debt securities are transferred to a VIE in exchange for new beneficial interests. These transfers occur to both agency (Fannie Mae, Freddie Mac and Ginnie Mae) and nonagency (private-label) sponsored VIEs, which may be backed by either residential or commercial mortgages and are often structured on behalf of clients. As of June 30, 2010, the Firm did not consolidate any agency re-securitizations, as it did not have the power to direct the significant activities of the trust. As of June 30, 2010, the Firm consolidated \$522 million of assets and \$117 million of liabilities of private-label re-securitizations, as the Firm had both the power to

[Table of Contents](#)

direct the significant activities of, and retained an interest that is deemed to be significant in, the trust. For other nonconsolidated private-label re-securitizations, the Firm did not have the sole power to direct the significant activities of the entity. During the three months and six months ended June 30, 2010, respectively, the Firm transferred \$7.8 billion and \$663 million, respectively, and \$14.3 billion and \$1.0 billion, respectively, of securities to agency and private-label VIEs. At June 30, 2010, the Firm held approximately \$1.7 billion and \$23 million of senior and subordinated interests, respectively, in nonconsolidated agency and private-label re-securitization entities. See pages 161-163 of this Note for further information on interests held in nonconsolidated securitization VIEs.

Multi-seller conduits

Effective January 1, 2010, the Firm consolidated its Firm-administered multi-seller conduits, as the Firm had both the power to direct the significant activities of the conduits and a potentially significant economic interest. The Firm directs the economic performance of the conduits as administrative agent and in its role in structuring transactions for the conduits. In these roles, the Firm makes decisions regarding concentration of asset types and credit quality of transactions, and is responsible for managing the commercial paper funding needs of the conduits. The Firm's interests that could potentially be significant to the VIEs include the fees received as administrative agent, liquidity provider and provider of program-wide credit enhancement, as well as the Firm's potential exposure as a result of the liquidity and credit enhancement facilities provided to the conduits.

For a more detailed description of JPMorgan Chase's principal involvement with Firm-administered multi-seller conduits, as well as the accounting treatment applicable under prior accounting rules, see Note 16 on pages 206-209 of JPMorgan Chase's 2009 Annual Report.

Consolidated Firm-administered multi-seller conduits

(in billions)	Loans	Other assets	Total assets held by Firm-administered multi-seller conduits	Commercial paper issued to third parties
June 30, 2010	\$20.9	\$ 1.9	\$ 22.8	\$ 22.8

The Firm provides both deal-specific and program-wide liquidity facilities. Because the majority of the deal-specific liquidity facilities will only fund nondefaulted assets, program-wide credit enhancement is required to absorb losses on defaulted receivables in excess of losses absorbed by any deal-specific credit enhancement. Program-wide credit enhancement may be provided by JPMorgan Chase in the form of standby letters of credit or by third-party surety bond providers. The amount of program-wide credit enhancement required varies by conduit and ranges between 5% and 10% of applicable commercial paper outstanding. The Firm provided \$2.0 billion of program-wide credit enhancement at June 30, 2010.

VIEs associated with investor intermediation activities

For a more detailed description of JPMorgan Chase's principal involvement with investor intermediation activities, see Note 16 on pages 209-212 of JPMorgan Chase's 2009 Annual Report.

Municipal bond vehicles

The Firm consolidates municipal bond vehicles if it owns the residual interest. The residual interest generally allows the owner to make decisions that significantly impact the economic performance of the municipal bond vehicle, primarily by directing the sale of the municipal bonds owned by the vehicle. In addition, the residual interest owners have the right to receive benefits and bear losses that could potentially be significant to the municipal bond vehicle. The Firm does not consolidate municipal bond vehicles if it does not own the residual interests, since the Firm does not have the power to make decisions that significantly impact the economic performance of the municipal bond vehicle.

[Table of Contents](#)

The Firm's exposure to nonconsolidated municipal bond VIEs at June 30, 2010, and December 31, 2009, including the ratings profile of the VIEs' assets, was as follows.

(in billions)	Fair value of assets held by VIEs	Liquidity facilities ^(b)	Excess/(deficit) ^(c)	Maximum exposure
Nonconsolidated municipal bond vehicles ^(a)				
June 30, 2010	\$ 13.9	\$ 8.7	\$ 5.2	\$ 8.7
December 31, 2009	13.2	8.4	4.8	8.4

(in billions, except where otherwise noted)	Ratings profile of VIE assets ^(d)					Fair value of assets held by VIEs	Wt. avg. expected life of assets (years)
	Investment-grade				Noninvestment-grade		
	AAA to AAA-	AA+ to AA-	A+ to A-	BBB to BBB-	BB+ and below		
Nonconsolidated municipal bond vehicles ^(a)							
June 30, 2010	\$ 4.3	\$ 9.3	\$ 0.3	\$ —	\$ —	\$ 13.9	9.0
December 31, 2009	1.6	11.4	0.2	—	—	13.2	10.1

- (a) Excluded \$2.1 billion and \$2.8 billion, as of June 30, 2010, and December 31, 2009, respectively, which were consolidated due to the Firm owning the residual interests.
- (b) The Firm may serve as credit enhancement provider to municipal bond vehicles in which it serves as liquidity provider. The Firm provided insurance on underlying municipal bonds, in the form of letters of credit, of \$10 million at both June 30, 2010, and December 31, 2009.
- (c) Represents the excess/(deficit) of the fair values of municipal bond assets available to repay the liquidity facilities, if drawn.
- (d) The ratings scale is based on the Firm's internal risk ratings and is presented on an S&P-equivalent basis.

Credit-linked note vehicles

The Firm structures transactions with credit-linked note vehicles in which the VIE purchases highly rated assets, such as asset-backed securities, or enters into a credit derivative contract with the Firm to obtain exposure to a referenced credit which the VIE otherwise does not hold. The VIE then issues CLNs with maturities predominantly ranging from one to ten years in order to transfer the risk of the referenced credit to the VIE's investors. The Firm does not generally consolidate these credit-linked note entities, since the Firm does not have the power to direct the significant activities of these entities and does not have a variable interest that could potentially be significant.

Exposure to nonconsolidated credit-linked note VIEs at June 30, 2010, and December 31, 2009, was as follows.

June 30, 2010 (in billions)	Net derivative receivables	Trading assets ^(b)	Total exposure ^(c)	Par value of collateral held by VIEs ^(d)
Credit-linked notes ^(a)				
Static structure	\$ 1.5	\$ —	\$ 1.5	\$ 9.9
Managed structure	4.0	0.1	4.1	11.5
Total	\$ 5.5	\$ 0.1	\$ 5.6	\$ 21.4

December 31, 2009 (in billions)	Net derivative receivables	Trading assets ^(b)	Total exposure ^(c)	Par value of collateral held by VIEs ^(d)
Credit-linked notes ^(a)				
Static structure	\$ 1.9	\$ 0.7	\$ 2.6	\$ 10.8
Managed structure	5.0	0.6	5.6	15.2
Total	\$ 6.9	\$ 1.3	\$ 8.2	\$ 26.0

- (a) Excluded collateral with a fair value of \$244 million and \$855 million at June 30, 2010, and December 31, 2009, respectively, which was consolidated, as the Firm, in its role as secondary market-maker, held a majority of the issued credit-linked notes of certain vehicles.
- (b) Trading assets principally comprise notes issued by VIEs, which from time to time are held as part of the termination of a deal or to support limited market-making.
- (c) On-balance sheet exposure that includes net derivative receivables and trading assets — debt and equity instruments.
- (d) The Firm's maximum exposure arises through the derivatives executed with the VIEs; the exposure varies over time with changes in the fair value of the derivatives. The Firm relies on the collateral held by the VIEs to pay any amounts due under the derivatives; the vehicles are structured at inception so that the par value of the collateral is expected to be sufficient to pay amounts due under the derivative contracts.

Asset swap vehicles

The Firm structures and executes transactions with asset swap vehicles on behalf of investors. In such transactions, the VIE purchases a specific asset or assets and then enters into a derivative with the Firm in order to tailor the interest rate or currency risk, or both, according to investors' requirements. The Firm does not generally consolidate these asset swap vehicles, since the Firm does not have the power to direct the significant activities of these entities and does not have a variable interest that could potentially be significant.

Exposure to nonconsolidated asset swap VIEs at June 30, 2010, and December 31, 2009, was as follows.

(in billions)	Net derivative receivables	Trading assets ^(b)	Total exposure ^(c)	Par value of collateral held by VIEs ^(d)
June 30, 2010^(a)	\$ 0.3	\$ —	\$ 0.3	\$ 7.3
December 31, 2009 ^(a)	0.1	—	0.1	10.2

- (a) Excluded the fair value of collateral of \$532 million and \$623 million at June 30, 2010, and December 31, 2009, respectively, which was consolidated as the Firm, in its role as secondary market-maker, held a majority of the issued notes of certain vehicles.
- (b) Trading assets principally comprise notes issued by VIEs, which from time to time are held as part of the termination of a deal or to support limited market-making.
- (c) On-balance sheet exposure that includes net derivative receivables and trading assets—debt and equity instruments.
- (d) The Firm's maximum exposure arises through the derivatives executed with the VIEs; the exposure varies over time with changes in the fair value of the derivatives. The Firm relies upon the collateral held by the VIEs to pay any amounts due under the derivatives; the vehicles are structured at inception so that the par value of the collateral is expected to be sufficient to pay amounts due under the derivative contracts.

VIEs sponsored by third parties

Investment in a third-party credit card securitization trust

The Firm holds two interests in a third-party-sponsored VIE, which is a credit card securitization trust that owns credit card receivables issued by a national retailer. The Firm is not the primary beneficiary of the trust, as the Firm does not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance. The first note is structured so that the principal amount can float up to 47% of the principal amount of the receivables held by the trust, not to exceed \$4.2 billion. The Firm accounts for its investment at fair value within AFS securities. At June 30, 2010, and December 31, 2009, the amortized cost of the note was \$3.1 billion and \$3.5 billion, respectively, and the fair value was \$3.2 billion and \$3.5 billion, respectively. The Firm accounts for its other interest, which is not subject to limits, as a loan at amortized cost. This senior loan had an amortized cost and fair value of approximately \$1.0 billion at both June 30, 2010, and December 31, 2009. For more information on AFS securities and loans, see Notes 11 and 13 on pages 139-144 and 145-150, respectively, of this Form 10-Q.

VIE used in FRBNY transaction

In conjunction with the Bear Stearns merger, in June 2008, the Federal Reserve Bank of New York ("FRBNY") took control, through an LLC formed for this purpose, of a portfolio of \$30.0 billion in assets, based on the value of the portfolio as of March 14, 2008. The assets of the LLC were funded by a \$28.85 billion term loan from the FRBNY and a \$1.15 billion subordinated loan from JPMorgan Chase. The JPMorgan Chase loan is subordinated to the FRBNY loan and will bear the first \$1.15 billion of any losses of the portfolio. Any remaining assets in the portfolio after repayment of the FRBNY loan, repayment of the JPMorgan Chase loan and the expense of the LLC will be for the account of the FRBNY. The extent to which the FRBNY and JPMorgan Chase loans will be repaid will depend on the value of the assets in the portfolio and the liquidation strategy directed by the FRBNY. The Firm does not consolidate the LLC, as it does not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance.

Other VIEs sponsored by third parties

The Firm enters into transactions with VIEs structured by other parties. These include, for example, acting as a derivative counterparty, liquidity provider, investor, underwriter, placement agent, trustee or custodian. These transactions are conducted at arm's length, and individual credit decisions are based on the analysis of the specific VIE, taking into consideration the quality of the underlying assets. Where the Firm does not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, or a variable interest that could potentially be significant, the Firm records and reports these positions on its Consolidated Balance Sheets similarly to the way it would record and report positions from any other third-party transaction.

Consolidated VIE assets and liabilities

The following table presents information on assets and liabilities related to VIEs that are consolidated by the Firm as of June 30, 2010, and December 31, 2009.

June 30, 2010 (in billions)	Assets			
	Trading assets- debt and equity instruments	Loans	Other ^(a)	Total assets ^(b)
VIE program type				
Firm-sponsored credit card trusts	\$ —	\$ 82.1	\$ 1.3	\$ 83.4
Firm-administered multi-seller conduits	—	20.9	1.9	22.8

Total	\$ 15.2	\$ 2.2	\$ 17.4

- (a) Included assets classified as cash, resale agreements, derivative receivables, available-for-sale, and other assets within the Consolidated Balance Sheets.
- (b) The assets of the consolidated VIEs included in the program types above are used to settle the liabilities of those entities. The difference between total assets and total liabilities recognized for consolidated VIEs represents the Firm's interest in the consolidated VIEs for each program type.
- (c) The interest-bearing beneficial interest liabilities issued by consolidated VIEs are classified in the line item on the Consolidated Balance Sheets titled, "Beneficial interests issued by consolidated variable interest entities." The holders of these beneficial interests do not have recourse to the general credit of JPMorgan Chase. Included in beneficial interests in VIE assets are long-term beneficial interests of \$65.1 billion and \$10.4 billion at June 30, 2010, and December 31, 2009, respectively. The maturities of the long-term beneficial interests as of June 30, 2010, were as follows: \$22.1 billion under one year, \$33.2 billion between one and five years, and \$9.8 billion over 5 years.
- (d) Included liabilities classified as other borrowed funds and accounts payable and other liabilities in the Consolidated Balance Sheets.
- (e) Includes the receivables and related liabilities of the WMM Trust. For further discussion, see Note 15 on pages 198-205 respectively, of JPMorgan Chase's 2009 Annual Report.

Supplemental information on loan securitizations

The Firm securitizes and sells a variety of loans, including residential mortgage, credit card, automobile, student and commercial (primarily related to real estate) loans, as well as debt securities. The primary purposes of these securitization transactions are to satisfy investor demand and to generate liquidity for the Firm.

For a discussion of the accounting treatment under prior accounting rules relating to loan securitizations, see Note 1 on pages 142-143 and Note 15 on pages 198-205 of JPMorgan Chase's 2009 Annual Report.

Securitization activity

The following tables provide information related to the Firm's securitization activities for the three and six months ended June 30, 2010 and 2009, related to assets held in JPMorgan Chase-sponsored securitization entities that were not consolidated by the Firm, as sale accounting was achieved based on the accounting rules in effect at the time of the securitization. For the three- and six-month periods ended June 30, 2009, there were no mortgage loans that were securitized, and there were no cash flows from the Firm to the SPEs related to recourse or guarantee arrangements. Effective January 1, 2010, all of the Firm-sponsored credit card, student loan and auto securitization trusts were consolidated as a result of the new consolidation guidance related to VIEs and, accordingly, are not included in the securitization activity tables below for the three and six months ended June 30, 2010 and 2009.

	Three months ended June 30, 2010

(in millions)	Six months ended June 30, 2009			
	Residential mortgage			Commercial and other
	Prime(f)	Subprime	Option ARMs	
All cash flows during the period(a):				
Servicing fees collected	\$ 232	\$ 85	\$ 246	\$ 8
Other cash flows received(c)	6	2	—	—
Purchases of previously transferred financial assets (or the underlying collateral)(d)	76	—	13	—
Cash flows received on the interests that continue to be held by the Firm(e)	364	13	64	158

(a) Excludes loan sales for which the Firm did not securitize (including loans sold to Ginnie Mae, Fannie Mae and Freddie Mac).

(b) Proceeds were received in the form of securities and were classified in level 2 of the fair value measurement hierarchy. A majority of these securities were sold for cash shortly after securitization.

(c) Includes excess servicing fees and other ancillary fees received.

(d) Includes cash paid by the Firm to reacquire assets from the off-balance sheet, nonconsolidated entities—for example, servicer clean-up calls.

(e) Includes cash flows received on retained interests—including, for example, principal repayments and interest payments.

(f) Includes Alt-A loans and re-securitization transactions.

(g) As of January 1, 2007, the Firm elected the fair value option for IB warehouse. The carrying value of these loans accounted for at fair value approximated the proceeds received from securitization.

Loans sold to agencies and other third-party sponsored securitization entities

In addition to the amounts reported in the securitization activity tables above, the Firm, in the normal course of business, sells originated and purchased mortgage loans, predominantly to Ginnie Mae, Fannie Mae, and Freddie Mac, (the “Agencies”). These loans are sold primarily for the purpose of securitization by the Agencies, which also provide credit enhancement of the loans through certain guarantee provisions. The Firm does not consolidate these securitization vehicles as it is not the primary beneficiary. In connection with these loan sales, the Firm makes certain representations and warranties. For additional information about the Firm’s loan sale- and securitization-related indemnifications, see Note 22 on pages 170-174 of this Form 10-Q.

The Firm generally retains the right to service the mortgage loans in accordance with the respective servicing guidelines and standards, which is a form of continuing involvement, and records this right as a servicing asset at the time of sale.

The following table summarizes these loan sale activities.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Carrying value of loans sold(a)(b)	\$ 30,173	\$ 41,706	\$ 65,547	\$ 81,608
Proceeds received from loan sales(c)	29,710	40,751	64,416	79,676
Gains on loan sales	70	29	91	46

(a) Predominantly to the Agencies.

(b) See Note 16 on pages 164-167 of this Form 10-Q for further information on originated MSR.

(c) Predominantly includes securities from the Agencies that are generally sold shortly after receipt.

JPMorgan Chase’s interest in securitized assets held at fair value

The following table summarizes the Firm’s nonconsolidated securitization interests which are carried at fair value on the Firm’s Consolidated Balance Sheets at June 30, 2010, and December 31, 2009. The risk ratings are periodically reassessed as information becomes available. As of June 30, 2010, and December 31, 2009, 69% and 76%, respectively, of the Firm’s retained securitization interests, which are carried at fair value, were risk-rated “A” or better.

(in billions)	Ratings profile of interests held ^{(b)(c)(d)}					
	June 30, 2010			December 31, 2009		
	Investment-grade	Noninvestment-grade	Retained interests	Investment-grade	Noninvestment-grade	Retained interests ^(e)
Asset types:						
Residential mortgage:						
Prime ^(a)	\$ 0.2	\$ 0.5	\$ 0.7	\$ 0.7	\$ 0.4	\$ 1.1
Subprime	—	—	—	—	—	—
Option ARMs	0.1	—	0.1	0.1	—	0.1
Commercial and other	2.3	0.3	2.6	2.2	0.2	2.4
Total	\$ 2.6	\$ 0.8	\$ 3.4	\$ 3.0	\$ 0.6	\$ 3.6

(a) Includes retained interests in Alt-A loans and re-securitization transactions.

(b) The ratings scale is presented on an S&P-equivalent basis.

(c) Includes \$182 million and \$139 million of investments acquired in the secondary market, but predominantly held for investment purposes, as of June 30, 2010, and December 31, 2009, respectively. Of this amount, \$147 million and \$108 million is classified as investment-grade as of June 30, 2010, and December 31, 2009, respectively.

(d) Excludes senior and subordinated securities of \$259 million and \$875 million at June 30, 2010, and December 31, 2009, respectively, which the Firm purchased in connection with IB's secondary market-making activities.

(e) Excludes \$49 million of retained interests in student loans at December 31, 2009.

The table below outlines the key economic assumptions used to determine the fair value as of June 30, 2010, and December 31, 2009, of certain of the Firm's retained interests in nonconsolidated VIEs, other than MSRs, that are valued using modeling techniques. The table below also outlines the sensitivities of those fair values to immediate 10% and 20% adverse changes in assumptions used to determine fair value. For a discussion of MSRs, see Note 16 on pages 164-167 of this Form 10-Q.

June 30, 2010 (in millions, except rates and where otherwise noted)	Residential mortgage			Commercial and other
	Prime ^(a)	Subprime	Option ARMs	
JPMorgan Chase interests in securitized assets	\$ 676	\$ 26	\$ 112	\$ 2,562
Weighted-average life (in years)	6.1	4.3	4.3	3.2
Weighted-average constant prepayment rate	9.2%	3.5%	16.4%	—%
	CPR	CPR	CPR	CPR
Impact of 10% adverse change	\$ (17)	\$ (1)	\$ (2)	\$ —
Impact of 20% adverse change	(32)	(1)	(3)	—

Impact of 10% adverse change	\$ (12)	\$ (1)	\$ —	\$ (74)
Impact of 20% adverse change	(22)	(2)	—	(168)
Weighted-average discount rate	12.6%	13.0%	5.9%	15.0%
Impact of 10% adverse change	\$ (28)	\$ (1)	\$ (2)	\$ (73)
Impact of 20% adverse change	(57)	(1)	(3)	(133)

December 31, 2009 (in millions, except rates and where otherwise noted)	Residential mortgage			Commercial and other
	Prime ^(a)	Subprime	Option ARMs	
JPMorgan Chase interests in securitized assets	\$ 1,143	\$ 27	\$ 113	\$ 2,361
Weighted-average life (in years)	8.3	4.3	5.1	3.5
Weighted-average constant prepayment rate	4.9%	21.8%	15.7%	—%
	CPR	CPR	CPR	CPR
Impact of 10% adverse change	\$ (15)	\$ (2)	\$ —	\$ —
Impact of 20% adverse change	(31)	(3)	(1)	—
Weighted-average loss assumption	3.2%	2.7%	0.7%	1.4%
Impact of 10% adverse change	\$ (15)	\$ (4)	\$ —	\$ (41)
Impact of 20% adverse change	(29)	(7)	—	(100)
Weighted-average discount rate	11.4%	23.2%	5.4%	12.5%
Impact of 10% adverse change	\$ (41)	\$ (2)	\$ (1)	\$ (72)
Impact of 20% adverse change	(82)	(4)	(3)	(139)

(a) Includes retained interests in Alt-A loans and re-securitization transactions.

Table of Contents

The sensitivity analysis in the preceding table is hypothetical. Changes in fair value based on a 10% or 20% variation in assumptions generally cannot be extrapolated easily, because the relationship of the change in the assumptions to the change in fair value may not be linear. Also, in the table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which might counteract or magnify the sensitivities. The above sensitivities also do not reflect risk management practices the Firm may undertake to mitigate such risks.

Loan delinquencies and net charge-offs

The table below includes information about delinquencies, net charge-offs and components of off-balance sheet securitized financial assets as of June 30, 2010, and December 31, 2009.

	Credit exposure		Nonperforming loans		Net loan charge-offs ^(e)			
	June 30,	Dec. 31,	June 30,	Dec. 31,	Three months ended		Six months ended	
(in millions)	2010	2009	2010	2009	June 30,		June 30,	
	2010	2009	2010	2009	2010	2009	2010	2009
Securitized loans: ^(a)								
Residential mortgage:								
Prime mortgage ^{(b)(c)}	\$159,991	\$171,547	\$35,008	\$33,838	\$1,696	\$2,395	\$3,385	\$4,591
Subprime mortgage ^(c)	41,061	47,261	17,558	19,505	951	2,044	2,116	4,278
Option ARMs ^(c)	38,247	41,983	11,301	10,973	637	474	1,226	854
Commercial and other ^(c)	94,479	24,799	5,158	1,244	116	5	143	10
Total loans securitized ^(d)	\$333,778	\$285,590	\$69,025	\$65,560	\$3,400	\$4,918	\$6,870	\$9,733

(a) There were no loans that were 90 days past due and still accruing at June 30, 2010, and December 31, 2009.

(b) Includes Alt-A loans.

(c) Total assets held in securitization-related SPEs were \$409.7 billion and \$435.6 billion at June 30, 2010, and December 31, 2009, respectively. The \$333.8 billion and \$285.6 billion of loans securitized at June 30, 2010, and December 31, 2009, respectively, excludes: \$65.6 billion and \$145.0 billion of securitized loans in which the Firm has no continuing involvement, zero and \$1.2 billion of nonconsolidated auto and student loan securitizations, and \$10.3 billion and \$3.8 billion of loan securitizations (including automobile and student loans) consolidated on the Firm's Consolidated Balance Sheets at June 30, 2010, and December 31, 2009, respectively.

(d) Includes securitized loans that were previously recorded at fair value and classified as trading assets.

(e) Net charge-offs represent losses realized upon liquidation of the assets held by off-balance sheet securitization entities.

NOTE 16 — GOODWILL AND OTHER INTANGIBLE ASSETS

For a discussion of accounting policies related to goodwill and other intangible assets, see Note 17 on pages 214-217 of JPMorgan Chase's 2009 Annual Report.

Goodwill and other intangible assets consist of the following.

(in millions)	June 30, 2010	December 31, 2009
Goodwill	\$ 48,320	\$ 48,357
Mortgage servicing rights	11,853	15,531
Other intangible assets:		
Purchased credit card relationships	\$ 1,051	\$ 1,246
Other credit card-related intangibles	629	691
Core deposit intangibles	1,041	1,207
Other intangibles	1,457	1,477
Total other intangible assets	\$ 4,178	\$ 4,621

Goodwill

The following table presents goodwill attributed to the business segments.

(in millions)	June 30, 2010	December 31, 2009
Investment Bank	\$ 4,963	\$ 4,959
Retail Financial Services	16,816	16,831
Card Services	14,128	14,134
Commercial Banking	2,866	2,868
Treasury & Securities Services	1,665	1,667
Asset Management	7,505	7,521
Corporate/Private Equity	377	377
Total goodwill	\$ 48,320	\$ 48,357

The following table presents changes in the carrying amount of goodwill.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Balance at beginning of period ^(a)	\$ 48,359	\$ 48,201	\$ 48,357	\$ 48,027
Changes during the period from:				
Business combinations	10	35	19	245
Dispositions	—	—	(19)	—
Other ^(b)	(49)	52	(37)	16
Balance at June 30, ^(a)	\$ 48,320	\$ 48,288	\$ 48,320	\$ 48,288

(a) Reflects gross goodwill balances as the Firm has not recognized any impairment losses to date.

(b) Includes foreign currency translation adjustments and other tax-related adjustments.

The \$37 million decrease in goodwill from December 31, 2009, was largely due to foreign currency translation adjustments related to the Firm's credit card and merchant businesses, the divestiture of certain non-strategic businesses, as well as tax-related purchase accounting adjustments associated with the Bank One merger.

Goodwill was not impaired at June 30, 2010, or December 31, 2009, nor was any goodwill written off due to impairment during the six month periods ended June 30, 2010 or 2009. During the six months ended June 30, 2010, in addition to reviewing the current conditions and prior projections for all of its reporting units, the Firm updated the discounted cash flow valuations of its consumer lending businesses in RFS and CS, as these businesses continue to have elevated risk for goodwill impairment due to their exposure to U.S. consumer credit risk and the effects of recent regulatory and legislative changes. As a result of this review, the Firm concluded that goodwill for these businesses and the Firm's other reporting units was not impaired at June 30, 2010.

[Table of Contents](#)
Mortgage servicing rights

For a further description of the MSR asset, interest rate risk management, and the valuation methodology of MSRs, see Notes 3 and 17 on pages 151-152 and 214-217, respectively, of JPMorgan Chase's 2009 Annual Report.

The following table summarizes MSR activity for the three and six months ended June 30, 2010 and 2009.

(in millions, except where otherwise noted)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Fair value at the beginning of the period	\$ 15,531	\$ 10,634	\$ 15,531	\$ 9,403

Change in valuation due to inputs and assumptions ^(a)	(3,584)	3,831	(3,680)	5,141
Other changes in fair value ^(b)	(622)	(839)	(1,229)	(1,914)
Total change in fair value of MSRs^(c)	(4,206)	2,992	(4,909)	3,227
Fair value at June 30^(d)	\$ 11,853	\$ 14,600	\$ 11,853	\$ 14,600
Change in unrealized gains/(losses) included in income related to MSRs held at June 30	\$ (3,584)	\$ 3,831	\$ (3,680)	\$ 5,141
Contractual service fees, late fees and other ancillary fees included in income	\$ 1,148	\$ 1,221	\$ 2,280	\$ 2,428
Third-party mortgage loans serviced at June 30 (in billions)	\$ 1,064	\$ 1,126	\$ 1,064	\$ 1,126

(a) Represents MSR asset fair value adjustments due to changes in inputs, such as interest rates and volatility, as well as updates to assumptions used in the valuation model. "Total realized/unrealized gains/(losses)" columns in the Changes in level 3 recurring fair value measurements tables in Note 3 on pages 115-118 of this Form 10-Q include these amounts.

(b) Includes changes in MSR value due to modeled servicing portfolio runoff (or time decay). "Purchases, issuances, settlements, net" columns in the Changes in level 3 recurring fair value measurements tables in Note 3 on pages 115-118 of this Form 10-Q include these amounts.

(c) Includes changes related to commercial real estate of \$(2) million for the three months ended June 30, 2010 and 2009, and \$(4) million for the six months ended June 30, 2010 and 2009.

(d) Includes \$37 million and \$41 million related to commercial real estate at June 30, 2010 and 2009, respectively.

The following table presents the components of mortgage fees and related income (including the impact of MSR risk management activities) for the three and six months ended June 30, 2010 and 2009.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
RFS mortgage fees and related income				
Production revenue ^(a)	\$ 9	\$ 284	\$ 10	\$ 765
Net mortgage servicing revenue				
Operating revenue:				
Loan servicing revenue	1,186	1,279	2,293	2,501
Other changes in MSR asset fair value ^(b)	(620)	(837)	(1,225)	(1,910)
Total operating revenue	566	442	1,068	591
Risk management:				
Changes in MSR asset fair value due to inputs or assumptions in model ^(c)	(3,584)	3,831	(3,680)	5,141
Derivative valuation adjustments and other	3,895	(3,750)	4,143	(4,057)
Total risk management	311	81	463	1,084
Total RFS net mortgage servicing revenue	877	523	1,531	1,675
All other ^(d)	2	(23)	5	(55)
Mortgage fees and related income	\$ 888	\$ 784	\$ 1,546	\$ 2,385

(a) Losses related to the repurchase of previously-sold loans are recorded as a reduction to production revenue. These losses totaled \$667 million and \$255 million for the three months ended June 30, 2010 and 2009, respectively, and \$1.1 billion and \$475 million for the six months ended June 30, 2010 and 2009, respectively.

(b) Includes changes in the MSR value due to modeled servicing portfolio runoff (or time decay). "Purchases, issuances, settlements, net" columns in the Changes in level 3 recurring fair value measurements tables in Note 3 on pages 115-118 of this Form 10-Q include these amounts.

(c) Represents MSR asset fair value adjustments due to changes in inputs, such as interest rates and volatility, as well as updates to assumptions used in the valuation model. "Total realized/unrealized gains/(losses)" columns in the Changes in level 3 recurring fair value measurements tables in Note 3 on pages 115-118 of this Form 10-Q include these amounts.

(d) Primarily represents risk management activities performed by the Chief Investment Office ("CIO") in the Corporate sector, including \$(2) million and \$(4) million related to CB MSRs for the three and six months ended June 30, 2010 and 2009, respectively.

Table of Contents

The table below outlines the key economic assumptions used to determine the fair value of the Firm's MSRs at June 30, 2010, and December 31, 2009; and it outlines the sensitivities of those fair values to immediate adverse changes in those assumptions, as defined below.

(in millions, except rates)	June 30, 2010	December 31, 2009
Weighted-average prepayment speed assumption (CPR)	16.47%	11.37%
Impact on fair value of 10% adverse change	\$ (939)	\$ (896)
Impact on fair value of 20% adverse change	(1,797)	(1,731)
Weighted-average option adjusted spread	4.34%	4.63%
Impact on fair value of 100 basis points adverse change	\$ (444)	\$ (641)
Impact on fair value of 200 basis points adverse change	(854)	(1,232)

CPR: Constant prepayment rate.

The sensitivity analysis in the preceding table is hypothetical and should be used with caution. Changes in fair value based on changes in assumptions generally cannot be easily extrapolated, because the relationship of the change in the assumptions to the change in fair value may not be linear. Also, in this table, the effect that a change in a particular assumption may have on the fair value is calculated without changing any other assumption. In reality, changes in one factor may result in changes in another, which might magnify or counteract the sensitivities.

Other intangible assets

For the six months ended June 30, 2010, purchased credit card relationships, other credit card-related intangibles, core deposit intangibles and other intangible assets decreased \$443 million, primarily reflecting amortization expense.

The components of credit card relationships, core deposits and other intangible assets were as follows.

(in millions)	June 30, 2010			December 31, 2009		
	Gross amount	Accumulated amortization	Net carrying value	Gross amount	Accumulated amortization	Net carrying value
Purchased credit card relationships	\$5,782	\$ 4,731	\$1,051	\$5,783	\$ 4,537	\$1,246
Other credit card-related intangibles	884	255	629	894	203	691
Core deposit intangibles	4,280	3,239	1,041	4,280	3,073	1,207
Other intangibles	2,226	769	1,457 ^(a)	2,200	723	1,477

(a) The decrease from December 31, 2009 includes the elimination of servicing assets for auto and student loans as a result of the adoption of the new consolidation guidance related to VIEs.

Amortization expense

The Firm's intangible assets with finite lives are amortized over their useful lives in a manner that best reflects the economic benefits of the intangible asset. Intangible assets of approximately \$600 million consisting primarily of asset management advisory contracts, were determined to have an indefinite life and are not amortized.

The following table presents amortization expense related to credit card relationships, core deposits and other intangible assets.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Purchased credit card relationships	\$ 97	\$ 108	\$ 194	\$ 224
All other intangibles:				
Other credit card-related intangibles	26	23	52	46
Core deposit intangibles	83	99	166	198
Other intangibles ^(a)	29	35	66	72
Total amortization expense	\$ 235	\$ 265	\$ 478	\$ 540

(a) Excludes amortization expense related to servicing assets on securitized automobile loans, which is recorded in lending- and deposit-related fees, of \$1 million for the six months ended June 30, 2009. Effective January 1, 2010, the Firm adopted new accounting guidance which resulted in the elimination of those servicing assets.

[Table of Contents](#)

Future amortization expense

The following table presents estimated future amortization expense related to credit card relationships, core deposits and other intangible assets.

For the year: (in millions)	Purchased credit card relationships	Other credit card related intangibles	Core deposit intangibles	Other intangibles	Total
2010(a)	\$ 354	\$ 102	\$ 329	\$ 129	\$914
2011	290	101	284	118	793
2012	251	103	240	114	708
2013	212	103	195	110	620
2014	109	99	103	98	409

(a) Includes \$194 million, \$52 million, \$166 million and \$66 million of amortization expense related to purchased credit card relationships, other credit card-related intangibles, core deposit intangibles and other intangibles, respectively, recognized during the first six months of 2010.

NOTE 17 — DEPOSITS

For further discussion of deposits, see Note 19 on page 218 in JPMorgan Chase's 2009 Annual Report.

At June 30, 2010, and December 31, 2009, noninterest-bearing and interest-bearing deposits were as follows.

(in millions)	June 30, 2010	December 31, 2009
U.S. offices:		
Noninterest-bearing	\$ 208,064	\$ 204,003
Interest-bearing		
Demand(a)	15,786	15,964
Savings(b)	315,486	297,949
Time (included \$2,453 and \$1,463 at fair value at June 30, 2010, and December 31, 2009, respectively)	102,492	125,191
Total interest-bearing deposits	433,764	439,104
Total deposits in U.S. offices	641,828	643,107
Non-U.S. offices:		
Noninterest-bearing	9,094	8,082
Interest-bearing		
Demand	175,636	186,885
Savings	645	661
Time (included \$2,437 and \$2,992 at fair value at June 30, 2010, and December 31, 2009, respectively)	60,602	99,632
Total interest-bearing deposits	236,883	287,178
Total deposits in non-U.S. offices	245,977	295,260
Total deposits	\$ 887,805	\$ 938,367

(a) Represents Negotiable Order of Withdrawal ("NOW") accounts.

(b) Includes Money Market Deposit Accounts ("MMDAs").

NOTE 18 — OTHER BORROWED FUNDS

The following table details the components of other borrowed funds.

(in millions)	June 30, 2010	December 31, 2009
Advances from Federal Home Loan Banks(a)	\$ 14,324	\$ 27,847
Other	30,107	27,893
Total other borrowed funds(b)	\$ 44,431	\$ 55,740

(a) Maturities of advances from the FHLBs are \$10.1 billion, \$16 million, \$3.2 billion, \$20 million, and \$12 million in each of the 12-month periods ending June 30, 2011, 2012, 2013, 2014, and 2015, respectively, and \$928 million maturing after June 30, 2015.

(b) Includes other borrowed funds of \$7.4 billion and \$5.6 billion accounted for at fair value at June 30, 2010, and December 31, 2009, respectively.

NOTE 19 — EARNINGS PER SHARE

For a discussion of the computation of basic and diluted earnings per share (“EPS”), see Note 25 on page 224 of JPMorgan Chase’s 2009 Annual Report. The following table presents the calculation of basic and diluted EPS for the three and six months ended June 30, 2010 and 2009.

(in millions, except per share amounts)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Basic earnings per share				
Net income	\$ 4,795	\$ 2,721	\$ 8,121	\$ 4,862
Less: Preferred stock dividends	163	473	325	1,002
Less: Accelerated amortization from redemption of preferred stock issued to the U.S. Treasury ^(a)	—	1,112	—	1,112
Net income applicable to common equity	4,632	1,136	7,796	2,748
Less: Dividends and undistributed earnings allocated to participating securities	269	64	461	157
Net income applicable to common stockholders	\$ 4,363	\$ 1,072	\$ 7,335	\$ 2,591
Total weighted-average basic shares outstanding	3,983.5	3,811.5	3,977.0	3,783.6
Net income per share ^(a)	\$ 1.10	\$ 0.28	\$ 1.84	\$ 0.68

(in millions, except per share amounts)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Diluted earnings per share				
Net income applicable to common stockholders	\$ 4,363	\$ 1,072	\$ 7,335	\$ 2,591
Total weighted-average basic shares outstanding	3,983.5	3,811.5	3,977.0	3,783.6
Add: Employee stock options and SARs ^(b)	22.1	12.6	23.2	7.8
Total weighted-average diluted shares outstanding ^(c)	4,005.6	3,824.1	4,000.2	3,791.4
Net income per share ^(a)	\$ 1.09	\$ 0.28	\$ 1.83	\$ 0.68

(a) The calculation of basic and diluted EPS for the three and six months ended June 30, 2009, includes a one-time noncash reduction of \$1.1 billion, or \$0.27 and \$0.28 per share, respectively, resulting from the redemption of the Series K Preferred Stock issued to the U.S. Treasury.

(b) Excluded from the computation of diluted EPS (due to the antidilutive effect) were options issued under employee benefit plans and warrants originally issued under the U.S. Treasury’s Capital Purchase Program to purchase shares of the Firm’s common stock aggregating 224 million and 315 million shares for the three months ended June 30, 2010 and 2009, respectively, and 232 million and 339 million shares for the six months ended June 30, 2010 and 2009, respectively.

(c) Participating securities were included in the calculation of diluted EPS using the two-class method, as this computation was more dilutive than the calculation using the treasury stock method.

NOTE 20 — ACCUMULATED OTHER COMPREHENSIVE INCOME/(LOSS)

Accumulated other comprehensive income/(loss) includes the after-tax change in unrealized gains and losses on AFS securities, foreign currency translation adjustments (including the impact of related derivatives), cash flow hedging activities and net loss and prior service cost/(credit) related to the Firm’s defined benefit pension and OPEB plans.

Six months ended June 30, 2010 (in millions)	Unrealized gains/(losses) on AFS securities ^(b)	Translation adjustments, net of hedges	Cash flow hedges	Net loss and prior service costs/(credit) of defined benefit pension and OPEB plans	Accumulated other comprehensive income/(loss)
Balance at January 1, 2010	\$ 2,032 ^(c)	\$ (16)	\$ 181	\$ (2,288)	\$ (91)
Cumulative effect of changes in accounting principles ^(a)	(129)	—	—	—	(129)
Net change	2,339 ^(d)	(25) ^(e)	165 ^(f)	145 ^(g)	2,624
Balance at June 30, 2010	\$ 4,242^(c)	\$ (41)	\$ 346	\$ (2,143)	\$ 2,404

[Table of Contents](#)

Six months ended June 30, 2009 (in millions)	Unrealized gains/(losses) on AFS securities ^(b)	Translation adjustments, net of hedges	Cash flow hedges	Net loss and prior service costs/(credit) of defined benefit pension and OPEB plans	Accumulated other comprehensive income/(loss)
Balance at January 1, 2009	\$ (2,101)	\$ (598)	\$ (202)	\$ (2,786)	\$ (5,687)
Net change	1,576 ^(d)	491 ^(e)	95 ^(f)	87 ^(g)	2,249
Balance at June 30, 2009	\$ (525)	\$ (107)	\$ (107)	\$ (2,699)	\$ (3,438)

- (a) Reflects the effect of adoption of new consolidation guidance related to VIEs. The decrease in AOCI is a result of the reversal of the fair value adjustments taken on retained AFS securities that were eliminated in consolidation. For further discussion, see Note 15 on pages 151-163 of this Form 10-Q.
- (b) Represents the after-tax difference between the fair value and amortized cost of the AFS securities portfolio and retained interests in securitizations recorded in other assets.
- (c) Includes after-tax unrealized losses of \$(126) million and \$(226) million not related to credit on debt securities for which credit losses have been recognized in income at June 30, 2010, and December 31, 2009, respectively.
- (d) The net change for the six months ended June 30, 2010, was due primarily to the narrowing of spreads on mortgage-backed securities and CLOs partially offset by declines in non-U.S. government debt and realization of gains due to portfolio repositioning. The net change for the six months ended June 30, 2009, was due primarily to the narrowing of spreads on U.S. government agency mortgage-backed securities and credit card ABS positions as a result of improvement in the credit environment.
- (e) Includes \$(489) million and \$509 million at June 30, 2010 and 2009, respectively, of after-tax gains/(losses) on foreign currency translation from operations for which the functional currency is other than the U.S. dollar, partially offset by \$464 million and \$(18) million, respectively, of after-tax gains/(losses) on hedges. The Firm may not hedge its entire exposure to foreign currency translation on net investments in foreign operations.
- (f) The net change for the six months ended June 30, 2010, included \$6 million of after-tax gains recognized in income, and \$171 million of after-tax gains, representing the net change in derivative fair value that was reported in comprehensive income. The net change for the six months ended June 30, 2009, included \$86 million of after-tax gains recognized in income and \$181 million of after-tax gains, representing the net change in derivative fair value that was reported in comprehensive income.
- (g) The net changes for the six months ended June 30, 2010 and 2009, were primarily due to after-tax adjustments based on the final year-end actuarial valuations for the U.S. and non-U.S. defined benefit pension and OPEB plans (for 2009 and 2008, respectively); and the amortization of net loss and prior service credit into net periodic benefit cost. The net change for 2009 also included an offset for a change in tax rates.

NOTE 21 — COMMITMENTS AND CONTINGENCIES

For a discussion of the Firm's commitments and contingencies, see Note 30 on page 230 of JPMorgan Chase's 2009 Annual Report.

Litigation reserve

The Firm maintains litigation reserves for certain of its outstanding litigation. At June 30, 2010, the Firm and its subsidiaries were named as a defendant or were otherwise involved in several thousand legal proceedings, investigations and litigations in various jurisdictions around the world. The Firm's material legal proceedings are described in Item 1: Legal Proceedings on pages 188-196 of this Form 10-Q (the "Legal Proceedings section"), to which reference is hereby made.

The Firm has established reserves for several hundred of its cases. The Firm accrues for a litigation-related liability when it is probable that such liability has been incurred and the amount of the loss can be reasonably estimated. The Firm evaluates its litigations, proceedings and investigations each quarter to assess its litigation reserves, and makes adjustments in such reserves, upwards or downwards as appropriate, based on management's best judgment after consultation with counsel. During the three and six months ended June 30, 2010, the Firm incurred \$792 million and \$3.7 billion, respectively, of litigation expense. There is no assurance that the Firm's litigation reserves will not need to be adjusted in the future.

Table of Contents

The Firm's legal proceedings range from cases involving a single plaintiff to class action lawsuits with classes involving thousands of plaintiffs. These cases involve each of the various lines of business of the Firm and a wide variety of claims (including common law tort and contract claims and statutory antitrust, securities and consumer protection claims), some of which are at preliminary stages of adjudication and/or present novel factual claims or legal theories. While some cases pending against the Firm specify the damages claimed by the plaintiff, many seek an indeterminate amount of damages or are at very early stages; and even where damages are specified by the plaintiff, such claimed amount may not correlate to reasonably possible losses or those that might be judicially determined to be payable by the Firm.

The Firm does not believe that an aggregate range of reasonably possible losses (defined by the relevant accounting literature to include all potential losses other than those deemed "remote") can be determined for asserted and probable unasserted claims as of June 30, 2010. This would require the Firm to make assessments regarding claims, or portion of claims, where actual damages have not been specified by the plaintiffs, or to assess novel claims or claims that are at preliminary stages of adjudication. For those legal matters where damages have been specified by the plaintiff, such claimed damages may, in some instances, provide the upper end of the range of reasonably possible losses as previously defined. Accordingly, to assist the reader's understanding of the potential magnitude of the matters at issue, the Firm has included in its current description of the status of each matter set forth in the Legal Proceedings section, for each particular matter where the information is available, the amount of damages claimed or publicly available information that pertains to the damages claimed where not so specified.

The Firm believes it has meritorious defenses to the claims asserted against it in its currently outstanding litigations, and it intends to defend itself vigorously in all its cases.

Based upon its current knowledge, after consultation with counsel and after taking into consideration its current litigation reserves, the Firm believes that the legal actions, proceedings and investigations currently pending against it should not have a material adverse effect on the Firm's consolidated financial condition. However, in light of the uncertainties involved in such proceedings, actions and investigations, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves currently accrued by the Firm; as a result, the outcome of a particular matter may be material to JPMorgan Chase's operating results for a particular period depending on, among other factors, the size of the loss or liability imposed and the level of JPMorgan Chase's income for that period.

NOTE 22 — OFF-BALANCE SHEET LENDING-RELATED FINANCIAL INSTRUMENTS, GUARANTEES AND OTHER COMMITMENTS

JPMorgan Chase utilizes lending-related financial instruments (e.g., commitments and guarantees) to meet the financing needs of its customers. The contractual amount of these financial instruments represents the maximum possible credit risk should the counterparty draw upon the commitment or the Firm be required to fulfill its obligation under the guarantee, and the counterparty subsequently fail to perform according to the terms of the contract. These commitments and guarantees often expire without being drawn, and even higher proportions expire without a default. As a result, the total contractual amount of these instruments is not, in the Firm's view, representative of its actual future credit exposure or funding requirements. For a discussion of off-balance sheet lending-related financial instruments and guarantees, and the Firm's related accounting policies, see Note 31 on pages 230-234 of JPMorgan Chase's 2009 Annual Report.

To provide for the risk of loss inherent in wholesale-related contracts, an allowance for credit losses on lending-related commitments is maintained. See Note 14 on pages 150-151 of this Form 10-Q for further discussion regarding the allowance for credit losses on lending-related commitments.

The following table summarizes the contractual amounts and carrying values of off-balance sheet lending-related financial instruments, guarantees and other commitments at June 30, 2010, and December 31, 2009. The amounts in the table below for credit card and home equity lending-related commitments represent the total available credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit for these products will be utilized at the same time. The Firm can reduce or cancel these lines of credit by providing the borrower prior notice or, in some cases, without notice as permitted by law.

Off-balance sheet lending-related financial instruments, guarantees and other commitments

(in millions)	Contractual amount		Carrying value ⁽ⁱ⁾	
	June 30, 2010	December 31, 2009	June 30, 2010	December 31, 2009
Lending-related				
Consumer:				
Home equity — senior lien	\$ 18,320	\$ 19,246	\$ —	\$ —
Home equity — junior lien	33,985	37,231	—	—

Building purchase commitment	670	670	—	—
Loan sale and securitization-related indemnifications:				
Repurchase liability ^(h)	NA	NA	2,332	1,705
Loans sold with recourse	11,328	13,544	148	271

- (a) At June 30, 2010, and December 31, 2009, represents the contractual amount net of risk participations totaling \$609 million and \$643 million, respectively, for other unfunded commitments to extend credit; \$23.4 billion and \$24.6 billion, respectively, for standby letters of credit and other financial guarantees; and \$828 million and \$690 million, respectively, for other letters of credit. In regulatory filings with the Federal Reserve these commitments are shown gross of risk participations.
- (b) Upon the adoption of the new consolidation guidance related to VIEs, \$24.2 billion of lending-related commitments between the Firm and Firm-administered multi-seller conduits were eliminated upon consolidation. The decrease in lending-related commitments was partially offset by the addition of \$6.5 billion of unfunded commitments directly between the multi-seller conduits and clients; these unfunded commitments of the consolidated conduits are now included as off-balance sheet lending-related commitments of the Firm.
- (c) At June 30, 2010, and December 31, 2009, includes unissued standby letters of credit commitments of \$39.4 billion and \$38.4 billion, respectively.
- (d) At June 30, 2010, and December 31, 2009, JPMorgan Chase held collateral relating to \$34.7 billion and \$31.5 billion, respectively, of standby letters of credit; and \$2.7 billion and \$1.3 billion, respectively, of other letters of credit.
- (e) At June 30, 2010, and December 31, 2009, collateral held by the Firm in support of securities lending indemnification agreements totaled \$164.5 billion and \$173.2 billion, respectively. Securities lending collateral comprises primarily cash and securities issued by governments that are members of the Organisation for Economic Co-operation and Development ("OECD") and U.S. government agencies.
- (f) Represents notional amounts of derivatives qualifying as guarantees. The carrying value at June 30, 2010, and December 31, 2009, reflects derivative payables of \$1.0 billion and \$981 million, respectively, less derivative receivables of \$232 million and \$219 million, respectively.
- (g) At June 30, 2010, and December 31, 2009, includes unfunded commitments to third-party private equity funds of \$1.2 billion and \$1.5 billion respectively. Also includes unfunded commitments for other equity investments of \$981 million and \$897 million, respectively. These commitments include \$1.2 billion and \$1.5 billion, respectively, related to investments that are generally fair valued at net asset value as discussed in Note 3 on pages 110-124 of this Form 10-Q.
- (h) Represents estimated repurchase liability related to indemnifications for breaches of representations and warranties in loan sale and securitization agreements. For additional information, see Loan sale and securitization-related indemnifications on pages 173-174 of this Note.
- (i) For lending-related products, the carrying value represents the allowance for lending-related commitments and the guarantee liability. For derivative-related products, the carrying value represents the fair value. For all other products the carrying value represents the valuation reserve.

Other unfunded commitments to extend credit

Other unfunded commitments to extend credit include commitments to U.S. states and municipalities, hospitals and other not-for-profit entities to provide funding for periodic tenders of their variable-rate demand bond obligations or commercial paper. Performance by the Firm is required in the event that the variable-rate demand bonds or commercial paper cannot be remarketed to new investors. The amount of commitments related to variable-rate demand bonds and commercial paper of U.S. states and municipalities, hospitals and not-for-profit entities was \$19.1 billion and \$23.3 billion at June 30, 2010, and December 31, 2009, respectively. Similar commitments exist to extend credit in the form of liquidity facility agreements with nonconsolidated municipal bond VIEs. For further information, see Note 15 on pages 151-163 of this Form 10-Q.

Also included in other unfunded commitments to extend credit are commitments to investment- and noninvestment-grade counterparties in connection with leveraged acquisitions. These commitments are dependent on whether the acquisition by the borrower is successful, tend to be short-term in nature and, in most cases, are subject to certain conditions based on the borrower's financial condition or other factors. The amounts of commitments related to leveraged acquisitions were \$2.9 billion at both June 30, 2010, and December 31, 2009. For further information, see Note 3 and Note 4 on pages 110-124 and 125-127 respectively, of this Form 10-Q.

Guarantees

The Firm considers the following off-balance sheet lending-related arrangements to be guarantees under U.S. GAAP: standby letters of credit and financial guarantees, securities lending indemnifications, certain indemnification agreements included within third-party contractual arrangements and certain derivative contracts. For a further discussion of the off-balance sheet lending-related arrangements the Firm considers to be guarantees, and the related accounting policies, see Note 31 on pages 230-234 of JPMorgan Chase's 2009 Annual Report. The amount of the liability related to guarantees recorded at June 30, 2010, and December 31, 2009, excluding the allowance for credit losses on lending-related commitments and derivative contracts discussed below, was \$360 million and \$475 million, respectively.

Standby letters of credit

Standby letters of credit ("SBLC") and other financial guarantees are conditional lending commitments issued by the Firm to guarantee the performance of a customer to a third party under certain arrangements, such as commercial paper facilities, bond financings, acquisition financings, trade and similar transactions. The carrying values of standby and other letters of credit were \$880 million and \$920 million at June 30, 2010, and December 31, 2009, respectively, which was classified in accounts payable and other liabilities on the Consolidated Balance Sheets; these carrying values include \$520 million and \$553 million, respectively, for the allowance for lending-related commitments, and \$360 million and \$367 million, respectively, for the guarantee liability.

[Table of Contents](#)

The following table summarizes the types of facilities under which standby letters of credit and other letters of credit arrangements are outstanding by the ratings profiles of the Firm's customers, as of June 30, 2010, and December 31, 2009.

Standby letters of credit and other financial guarantees and other letters of credit

(in millions)	June 30, 2010		December 31, 2009	
	Standby letters of credit and other financial guarantees	Other letters of credit	Standby letters of credit and other financial guarantees	Other letters of credit
Investment-grade ^(a)	\$ 66,431	\$ 4,942	\$ 66,786	\$ 3,861
Noninvestment-grade ^(a)	24,736	1,434	24,699	1,306
Total contractual amount^(b)	\$ 91,167^(c)	\$ 6,376	\$ 91,485^(c)	\$ 5,167
Allowance for lending-related commitments	\$ 519	\$ 1	\$ 552	\$ 1
Commitments with collateral	34,696	2,698	31,454	1,315

(a) The ratings scale is based on the Firm's internal ratings which generally correspond to ratings as defined by S&P and Moody's.

(b) At June 30, 2010, and December 31, 2009, represents contractual amount net of risk participations totaling \$23.4 billion and \$24.6 billion, respectively, for standby letters of credit and other financial guarantees; and \$828 million and \$690 million, respectively, for other letters of credit. In regulatory filings with the Federal Reserve these commitments are shown gross of risk participations.

(c) At June 30, 2010, and December 31, 2009, includes unissued standby letters of credit commitments of \$39.4 billion and \$38.4 billion, respectively.

Derivatives qualifying as guarantees

In addition to the contracts described above, the Firm transacts certain derivative contracts that meet the characteristics of a guarantee under U.S. GAAP. The total notional value of the derivatives that the Firm deems to be guarantees was \$79.3 billion and \$87.2 billion at June 30, 2010, and December 31, 2009, respectively. The notional value generally represents the Firm's maximum exposure to derivatives qualifying as guarantees, although exposure to certain stable value derivatives is contractually limited to a substantially lower percentage of the notional value. The fair value of the contracts reflects the probability of whether the Firm will be required to perform under the contract. The fair value related to derivative guarantees were derivative payables of \$1.0 billion and \$981 million and derivative receivables of \$232 million and \$219 million at June 30, 2010, and December 31, 2009, respectively. The Firm reduces exposures to these contracts by entering into offsetting transactions, or by entering into contracts that hedge the market risk related to the derivative guarantees.

In addition to derivative contracts that meet the characteristics of a guarantee, the Firm is both a purchaser and seller of credit protection in the credit derivatives market. For a further discussion of credit derivatives, see Note 5 on pages 128-136 of this Form 10-Q, and Note 5 on pages 167-175 of JPMorgan Chase's 2009 Annual Report.

Loan sale- and securitization-related indemnifications

Indemnifications for breaches of representations and warranties

As part of the Firm's loan sale and securitization activities, the Firm generally makes representations and warranties in its loan sale and securitization agreements that the loans sold meet certain requirements. These agreements may require the Firm (including in its roles as a servicer) to repurchase the loan, purchase the property if the loan has already been foreclosed upon, and/or reimburse the purchaser for losses if the foreclosed property has been liquidated (commonly referred to as a "make-whole payment") if the Firm is deemed to have breached such representations or warranties. Generally, the maximum amount of future payments the Firm would be required to make for breaches under these representations and warranties would be equal to the unpaid principal balance of such loans that are deemed to have defects sold to purchasers (including securitization-related SPEs) plus, in certain circumstances, accrued and unpaid interest on such loans and certain expense. At June 30, 2010, and December 31, 2009, the Firm had recorded repurchase liabilities of \$2.3 billion and \$1.7 billion, respectively, which are reported in accounts payable and other liabilities net of probable recoveries from third parties. The Firm does not believe a range of reasonably possible loss (as defined by the relevant accounting literature) related to its repurchase liability can be determined for asserted and probable unasserted claims as of June 30, 2010.

For additional information, see Note 13 and Note 15 on pages 145-150 and 151-163, respectively, of this Form 10-Q, and Note 13 and Note 15 on pages 192-196 and 198-205, respectively, of JPMorgan Chase's 2009 Annual Report.

Loans sold with recourse

The Firm provides servicing for mortgages and certain commercial lending products on both a recourse and nonrecourse basis. In nonrecourse servicing, the principal credit risk to the Firm is the cost of temporary servicing advances of funds (i.e., normal servicing advances). In recourse servicing, the servicer agrees to share credit risk with the owner of the mortgage loans, such as Fannie Mae or Freddie Mac or a private investor, insurer or guarantor. Losses on recourse servicing predominantly occur when foreclosure sales proceeds of the property underlying a defaulted loan are less than the sum of the outstanding principal balance, plus accrued interest on the loan and the cost of holding and disposing of the underlying property. The Firm's securitizations are predominantly nonrecourse, thereby effectively transferring the risk of future credit losses to the purchaser of the mortgage-backed securities issued by the trust. At June 30, 2010, and December 31, 2009, the unpaid principal balance of loans sold with recourse totaled \$11.3 billion and \$13.5 billion, respectively. The carrying value of the related liability that the Firm has recorded, which is representative of the Firm's view of the likelihood it will have to perform under this guarantee, was \$148 million and \$271 million at June 30, 2010, and December 31, 2009, respectively.

Building purchase commitment

In connection with the Bear Stearns merger, the Firm succeeded to an operating lease arrangement for the building located at 383 Madison Avenue in New York City (the "Synthetic Lease"). Under the terms of the Synthetic Lease, the Firm was obligated to a maximum residual value guarantee of approximately \$670 million if the building were sold and the proceeds of the sale were insufficient to satisfy the lessor's debt obligation. The Firm subsequently served notice to the lessor indicating the Firm will purchase the property on the expiration date of the lease, November 1, 2010. Accordingly, the residual value guarantee has been reclassified as a building purchase commitment.

NOTE 23 — BUSINESS SEGMENTS

The Firm is managed on a line of business basis. There are six major reportable business segments — Investment Bank, Retail Financial Services, Card Services, Commercial Banking, Treasury & Securities Services and Asset Management, as well as a Corporate/Private Equity segment. The business segments are determined based on the products and services provided, or the type of customer served, and they reflect the manner in which financial information is currently evaluated by management. Results of these lines of business are presented on a managed basis. For a definition of managed basis, see the footnotes to the table below. For a further discussion concerning JPMorgan Chase's business segments, see Business Segment Results on page 20 of this Form 10-Q, and pages 53-54 and Note 34 on pages 237-239 of JPMorgan Chase's 2009 Annual Report.

Segment results

The following tables provide a summary of the Firm's segment results for the three and six months ended June 30, 2010, and 2009, on a managed basis. Prior to the January 1, 2010, adoption of the new consolidation guidance related to VIEs, the impact of credit card securitization adjustments had been included in reconciling items so that the total Firm results are on a reported basis. Finally, total net revenue (noninterest revenue and net interest income) for each of the segments is presented on a tax-equivalent basis. Accordingly, revenue from tax-exempt securities and investments that receive tax credits are presented in the managed results on a basis comparable to taxable securities and investments. This approach allows management to assess the comparability of revenue arising from both taxable and tax-exempt sources. The corresponding income tax impact related to these items is recorded within income tax expense/(benefit).

[Table of Contents](#)

Effective January 1, 2010, the Firm enhanced its line of business equity framework to better align equity assigned to each line of business with the changes anticipated to occur in the business, and in the competitive and regulatory landscape. The lines of business are now capitalized based on the Tier 1 common standard, rather than the Tier 1 capital standard.

- (a) In addition to analyzing the Firm's results on a reported basis, management reviews the Firm's lines of business results on a "managed basis," which is a non-GAAP financial measure. The Firm's definition of managed basis starts with the reported U.S. GAAP results and includes certain reclassifications that do not have any impact on net income as reported by the lines of business or by the Firm as a whole.
- (b) In the second quarter of 2009, IB began reporting a credit reimbursement from TSS as a component of total net revenue, whereas TSS reports the credit reimbursement as a separate line item on its income statement (not part of net revenue). Reconciling items include an adjustment to offset IB's inclusion of the credit reimbursement in total net revenue.
- (c) Includes merger costs, which are reported in the Corporate/Private Equity segment. Merger costs attributed to the business segments for the three and six months ended June 30, 2010 and 2009, were as follows.

(in millions)	Three months ended June 30,		Six months ended June 30,	
	2010	2009	2010	2009
Investment Bank	\$ —	\$ 1	\$ —	\$ 16
Retail Financial Services	—	91	—	184
Card Services	—	8	—	36
Commercial Banking	—	2	—	5
Treasury & Securities Services	—	4	—	7
Asset Management	—	2	—	3
Corporate/Private Equity	—	35	—	97

- (d) Effective January 1, 2010, the Firm enhanced its line of business equity framework to better align equity assigned to each line of business with the changes anticipated to occur in the business, and in the competitive and regulatory landscape.
- (e) Effective January 1, 2010, the Firm adopted new consolidation guidance related to VIEs. Prior to the adoption of the new guidance, managed results for credit card excluded the impact of credit card securitizations on total net revenue, provision for credit losses and average assets, as JPMorgan Chase treated the sold receivables as if they were still on the balance sheet in evaluating the credit performance of the entire managed credit card portfolio, as operations are funded, and decisions are made about allocating resources, such as employees and capital, based on managed information. These adjustments are eliminated in reconciling items to arrive at the Firm's reported U.S. GAAP results. The related securitization adjustments were as follows.

(c) Reflects a benefit from the favorable market environments for dollar-roll financings during the six months ended June 30, 2010.

GLOSSARY OF TERMS

ACH: Automated Clearing House.

Advised lines of credit: An authorization which specifies the maximum amount of a credit facility the Firm has made available to an obligor on a revolving but non-binding basis. The borrower receives written or oral advice of this facility. The Firm may cancel this facility at any time.

AICPA: American Institute of Certified Public Accountants.

Allowance for loan losses to total loans: Represents period-end Allowance for loan losses divided by retained loans.

Assets under management: Represent assets actively managed by AM on behalf of Institutional, Retail, Private Bank, Private Wealth Management and JPMorgan Securities clients. Includes “committed capital not called”, on which AM earns fees. Excludes assets managed by American Century Companies, Inc. in which the Firm has a 42% ownership interest as of June 30, 2010.

Assets under supervision: Represent assets under management, as well as custody, brokerage, administration and deposit accounts.

Average managed assets: Refers to total assets on the Firm’s Consolidated Balance Sheets plus credit card receivables that have been securitized and removed from the Firm’s Consolidated Balance Sheets, for periods ended prior to the January 1, 2010, adoption of new FASB guidance requiring the consolidation of the Firm-sponsored credit card securitization trusts.

Bear Stearns merger: Effective May 30, 2008, JPMorgan Chase merged with The Bear Stearns Companies Inc. (“Bear Stearns”), and Bear Stearns became a wholly-owned subsidiary of JPMorgan Chase. The final total purchase price to complete the merger was \$1.5 billion. For additional information, see Note 2 on pages 143-148 of JPMorgan Chase’s 2009 Annual Report.

Beneficial interest issued by consolidated VIEs: Represents the interest of third-party holders of debt/equity securities, or other obligations, issued by VIEs that JPMorgan Chase consolidates. The underlying obligations of the VIEs consist of short-term borrowings, commercial paper and long-term debt. The related assets consist of trading assets, available-for-sale securities, loans and other assets.

Benefit obligation: Refers to the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for OPEB plans.

Combined effective loan-to-value ratio: For residential real estate loans, an indicator of how much equity a borrower has in a secured borrowing based on current estimates of the value of the collateral and considering all lien positions related to the property.

Contractual credit card charge-off: In accordance with the Federal Financial Institutions Examination Council policy, credit card loans are charged off by the end of the month in which the account becomes 180 days past due or within 60 days from receiving notification about a specific event (e.g., bankruptcy of the borrower), whichever is earlier.

Credit card securitizations: For periods ended prior to the January 1, 2010, adoption of new guidance relating to the accounting for the transfer of financial assets and the consolidation of VIEs, CS’ results were presented on a “managed” basis that assumed that credit card loans that had been securitized and sold in accordance with U.S. GAAP remained on the Consolidated Balance Sheets and that earnings on the securitized loans were classified in the same manner as the earnings on retained loans recorded on the Consolidated Balance Sheets. “Managed” results excluded the impact of credit card securitizations on total net revenue, the provision for credit losses, net charge-offs and loan receivables. Securitization did not change reported net income; however, it did affect the classification of items on the Consolidated Statements of Income and Consolidated Balance Sheets.

Credit derivatives: Contractual agreements that provide protection against a credit event on one or more referenced credits. The nature of a credit event is established by the protection buyer and protection seller at the inception of a transaction, and such events include bankruptcy, insolvency or failure to meet payment obligations when due. The buyer of the credit derivative pays a periodic fee in return for a payment by the protection seller upon the occurrence, if any, of a credit event.

Deposit margin: Represents net interest income expressed as a percentage of average deposits.

[Table of Contents](#)

ETTF: Emerging Issues Task Force.

FASB: Financial Accounting Standards Board.

FICO: Fair Isaac Corporation.

Forward points: Represents the interest rate differential between two currencies, which is either added to or subtracted from the current exchange rate (i.e., “spot rate”) to determine the forward exchange rate.

Headcount-related expense: Includes salary and benefits (excluding performance-based incentives), and other noncompensation costs related to employees.

IASB: International Accounting Standards Board.

Interests in purchased receivables: Represents an ownership interest in cash flows of an underlying pool of receivables transferred by a third-party seller into a bankruptcy-remote entity, generally a trust.

Investment-grade: An indication of credit quality based on JPMorgan Chase’s internal risk assessment system. “Investment-grade” generally represents a risk profile similar to a rating of a “BBB-”/“Baa3” or better, as defined by independent rating agencies.

Managed basis: A non-GAAP presentation of financial results that includes reclassifications to present revenue on a fully taxable-equivalent basis, and for periods ended prior to the January 1, 2010, adoption of new accounting guidance relating to the accounting for the transfer of financial assets and the consolidation of VIEs related to credit card securitizations. Management uses this non-GAAP financial measure at the segment level, because it believes this provides information to enable investors to understand the underlying operational performance and trends of the particular business segment and facilitates a comparison of the business segment with the performance of competitors.

Managed credit card receivables: Refers to credit card receivables on the Firm’s Consolidated Balance Sheets plus credit card receivables that have been securitized and removed from the Firm’s Consolidated Balance Sheets, for periods ended prior to the January 1, 2010, adoption of new guidance requiring the consolidation of the Firm-sponsored credit card securitization trusts.

Mark-to-market exposure: A measure, at a point in time, of the value of a derivative or foreign exchange contract in the open market. When the MTM value is positive, it indicates the counterparty owes JPMorgan Chase and, therefore, creates credit risk for the Firm. When the MTM value is negative, JPMorgan Chase owes the counterparty; in this situation, the Firm has liquidity risk.

Master netting agreement: An agreement between two counterparties who have multiple derivative contracts with each other that provides for the net settlement of all contracts, as well as cash collateral, through a single payment, in a single currency, in the event of default on or termination of any one contract.

Mortgage product types:

Alt-A

Alt-A loans are generally higher in credit quality than subprime loans but have characteristics that would disqualify the borrower from a traditional prime loan. Alt-A lending characteristics may include one or more of the following: (i) limited documentation; (ii) high combined-loan-to-value (“CLTV”) ratio; (iii) loans secured by non-owner occupied properties; or (iv) debt-to-income ratio above normal limits. Perhaps the most important characteristic is limited documentation. A substantial proportion of traditional Alt-A loans are those where a borrower does not provide complete documentation of his or her assets or the amount or source of his or her income.

Option ARMs

The option ARM real estate loan product is an adjustable-rate mortgage loan that provides the borrower with the option each month to make a fully amortizing, interest-only or minimum payment. The minimum payment on an option ARM loan is based on the interest rate charged during the introductory period. This introductory rate has usually been significantly below the fully indexed rate. The fully indexed rate is calculated using an index rate plus a margin. Once the introductory period ends, the contractual interest rate charged on the loan increases to the fully indexed rate and adjusts monthly to reflect movements in the index. The minimum payment is typically insufficient to cover interest accrued in the prior month, and any unpaid interest is deferred and added to the principal balance of the loan.

[Table of Contents](#)

Prime

Prime mortgage loans generally have low default risk and are made to borrowers with good credit records and a monthly income that is at least three to four times greater than their monthly housing expense (mortgage payments plus taxes and other debt payments). These borrowers provide full documentation and generally have reliable payment histories.

Subprime

Subprime loans are designed for customers with one or more high risk characteristics, including but not limited to: (i) unreliable or poor payment histories; (ii) a high LTV ratio of greater than 80% (without borrower-paid mortgage insurance); (iii) a high debt-to-income ratio; (iv) an occupancy type for the loan is other than the borrower's primary residence; or (v) a history of delinquencies or late payments on the loan.

NA: Data is not applicable or available for the period presented.

Net charge-off ratio: Represents net charge-offs (annualized) divided by average retained loans for the reporting period.

Net yield on interest-earning assets: The average rate for interest-earning assets less the average rate paid for all sources of funds.

NM: Not meaningful.

Nonconforming mortgage loans: Mortgage loans that do not meet the requirements for sale to U.S. government agencies and U.S. government-sponsored enterprises. These requirements include limits on loan-to-value ratios, loan terms, loan amounts, down payments, borrower creditworthiness and other requirements.

OPEB: Other postretirement employee benefits.

Overhead ratio: Noninterest expense as a percentage of total net revenue.

Personal bankers: Retail branch office personnel who acquire, retain and expand new and existing customer relationships by assessing customer needs and recommending and selling appropriate banking products and services.

Portfolio activity: Describes changes to the risk profile of existing lending-related exposures and their impact on the allowance for credit losses from changes in customer profiles and inputs used to estimate the allowances.

Provision profit: The Firm believes that this financial measure is useful in assessing the ability of a lending institution to generate income in excess of its provision for credit losses.

Pretax margin: Represents income before income tax expense divided by total net revenue, which is, in management's view, a comprehensive measure of pretax performance derived by measuring earnings after all costs are taken into consideration. It is, therefore, another basis that management uses to evaluate the performance of TSS and AM against the performance of their respective competitors.

Principal transactions: Realized and unrealized gains and losses from trading activities (including physical commodities inventories that are accounted for at the lower of cost or fair value) and changes in fair value associated with financial instruments held predominantly by the IB for which the fair value option was elected. Principal transactions revenue also includes private equity gains and losses.

Purchased credit-impaired loans: Acquired loans deemed to be credit-impaired under the FASB guidance for purchased credit-impaired loans. The guidance allows purchasers to aggregate credit-impaired loans acquired in the same fiscal quarter into one or more pools, provided that the loans have common risk characteristics (e.g., FICO score, geographic location). A pool is then accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. Wholesale loans were determined to be credit-impaired if they meet the definition of an impaired loan under U.S. GAAP at the acquisition date. Consumer loans are determined to be purchased credit-impaired based on specific risk characteristics of the loan, including product type, LTV ratios, FICO scores, and past due status.

Real estate investment trust ("REIT"): A special purpose investment vehicle that provides investors with the ability to participate directly in the ownership or financing of real-estate related assets by pooling their capital to purchase and manage income property (i.e., equity REIT) and/or mortgage loans (i.e., mortgage REIT). REITs can be publicly- or privately-held and they also qualify for certain favorable tax considerations.

Receivables from customers: Primarily represents margin loans to prime and retail brokerage customers which are included in accrued interest and accounts receivable on the Consolidated Balance Sheets for the wholesale lines of business.

[Table of Contents](#)

Reported basis: Financial statements prepared under U.S. GAAP, which excludes the impact of taxable-equivalent adjustments. For periods ended prior to the January 1, 2010, adoption of new guidance requiring the consolidation of the Firm-sponsored credit card securitization trusts, the reported basis included the impact of credit card securitizations.

Retained Loans: Loans that are held for investment excluding loans held-for-sale and loans at fair value.

Risk-layered loans: Loans with multiple high-risk elements.

Sales specialists: Retail branch office personnel who specialize in the marketing of a single product, including mortgages, investments and business banking, by partnering with the personal bankers.

Stress testing: A scenario that measures market risk under unlikely but plausible events in abnormal markets.

Troubled debt restructuring: Occurs when the Firm modifies the original terms of a loan agreement by granting a concession to a borrower that is experiencing financial difficulty.

Unaudited: Financial statements and information that have not been subjected to auditing procedures sufficient to permit an independent certified public accountant to express an opinion.

U.S. GAAP: Accounting principles generally accepted in the United States of America.

U.S. government and federal agency obligations: Obligations of the U.S. government or an instrumentality of the U.S. government whose obligations are fully and explicitly guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government.

U.S. government-sponsored enterprise obligations: Obligations of agencies originally established or chartered by the U.S. government to serve public purposes as specified by the U.S. Congress; these obligations are not explicitly guaranteed as to the timely payment of principal and interest by the full faith and credit of the U.S. government.

Value-at-risk ("VaR"): A measure of the dollar amount of potential loss from adverse market moves in an ordinary market environment.

Washington Mutual transaction: On September 25, 2008, JPMorgan Chase acquired the banking operations of Washington Mutual Bank ("Washington Mutual") from the FDIC for \$1.9 billion. The final allocation of the purchase price resulted in the recognition of negative goodwill and an extraordinary gain of \$2.0 billion. For additional information, see Note 2 on pages 143-148 of JPMorgan Chase's 2009 Annual Report.

LINE OF BUSINESS METRICS

Investment Banking

IB's revenue comprises the following:

Investment banking fees include advisory, equity underwriting, bond underwriting and loan syndication fees.

Fixed income markets primarily include client and portfolio management revenue related to market-making across global fixed income markets, including foreign exchange, interest rate, credit and commodities markets.

Equity markets primarily include client and portfolio management revenue related to market-making across global equity products, including cash instruments, derivatives and convertibles.

Credit portfolio revenue includes net interest income, fees and loan sale activity, as well as gains or losses on securities received as part of a loan restructuring, for IB's credit portfolio. Credit portfolio revenue also includes the results of risk management related to the Firm's lending and derivative activities, and changes in the CVA, which is the component of the fair value of a derivative that reflects the credit quality of the counterparty.

Retail Financial Services

Description of selected business metrics within Retail Banking:

Personal bankers — Retail branch office personnel who acquire, retain and expand new and existing customer relationships by assessing customer needs and recommending and selling appropriate banking products and services.

Sales specialists — Retail branch office personnel who specialize in the marketing of a single product, including mortgages, investments and business banking, by partnering with the personal bankers.

Mortgage banking revenue comprises the following:

Production revenue includes net gains or losses on originations and sales of prime and subprime mortgage loans, other production-related fees and losses related to the repurchase of previously-sold loans.

Net mortgage servicing revenue includes the following components:

(a) Operating revenue comprises:

- all gross income earned from servicing third-party mortgage loans, including stated service fees, excess service fees, late fees and other ancillary fees; and
- modeled servicing portfolio runoff (or time decay).

(b) Risk management comprises:

- changes in MSR asset fair value due to market-based inputs, such as interest rates and volatility, as well as updates to assumptions used in the MSR valuation model; and
- derivative valuation adjustments and other, which represents changes in the fair value of derivative instruments used to offset the impact of changes in the market-based inputs to the MSR valuation model.

Mortgage origination channels comprise the following:

Retail — Borrowers who are buying or refinancing a home through direct contact with a mortgage banker employed by the Firm using a branch office, the Internet or by phone. Borrowers are frequently referred to a mortgage banker by a banker in a Chase branch, real estate brokers, home builders or other third parties.

Wholesale — A third-party mortgage broker refers loan applications to a mortgage banker at the Firm. Brokers are independent loan originators that specialize in finding and counseling borrowers but do not provide funding for loans. The Firm exited the broker channel during 2008.

Correspondent — Banks, thrifts, other mortgage banks and other financial institutions that sell closed loans to the Firm.

Correspondent negotiated transactions (“CNTs”) — These transactions occur when mid-to large-sized mortgage lenders, banks and bank-owned mortgage companies sell servicing to the Firm, on an as-originated basis, and exclude purchased bulk servicing transactions. These transactions supplement traditional production channels and provide growth opportunities in the servicing portfolio in stable and periods of rising interest rates.

[Table of Contents](#)

Card Services

Description of selected business metrics within CS:

Sales volume — Dollar amount of cardmember purchases, net of returns.

Open accounts — Cardmember accounts with charging privileges.

Merchant acquiring business — A business that processes bank card transactions for merchants.

Bank card volume — Dollar amount of transactions processed for merchants.

Total transactions — Number of transactions and authorizations processed for merchants.

Commercial Banking

CB Client Segments:

Middle Market Banking covers corporate, municipal, financial institution and not-for-profit clients, with annual revenue generally ranging between \$10 million and \$500 million.

Mid-Corporate Banking covers clients with annual revenue generally ranging between \$500 million and \$2 billion and focuses on clients that have broader investment banking needs.

Commercial Term Lending primarily provides term financing to real estate investors/owners for multi-family properties as well as financing office, retail and industrial properties.

Real Estate Banking provides full-service banking to investors and developers of institutional-grade real estate properties.

CB revenue:

Lending includes a variety of financing alternatives, which are primarily provided on a basis secured by receivables, inventory, equipment, real estate or other assets. Products include term loans, revolving lines of credit, bridge financing, asset-based structures and leases.

Treasury services includes a broad range of products and services enabling clients to transfer, invest and manage the receipt and disbursement of funds, while providing the related information reporting. These products and services include U.S. dollar and multi-currency clearing, ACH, lockbox, disbursement and reconciliation services, check deposits, other check and currency—related services, trade finance and logistics solutions, commercial card and deposit products, sweeps and money market mutual funds.

Investment banking products provide clients with sophisticated capital-raising alternatives, as well as balance sheet and risk management tools through loan syndications, investment-grade debt, asset-backed securities, private placements, high-yield bonds, equity underwriting, advisory, interest rate derivatives, foreign exchange hedges and securities sales.

CB selected business metrics:

Liability balances include deposits, as well as deposits that are swept to on—balance sheet liabilities (e.g., commercial paper, federal funds purchased, time deposits and securities loaned or sold under repurchase agreements) as part of customer cash management programs.

IB revenue, gross represents total revenue related to investment banking products sold to CB clients.

Treasury & Securities Services

Treasury & Securities Services **firmwide metrics** include certain TSS product revenue and liability balances reported in other lines of business related to customers who are also customers of those other lines of business. In order to capture the firmwide impact of Treasury Services and TSS products and revenue, management reviews firmwide metrics such as liability balances, revenue and overhead ratios in assessing financial performance for TSS. Firmwide metrics are necessary, in management's view, in order to understand the aggregate TSS business.

Description of selected business metrics within TSS:

Liability balances include deposits, as well as deposits that are swept to on—balance sheet liabilities (e.g., commercial paper, federal funds purchased, time deposits and securities loaned or sold under repurchase agreements) as part of customer cash management programs.

Asset Management

Assets under management — Represent assets actively managed by AM on behalf of Institutional, Retail, Private Bank, Private Wealth Management and JPMorgan Securities clients. Includes “committed capital not called”, on which AM

[Table of Contents](#)

earnings fees. Excludes assets managed by American Century Companies, Inc., in which the Firm has a 42% ownership interest as of June 30, 2010.

Assets under supervision — Represents assets under management as well as custody, brokerage, administration and deposit accounts.

Alternative assets — The following types of assets constitute alternative investments — Hedge funds, currency, real estate and private equity.

AM's client segments comprise the following:

Institutional brings comprehensive global investment services — including asset management, pension analytics, asset/liability management and active risk budgeting strategies — to corporate and public institutions, endowments, foundations, not-for-profit organizations and governments worldwide.

Retail provides worldwide investment management services and retirement planning and administration through third-party and direct distribution of a full range of investment vehicles.

The Private Bank addresses every facet of wealth management for ultra-high-net-worth individuals and families worldwide, including investment management, capital markets and risk management, tax and estate planning, banking, capital raising and specialty-wealth advisory services.

Private Wealth Management offers high-net-worth individuals, families and business owners in the U.S. comprehensive wealth management solutions, including investment management, capital markets and risk management, tax and estate planning, banking and specialty-wealth advisory services.

JPMorgan Securities provides investment advice and wealth management services to high-net-worth individuals, money managers, and small corporations.

FORWARD-LOOKING STATEMENTS

From time to time, the Firm has made and will make forward-looking statements. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as “anticipate,” “target,” “expect,” “estimate,” “intend,” “plan,” “goal,” “believe,” or other words of similar meaning. Forward-looking statements provide JPMorgan Chase’s current expectations or forecasts of future events, circumstances, results or aspirations. JPMorgan Chase’s disclosures in this Form 10-Q contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Firm also may make forward-looking statements in its other documents filed or furnished with the Securities and Exchange Commission. In addition, the Firm’s senior management may make forward-looking statements orally to analysts, investors, representatives of the media and others.

All forward-looking statements are, by their nature, subject to risks and uncertainties, many of which are beyond the Firm’s control. JPMorgan Chase’s actual future results may differ materially from those set forth in its forward-looking statements. While there is no assurance that any list of risks and uncertainties or risk factors is complete, below are certain factors which could cause actual results to differ from those in the forward-looking statements:

- local, regional and international business, economic and political conditions and geopolitical events;
- changes in financial services regulation;
- changes in trade, monetary and fiscal policies and laws;
- securities and capital markets behavior, including changes in market liquidity and volatility;
- changes in investor sentiment or consumer spending or savings behavior;
- ability of the Firm to manage effectively its liquidity;
- credit ratings assigned to the Firm or its subsidiaries;
- the Firm’s reputation;
- ability of the Firm to deal effectively with an economic slowdown or other economic or market difficulty;

Any forward-looking statements made by or on behalf of the Firm speak only as of the date they are made, and JPMorgan Chase does not undertake to update forward-looking statements to reflect the impact of circumstances or events that arise after the date the forward-looking statements were made. The reader should, however, consult any further disclosures of a forward-looking nature the Firm may make in any subsequent Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, or Current Reports on Form 8-K.

Item 3 Quantitative and Qualitative Disclosures about Market Risk

For a discussion of the quantitative and qualitative disclosures about market risk, see the Market Risk Management section of the Management's discussion and analysis on pages 95-98 of this Form 10-Q.

Item 4 Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of the Firm's management, including its Chairman and Chief Executive Officer and its Chief Financial Officer, of the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, the Chairman and Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective. See Exhibits 31.1 and 31.2 for the Certification statements issued by the Chairman and Chief Executive Officer, and Chief Financial Officer.

The Firm is committed to maintaining high standards of internal control over financial reporting. Nevertheless, because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Part II Other Information

Item 1 Legal Proceedings

The following information updates and restates the disclosures set forth under Part 1, Item 3 "Legal Proceedings" in the Firm's 2009 Annual Report on Form 10-K, and Part II, Item 1 "Legal Proceedings," in the Firm's Quarterly Report on Form 10-Q for the quarterly period ending March 31, 2010 (the "Firm's SEC filings").

Bear Stearns Shareholder Litigation and Related Matters. Various shareholders of Bear Stearns have commenced purported class actions against Bear Stearns and certain of its former officers and/or directors on behalf of all persons who purchased or otherwise acquired common stock of Bear Stearns between December 14, 2006 and March 14, 2008 (the "Class Period"). During the Class Period, Bear Stearns had between 115 and 120 million common shares outstanding, and the price of those securities declined from a high of \$172.61 to a low of \$30 at the end of the period. The actions, originally commenced in several federal courts, allege that the defendants issued materially false and misleading statements regarding Bear Stearns' business and financial results and that, as a result of those false statements, Bear Stearns' common stock traded at artificially inflated prices during the Class Period. In connection with these allegations, the complaints assert claims for violations of Sections 10(b) and 20(a) of the Securities Exchange Act of 1934. Separately, several individual shareholders of Bear Stearns have commenced or threatened to commence arbitration proceedings and lawsuits asserting claims similar to those in the putative class actions. In addition, Bear Stearns and certain of its former officers and/or directors have also been named as defendants in a number of purported class actions

[Table of Contents](#)

commenced in the United States District Court for the Southern District of New York seeking to represent the interests of participants in the Bear Stearns Employee Stock Ownership Plan (“ESOP”) during the time period of December 2006 to March 2008. These actions allege that defendants breached their fiduciary duties to plaintiffs and to the other participants and beneficiaries of the ESOP by (a) failing to manage prudently the ESOP’s investment in Bear Stearns securities; (b) failing to communicate fully and accurately about the risks of the ESOP’s investment in Bear Stearns stock; (c) failing to avoid or address alleged conflicts of interest; and (d) failing to monitor those who managed and administered the ESOP. In connection with these allegations, each plaintiff asserts claims for violations under various sections of the Employee Retirement Income Security Act (“ERISA”) and seeks reimbursement to the ESOP for all losses, an unspecified amount of monetary damages and imposition of a constructive trust.

Bear Stearns, former members of Bear Stearns’ Board of Directors and certain of Bear Stearns’ former executive officers have also been named as defendants in two purported shareholder derivative suits, subsequently consolidated into one action, pending in the United States District Court for the Southern District of New York. Plaintiffs are asserting claims for breach of fiduciary duty, violations of federal securities laws, waste of corporate assets and gross mismanagement, unjust enrichment, abuse of control and indemnification and contribution in connection with the losses sustained by Bear Stearns as a result of its purchases of subprime loans and certain repurchases of its own common stock. Certain individual defendants are also alleged to have sold their holdings of Bear Stearns common stock while in possession of material nonpublic information. Plaintiffs seek compensatory damages in an unspecified amount and an order directing Bear Stearns to improve its corporate governance procedures. Plaintiffs later filed a second amended complaint asserting, for the first time, purported class action claims for violation of Section 10(b) of the Securities Exchange Act of 1934, as well as new allegations concerning events that took place in March 2008.

All of the above-described actions filed in federal courts were ordered transferred and joined for pre-trial purposes before the United States District Court for the Southern District of New York. Motions to dismiss have been filed in the purported securities class action, the shareholders’ derivative action and the ERISA action.

Bear Stearns Hedge Fund Matters. Bear Stearns, certain current or former subsidiaries of Bear Stearns, including Bear Stearns Asset Management, Inc. (“BSAM”) and Bear Stearns & Co. Inc., and certain current or former Bear Stearns employees are named defendants (collectively the “Bear Stearns defendants”) in multiple civil actions and arbitrations relating to alleged losses of more than \$1 billion resulting from the failure of the Bear Stearns High Grade Structured Credit Strategies Master Fund, Ltd. (the “High Grade Fund”) and the Bear Stearns High Grade Structured Credit Strategies Enhanced Leverage Master Fund, Ltd. (the “Enhanced Leverage Fund”) (collectively, the “Funds”). BSAM served as investment manager for both of the Funds, which were organized such that there were U.S. and Cayman Islands “feeder funds” that invested substantially all their assets, directly or indirectly, in the Funds. The Funds are in liquidation.

As a result of the voluntary dismissal of one previously pending derivative lawsuit, currently four civil actions remain pending in the United States District Court for the Southern District of New York relating to the Funds. Two of these actions involve derivative lawsuits brought on behalf of purchasers of partnership interests in the two U.S. feeder funds, alleging that the Bear Stearns defendants mismanaged the Funds and made material misrepresentations to and/or withheld information from investors in the funds. These actions seek, among other things, unspecified compensatory damages based on alleged investor losses. The third action, brought by the Joint Voluntary Liquidators of the Cayman Islands feeder funds, makes allegations similar to those asserted in the derivative lawsuits related to the U.S. feeder funds, and seeks compensatory and punitive damages. Motions to dismiss in these three cases have been granted in part and denied in part, and discovery is ongoing. The fourth action was brought by Bank of America and Banc of America Securities LLC (together “BofA”) alleging breach of contract and fraud in connection with a May 2007 \$4 billion securitization, known as a “CDO-squared,” for which BSAM served as collateral manager. This securitization was composed of certain collateralized debt obligation (“CDO”) holdings that were purchased by BofA from the High Grade Fund and the Enhanced Leverage Fund. Bank of America apparently seeks in excess of \$3 billion in damages. Defendants’ motion to dismiss in this action was largely denied; an amended complaint was filed; and discovery is ongoing in this case as well.

Ralph Cioffi and Matthew Tannin, the portfolio managers for the Funds, were tried on, and acquitted of, criminal charges of securities fraud and conspiracy to commit securities and wire fraud brought by the United States Attorney’s Office for the Eastern District of New York. The United States Securities and Exchange Commission (“SEC”) is proceeding with a civil action against Cioffi and Tannin.

[Table of Contents](#)

Municipal Derivatives Investigations and Litigation. The Department of Justice and the SEC have been investigating JPMorgan Chase and Bear Stearns for possible antitrust, securities and tax-related violations in connection with the bidding or sale of guaranteed investment contracts and derivatives to municipal issuers. A group of state attorneys general and the Office of the Comptroller of the Currency (“OCC”) have opened investigations into the same underlying conduct. The Firm has been cooperating with all of these investigations. The Philadelphia Office of the SEC provided notice to J.P. Morgan Securities Inc. (“JPMorgan Securities Inc.”) that it intends to recommend that the SEC bring civil charges in connection with its investigations. JPMorgan Securities Inc. has responded to that notice, as well as to a separate notice that that Philadelphia Office of the SEC provided to Bear, Stearns & Co. Inc.

Purported class action lawsuits and individual actions (the “Municipal Derivatives Actions”) have been filed against JPMorgan Chase and Bear Stearns, as well as numerous other providers and brokers, alleging antitrust violations in the reportedly \$100 billion to \$300 billion annual market for financial instruments related to municipal bond offerings referred to collectively as “municipal derivatives.” The Municipal Derivatives Actions have been consolidated in the United States District Court for the Southern District of New York. The court denied in part and granted in part defendants’ motions to dismiss the purported class and individual actions, permitting certain claims to proceed against the Firm and others under federal and California state antitrust laws and under the California false claims act.

As previously reported, following JPMorgan Securities Inc.’s settlement with the SEC in connection with certain Jefferson County, Alabama (the “County”) warrant underwritings and related swap transactions, the County filed a complaint against the Firm and several other defendants in the Circuit Court of Jefferson County, Alabama. The suit alleges that the Firm made payments to certain third parties in exchange for which it was chosen to underwrite more than \$3 billion in warrants issued by the County and chosen as the counterparty for certain swaps executed by the County. In its complaint, Jefferson County alleges that the Firm concealed these third party payments and that, but for this concealment, the County would not have entered into the transactions. The County further alleges that the transactions increased the risks of its capital structure and that, following the downgrade of certain insurers that insured the warrants, the County’s interest obligations increased and the principal due on a portion of its outstanding warrants was accelerated. The Court denied the Firm’s motion to dismiss the complaint in May 2010. The Firm filed a mandamus petition with the Alabama Supreme Court, seeking immediate appellate review of this decision. The Alabama Supreme Court set a briefing schedule in connection with the petition and stayed all proceedings pending its adjudication.

A putative class action was filed on behalf of sewer ratepayers against JPMorgan Chase and Bear Stearns and numerous other defendants, based on substantially the same conduct described above (the “Wilson Action”). The plaintiff in the Wilson Action recently filed a sixth amended complaint. The Firm has moved to dismiss the complaint for lack of standing.

Separately, a plaintiff asserting substantially similar claims to those alleged in the Wilson Action was recently granted permission to intervene in a separate action brought by the indenture trustee seeking the appointment of a receiver over Jefferson County’s sewer system. The Firm was not a party to the original action brought by the indenture trustee but has been named a party by the intervening plaintiff. After the intervention motion was granted but before the Firm was added as a party, the Court scheduled the case for trial on September 7, 2010. The Firm has sought reconsideration of the motion granting the intervention or, alternatively, severance of the claims against the Firm and consolidation of those claims with the Wilson Action.

Two insurance companies that guaranteed the payment of principal and interest on warrants issued by Jefferson County have filed separate actions against JPMorgan Chase (one of the insurers has also named Jefferson County) in New York state court asserting that defendants fraudulently misled them into issuing the insurance coverage, based upon substantially the same alleged conduct described above and other alleged non-disclosures. One insurer claims that it insured an aggregate principal amount of nearly \$1.2 billion in warrants, and seeks unspecified damages in excess of \$400 million, as well as unspecified punitive damages. JPMorgan Chase has moved to dismiss the complaint. The other insurer claims that it insured an aggregate principal amount of more than \$378 million and seeks recovery of \$4 million it alleges it paid under the policies to date as well as any payments it will make in the future and unspecified punitive damages.

The Alabama Public Schools and College Authority (“APSCA”) brought a declaratory judgment action in the United States District Court for the Northern District of Alabama claiming that certain interest rate swaption transactions entered into with JPMorgan Chase Bank, N.A. are void on the grounds that the APSCA purportedly did not have the authority to enter into the transactions or, alternatively, are voidable at the APSCA’s option because of its alleged inability to issue refunding bonds in relation to the swaption. Following the denial of its motion to dismiss the action, JPMorgan Chase Bank, N.A. answered the complaint and filed a counterclaim seeking the amounts due under the swaption transactions. Discovery is ongoing and the trial is scheduled to commence in February 2011.

[Table of Contents](#)

Interchange Litigation. A group of merchants have filed a series of putative class action complaints in several federal courts. The complaints allege that VISA and MasterCard, as well as certain other banks and their respective bank holding companies, conspired to set the price of credit card interchange fees, enacted respective association rules in violation of Section 1 of the Sherman Act, and engaged in tying/bundling and exclusive dealing. The complaint seeks unspecified damages and injunctive relief based on the theory that interchange would be lower or eliminated but for the challenged conduct. Based on publicly available estimates, Visa and MasterCard branded payment cards generated approximately \$40 billion of interchange fees industry-wide in 2009. All cases have been consolidated in the United States District Court for the Eastern District of New York for pretrial proceedings. The amended consolidated class action complaint extended the claims beyond credit to debit cards. Defendants filed a motion to dismiss all claims that predated January 2004. The Court granted the motion to dismiss those claims. Plaintiffs then filed a second amended consolidated class action complaint. The basic theories of the complaint remain the same, and defendants again filed motions to dismiss. The Court has not yet ruled on the motions. Fact discovery has closed, and expert discovery in the case is ongoing. The plaintiffs have filed a motion seeking class certification, and the defendants have opposed that motion. The Court has not yet ruled on the class certification motion.

In addition to the consolidated class action complaint, plaintiffs filed supplemental complaints challenging the MasterCard and Visa IPOs (the “IPO Complaints”). With respect to the MasterCard IPO, plaintiffs allege that the offering violated Section 7 of the Clayton Act and Section 1 of the Sherman Act and that the offering was a fraudulent conveyance. With respect to the Visa IPO, plaintiffs are challenging the Visa IPO on antitrust theories parallel to those articulated in the MasterCard IPO pleading. Defendants have filed motions to dismiss the IPO Complaints. The Court has not yet ruled on those motions.

Mortgage-Backed Securities Litigation. JPMorgan Chase and affiliates, heritage Bear Stearns and affiliates and heritage Washington Mutual affiliates have been named as defendants in a number of cases relating to various roles they played in mortgage-backed securities (“MBS”) offerings. These cases are generally purported class action suits, actions by individual purchasers of securities, or actions by insurance companies that guaranteed payments of principal and interest for particular tranches. Although the allegations vary by lawsuit, these cases generally allege that the offering documents for more than \$150 billion of securities issued by dozens of securitization trusts contained material misrepresentations and omissions, including statements regarding the underwriting standards pursuant to which the underlying mortgage loans were issued, the ratings given to the tranches by rating agencies, and the appraisal standards that were used.

Purported class actions are pending against JPMorgan Chase and heritage Bear Stearns, and certain of their affiliates and current and former employees in the United States District Courts for the Eastern and Southern Districts of New York. Defendants have moved to dismiss the action that is pending against JPMorgan Chase entities and certain of their employees in the Eastern District of New York. Heritage Washington Mutual affiliates, Washington Mutual Asset Acceptance Corp. and Washington Mutual Capital Corp., are defendants, along with certain former officers or directors of Washington Mutual Asset Acceptance Corp., in two now-consolidated purported class action cases pending in the Western District of Washington. In addition to allegations as to mortgage underwriting standards and ratings, plaintiffs in these cases allege that defendants failed to disclose Washington Mutual Bank’s alleged coercion or collusion with appraisal vendors to inflate appraisal valuations of the loans in the pools. Defendants have moved to dismiss. In addition to the purported class actions, certain JPMorgan Chase entities and several heritage Bear Stearns entities are defendants in actions filed in state courts in Pennsylvania and Washington brought by the Federal Home Loan Banks of Pittsburgh and Seattle, respectively. These actions relate to each Federal Home Loan Bank’s purchases of certificates in MBS offerings. Defendants moved to dismiss the complaint brought by the FHLB of Pittsburgh. Defendants removed the action by FHLB Seattle to federal court, where it was consolidated with 10 other identical lawsuits by that FHLB against other financial services firms. FHLB of Seattle has moved to remand the consolidated cases back to state court.

Heritage Bear entities, JPMorgan Securities Inc. and heritage Washington Mutual affiliates are among the defendants in an individual action filed by Cambridge Place Investment Management Inc. in Massachusetts state court. Cambridge Place asserts claims under state securities laws, alleging that, when selling mortgage-backed securities, the defendants made misrepresentations and omissions related to loan-to-value ratios, appraisals, underwriting standards, occupancy status, due diligence and credit enhancement.

Heritage Bear entities are also among the defendants named in an individual action filed by The Charles Schwab Corporation (“Schwab”) in state court in California, which similarly alleges misrepresentations and omissions by defendants in connection with the sales of mortgage-backed securities to Schwab. Pursuant to a tolling agreement, that action has been discontinued as against the heritage Bear entities.

EMC Mortgage Corporation (“EMC”), a subsidiary of JPMorgan Chase, is currently a defendant in four pending actions commenced by bond insurers that guaranteed approximately \$3 billion of payments on certain classes of MBS securitizations sponsored by EMC. An action has been commenced by Assured Guaranty Corp. in the United States District Court for the Southern District of

New York, involving one securitization sponsored by EMC. Three previously pending actions, commenced respectively by Ambac Assurance Corporation and Syncora Guarantee, Inc., (“Syncora”) in the United States District Court for the Southern District of New York and CIFG Assurance North America, Inc. (“CIFG”) in state court in Texas, involve a total of six securitizations sponsored by EMC. In each action, plaintiffs claim the underlying mortgage loans had origination defects that purportedly violate certain representations and warranties given by EMC to plaintiffs and that EMC has breached the relevant agreements between the parties by failing to repurchase allegedly defective mortgage loans. Each action seeks unspecified damages and an order compelling EMC to repurchase those loans. The action that was commenced by Syncora seeking access to certain loan files has been resolved through a joint court order proposed by the parties pursuant to which EMC produced loan files relating to those loans subject to a confidentiality stipulation and protective order, and the action has been terminated and closed.

Currently pending in the United States District Court for the Southern District of New York is an action brought on behalf of purchasers of certificates issued by various MBS securitizations sponsored by affiliates of IndyMac Bancorp (“IndyMac Trusts”). JPMorgan Securities Inc., along with numerous other underwriters and individuals, is named as a defendant, both in its own capacity and as successor to Bear Stearns & Co. The Court has dismissed claims as to certain securitizations, including all offerings in which no named plaintiff purchased certificates, and allowed claims as to other securitizations to proceed. JPMorgan Chase and JPMorgan Securities Inc. are defendants in an action pending in state court in Pennsylvania brought by FHLB-Pittsburgh, relating to its purchase of a certificate issued by one IndyMac Trust. Defendants have moved to dismiss. JPMorgan Chase and JPMorgan Securities Inc., as alleged successor to Bear Stearns & Co., and other underwriters, along with certain individuals, are defendants in an action pending in state court in California brought by MBIA Insurance Corp. (“MBIA”) relating to certain certificates issued by three IndyMac trusts, as to two of which Bear Stearns was an underwriter, and as to which MBIA provided guaranty insurance policies. MBIA purports to be subrogated to the rights of the certificate holders, and seeks recovery of sums it has paid and will pay pursuant to those policies. Defendants have moved for judgment on the pleadings on the grounds that plaintiff does not have standing to bring these claims.

Auction-Rate Securities Investigations and Litigation. Beginning in March 2008, several regulatory authorities initiated investigations of a number of industry participants, including the Firm, concerning possible state and federal securities law violations in connection with the sale of auction-rate securities. The market for many such securities had frozen and a significant number of auctions for those securities began to fail in February 2008.

The Firm, on behalf of itself and affiliates, agreed to a settlement in principle with the New York Attorney General’s Office which provided, among other things, that the Firm would offer to purchase at par certain auction-rate securities purchased from JPMorgan Securities Inc., Chase Investment Services Corp. and Bear, Stearns & Co. Inc. by individual investors, charities, and small- to medium-sized businesses. The Firm also agreed to a substantively similar settlement in principle with the Office of Financial Regulation for the State of Florida and the North American Securities Administrator Association (“NASAA”) Task Force, which agreed to recommend approval of the settlement to all remaining states, Puerto Rico and the U.S. Virgin Islands. The Firm finalized the settlement agreements with the New York Attorney General’s Office and the Office of Financial Regulation for the State of Florida. The settlement agreements provide for the payment of penalties totaling \$25 million to all states. The Firm is currently in the process of finalizing consent agreements with NASAA’s member states; more than 35 of these consent agreements have been finalized to date.

The Firm also faces a number of civil actions relating to the Firm’s sales of auction-rate securities, including a putative securities class action in the United States District Court for the Southern District of New York that seeks unspecified damages, and individual arbitrations and lawsuits in various forums brought by institutional and individual investors that, together, seek damages totaling more than \$200 million relating to the Firm’s sales of auction-rate securities. One action is brought by an issuer of auction-rate securities. The actions generally allege that the Firm and other firms manipulated the market for auction-rate securities by placing bids at auctions that affected these securities’ clearing rates or otherwise supported the auctions without properly disclosing these activities. Some actions also allege that the Firm misrepresented that auction-rate securities were short-term instruments and one action alleges that the Firm failed to satisfy a condition set forth in the relevant offering documents prior to selling the securities to the investor. The Firm’s motion to transfer and coordinate before the Southern District all of the active federal auction-rate securities cases was granted by the multi-district panel on June 9, 2010.

Additionally, the Firm was named in two putative antitrust class actions in the United States District Court for the Southern District of New York, which actions allege that the Firm, in collusion with numerous other financial institution defendants, entered into an unlawful conspiracy in violation of Section 1 of the Sherman Act. Specifically, the complaints allege that defendants acted collusively to maintain and stabilize the auction-rate securities market and similarly acted collusively in withdrawing their support for the auction-rate securities market in February 2008. On

January 26, 2010, the District Court dismissed both actions. The appeal is currently pending in the Second Circuit Court of Appeals.

City of Milan Litigation and Criminal Investigation. In January 2009, the City of Milan, Italy (the “City”) issued civil proceedings against (among others) JPMorgan Chase Bank, National Association and J.P. Morgan Securities Ltd. (together, “JPMorgan Chase”) in the District Court of Milan. The proceedings relate to (a) a bond issue by the City in June 2005 (the “Bond”) and (b) an associated swap transaction, which was subsequently restructured on a number of occasions between 2005 and 2007 (the “Swap”). The City seeks damages and/or other remedies against JPMorgan Chase (among others) on the grounds of alleged “fraudulent and deceitful acts” and alleged breach of advisory obligations by JPMorgan Chase (among others) in connection with the Swap and the Bond, together with related swap transactions with other counterparties. The civil proceedings continue and no trial date has been set as yet. JPMorgan Chase Bank, N.A. filed a challenge to the Italian Supreme Court’s jurisdiction over JPMorgan Chase Bank, N.A. In January 2009, JPMorgan Chase Bank, N.A. also received a notice from the Prosecutor at the Court of Milan placing it and certain current and former JPMorgan Chase personnel under investigation in connection with the above transactions. Since April 2009, JPMorgan Chase Bank, N.A. has been contesting an attachment order obtained by the Prosecutor, purportedly to freeze assets potentially subject to confiscation in the event of a conviction. The original Euro 92 million attachment has been reduced to Euro 44.9 million, and JPMorgan Chase Bank, N.A.’s application for a further reduction remains pending. The judge has directed four current and former JPMorgan Chase personnel and JPMorgan Chase Bank, N.A. (as well as other individuals and three other banks) to go forward to a full trial that started in May 2010. Although the Firm is not charged with any crime and does not face criminal liability, if one or more of its employees were found guilty, the Firm could be subject to administrative sanctions, including restrictions on its ability to conduct business in Italy and monetary penalties. In the initial hearings, the City successfully applied to join some of the claims in the civil proceedings against the individuals and JPMorgan Chase Bank, N.A. to the criminal proceedings. In addition, a consumer association has also been given leave to join the criminal proceedings to seek damages from the defendant banks. The trial will resume after the summer recess on September 24, 2010.

Physical Segregation of Assets in U.K. Affiliate. On June 3, 2010, the U.K. Financial Services Authority (the “FSA”) fined the Firm £33.32 million for failing to hold certain client money in a segregated trust status account with JPMorgan Chase Bank, N.A. as required by FSA rules. The Firm had discovered the violation in July 2009, and took immediate action at the time to rectify the error and notify the FSA. No clients suffered any loss. Subsequently, PricewaterhouseCoopers LLP, whose affiliate had performed audit-related services in respect of client money accounts, agreed to provide up to an aggregate of \$12.5 million to the Firm in cash and in credits against fees for audit-related and tax services provided or to be provided to the Firm.

Washington Mutual Litigations. Subsequent to JPMorgan Chase’s acquisition from the Federal Deposit Insurance Corporation (“FDIC”) of substantially all of the assets and certain specified liabilities of Washington Mutual Bank, Henderson Nevada (“Washington Mutual Bank”), in September 2008, Washington Mutual Bank’s parent holding company, Washington Mutual, Inc. (“WMI”) and its wholly-owned subsidiary, WMI Investment Corp. (together, the “Debtors”), both commenced voluntary cases under Chapter 11 of Title 11 of the United States Code in the United States Bankruptcy Court for the District of Delaware (the “Bankruptcy Case”). In the Bankruptcy Case, the Debtors have asserted rights and interests in certain assets. The assets in dispute include principally the following: (a) approximately \$4 billion in trust securities contributed by WMI to Washington Mutual Bank (the “Trust Securities”); (b) the right to tax refunds arising from overpayments attributable to operations of Washington Mutual Bank and its subsidiaries; (c) ownership of and other rights in approximately \$4 billion that WMI contends are deposit accounts at Washington Mutual Bank and one of its subsidiaries; and (d) ownership of and rights in various other contracts and other assets (collectively, the “Disputed Assets”).

JPMorgan Chase commenced an adversary proceeding in the Bankruptcy Case against the Debtors and (for interpleader purposes only) the FDIC seeking a declaratory judgment and other relief determining JPMorgan Chase’s legal title to and beneficial interest in the Disputed Assets. The Debtors commenced a separate adversary proceeding in the Bankruptcy Case against JPMorgan Chase, seeking turnover of the \$4 billion in purported deposit funds and recovery for alleged unjust enrichment for failure to turn over the funds. The Debtors have moved for summary judgment in the turnover proceeding.

In both JPMorgan Chase’s adversary proceeding and the Debtors’ turnover proceeding, JPMorgan Chase and the FDIC have argued that the Bankruptcy Court lacks jurisdiction to adjudicate certain claims. JPMorgan Chase moved to have the adversary proceedings transferred to United States District Court for the District of Columbia and to withdraw jurisdiction from the Bankruptcy Court to the District Court. That motion is fully briefed. In addition, JPMorgan Chase

[Table of Contents](#)

and the FDIC have pending with the United States District Court for the District of Delaware an appeal of the Bankruptcy Court's rulings rejecting the jurisdictional arguments, and that appeal is fully briefed. JPMorgan Chase is also appealing a separate Bankruptcy Court decision holding, in part, that the Bankruptcy Court could proceed with certain matters while the first appeal is pending.

The Debtors submitted claims substantially similar to those submitted in the Bankruptcy Court in the FDIC receivership for, among other things, ownership of certain Disputed Assets, as well as claims challenging the terms of the agreement pursuant to which substantially all of the assets of Washington Mutual Bank were sold by the FDIC to JPMorgan Chase. The FDIC, as receiver, disallowed the Debtors' claims and the Debtors filed an action against the FDIC in the United States District Court for the District of Columbia challenging the FDIC's disallowance of the Debtors' claims, claiming ownership of the Disputed Assets, and seeking money damages from the FDIC. JPMorgan Chase has intervened in the action. In January 2010, the District Court stayed the action pending developments in the Bankruptcy Court. In connection with the stay, the District Court denied WMI's and the FDIC's motions to dismiss without prejudice.

In addition, JPMorgan Chase has been sued in an action originally filed in the 122nd State District Court of Galveston County, Texas (the "Texas Action") by certain holders of WMI common stock and debt of WMI and Washington Mutual Bank who seek unspecified damages alleging that JPMorgan Chase acquired substantially all of the assets of Washington Mutual Bank from the FDIC at an allegedly too low price. The FDIC intervened in the Texas Action and, upon motion by the FDIC and JPMorgan Chase, the District Court transferred the Texas Action to the District of Columbia. Plaintiffs moved to have the FDIC dismissed as a party and to remand the action to the state court, or, in the alternative, dismissed for lack of subject matter jurisdiction. JPMorgan Chase and the FDIC moved to have the entire action dismissed. On April 13, 2010, the United States District Court for the District of Columbia granted JPMorgan Chase's motion to dismiss the complaint, granted the FDIC's parallel motion to dismiss the complaint and denied plaintiffs' motion to dismiss the FDIC as a party and to remand the case to Texas state court. On July 19, 2010, the Court denied plaintiffs' motion to reconsider its prior ruling, to vacate the judgment in the Texas Action and to permit them to file an amended complaint. On July 20, 2010, the plaintiffs in the Texas Action appealed these decisions to the United States Court of Appeals for the District of Columbia.

Other proceedings related to Washington Mutual's failure also pending before the United States District Court for the District of Columbia include a lawsuit brought by Deutsche Bank National Trust Company against the FDIC seeking more than \$6 billion in damages based upon alleged breach of various mortgage securitization agreements and alleged violation of certain representations and warranties given by certain WMI subsidiaries in connection with those securitization agreements. JPMorgan Chase has not been named a party to the Deutsche Bank litigation, but the complaint, and the FDIC's motion to dismiss the complaint, include assertions that JPMorgan Chase may have assumed liabilities relating to the mortgage securitization agreements. Deutsche Bank is scheduled to file an amended complaint on August 30, 2010.

On May 19, 2010, WMI, JPMorgan Chase and the FDIC announced a global settlement agreement among themselves and significant creditor groups (the "Global Settlement Agreement"). The Global Settlement Agreement is incorporated into WMI's proposed Chapter 11 plan ("Plan") that has been submitted to the Bankruptcy Court. If approved by the Bankruptcy Court, the Global Settlement would resolve numerous disputes among WMI, JPMorgan Chase, the FDIC in its capacity as receiver for Washington Mutual Bank and the FDIC in its corporate capacity, as well as those of significant creditor groups, including disputes relating to the Disputed Assets. While the Plan confirmation process is ongoing, the appeals and proceedings before the United States District Courts for the Districts of Delaware and the District of Columbia, are stayed.

Other proceedings related to Washington Mutual's failure are also pending before the Bankruptcy Court. On May 4, 2010, certain WMI creditors who have not agreed to the Global Settlement Agreement filed a motion to convert the Debtors' cases to a Chapter 7 liquidation or, in the alternative, for an order to appoint a trustee to administer the Debtors' estates. Also, on July 6, 2010, certain holders of the Trust Securities commenced an adversary proceeding in the Bankruptcy Court against JPMorgan Chase, WMI, and other entities seeking, among other relief, a declaratory judgment that WMI and JPMorgan Chase do not have any right, title or interest in the Trust Securities.

In a July 20, 2010 hearing in the Bankruptcy Case, the Bankruptcy Court appointed an examiner to investigate, among other things, the claims and assets that may be property of the Debtors' estates that are proposed to be conveyed, released or otherwise compromised and settled under the Plan and Global Settlement Agreement. The examiner is to prepare a preliminary report for the Bankruptcy Court by September 7, 2010, and a final report by October 8, 2010. The

Bankruptcy Court is scheduled to consider confirmation of the Plan, including the Global Settlement Agreement, beginning on November 1, 2010.

Securities Lending Litigation. JPMorgan Chase Bank N.A. has been named as a defendant in four putative class actions asserting ERISA and non-ERISA claims pending in the United States District Court for the Southern District of New York brought by participants in the Firm's securities lending business. A fifth lawsuit was filed in New York state court by an individual participant in the program. Three of the purported class actions, which have been consolidated, relate to losses of plaintiffs' money in medium-term notes of Sigma Finance Inc. ("Sigma"). Plaintiffs assert claims under both ERISA and state law. Fact discovery is substantially complete. In August 2010, the Court certified a plaintiff class consisting of all securities lending participants that held Sigma medium-term notes on September 30, 2008, including those that held the notes by virtue of participation in the investment of cash collateral through a collective fund, as well as those that held the notes by virtue of the investment of cash collateral through individual accounts. The fourth putative class action, as originally filed, concerned losses of money invested in Lehman Brothers medium-term notes and in asset-backed securities offered by nine other issuers. The Firm moved to dismiss the complaint. Before the court ruled on the motion, the plaintiff requested leave to serve a second amended complaint, which was filed July 15, 2010. The amended complaint includes additional factual allegations regarding Lehman Brothers and eliminates claims regarding the other asset-backed securities. The plaintiff asserts only ERISA claims. The Firm's response to the second amended complaint is due on September 15, 2010 and a stay of discovery is in place until that date. The New York state court action, which is not a class action, concerns the plaintiff's loss of money in both Sigma and Lehman Brothers medium-term notes. The Firm has answered the complaint and has moved to stay this action pending resolution of the proceedings in federal court.

Investment Management Litigation. Four cases have been filed claiming that investment portfolios managed by JPMorgan Investment Management Inc. ("JPMIM") were inappropriately invested in securities backed by subprime residential real estate collateral. Plaintiffs claim that JPMIM and related defendants are liable for the loss of more than \$1 billion in market value of these securities. The first case was filed by NM Homes One, Inc. in federal court in New York. The United States District Court for the Southern District of New York granted JPMIM's motion to dismiss nine of plaintiff's ten causes of action. The Court granted JPMIM's request for permission to move to dismiss the remaining cause of action. Plaintiff has moved for reconsideration. The second case, filed by Assured Guaranty (U.K.) in New York state court, was dismissed and Assured has appealed the court's decision. In the third case, filed by Ambac Assurance UK Limited in New York state court, the Court granted JPMIM's motion to dismiss in March 2010, and plaintiff has filed a notice of appeal. The fourth case was filed by CMMF LLP in New York state court in December 2009; the Court granted JPMIM's motion to dismiss the claims, other than claims for breach of contract and misrepresentation. Both CMMF and JPMIM have filed notices of appeal. On May 26, 2010, the New York Appellate Division heard arguments on the case.

Lehman Brothers Bankruptcy Proceedings. In March 2010, the Examiner appointed by the Bankruptcy Court presiding over the Chapter 11 bankruptcy proceedings of Lehman Brothers Holdings Inc. ("LBHI") and several of its subsidiaries (collectively, "Lehman") released a report as to his investigation into Lehman's failure and related matters. The Examiner concluded that one common law claim potentially could be asserted against the Firm for contributing to Lehman's failure, though he characterized the claim as "not strong." The Examiner also opined that certain cash and securities collateral provided by LBHI to the Firm in the weeks and days preceding LBHI's demise potentially could be challenged under the Bankruptcy Code's fraudulent conveyance or preference provisions, though the Firm is of the view that its right to such collateral is protected by the Bankruptcy Code's safe harbor provisions. On May 26, 2010, LBHI and its Official Committee of Unsecured Creditors filed an adversary proceeding against JPMorgan Chase Bank, N.A. in the United States Bankruptcy Court for the Southern District of New York. The complaint asserts both federal bankruptcy law and state common law claims, and seeks, among other relief, to recover \$8.6 billion in collateral that was transferred to JPMorgan Chase Bank, N.A. in the week preceding LBHI's bankruptcy. The complaint also seeks unspecified damages on the grounds that JPMorgan Chase Bank, N.A.'s collateral requests hastened LBHI's demise. The Court set the case for trial in April 2012. In addition, the Firm may also face claims in the liquidation proceeding pending before the same Bankruptcy Court under the Securities Investor Protection Act ("SIPA") for LBHI's U.S. broker-dealer subsidiary, Lehman Brothers Inc. ("LBI"). The SIPA Trustee has advised the Firm that certain of the securities and cash pledged as collateral for the Firm's claims against LBI may be customer property free from any security interest in favor of the Firm.

Table of Contents

Enron Litigation. JPMorgan Chase and certain of its officers and directors are involved in several lawsuits that together seek substantial damages arising out of the Firm's banking relationships with Enron Corp. and its subsidiaries ("Enron"). A number of actions and other proceedings against the Firm previously were resolved, including a class action lawsuit captioned *Newby v. Enron Corp.* and adversary proceedings brought by Enron's bankruptcy estate. The remaining Enron-related actions include individual actions by Enron investors and a purported class action filed on behalf of JPMorgan Chase employees who participated in the Firm's 401(k) plan asserting claims under the Employee Retirement Income Security Act for alleged breaches of fiduciary duties and negligence by JPMorgan Chase, its directors and named officers.

IPO Allocation Litigation. JPMorgan Chase and certain of its securities subsidiaries, including Bear Stearns, were named, along with numerous other firms in the securities industry, as defendants in a large number of putative class action lawsuits filed in the United States District Court for the Southern District of New York alleging improprieties in connection with the allocation of securities in various public offerings, including some offerings for which a JPMorgan Chase entity served as an underwriter. They also claim violations of securities laws arising from alleged material misstatements and omissions in registration statements and prospectuses for the initial public offerings ("IPOs") and alleged market manipulation with respect to aftermarket transactions in the offered securities. Antitrust lawsuits based on similar allegations have been dismissed with prejudice. A settlement was reached in the securities cases, which the District Court approved; the Firm's share of the settlement is approximately \$62 million. Appeals have been filed in the United States Court of Appeals for the Second Circuit seeking reversal of the decision approving the settlement.

In addition to the various cases, proceedings and investigations discussed above, JPMorgan Chase and its subsidiaries are named as defendants or otherwise involved in a number of other legal actions and governmental proceedings arising in connection with their businesses. The Firm believes it has meritorious defenses to the claims asserted against it in its currently outstanding litigations, investigations and proceedings and it intends to defend itself vigorously in all such matters. Additional actions, investigations or proceedings may be initiated from time to time in the future.

In view of the inherent difficulty of predicting the outcome of legal matters, particularly where the claimants seek very large or indeterminate damages, or where the cases present novel legal theories, involve a large number of parties or are in early stages of discovery, the Firm cannot state with confidence what the eventual outcome of these pending matters will be, what the timing of the ultimate resolution of these matters will be or what the eventual loss, fines, penalties or impact related to each pending matter may be. In addition, the Firm cannot estimate the aggregate range of reasonably possible loss as defined in ASC 450 for asserted and probable asserted claims as of June 30, 2010. JPMorgan Chase believes, based upon its current knowledge, after consultation with counsel and after taking into account its current litigation reserves, that the legal actions, proceedings and investigations currently pending against it should not have a material adverse effect on the Firm's consolidated financial condition. The Firm notes, however, that in light of the uncertainties involved in such proceedings, actions and investigations, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves currently accrued by the Firm; as a result, the outcome of a particular matter may be material to JPMorgan Chase's operating results for a particular period, depending on, among other factors, the size of the loss or liability imposed and the level of JPMorgan Chase's income for that period.

Item 1A Risk Factors

For a discussion of certain risk factors affecting the Firm, see Part I, Item 1A: Risk Factors, on pages 4-10 of JPMorgan Chase's 2009 Annual Report on Form 10-K, and Forward-Looking Statements on pages 187-188 of this Form 10-Q.

Financial services legislative and regulatory reforms may, if enacted or adopted, have a significant impact on our business and results of operations and on our credit ratings.

On July 21, 2010, President Obama signed into law the Dodd-Frank Wall Street Reform and Consumer Protection Act which will make significant structural reforms to the financial services industry. The legislation will, among other things: establish a Bureau of Consumer Financial Protection having broad authority to regulate providers of credit, savings, payment and other consumer financial products and services, and may narrow the scope of federal preemption of state consumer laws and expand the authority of state attorneys general to bring actions to enforce federal consumer protection legislation; create a structure to regulate systemically important financial companies, and provide regulators with the power to require such companies to sell or transfer assets and terminate activities if the regulators determine that the size or scope of activities of the company pose a threat to the safety and soundness of the company or the financial stability of the United States; require more comprehensive regulation of the over-the-counter derivatives market, including providing for more strict capital and margin requirements, the central clearing of standardized over-the-counter derivatives, and heightened supervision of all over-the-counter derivatives dealers and major market participants, including JPMorgan Chase; potentially require banking entities, such as JPMorgan Chase, to significantly restructure or restrict their derivatives businesses or to change the legal entities through which such businesses are conducted; prohibit banking entities, such as JPMorgan Chase, from engaging in certain proprietary trading activities and restricting their

[Table of Contents](#)

ownership of, investment in or sponsorship of hedge funds and private equity funds; restrict the interchange fees payable on debit card transactions; and give regulators the authority to phase out the treatment of trust preferred capital debt securities as Tier 1 capital for regulatory capital purposes.

These or any other new legislative changes enacted (as well as any rules or regulations issued by U.S. regulators implementing any such legislation, and any actions by legislatures and regulatory bodies in other countries) could result in significant loss of revenue, limit our ability to pursue business opportunities we might otherwise consider engaging in, impact the value of assets that we hold, require us to change certain of our business practices, impose additional costs on us, establish more stringent capital, liquidity and leverage ratio requirements, or otherwise adversely affect our businesses. Accordingly, we cannot provide assurance that any such new legislation or regulation would not have an adverse effect on our business, results of operations or financial condition.

Item 2 Unregistered Sales of Equity Securities and Use of Proceeds

During the second quarter of 2010, there were no shares of common stock of JPMorgan Chase & Co. issued in transactions exempt from registration under the Securities Act of 1933, pursuant to Section 4(2) thereof.

Under the stock repurchase program authorized by the Firm's Board of Directors, the Firm is authorized to repurchase up to \$10.0 billion of the Firm's common stock plus 88 million warrants issued in 2008 as part of the U.S. Treasury's Capital Purchase Program. During the second quarter of 2010, the Firm resumed common stock repurchases, repurchasing a total of 3 million shares for \$135 million at an average price of \$38.73 per share. The Firm did not repurchase any of the warrants. As of June 30, 2010, \$6.1 billion of authorized repurchase capacity remained with respect to the common stock, and all of the authorized repurchase capacity remained with respect to the warrants.

The Firm has determined that it may, from time to time, enter into written trading plans under Rule 10b5-1 of the Securities Exchange Act of 1934 to facilitate the repurchase of common stock and warrants in accordance with the repurchase program. A Rule 10b5-1 repurchase plan allows the Firm to repurchase its equity during periods when it would not otherwise be repurchasing common stock—for example during internal trading "black-out periods." All purchases under a Rule 10b5-1 plan must be made according to a predefined plan established when the Firm is not aware of material nonpublic information.

For the six months ended June 30, 2010	Total shares repurchased	Average price paid per share ^(a)	Dollar value of remaining authorized repurchase (in millions) ^(b)
First quarter	—	\$ —	\$ 6,221
April	—	—	6,221
May	—	—	6,221
June	3,491,900	38.73	6,085
Second quarter	3,491,900	38.73	6,085
Year-to-date	3,491,900	\$ 38.73	\$ 6,085

(a) Excludes commission costs.

(b) The amount authorized by the Board of Directors excludes commissions cost.

Table of Contents

Participants in the Firm's stock-based incentive plans may have shares withheld to cover income taxes. Shares withheld to pay income taxes are repurchased pursuant to the terms of the applicable plan and not under the Firm's share repurchase program. Shares repurchased pursuant to these plans during the second quarter of 2010 were as follows:

For the six months ended June 30, 2010	Total shares repurchased	Average price paid per share
First quarter	2,444	\$ 41.88
April	46	45.08
May	325	27.29
June	22	38.63
Second quarter	393	30.01
Year-to-date	2,837	\$ 40.23
