-5- EXXON MOBIL CORPORATION NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS 1. Basis Of Financial Statement Preparation These unaudited condensed consolidated financial statements should be read in the context of the consolidated financial statements and notes thereto filed with the Securities and Exchange Commission in the corporation's 2001 Annual Report on Form 10-K. In the

the periods reported herein. All such adjustments are of a normal recurring nature. The corporation's exploration and production activities are
accounted for under the "successful efforts" method. 2. Accounting Changes As of January 1, 2002, ExxonMobil adopted Financial Accounting
Standards Board Statements of Financial Accounting Standards No. 141 (FAS 141), "Business Combinations", and No. 142 (FAS 142), "Goodwill
and Other Intangible Assets". Under FAS 141, the pooling of interests method of accounting is no longer permitted and the purchase method must be
used for business combinations initiated after June 30, 2001. Under FAS 142, goodwill and certain intangibles will no longer be amortized but will be
subject to annual impairment tests. The effect of adoption of the new standards on the corporation's financial statements was negligible. As of January 1,
2002, ExxonMobil adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 144 (FAS 144), "Accounting for
the Impairment or Disposal of Long-Lived Assets". FAS 144 supercedes previous guidance related to the impairment or disposal of long-lived assets.
For long-lived assets to be held and used, it resolves certain implementation issues of the former standards, but retains the basic requirements of
recognition and measurement of impairment losses. For long-lived assets to be disposed of by sale, it broadens the definition of those disposals that
should be reported separately as discontinued operations. There was no impact on the corporation of adopting FAS 144, except that future sales of
long-lived assets may be required to be presented as discontinued operations, which would be a different presentation than under previous accounting
standards. 3. Recently Issued Statements of Financial Accounting Standards In August 2001, the Financial Accounting Standards Board issued
Statement of Financial Accounting Standards No. 143 (FAS 143), "Accounting for Asset Retirement Obligations". FAS 143 is required to be adopted
by the corporation no later than January 1, 2003 and its primary impact will be to change the method of accruing for upstream site restoration costs.
These costs are currently accrued ratably over the productive lives of the assets. At the end of 2001, the cumulative amount accrued under this policy
was approximately \$3.2 billion. Under FAS 143, the fair value of asset retirement obligations will be recorded as liabilities when they are incurred,
which are typically at the time the assets are installed. Amounts recorded for the related assets will be increased by the amount of these obligations.
Over time the liabilities will be accreted for the change in their present value and the initial capitalized costs will be depreciated over the useful lives of
the related assets. The corporation is evaluating the impact of adopting FAS 1436- 4. Merger of Exxon Corporation and Mobil Corporation On
November 30, 1999, a wholly-owned subsidiary of Exxon Corporation merged with Mobil Corporation so that Mobil became a wholly-owned
subsidiary of Exxon (the "Merger"). At the same time, Exxon changed its name to Exxon Mobil Corporation. The Merger was accounted for as a
pooling of interests. In the first quarter of 2002, in association with the Merger, \$83 million of before tax costs (\$60 million after tax) were recorded as
merger related expenses, including costs for rationalization of facilities and systems. In the first quarter of 2001, merger related costs were \$121 million
before tax (\$90 million after tax). The severance reserve balance at the end of the first quarter of 2002 is expected to be expended in 2002. The
following table summarizes the activity in the severance reserve for the quarter ended March 31, 2002: Opening Balance at Balance Additions
Deductions Period End (millions of dollars) 197 0 75 122 5. Extraordinary Gains on Required Asset
Divestitures First quarter 2002 results included no extraordinary gains. First quarter 2001 included a net after-tax gain of \$40 million (including an
income tax credit of \$15 million), or \$0.01 per common share, from asset divestments that were required as a condition of the regulatory approval of
the Merger. These net gains on required divestments have been reported as extraordinary items in accordance with accounting requirements for
business combinations accounted for as a pooling of interests. 6. Litigation and Other Contingencies A number of lawsuits, including class actions, were
brought in various courts against Exxon Mobil Corporation and certain of its subsidiaries relating to the accidental release of crude oil from the tanker
Exxon Valdez in 1989. The vast majority of the claims have been resolved leaving a few compensatory damages cases to be tried. All of the punitive
damage claims were consolidated in the civil trial that began in May 1994. In that trial, on September 24, 1996, the United States District Court for the
District of Alaska entered a judgment in the amount of \$5.058 billion. The District Court awarded approximately \$19.6 million in compensatory
damages to fisher plaintiffs, \$38 million in prejudgment interest on the compensatory damages and \$5 billion in punitive damages to a class composed of
all persons and entities who asserted claims for punitive damages from the corporation as a result of the Exxon Valdez grounding. The District Court
also ordered that these awards shall bear interest from and after entry of the judgment. The District Court stayed execution on the judgment pending
appeal based on a \$6.75 billion letter of credit posted by the corporation. ExxonMobil appealed the judgment. On November 7, 2001, the United
States Court of Appeals for the Ninth Circuit vacated the punitive damage award as being excessive under the Constitution and remanded the case to
the District Court for it to determine the amount of the punitive damage award consistent with the Ninth Circuit's holding. The Ninth Circuit upheld the
compensatory damage award which has been paid. The letter of credit was terminated on February 1, 20027- On January 29, 1997, a settlement
agreement was concluded resolving all remaining matters between the corporation and various insurers arising from the Valdez accident. Under terms of
this settlement, ExxonMobil received \$480 million. Final income statement recognition of this settlement continues to be deferred in view of uncertainty
regarding the ultimate cost to the corporation of the Valdez accident. The ultimate cost to ExxonMobil from the lawsuits arising from the Exxon Valdez
grounding is not possible to predict and may not be resolved for a number of years. A dispute with a Dutch affiliate concerning an overlift of natural gas
by a German affiliate was resolved by payments by the German affiliate pursuant to an arbitration award. The German affiliate had paid royalties on the
excess gas and recovered the royalties in 2001. The only substantive issue remaining is the taxes payable on the final compensation for the overlift.
Resolution of this issue will not have a materially adverse effect upon the corporation's operations or financial condition. On December 19, 2000, a jury
in Montgomery County, Alabama, returned a verdict against the corporation in a contract dispute over royalties in the amount of \$87.69 million in
compensatory damages and \$3.42 billion in punitive damages in the case of Exxon Corporation v. State of Alabama, et al. The verdict was upheld by
the trial court on May 4, 2001. ExxonMobil has appealed the judgment and believes it should be set aside or substantially reduced on factual and
constitutional grounds. The Alabama Supreme Court heard oral arguments on the appeal on April 25, 2002. The ultimate outcome is not expected to
have a materially adverse effect upon the corporation's operations or financial condition. On May 22, 2001, a state court jury in New Orleans,
Louisiana, returned a verdict against the corporation and three other entities in a case brought by a landowner claiming damage to his property. The
property had been leased by the landowner to a company that performed pipe cleaning and storage services for customers, including the corporation.
The jury awarded the plaintiff \$56 million in compensatory damages (90 percent to be paid by the corporation) and \$1 billion in punitive damages (all to
be paid by the corporation). The damage related to the presence of naturally occurring radioactive material (NORM) on the site resulting from pipe
cleaning operations. The award has been upheld at the trial court. ExxonMobil will appeal the judgment to the Louisiana Fourth Circuit Court of
Anneals and believes that the judgment should be set aside or substantially reduced on factual and constitutional grounds. The ultimate outcome is not

opinion of the corporation, the information furnished herein reflects all known accruals and adjustments necessary for a fair statement of the results for

expected to have a materially adverse effect upon the corporation's operations or financial condition. The U.S. Tax Court has decided the issue with respect to the pricing of crude oil purchased from Saudi Arabia for the years 1979-1981 in favor of the corporation. This decision is subject to appeal. Certain other issues for the years 1979-1993 remain pending before the Tax Court. The ultimate resolution of these issues is not expected to have a materially adverse effect upon the corporation's operations or financial condition. Claims for substantial amounts have been made against ExxonMobil and certain of its consolidated subsidiaries in other pending lawsuits, the outcome of which is not expected to have a materially adverse effect upon the corporation's operations or financial condition. -8- The corporation and certain of its consolidated subsidiaries are directly and indirectly contingently liable for amounts similar to those at the prior year-end relating to guarantees for notes, loans and performance under contracts, including guarantees of non-U.S. excise taxes and customs duties of other companies, entered into as a normal business practice, under reciprocal arrangements. Additionally, the corporation and its affiliates have numerous long-term sales and purchase commitments in their various business activities, all of which are expected to be fulfilled with no adverse consequences material to the corporation's operations or financial condition. The corporation's outstanding unconditional purchase obligations at March 31, 2002, were similar to those at the prior year-end period. Unconditional purchase obligations as defined by accounting standards are those long-term commitments that are noncancelable or cancelable only under certain conditions, and that third parties have used to secure financing for the facilities that will provide the contracted goods or services. The operations and earnings of the corporation and its affiliates throughout the world have been, and may in the future be, affected from time to time in varying degree by political developments and laws and regulations, such as forced divestiture of assets; restrictions on production, imports and exports; price controls; tax increases and retroactive tax claims; expropriation of property; cancellation of contract rights and environmental regulations. Both the likelihood of such occurrences and their overall effect upon the corporation vary greatly from country to country and are not predictable. 7. Nonowner Changes in Shareholders' Equity

<sup>\*</sup> Prior year amounts restated to reflect two-for-one stock split effective in June 2001. -16- REVIEW OF FIRST QUARTER 2002 RESULTS Excluding merger effects, estimated first quarter 2002 earnings were \$2,150 million (\$0.31 per share), a decrease of \$2,900 million from the record first quarter of 2001. Including merger effects, net income of \$2,090 million (\$0.30 per share) decreased \$2,910 million. Revenue for the first quarter of 2002 totaled \$43,531 million compared with \$57,300 million in 2001. Capital and exploration expenditures of \$2,974 million in the first quarter of 2002 were up \$458 million, or 18 percent, compared with \$2,516 million last year. Upstream capital spending was up 28 percent consistent with plans to grow profitable production levels. Excluding merger effects, ExxonMobil's first quarter 2002 earnings of \$2,150 million were down \$730 million from fourth quarter 2001 earnings of \$2,880 million. Compared with the fourth quarter of 2001, upstream earnings improved \$339 million, reflecting an upward trend in crude oil prices. Liquids volumes were also higher as production from new operations more than offset OPEC quota restrictions and natural field decline. Gas volumes were up 3 percent reflecting higher production in Indonesia and seasonal demand patterns in Europe. Downstream results fell \$1,047 million from the fourth quarter of 2001. Severely compressed industry refining and marketing margins were experienced worldwide and were the primary driver in the decline. Additionally, the absence of benefits from planned inventory reductions that occurred in the fourth quarter contributed to the decrease. Industry conditions have improved in both the upstream and downstream thus far in the second quarter. Oil prices have remained above first quarter levels and natural gas prices in North America have also improved. Early in the quarter, we have seen recovery in some refining and marketing margins, although they remain at low levels, particularly in the Asia-Pacific region. Excluding merger effects, ExxonMobil's first quarter 2002 earnings of \$2,150 million were down \$2,900 million from the record set last year. Net income was \$2,090 million. The reduction in earnings reflected weakened conditions in all business segments, including lower crude oil prices, a sharp decline in natural gas realizations, and significantly weaker refining and marketing margins. Ample inventories, weakened demand and rapidly rising raw materials costs created the worst downstream conditions since the mid-80s. Capital expenditures increased in line with higher full-year spending plans, consistent with a disciplined, longterm focus on investing for profitable growth. Upstream earnings were \$2,009 million, a decrease of \$1,769 million from the record first quarter 2001 results. Average realizations on crude oil sales were 20 percent lower than the prior year, and natural gas prices in North America fell about 70 percent from the historic highs reached during the same period last year. Liquids production, excluding the impact of OPEC quota restrictions, was consistent with plans. Natural gas volumes were down 3 percent due to a reduction in weather related demand in Europe and also were consistent with plans. Downstream losses were \$28 million, versus \$999 million of earnings in last year's first quarter, reflecting historically weak industry-wide margin as product prices did not keep pace with rising crude prices. Refining margins dropped sharply in the U.S. and Europe, and remained depressed in Asia-Pacific with particular weakness in Japan. -17- First quarter marketing margins in the U.S. were down significantly from a year earlier, and also declined in other major markets worldwide. In total, the confluence of margin weakness in both the refining and marketing sectors led to a downstream margin environment that was the worst seen since the mid-80s. Worldwide sales volumes decreased 4 percent reflecting reduced weather related

```
demand for heating oil and lower jet fuels sales. Earnings were also adversely affected by foreign exchange losses in Argentina. Chemicals earnings of
$132 million declined despite higher sales volumes which exceeded the record first quarter levels achieved last year. Margins remained depressed, with
continuing pressure on product realizations. Outside the U.S., higher volumes reflecting capacity additions in Singapore and Saudi Arabia were more
than offset by weaker margins. Earnings from other operations of $153 million increased slightly. First quarter net income of $2,090 million included
merger expenses of $60 million. Although first quarter earnings were negatively affected by declines in prices and margins, ExxonMobil continued its
vigorous pursuit of plans and programs to enhance shareholder value. Each of the businesses captured additional efficiencies in line with planned full-
year targets. Capital and exploration expenditures increased 18 percent, including a 28 percent increase in the upstream, laying the groundwork for
future profitable production growth. In the first quarter, the Corporation acquired 35 million shares at a gross cost of $1,450 million to offset the dilution
associated with benefit plans and to reduce common stock outstanding. OTHER COMMENTS ON FIRST QUARTER 2002 COMPARED WITH
FIRST QUARTER 2001 Upstream earnings were $2,009 million, significantly lower than the first quarter record achieved in 2001 reflecting a 20
percent decline in crude oil realizations and a 70 percent reduction in North America natural gas prices from their historic highs last year. Liquids
production of 2,538 kbd (thousands of barrels per day) decreased from 2,620 kbd in the first quarter of 2001. Higher production in Angola and
Malaysia was offset by OPEC quota restrictions and natural field declines in mature areas. First quarter natural gas production of 11,744 mcfd (millions
of cubic feet per day) compared with 12,119 mcfd last year. Improvements in Asia-Pacific volumes, partly from the absence of production curtailments
due to security concerns at the Arun field in Indonesia, were offset by reduced demand in Europe and natural field decline in mature areas. Earnings
from U.S. upstream operations were $444 million, a decrease of $1,184 million from the prior year, reflecting the sharp decline in natural gas prices.
Upstream earnings outside the U.S. were $1,565 million, a decrease of $585 million. Downstream earnings decreased substantially from the first
quarter of last year, reflecting significantly lower refining margins in the U.S. and Europe, with continued weakness in Asia-Pacific. Refining margins in
Japan dropped sharply and marketing margins were depressed worldwide. Petroleum product sales were 7,697 kbd, 288 kbd lower than last year's
first quarter due to lower demand in Asia-Pacific and Europe. -18- U.S. downstream earnings were $14 million, down $395 million. Non-U.S.
downstream losses of $42 million were $632 million lower than last year's first quarter earnings of $590 million. In addition to refining and marketing
margin effects, non-U.S. downstream results included negative foreign exchange effects in Argentina. Chemicals earnings were $132 million, down $68
million from the same quarter a year ago reflecting continuing pressure on product realizations in the U.S. manufacturing sector as well as margin
declines outside the U.S. Prime product sales volumes of 6,720 kt (thousands of metric tons) exceeded last year's record level, as declines in the U.S.
were more than offset by increased sales outside of the U.S., helped by recent capacity additions. Earnings from other operations, including coal,
minerals and power, totaled $153 million, compared with $141 million last year. Corporate and financing expenses of $116 million compared with $68
million in 2001. The increase reflected the impact of higher pension expenses. During the period, the company continued to benefit from favorable tax
effects. First quarter net income included $60 million of after-tax merger expenses, including costs for rationalization of facilities and systems. MERGER
OF EXXON CORPORATION AND MOBIL CORPORATION On November 30, 1999, a wholly-owned subsidiary of Exxon Corporation
merged with Mobil Corporation so that Mobil became a wholly-owned subsidiary of Exxon (the "Merger"). At the same time, Exxon changed its name
to Exxon Mobil Corporation. The Merger was accounted for as a pooling of interests. In the first quarter of 2002, in association with the Merger, $83
million of before tax costs ($60 million after tax) were recorded as merger related expenses, including costs for rationalization of facilities and systems.
In the first quarter of 2001, merger related costs were $121 million before tax ($90 million after tax). The severance reserve balance at the end of the
first quarter of 2002 is expected to be expended in 2002. The following table summarizes the activity in the severance reserve for the quarter ended
March 31, 2002: Opening Balance at Balance Additions Deductions Period End
                                                                                                                                   (millions of dollars)
197 0 75 122 Merger related expenses are expected to grow to approximately $2.9 billion before tax on a cumulative basis by the end of 2002.
Merger synergy initiatives, including cost savings, efficiency gains, and revenue enhancements, are on track. First quarter 2002 results included no
extraordinary gains. First quarter 2001 included a net after-tax gain of $40 million (including an income tax credit of $15 million), or $0.01 per common
share, from asset divestments that were required as a condition of the regulatory approval of the Merger. These net gains on required divestments have
been reported as extraordinary items in accordance with accounting requirements for business combinations accounted for as a pooling of interests. -
19- LIQUIDITY AND CAPITAL RESOURCES Net cash generation before financing activities was $3,387 million in the first three months of 2002
versus $7,637 million in the same period last year. Operating activities provided net cash of $4,624 million, a decrease of $4,105 million from the prior
year, influenced by lower net income. Investing activities used net cash of $1,237 million, compared to a net use of $1,092 million in the prior year,
reflecting higher additions to property, plant, and equipment and higher asset divestment proceeds. Net cash used in financing activities was $3,284
million in the first quarter of 2002 versus $3,662 million in the same quarter last year reflecting a lower level of debt reductions in the current year.
During the first quarter of 2002, Exxon Mobil Corporation purchased 35 million shares of its common stock for the treasury at a gross cost of $1,450
million. These purchases were to offset shares issued in conjunction with company benefit plans and programs and to reduce the number of shares
outstanding. Shares outstanding were reduced from 6,809 million at the end of 2001 to 6,782 million at the end of the first quarter 2002. Purchases
may be made in both the open market and through negotiated transactions, and may be discontinued at any time. Revenue for the first quarter of 2002
totaled $43,531 million compared to $57,300 million in the first quarter 2001 reflecting significantly lower prices. Capital and exploration expenditures
were $2,974 million in the first quarter 2002 compared to $2,516 million in last year's first quarter. In 2002, capital and exploration investments are
expected to increase by 10 percent over 2001 primarily driven by ExxonMobil's large portfolio of upstream projects. Total debt of $10.5 billion at
March 31, 2002 decreased $0.3 billion from year-end 2001. The corporation's debt to total capital ratio was 12.3 percent at the end of the first
quarter of 2002, compared to 12.4 percent at year-end 2001. Although the corporation issues long-term debt from time to time and maintains a
revolving commercial paper program, internally generated funds cover the majority of its financial requirements. Litigation and other contingencies are
discussed in note 6 to the unaudited condensed consolidated financial statements. There are no events or uncertainties known to management beyond
those already included in reported financial information that would indicate a material change in future operating results or future financial condition. The
corporation, as part of its ongoing asset management program, continues to evaluate its mix of assets for potential upgrade. Because of the ongoing
nature of this program, dispositions will continue to be made from time to time which will result in either gains or losses. Asset management activities in
the first quarter of 2002 included the sale of coal operations in Colombia. On May 2, 2002, the corporation announced that it has reached agreement
to sell its affiliated companies that hold all of the interests in Compania Minera Disputada de las Condes Limitada (a Chile copper mining business) for
```

\$1.3 billion, plus future contingent payments in the event of higher future copper prices. The sale, which is subject to the completion of outstanding due diligence, the completion of a definitive sale and purchase agreement and required regulatory approvals, is expected to be completed by June 30, 2002. -20- FORWARD-LOOKING STATEMENTS Statements in this discussion regarding expectations, plans and future events or conditions are forward-looking statements. Actual future results, including merger related expenses and synergies; financing sources; the resolution of contingencies; the effect of changes in prices, interest rates and other market conditions; and environmental and capital expenditures could differ materially depending on a number of factors, such as the outcome of commercial negotiations; changes in the supply of and demand for crude oil, natural gas and petroleum and petrochemical products; and other factors discussed above and discussed under the caption "Factors Affecting Future Results" in Item 1 of ExxonMobil's 2001 Form 10-K. -21- EXXON MOBIL CORPORATION Item 3. Quantitative and Qualitative Disclosures About Market Risk Information about market risks for the three months ended March 31, 2002 does not differ materially from that discussed under Item 7A of the registrant's Annual Report on Form 10-K for 2001. PART II. OTHER INFORMATION Item 1. Legal Proceedings The Bay Area Air Quality Management District ("BAAQMD") issued approximately 17 notices of violations for alleged violations in 1998 and 1999 of various local, state and federal laws relating to control of air contaminants at the Benicia refinery that was formerly owned by the corporation. The amount of the penalty for which the corporation might ultimately be liable is unknown at this time, but penalties could be in excess of \$100,000. Settlement discussions with the BAAQMD to resolve these matters are ongoing. Refer to the relevant portions of Note 6 on pages 7 through 9 of this Quarterly Report on Form 10-Q for further information on legal proceedings. Item 6. Exhibits and Reports on Form 8-K a) Exhibits The registrant has no exhibits for the three month period ended March 31, 2002. b) Reports on Form 8-K The registrant has not filed any reports on Form 8-K during the quarter. -22- EXXON MOBIL CORPORATION SIGNATURE Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized. EXXON MOBIL CORPORATION Date: May 14, 2002 /s/ DONALD D. HUMPHREYS Donald D. Humphreys, Vice President, Controller and

Principal Accounting Officer -23-
