RASIS OF PRESENTATION: The consolidated financial statements of Air Products and Chemicals. Inc. and its subsidiaries (the "company" or "registrant") included

BASIS OF PRESENTATION: The consolidated financial statements of Air Products and Chemicals, Inc. and its subsidiaries (the "company" or "registrant") included herein have been prepared by the company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of the company, the accompanying statements reflect adjustments necessary to present fairly the financial position, results of operations and cash flows for those periods indicated, and contain adequate disclosure to make the information presented not misleading. Adjustments included herein are of a normal, recurring nature unless otherwise disclosed in the notes to consolidated financial statements. However, the interim results for the periods indicated herein do not reflect certain adjustments, such as the valuation of inventories on the LIFO cost basis, which can only be finally determined on an annual basis. The consolidated condensed financial statements included herein should be read in conjunction with the financial statements and notes thereto included in the company's latest annual report on Form 10-K in order to fully understand the basis of presentation. Results of operations for interim periods are not necessarily indicative of the results of operations for a full year. Reference the 2004 Outlook included on page 20 of Item 2 in Management's Discussion and Analysis of Financial Condition and Results of Operations. Risk factors that could impact results are discussed under Forward-Looking Statements on page 23. 2 PART I. FINANCIAL INFORMATION ITEM 1. FINANCIAL STATEMENTS AIR PRODUCTS AND CHEMICALS, INC. segment operates principally in China, Japan, Korea, and Taiwan. 8 AIR PRODUCTS AND CHEMICALS, INC. AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Millions of dollars, except per share) MAJOR ACCOUNTING POLICIES Refer to the company's 2003 annual report on Form 10-K for a description of major accounting policies. STOCK-BASED COMPENSATION At 31 December 2003, the company had various stock-based compensation plans as described in Note 14 to the consolidated financial statements in the company's 2003 annual report on Form 10-K. The company accounts for its stock option plans under the recognition and measurement principles of APB Opinion No. 25, "Accounting for Stock Issued to Employees," and related Interpretations. No compensation expense has been recognized in net income for stock options, as options granted had an exercise price equal to the market value of the underlying common stock on the date of grant. The following table illustrates the effect on net income and earnings per share if the company had applied the fair value recognition provisions of Statement of Financial Accounting Standard (SFAS) No. 123, "Accounting for Stock-Based Compensation," to its stock option plans.

RECLASSIFICATION The company changed its reporting to now include overhead expenses incurred by the company related to equity affiliates in selling and administrative expense. Previously, expenses related to equity affiliates were reported in the income statement line item for equity affiliates' income, net of related expenses. Equity affiliates' income now includes the company's proportionate share of earnings of the affiliates and the gain or loss on the sale of investments in equity affiliates. This

affiliates' income and selli 2003 2002 2001	ng and administrative expense for each of th	e last five years is summarized below	w. 9

reclassification impacts the Gases segment. The income statements of the prior periods were adjusted to reflect this reclassification. The impact on consolidated equity

This reclassification for each of the fiscal 2003 quarters is as follows: first quarter - \$2.5; second quarter - \$2.7; third quarter - \$2.7; and fourth quarter - \$2.1. NEW ACCOUNTING STANDARDS In December 2003, the Financial Accounting Standards Board (FASB) published a revision to Interpretation No. 46, "Consolidation of Variable Interest Entities," to clarify some of the provisions of Interpretation No. 46. The revision to Interpretation No. 46 does not change the company's determination that the company has no interests in a variable interest entity. In December 2003, the FASB also issued a revised SFAS No. 132, "Employers' Disclosures about Pensions and Other Postretirement Benefits," which added disclosure requirements for defined benefit plans. The annual disclosure requirements are effective for the company's fiscal year ending 2004, and the quarterly disclosure requirements are effective beginning the second quarter of fiscal year 2004. The disclosures provided by the company in its 2003 annual report on Form 10-K complied with most of the annual disclosure requirements of the new Statement. In its 2004 annual report, the company will enhance its disclosure of investment strategies and the basis for determining the long-term rate of return on plan assets assumption. Also, the company will provide information related to the amount and timing of expected future benefit payments. Under SFAS No. 132, companies are also now required to report the various elements of pension benefit costs on a quarterly basis. The company will include the required interim disclosures beginning with the second quarter of 2004. In January 2004, the FASB issued a FASB Staff Position (FSP) No. FAS 106-1, "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Act)." This new FSP permits recognition or deferral of the effects of the prescription-drug provisions of the Act in current financial statements. The specific authoritative guidance on accounting for the federal subsidy provision of the Act is pending and the issued guidance could require a change to previously reported information. The impact of the Act on the company's postretirement medical benefits is not material. FINANCING ACTIVITIES At 30 September 2003, the company's committed lines of credit totaled \$600, maturing in January 2005. During the first quarter of 2004, the company replaced these commitments with a new \$700 multicurrency revolving credit facility, maturing in December 2008. 10 On 9 January 2004, the company filed a Form S-3 Registration Statement with the U.S. Securities and Exchange Commission, which became effective on 26 January 2004. The shelf registration enables the company to issue up to \$1 billion of debt and equity securities. The primary use of the proceeds is expected to be to refund long-term debt maturing in 2004 and 2005. INCENTIVE COMPENSATION COSTS Operating income for

12 ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS FIRST QUARTER FISCAL 2003 (MILLIONS OF DOLLARS, EXCEPT PER SHARE) All comparisons are to the corresponding period in the prior year unless otherwise stated. All amounts presented are in accordance with accounting principles generally accepted in the United States of America. RESULTS OF OPERATIONS FIRST QUARTER FISCAL 2004 OVERVIEW First quarter sales of \$1,685 were up 16% from the prior year due to higher volumes in both Gases and Chemicals, acquisitions, and currency effects. Operating income of \$199 was up 2% from the prior year, in spite of higher costs which negatively impacted earnings and operating margins. Pension expense is higher in 2004 due to the lower discount rate and lower long-term asset return assumptions. Higher raw material and energy costs not contractually passed through to customers had a negative impact on Chemicals segment results. Also impacting the comparison, favorable adjustments recognized in the prior year related to incentive compensation costs and equity affiliate divestitures recorded in prior periods. Results benefited from the acquisitions made in 2003 including Ashland Electronic Chemicals, U.S. homecare companies, and Sanwa Chemical Industry Co., Ltd. (Sanwa). During the first quarter of 2004, the company acquired an additional small homecare company. In 2004, the company will continue to execute its targeted regional growth strategy in the U.S. homecare market. A global cost reduction plan was announced in the third quarter of fiscal 2003 and the company is on track to achieve associated cost savings of \$38 in 2004. Going forward, the company will continue to focus on growth markets, capital discipline, improving operating leverage, leading market positions and improving work processes. An analysis of the first quarter results and an update to the company's outlook for 2004 is provided below. The disclosures in this quarterly report are complementary to those made in the company'

Sales of \$1,684.9 increased 16%, or \$237.9. Acquisitions, including U.S. homecare companies, Sanwa, and Ashland Electronic Chemicals in 2003, accounted for 5% of the increase. Favorable currency effects, driven by the strengthening of the Euro, accounted for an additional 5% of the sales growth. Underlying base business growth accounted for 6% of the increase, principally from improved volumes in the Gases and Chemicals businesses as further discussed in the Segment Analysis which follows. Operating income of \$198.8 increased 2%, or \$4.8. Consistent with the consolidated sales discussion above, favorable operating income variances resulted from acquisitions for 4%, favorable currency effects for 10%, and higher volumes for 16%. Operating income declined 26% from higher costs, primarily higher pension expense and higher raw material and energy costs in the Chemicals segment. In addition, the prior year included an adjustment for lower than anticipated payments of fiscal year 2002 incentive compensation costs. EQUITY AFFILIATES' INCOME Income from equity affiliates of \$19.6 decreased \$8.7 from the prior year. Current year results, including \$2 from favorable currency effects and also higher income from the Asian and Latin American affiliates, partially offset the impact of \$14 in favorable adjustments recorded in the first quarter of 2003 related to prior period divestitures. 15 S&A expense of \$231.4 increased 20%, or \$38.1. Acquisitions, including Ashland Electronic Chemicals and the U.S. homecare companies, increased S&A by 10%. Currency effects, driven by the strengthening of the Euro, increased S&A by 4%. Underlying costs increased 7%, primarily due to higher pension expense, the prior year adjustment for lower than anticipated payments of fiscal year 2002 incentive compensation costs, and inflation. OTHER (INCOME) EXPENSE, NET Other income of \$5.5 was comparable to \$3.3 in the prior year. INTEREST EXPENSE

2004 2003 % CHANGE
 Interest
### ##################################
interest capitalized 1.6-1.4 14%
<del>(3%)</del>

Interest expense of \$30.9 was comparable to \$31.7 in the prior year. EFFECTIVE TAX RATE The effective tax rate equals the income tax provision divided by income before taxes less minority interest. The effective tax rate was 28% compared to 30%. The lower rate is the result of increased credits and adjustments from the company's ongoing tax planning process, including such items as improved utilization of foreign tax credits, foreign tax holidays, and certain donations that are eligible for tax deductions. Additionally, changes in income mix reduced taxes. NET INCOME Net income was \$131.8, or \$.58 diluted earnings per share, compared to net income of \$125.8, or \$.56 diluted earnings per share. Prior year net income includes an after-tax transition charge of \$2.9, or \$.02 diluted earnings per share, which was recorded as the cumulative effect of an accounting change. A summary table of changes in earnings per share is presented on page 14. SEGMENT ANALYSIS GASES

Sales of \$1,203.5 increased 17%, or \$177.7. Acquisitions, including U.S. homecare companies and Ashland Electronic Chemicals in 2003, accounted for 6% of the increase. Favorable currency effects, driven primarily by the strengthening of the Euro, accounted for an additional 5% sales increase. Underlying base business sales growth of 6% resulted from improved volumes across the Electronics, Energy and Process Industries (EPI), and Healthcare growth businesses. Volumes for electronic specialty materials increased, as electronics markets continued to improve, including strong growth in the flat-panel display market. On-site and pipeline volumes in EPI were up 7%, led by stronger oxygen, nitrogen and hydrogen volumes. Hydrogen growth versus the prior year is tracking the ongoing trend for refiners to meet lower sulfur specifications, Liquid bulk volumes in North America declined 1%. The effects of lower food freezing business activity, customer shutdowns and reductions, and conversion of customers to on-site supply more than offset improved distributor sales and general manufacturing improvement. Liquid bulk volumes in Europe declined 4%, with stable liquid nitrogen (LIN) volumes more than offset by conversion of liquid oxygen (LOX) customers to on-site supply and higher prior year argon sales. Asian liquid bulk volumes were up 7%, led by strength in China. Pricing for electronic specialty materials decreased, due to low industry capacity utilization and customer mix effects. On average, prices for LOX/LIN in North America increased 1%. Surcharge impacts year-on-year were minimal. LOX/LIN pricing in Europe increased 7%, influenced by continued pricing actions as well as the customer mix effect from LOX conversions. Operating income of \$182.3 increased 9%, or \$14.3. Consistent with the sales analysis provided above, favorable operating income variances resulted from acquisitions for 4%, currency effects for 7%, and higher volumes for 17%. Higher liquid bulk and packaged gas prices were more than offset by lower electronic specialty materials average selling prices, resulting in a 3% operating income decrease. Operating income declined 15% from higher costs, including higher pension expense. Also impacting the comparison, the prior year included a portion of the favorable adjustment for lower than anticipated payments of fiscal year 2002 incentive compensation costs. 17 GASES EQUITY AFFILIATES' INCOME Gases equity affiliates' income of \$17.7 increased 3%, or \$.5. Current year results, including \$2 from favorable currency effects and also higher income from the Asian and Latin American affiliates, offset the impact of \$6 in favorable adjustments recorded in the prior year associated with two divested cogeneration plant investments. Sales of \$410.1 increased 16%, or \$56.3. Acquisitions, including Sanwa, increased sales by 2%. Sales increased 4% from favorable currency effects, driven primarily by the strengthening of the Euro. Underlying base business sales increased 6% from higher volumes across most of the company's Chemical Intermediates and Performance Materials businesses. Base business Performance Materials volumes increased 7%, with improvements in most businesses and regions. In Chemical Intermediates volumes increased 5%. Higher amines volumes increased from a better herbicide market and methylamines volumes increased from new contractual volumes. Partially offsetting these increases, polyurethane intermediate (PUI) volumes declined due to customer outages. Pricing increased sales by 3%, primarily from higher contractual cost pass-through of raw materials, merchant price improvements, and favorable mix impacts from sales of higher-priced product. Operating income of \$24.5 decreased 26%, or \$8.6. Consistent with the sales analysis provided above, favorable operating income variances resulted from acquisitions for 3%, currency effects for 17%, higher volumes for 20%, and merchant price improvements and mix impacts for 9%. Operating income decreased 75% from higher costs, primarily higher raw material and energy and pension costs. In addition, plant spending was higher and the prior year results included a portion of the favorable adjustment for lower than anticipated payments of fiscal 2002 incentive compensation costs. 18 CHEMICALS EQUITY AFFILIATES' INCOME Chemicals equity affiliates' income was \$1.9 compared to \$2.5 in the prior year. Chemicals equity affiliates' income consists primarily of a global polymer joint venture. EQUIPMENT

<del>\$(7.7)</del>	
<del>\$(11.2)</del>	
<del>Equity</del>	
affiliates'	
income	
8.3	

2004

Operating loss of \$7.7 declined \$3.5 primarily due to lower corporate research and development expense of \$1.3 and higher foreign exchange gains of \$1.1. Other equity affiliates' income of \$8.3 in 2003 represents a favorable adjustment recorded in the prior year associated with a divested business not associated with any of the company's current segments. PENSION BENEFITS For information on the company's pension benefits and associated accounting policies, refer to the Pension Benefits section of Management's Discussion and Analysis and Note 17 to the consolidated financial statements in the company's 2003 annual report on Form 10-K. For the three months ended 31 December 2003 and 2002, the company contributed \$3.6 and \$8.3, respectively, to the pension plans. Cash contributions are estimated to be approximately \$200 in 2004. 19 2004 OUTLOOK MANUFACTURING ACTIVITY Domestic manufacturing activity in the first quarter of 2004 improved, and was up 1.8% from the prior year. Initial indications are that consumer demand remains healthy, plans for new plant and equipment investment remain high, and domestic manufacturing inventories continue to remain tight. We are optimistic these three factors should contribute to sustained growth in manufacturing output in the near term GASES The Gases business has demonstrated improvement in both sales and operating income growth. The priority in Gases will be to increase operating leverage by driving productivity and loading assets. Electronics is expected to continue to see volume growth, however, pricing pressures are expected to continue. Strong growth is anticipated to continue in the Heathcare business, and the company plans to spend about \$50-75 on homecare acquisitions in fiscal year 2004. CHEMICALS In the Chemicals segment, volumes are expected to improve in the second quarter due to seasonality, the ending of the customer outages experienced in the first quarter, and the addition of several new customer contracts. A long-term supplier of sulfuric acid, used in the produc

profitability of the Chemicals segment could be materially impacted on an annual basis because of the company's inability to supply all of its customers' base requirements. The company does not expect a material loss related to this supplier. EQUIPMENT In Equipment, a new LNG order was received at the end of the first quarter, one of the 2-4 orders anticipated for the full year. The company expects the second quarter to be about breakeven, with an increase in Equipment segment profitability in the second half of the fiscal year, when the company anticipates additional LNG orders. In Equipment, proposal activity is high, however the exact timing of orders remains difficult to predict. CAPITAL EXPENDITURES Capital expenditures for new plant and equipment are expected to be between \$650 and \$750 in 2004. In addition, the company intends to continue to evaluate acquisition opportunities and investments in affiliated entities. It is anticipated these expenditures will be funded primarily with cash from operations. EFFECTIVE TAX RATE The company expects an effective tax rate of 28% versus the previous estimate of 30%. The 28% rate is the result of increased credits and adjustments from the company's ongoing tax planning process, including such items as improved utilization of foreign tax credits, foreign tax holidays, and certain donations that are eligible for tax deductions. Additionally, changes in income mix reduced taxes. 20 CURRENCY The translation of foreign earnings into U.S. dollars had a favorable impact on the company's income as a result of the weaker dollar. The company has seen evidence of the strong Euro impacting European economic activity and volumes and therefore remains cautious about economic growth in Europe. LIQUIDITY AND CAPITAL RESOURCES CASH FLOW The narrative below refers to the Consolidated Statements of Cash Flows included on page 6. OPERATING ACTIVITIES Net cash provided by operating activities decreased \$57.5, or 22%. Before working capital changes, the contribution of net income adjusted for non-cash items to cash provided by operating activities was up \$51.4. Net income increased by \$6.0. Non-cash adjustments favorably contributing to the change in cash provided by operating activities included depreciation expense, deferred income taxes, and other operating changes. The increase in depreciation expense of \$14.4 was due principally to currency effects and acquisitions. The \$27.8 increase in deferred income taxes resulted from higher temporary differences associated with pension plan accruals and higher foreign tax credits in the prior year. The increase in other operating changes of \$16.2 was principally due to an increase in noncurrent liabilities as a result of higher pension expense. These favorable impacts were offset by an increase in cash used for working capital of \$108.9. The increase reflects higher sales and the timing of normal payments and accruals. INVESTING ACTIVITIES Cash used for investing activities decreased \$166.1, due primarily to acquisitions. The company acquired a small U.S. homecare business in November 2003 for \$25.9. Acquisitions in 2003, totaling \$182.2, principally included the purchase of American Homecare Supply, LLC. Capital expenditures are detailed in the following table:

FINANCING ACTIVITIES Cash used for financing activities declined \$58.0. Short and long-term debt repayments were primarily funded by long-term debt borrowings. The primary long-term borrowing during the quarter was a \$125.0 seven-year, fixed-rate borrowing with a coupon rate of 4.125%. Cash provided by the issuance of stock for options and award plans increased by \$43.0 due to an increase in stock option exercises. Total debt at 31 December 2003 and 30 September 2003, expressed as a percentage of the sum of total debt, shareholders' equity, and minority interest, was 38% and 39%, respectively. Total debt increased 21 from \$2,510.7 at 30 September 2003 to \$2,572.4 at 31 December 2003, due primarily to the impact of a weaker U.S. dollar on the translation of foreign currency debt. At 30 September 2003, the company's committed lines of credit totaled \$600, maturing in January 2005. During the first quarter of 2004, the company replaced these commitments with a new \$700 multicurrency revolving credit facility, maturing in December 2008. No borrowings were outstanding under these commitments. Additional commitments totaling

```
$37.7 are maintained by the company's foreign subsidiaries, of which $13.9 was utilized at 31 December 2003. The estimated fair value of the company's long-term debt,
including current portion, as of 31 December 2003 is $2,599.4 compared to a book value of $2,475.4. On 9 January 2004, the company filed a Form S-3 Registration
Statement with the U.S. Securities and Exchange Commission, which became effective on 26 January 2004. The shelf registration enables the company to issue up to $1
billion of debt and equity securities. The primary use of the proceeds is expected to be to refund long-term debt maturing in 2004 and 2005. CONTRACTUAL
OBLIGATIONS The company is obligated to make future payments under various contracts such as debt agreements, lease agreements and unconditional purchase
obligations. There have been no material changes to contractual obligations as reflected in the Management's Discussion and Analysis in the company's 2003 annual report
on Form 10-K. OFF-BALANCE SHEET ARRANGEMENTS There have been no material changes to off-balance sheet arrangements as reflected in the Management's
Discussion and Analysis in the company's 2003 annual report on Form 10-K. The company's off-balance sheet arrangements are not reasonably likely to have a material
impact on financial condition, changes in financial condition, results of operations, or liquidity. RELATED PARTY TRANSACTIONS The company's principal related
parties are equity affiliates operating in industrial gas and chemicals businesses. The company did not engage in any material transactions involving related parties that
included terms or other aspects that differ from those which would be negotiated at arm's length with clearly independent parties. MARKET RISKS AND SENSITIVITY
ANALYSIS Information on the company's utilization of financial instruments and an analysis of the sensitivity of these instruments to selected changes in market rates and
prices is included in the company's 2003 annual report on Form 10-K. There was no material change to market risk sensitivity since 30 September 2003. The net financial
instrument position of the company increased from a liability of $2,542.1 at 30 September 2003 to a liability of $2,705.6 at 31 December 2003 primarily due to the impact
of a weaker U.S. dollar on the translation of foreign currency debt and the market value of foreign exchange forward contracts and the issuance of new long-term debt. 22
CRITICAL ACCOUNTING POLICIES AND ESTIMATES Management's Discussion and Analysis of the company's financial condition and results of operations is
based on the consolidated financial statements and accompanying notes that have been prepared in accordance with accounting principles generally accepted in the United
States. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and
disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual
results could differ from those estimates. The significant accounting policies of the company are described in Note 1 to the consolidated financial statements and the critical
accounting policies and estimates are described in the Management's Discussion and Analysis included in the 2003 annual report on Form 10-K. Information concerning
the company's implementation and impact of new accounting standards issued by the Financial Accounting Standards Board (FASB) is included in the notes to the
consolidated financial statements. There have been no other changes in accounting policy in the current period that had a material impact on the company's financial
condition, change in financial condition, liquidity or results of operations. NEW ACCOUNTING STANDARDS In December 2003, the FASB published a revision to
Interpretation No. 46, "Consolidation of Variable Interest Entities," to clarify some of the provisions of Interpretation No. 46. In December 2003, the FASB also issued a
revised Statement of Financial Accounting Standard (SFAS) No. 132, "Employers' Disclosures about Pensions and Other Postretirement Benefits," which added
disclosure requirements for defined benefit plans. In January 2004, the FASB issued a FASB Staff Position (FSP) No. FAS 106-1, "Accounting and Disclosure
Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Act)." This new FSP permits recognition or deferral of the effects
of the prescription-drug provisions of the Act in current financial statements. See the notes to the consolidated financial statements for information concerning the company's
implementation and impact of these new standards. FORWARD-LOOKING STATEMENTS The forward-looking statements contained in this document are based on
current expectations regarding important risk factors. Actual results may differ materially from those expressed. Factors that might cause forward-looking statements to
differ materially from actual results include, among other things, overall economic and business conditions different than those currently anticipated and demand for the
company's goods and services; competitive factors in the industries in which it competes; interruption in ordinary sources of supply; the ability to recover unanticipated
increased energy and raw material costs from customers; spikes in the pricing of natural gas; changes in government regulations; consequences of acts of war or terrorism
impacting the United States and other markets; charges related to currently unplanned portfolio management and cost reduction actions; the success of implementing cost
reduction programs; the timing, impact, and other uncertainties of future acquisitions or divestitures; significant fluctuations in interest rates and foreign currencies from that
currently anticipated; the impact of tax and other legislation and regulations in jurisdictions in which the company and its affiliates operate; and the timing and rate at which
tax credits can be utilized. 23 ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK Refer to the Market Risks and Sensitivity
Analysis on page 22 of Item 2 on Management's Discussion and Analysis of Financial Condition and Results of Operations. ITEM 4. CONTROLS AND PROCEDURES
Under the supervision of the Chief Executive Officer and Chief Financial Officer, the company's management conducted an evaluation of the effectiveness of the design and
operation of the company's disclosure controls and procedures as of 31 December 2003. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer
concluded that the design and operation of its disclosure controls and procedures have been effective. There have been no significant changes in internal controls or in other
factors that could significantly affect internal controls subsequent to the date of such evaluation. 24 PART II. OTHER INFORMATION ITEM 6. EXHIBITS AND
